a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	0.00	0.01	0.06

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	0.00	0.01	0.07

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Actions. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Actions. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Actions. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Actions. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Actions. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Actions. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; primary PM_{2.5} in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.
