

**VEHICLE INFORMATION/TEST SPECIFICATIONS  
FMVSS 210**

1. Provide information necessary to locate the seating reference point (SRP) and torso angles for each designated seating position on FORM 4.
  
2. Identify which designated seating positions (DSPs) have automatic or dynamically tested seat belt assemblies that meet the frontal crash requirements of S5.1 of FMVSS 208.
  
3. If the vehicle is equipped with an automatic seat belt assembly in the right front outboard seating position, provide instructions for securing child restraints at that seating position. Include locations for anchorages used specifically for child restraint if applicable.
  
4. State whether the alternate size body block (10 inches wide) was used for certification testing and, if so, at which seating position(s).
