a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	243.92	311.36	-1,446.28

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	0.03	0.04	-0.00

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

- a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
- b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
- c. Emissions thresholds in tons/year of VOCs or NO_x in ozone NAAs; primary PM_{2.5} in PM_{2.5} NAAs. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year of VOCs or NO_x in ozone NAAs; primary PM_{2.5} in PM_{2.5} NAAs. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	-3.13	-4.18	-9.13

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	-16.16	-27.32	-86.59

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	-16.33	-29.03	-116.46

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	0.01	0.01	0.04

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	0.04	0.04	-0.23

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	0.04	0.06	1.00

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	112.62	171.79	-703.95

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	227.63	355.19	-909.41

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	4.75	9.36	15.45

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

Yuma, AZ	PM ₁₀	Moderate	100	-	9.38	17.85	27.89

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

Youngstown-Warren-Sharon, OH-PA	Ozone	Maintenance	100	-	-17.95	-28.29	-59.98
Yuma, AZ	PM ₁₀	Moderate	100	-	-6.35	-10.00	-20.74

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action.

Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.
b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.
c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.

a. Reductions are shown as positive values. Negative values are emission increases. Values of less than 0.005 tons/year are rounded to zero.

b. Pollutants for which the area is designated nonattainment or maintenance as of 2008. N = Nonattainment. M = Maintenance. Source: 40 CFR 81.

c. Emissions thresholds in tons/year. In ozone NAAs the thresholds given are for the precursor pollutants VOC or NO_x; in PM_{2.5} NAAs the thresholds represent primary PM_{2.5}. Source: 40 CFR 51.853. These thresholds are provided for information only; a general conformity determination is not required for the Proposed Action. Source: EPA 2008.
