

Phase 2 Fuel Efficiency Standards for
Medium- and Heavy-Duty
Engines and Vehicles

Final EIS Appendices

August 2016

Docket No. NHTSA-2014-0074

U.S. Department of Transportation
National Highway Traffic Safety
Administration

APPENDIX A

Air Quality Nonattainment Area Results

Phase 2 Fuel Efficiency Standards for Medium- and Heavy-Duty Engines and Vehicles Final EIS

Table A1-1

**Changes in Emissions from U.S. HD Vehicles, by Nonattainment or Maintenance Area and Alternative, Direct and Indirect Impacts
Particulate Matter (PM2.5) 2018**

| Nonattainment or Maintenance Area | NAAQS Pollutant (Standard) | Status, Severity Classification ^b | General Conformity Threshold ^c | Emissions Changes for Proposed Alternative (tons per year) ^a | | | | |
|--|---------------------------------------|--|---|---|--------|--------------------|--------|--------|
| | | | | Alt. 1 - No Action | Alt. 2 | Alt. 3 - Preferred | Alt. 4 | Alt. 5 |
| Ada County; Boise, ID | PM10 (1987 24-hour) | Maintenance, Moderate | 100 | 0 | 0.01 | 0.01 | 0.01 | 0.01 |
| Adams, Denver, and Boulder Counties; Denver Metropolitan area, CO | PM10 (1987 24-hour) | Maintenance, Moderate | 100 | 0 | 0.05 | 0.05 | 0.05 | 0.06 |
| Ajo, AZ | SO ₂ (1971 24-hour/Annual) | Maintenance, -- | 100 | 0 | 0.00 | 0.00 | 0.00 | 0.00 |
| Albuquerque Area, NM | CO (1971 8-hour) | Maintenance, Moderate <= 12.7ppm | 100 | 0 | 0.02 | 0.02 | 0.02 | 0.02 |
| Allegheny County Air Basin: Hazelwood monitor, PA | SO ₂ (1971 24-hour/Annual) | Maintenance, -- | 100 | 0 | 0.00 | 0.00 | 0.00 | 0.00 |
| Allegheny County, PA | PM2.5 (2012 Annual) | Nonattainment, Moderate | 100 | 0 | 0.02 | 0.02 | 0.02 | 0.02 |
| Allegheny County; The area including Liberty, Lincoln, Port Vue, and Glassport Boroughs and the City of Clairton, PA | PM10 (1987 24-hour) | Maintenance, Moderate | 100 | 0 | 0.00 | 0.00 | 0.00 | 0.00 |
| Allegheny, PA | SO ₂ (2010 1-hour) | Nonattainment, -- | 100 | 0 | 0.00 | 0.00 | 0.00 | 0.00 |
| Allentown, PA | PM2.5 (2006 24-hour) | Maintenance, Moderate | 100 | 0 | 0.02 | 0.02 | 0.01 | 0.02 |
| Allentown-Bethlehem-Easton, PA | Ozone (2008 8-hour) | Nonattainment, Marginal | 50 | 0 | 0.00 | 0.00 | 0.00 | 0.00 |

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

| Yakima County; (part), WA | PM ₁₀ (1987 24-hour) | Maintenance, Moderate | 100 | 0 | 7.65 | 20.34 | 27.58 | 32.36 |
| Yuba City-Marysville, CA | PM _{2.5} (2006 24-hour) | Maintenance, Moderate | 100 | 0 | 12.69 | 33.77 | 45.80 | 53.73 |
| Yuma County; Yuma planning area, AZ | PM ₁₀ (1987 24-hour) | Nonattainment, Moderate | 100 | 0 | 10.75 | 28.61 | 38.79 | 45.51 |

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS =National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

| Yuba City-Marysville, CA | PM _{2.5} (2006 24-hour) | Maintenance, Moderate | 100 | 0 | 0.00 | 0.00 | 0.00 | 0.00 |
| Yuma County; Yuma planning area, AZ | PM ₁₀ (1987 24-hour) | Nonattainment, Moderate | 100 | 0 | 0.00 | 0.00 | 0.00 | 0.00 |

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide

^a Reductions are shown as positive values. Negative values are emissions increases. Values of less than 0.005 tons per year are rounded to zero.

^b Nonattainment or maintenance status as of 5/13/2016. Source: U.S. EPA, The Green Book Nonattainment Areas for Criteria Pollutants; <http://www.epa.gov/airquality/greenbook/>. "--" indicates that no severity classification has been established for the NAAQS pollutant.

^c Emissions thresholds in tons per year. Where the threshold differs by precursor pollutant, the smallest of the precursor thresholds is shown. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: 40 CFR 93.853.

Notes: CO = carbon monoxide; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; PM = particulate matter; SO₂ = sulfur dioxide
