Subject: 9LG for ES 350.

George,

Do you have the information yet on which of the IS models will be affected by the SSC? Â Just need to know if we should stay with just referring to the IS in general or if we should list the models to be included.

Are we going to stick with all the references in the Q&As to the "newly designed accelerator pedal"? Â It seems like this is going to create a huge demand eventually for new pedals.
