Att: VIN Coordinator
RE: 49 CFR part 566, Manufacturer Identification

Owners: Todd and Shanna Mounts
City of Incorporation: Dierks, Arkansas
Product Manufactured

Ironsmith Trailers, Inc. is a small business that builds utility flat bed trailers to be towed by automobiles. These trailers are constructed from metal I beams, angle and channel iron, and wood.

Components for these trailers such as axles, jacks, hitches, wheels and tires are purchased from a U.S. supplier. Wood for the flooring is purchased from a local whole sale yard in Arkansas.

Our trailers are sold fully assembled, unless a customer specifically asked for something not to be, such as a paint job. All structural aspects of the unit are fully constructed before any sale is made.

GVWR: The gross vehicle weight of our empty trailers range from 800 lbs. for a simple utility trailer to a 6500 lbs. for an empty tandem dual gooseneck. These trailers can have a combined weight of cargo and the trailer (GVWR) up to about 25000 pounds.

My assigned code by the world manufacturer's organization is 1Z9/394.
