a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year of VOCs or NO_x in ozone NAAs; primary PM_{2.5} in PM_{2.5} NAAs. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	0.01	0.01	-0.13

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	0.06	0.06	-1.22

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	6.41	10.32	-7.29

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	16.09	24.66	-127.57

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	39.38	4.01	-999.22

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	0.11	0.04	-3.21

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	0.01	0.01	0.04

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	-	0.00	0.10

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.
