<b>16. Abstract</b> This online booklet lists and compares differences in relative average loss payments for different makes and models of passenger cars, station wagons and passenger vans, pickups, and utility vehicles on the basis of damage susceptibility for the vehicles, as compiled by the Highway Loss Data Institute. The data compiled by the HLDI in its December 2017 and 2018 Insurance Collision Report, reflecting the collision loss experience of vehicles sold in the United States in terms of the average loss payment per insured vehicle year for model years 2015 - to 2017 and 2016 - to 2018. The tables present vehicles' collision loss experience in relative terms, with 100 representing the average for all passenger vehicles. For example, a rating of 122 reflects a collision loss experience that is 22 percent worse than average while a rating of 96 reflects a collision loss experience that is 4 percent better than average. NHTSA has provided the information in compliance with Federal law to aid consumers considering the purchase of new vehicles.

Dear Prospective Purchaser:

The U.S. Department of Transportation's National Highway Traffic Safety Administration (NHTSA) is pleased to publish the 2018 - 2019 Relative Collision Insurance Cost Information Booklet for prospective purchasers. As prescribed by Title 49, Code of Federal Regulations, Part 582, Insurance Cost Information Regulation, NHTSA is providing information regarding comparative insurance costs, based on damage susceptibility and crashworthiness, for makes and models of passenger cars, station wagons/passenger vans, pickups, and utility vehicles.

The information in this booklet is based on information provided by the Highway Loss Data Institute's December Insurance Collision Reports.

Sincerely,

A handwritten signature in black ink, appearing to read "James C. Owens".

James C. Owens  
Deputy Administrator

## **Comparison of Differences in Insurance Costs for Passenger Cars, Station Wagons/Passenger Vans, Pickups, and Utility Vehicles on the Basis of Damage Susceptibility, 2018-2019**

The National Highway Traffic Safety Administration has provided the information in this 2018 - 2019 online booklet in compliance with Federal law to aid consumers considering the purchase of new vehicles. This online booklet compares differences in relative average loss payments for different makes and models of passenger cars, station wagons and passenger vans, pickups, and utility vehicles on the basis of damage susceptibility for the vehicles.<sup>1</sup> However, it does *not* indicate a vehicle's relative safety for occupants.

The following tables contain the available information regarding the effect of damage susceptibility on insurance premiums. The information was taken from data compiled by the Highway Loss Data Institute (HLDI) in its December 2017 and 2018 *Insurance Collision Report*, reflecting the collision loss experience of passenger cars, station wagons/passenger vans, pickups, and utility vehicles sold in the United States in terms of the average loss payment per insured vehicle year for model years 2015 to 2017 and 2016 to 2018 respectively. NHTSA has not verified the data in these tables.

The tables present vehicles' collision loss experience in relative terms, with 100 representing the average for all passenger vehicles. For example, a rating of 122 reflects a collision loss experience that is 22 percent worse than average while a rating of 96 reflects a collision loss experience that is 4 percent better than average. The tables are not relevant for models that have been substantially redesigned for 2017 and 2018, and do not include information about models with insufficient claim experience.

Although many insurance companies use the HLDI information to adjust the "base rate" for the collision portion of their insurance premiums, the amount of any such adjustment is usually small. It is unlikely that your total premium will vary more than 10 percent depending upon the collision loss experience of a particular vehicle. If you do not purchase collision coverage or your insurance company does not use the HLDI information, your premium will not vary at all in relation to these rankings.

In setting insurance premiums, insurance companies rely on factors not directly related to the vehicle itself (except for its value). They consider driver characteristics such as age, gender, marital status, driving record, geographic area in which the vehicle is driven, how many miles are traveled, and how the vehicle is used. However, some companies adjust their premiums for personal injury protection and medical payment coverage if the insured vehicles have features that are likely to improve their crashworthiness, or ability to protect occupants from injury or death, such as air bags. Different insurance companies often charge different premiums for the same driver and vehicle. Therefore, to obtain complete information about insurance premiums, you should contact insurance companies or their agents directly.

Test data relating to vehicle crashworthiness is available from NHTSA's 5-Star Safety Ratings program. The program provides comparative information on the safety of new vehicles to assist

---

<sup>1</sup> These online booklets reflect the vehicle groupings as revised by HLDI since implementation of NHTSA's final rule (See 60 FR 15509, March 24, 1995).

consumers with vehicle purchasing decisions. Every year, the 5-Star Safety Ratings program rates selected new vehicles for frontal and side crashworthiness and rollover resistance. Beginning in 2010, vehicles equipped with three recommended advanced crash avoidance technologies that help drivers avoid crashes and meet the performance requirements set forth under the program are given credit on NHTSA's website, [www.nhtsa.gov/theft](http://www.nhtsa.gov/theft). Information on vehicles that NHTSA has tested under the 5-Star Safety Ratings program can be obtained from a new vehicle's price sticker (known as the Monroney label), by calling NHTSA's toll-free Auto Safety Hotline at 888-327-4236, and through the website at [www.nhtsa.gov/theft](http://www.nhtsa.gov/theft).

Where they appear in the list, LWB = long wheel base and SWB = short wheel base;

4WD = 4-wheel drive and 2WD = 2-wheel drive.

The terms "xtra" and "xtracab" (sometimes capitalized as "XtraCab") are used by Toyota to describe some of its models.

*Relative results are computed for individual model years and then combined through a weighted average to produce the three-year relative result. The all-passenger-vehicle "100=" value is given for reference only and can only be used as a rough estimate to convert from relative to absolute results*

*Minimum requirement for reporting: 1,000 vehicle years of exposure or 100 claims.*

If you would like more details about the information in these tables,  
or wish to obtain the complete Insurance Collision Report, please contact HLDI directly, at:

***Relative results are computed for individual model years and then combined through a weighted average to produce the three-year relative result. The all-passenger-vehicle "100=" value is given for reference only and can only be used as a rough estimate to convert from relative to absolute results***

***Minimum requirement for reporting: 1,000 vehicle years of exposure or 100 claims.***

If you would like more details about the information in these tables,  
or wish to obtain the complete Insurance Collision Report, please contact HLDI directly, at:
