Subject RE: ES Production Timing

History: This message has been replied to.

Jason / Jimmy

Thermoflex has not gotten direction from TMS engineering as to the exact changes to the tools. They were to have an internal meeting to develop standards that will apply to all. For what they want as of now, will require new tools.

We have discussed with quality adding the tags and labels to allow production. We will have a few follow up meeting this week and I will keep you both advised.

Best regards,

Lowell J. Reed
