07/25/2024	NHT A 240726 005	Shaaf, Omeed	-	I would like to receive all of the information collected from the NHTSA investigations into Tesla Autopilot defects; specifically,

				I am seeking all of the information described below: Crash Analysis Throughout the PE21020 and EA22002 investigations, ODI observed a trend of avoidable crashes involving hazards that would have been visible to an attentive driver. Before August 2023, ODI reviewed 956 total crashes where Autopilot was initially alleged to have been in use at the time of, or leading up to, those crashes. ODI's crash review involved two separate actions: 1. A detailed analysis covered 446 crashes occurring from early 2018 through August 2022 that relied on in-depth assessments of video from the subject vehicle onboard cameras, event data recorders (EDR), data logs, and other information; and 2. A supplemental analysis, which focused on 510 Tesla incidents gathered through the Standing General Order (SGO) process from August 2022 to the end of August 2023. ODI's analysis of these crashes relied primarily on Tesla's narratives and videos and data logs obtained from Tesla for a portion of the 510 crashes. When supporting videos and data logs were unavailable, ODI used Tesla's source material inventory as stated in the SGO narrative (such as full, partial or no video, logs, etc.) to assign a confidence level to its assessment. The supplemental analysis drew similar conclusions to those of the detailed analysis. ODI continued to observe and follow up on SGO-reported crashes after August 2023 up to the recall filing and generally observed conditions similar to those identified in the analyses."
07/26/2024	NHT A 240726 004	Steckler, Bruce	-	ALL records related to FMVSS 202/202a and Rear Impact Safety
07/29/2024	NHTSA-240729-003	Baum, Alex	Quinlan	All records , pertaining to or naming "Aurora Operations" or "Aurora Innovation"
