Office of the Administrator National Highway Traffic Safety Administration 400 Seventh Street, SW Washington, DC 20590

Attention: Mr. Coleman Sachs, Chief, Import & Certification Division

Subject: General Motors' Vehicle Identification Number decoding for 2007 Model Year

Dear Mr. Sachs:

General Motors Vehicle Identification Numbering (VIN) Standard for 2007 Model Year dated December, 2005 rev. 1 is submitted per the VIN reporting requirements of 49 CFR Part 565.7. The information is attached in paper and electronic forms for your convenience.

If you have any questions, please contact William Biondo of our Warren, Michigan office at (586) 986-5240.

Sincerely,

Brian Latouf, Director Safety Regulations and

Labels and Literature Engineering LETTER NO:0005

SUBJECT:

GM STANDARDS FOR VEHICLE IDENTIFICATION NUMBER (VIN)

2007 Model Year- 1st revision

This document is a notification of the 1st Revision of the subject Standard for model year 2007. The standard can be found on the GM Intranet at http://gmnal.gm.com/eng/labels/vin_assignment_standards.html Systems.

The following are changes from Initial release for 2007 model year.

Full size Utility and Pickup models (C/K) in section C now refer to both the current GMT 800 pickups and the new GMT900 platform (pickups and SUV's)

Section A

Page A8, added code 'J' for Lansing Delta township plant (builds GMT 900 product). Code 'J' al;so applies to Janesville Assembly (GMT800 products).

Section B

Page B2

Removed code 'N D' Malibu Classic, model no longer offered.

Removed code 'M D' Matiz, model no longer offered.

Removed code 'U D' U100, model not offered.

Removed code 'W M' Monte Carlo LT 3.5 Coupe, model cancelled.

Removed code 'W N' MonteCarlo LTZ 3.9 coupe, model cancelled.

Removed codes 'V B', 'V D', 'V P' for Epica LT, LS, and LTZ. Models not offered in 2007.

Code "Z W' Revised description from 'Malibu Maxx SS ' to Malibu SS. (Maxx is not offered)

Page B4

Removed WMI '6G2' from Identifier codes line.

Code 'A J' revised Description to include new marketing names 'G4' (Mexico) and 'G5' (U.S.) 'Pursuit' remains for Canada. Added note below table.

Code 'A L' Same as line above.

Code 'A N' Same as line above.

Add code 'M G' Solstice Turbo Convertible

Removed code 'N E' Grand Am SE, model no longer offered.

Removed code 'V X', Pontiac GTO, model not offered for 2007.

Revised description for code 'Z H' to include Convertible version.

Page B5

Added codes 'H D"' Lucerne CXL, 'H E' Lucerne CXS, 'H P' Lucerne CX, and 'H R' Lucerne CXL (different content from code 'H D'.)

Page B6.

Added code 'D E' for STS-L

Revised description for code 'K D' from Deville to DTS

Page B7.

Revised descriptions for codes 'Z R' to Aura Hybrid, 'Z S' to Aura XE, and 'Z V' to Aura XR.

Page B8.

Add to code '7' descriptions, '46 - 4 door High Roof Hatchback'.

Page B10

Added GMDAT Restraint Code Table B3e.

Page 2

Page B11
Code LH2, Removed E
Code L, Deleted options LNK, LBK (Both word code L)
Code 8, LX9, Deleted product 3Z.

Section C

Page C4

Add codes "C 0" "K 0" to Table C3b

Page C5

Revised Book 17 Product Table for Chevrolet to include "Acadia"

Page C6 Deleted Venture Model

Page C8

Revised Table C3f to include data for Buick Enclave "new product" Revised Table C3g to include data for the Saturn Outlook "new product"

Page C11

Table C4, code 3 Four Door Cab/Utility, add "Acadia, Enclave, Outlook" Code 3, 4dr APV, delete Venture

Page C14

Delete Code 5 'LMF', Add duplicate code Z, "LAT", code 2 delete book 6, code 6 delete book 10, code x add book 1

Section D

Page D3

Code 6,7,8 added H Models

Page D6

Added Codes R,U and 9

GM VEHICLE IDENTIFICATION NUMBERING STANDARDS

General Description

Purpose

The purpose of this standard is to define the uniform composition of vehicle identification numbers applied to GM vehicles marketed in the United States, U.S. Territories and Canada. This GM Standard has been promulgated in compliance with U.S. Federal Motor Vehicle Safety Regulation Part 565 (FMVSR 565) administered by the National Highway Traffic Safety Administration (NHTSA) and with Canada Motor Vehicle Safety Standard 115 (CMVSS 115) administered by Transport Canada.

Certain vehicles manufactured by GM for titling and registration elsewhere in the world may have other requirements with which they must comply, thus precluding the use of this VIN Standard. However, the VIN described herein does comply with the vehicle identification numbering standard of the International Standards Organization (ISO), and should be acceptable in many countries around the world.

Maintenance & Operating Responsibilities

Responsibility for updating of the coding tables contained herein has been established, and is shown on each table. As soon as new information or revisions to existing tables become known, the updated tables of codes for the coming model year(s) should be submitted by the authorized activity to North American Product Engineering, Mail Code 480-210-2Y3 30001 Van Dyke Ave, Warren, MI 48090-9020. Product Engineering has responsibility for publication and dissemination of these updated hardcopy model year tables of VIN data throughout General Motors. A copy of the updating materials should be sent to Safety Affairs and Regulations (SAR), NAO Safety Center, which has responsibility for review and approval of the coding specified; this is done on behalf of the GM Vehicle Identification Numbering Technical Committee, General Assembly Council, which in turn has responsibility for design of GM VIN's.

In compliance with FMVSR 565, SAR has the responsibility for submitting these tables of VIN data, and any revisions thereto, to the Federal Government at least 60 days prior to the use of that data in the assignment of VIN's to GM vehicles, but excluding pre-production vehicles not offered for sale.

Currently, abstracts of these tables of VIN data are distributed by Consumer Relations & Service Staff, Sales & Marketing Staff, Service Technology group and other GM activities.

Requests for any changes or refinements to the information content (not coding) of these Standards should be directed to Label and Literature Engineering. The revision request must provide an appropriate explanation for the requested change. L and Lwill review revision requests and take whatever action is deemed necessary before issuing revised pages to the Standards. At minimum, all proposed changes will be coordinated through CISCO Coordinators of involved Divisions and Central Office Staffs. Upon approval of proposed revisions by involved Divisions and Staffs, revisions to the Standards will be incorporated into the text of revised pages distributed through current CISCO Coordinators of GM Divisions and Staffs.

The Engine VIN Codes for passenger cars and light-duty (LDT) trucks that are published in this standard, are also updated in the Production Order Management Systems (POMS) and the Integrated Scheduling Project (ISP) by the platform/product team Production Control and Scheduling personnel.

CISCO Coordinators of GM units will be responsible for distribution of this Standard to persons or activities of their Unit who are affected by or have a need for this information.

GM VEHICLE IDENTIFICATION NUMBERING STANDARDS

Organization and Description of Tables

The code* definitions contained in the tables of interpretive data that follow provide for translation of the characters comprising any GM VIN, while at the same time they provide the information needed to compose the correct VIN for a GM vehicle. The tables of interpretive data are organized in Sections, and are described as follows:

Only Arabic numerals and English alphabetic capital letters are permitted in GM VIN's.
 However, I, O (oh), and Q, and special characters are not allowed as stated in FMVSR 565.

SECTION A - General Information

Contains information common to the GM VIN's for all GM vehicles merchandised or manufactured in U.S. or Canada regardless of the make or type of vehicle and consists of the following tables:

Table A1 - GM Make Identifiers

Make identifiers are assigned to GM by SAE (formerly the Society of Automotive Engineers) to indicate the country of origin, the make of the vehicle, and the type of vehicle.

Toyota (NUMMI), Suzuki (CAMI), and ISUZU are providing NHTSA with the VIN Coding in compliance with 49CFR part 565 on an annual basis. VIN information contained in these standards on vehicles built by above manufacturers is for reference purpose only.

Table A2 - Model Year Codes

The code assigned is in accord with FMVSR 565 to identify the designated model year of the vehicle. This coding corresponds to the year coding assigned in International Organization Standards (ISO), standard 3779. "Model year" designates a discrete vehicle model irrespective of the calendar year in which the vehicle was actually produced, so long as the period is less than two calendar years.

The EPA 40 CFR (Code of Federal Regulations) Part 85 requires that "A specific model year must always include January 1 of the calendar year for which it is designated and may not include a January 1 of any other calendar year". Thus, the maximum duration of model year is one calendar year plus 364 days.

Table A3 - Check Digit

Describes the check digit calculation procedure as defined in FMVSR 565.

GM VEHICLE IDENTIFICATION NUMBERING STANDARDS

Organization and Description of Tables

Table A4 - GM Plant Codes

The table will contain assembly plant codes for all plants anywhere, which assemble vehicles to be sold by GM in the U.S. or Canada.

SECTION B - Passenger Vehicles

This Section contains the interpretive data used in a passenger vehicle VIN.

Table B1 - Passenger Vehicle VIN Format

This illustrates the alphanumeric attributes of each position, and references subsequent tables for decoding data fields other than those defined in Section A.

Table B2 - Carline and Series Codes

This table lists the carline and series codes and merchandised name for each passenger vehicle carline by division. Carline and series codes must be alphabetic only; and besides I, O, and Q, the letter A may not be assigned as a series code. Passenger car divisions and GM of Canada are responsible for maintaining the code and names assignments.

B2 tables are included for the following:

B2a Chevrolet

B2g Saturn

B2b Chevrolet non NA B2e Buick

B2c Pontiac

B2f Cadillac

Table B3 - Body Style and Restraint Systems

The body types and restraint systems are individually represented by a single numeric code. Table B3 is a list of single character body style codes that are assigned to the numeric twoposition body style, which describe the physical attributes of the vehicle with respect to number of doors, roof line, and passenger capacity. Table B3b lists the codes assigned to identify the type of restraint system. The types of the restraint systems are obtained from the NAO Safety and Restraint Center.

Table B4 - Engine Codes

Passenger car engines are coded in this table. The VIN code must designate the engine description in respect to liter displacement, cylinder arrangement, fuel type, if other than gasoline, the number of carburetor barrels or other fuel induction system, engine designer, and any other unique attributes.

GM VEHICLE IDENTIFICATION NUMBERING STANDARDS

Organization and Description of Tables

All car platform Powertrain Engine coordinators are responsible for providing the engine usage for this table to Label and Literature Engineering. L and L prepares a consolidated list of uniform GM engine codes by model year by extracting engine information from divisional Vehicle Description Summaries. Engine line-ups are verified by periodically distributing the preliminary engine code lists to the car group/platform engine coordinators. Only one table is given here, and it includes GM of Canada usage.

SECTION C - Multipurpose Passenger Vehicles (MPV's,SUT's), Light Duty Trucks, and Incomplete Vehicles

This Section contains the interpretive data used in multipurpose, light duty truck and incomplete vehicle VIN's.

Table C1 - MPV, Light Duty Truck & Incomplete Vehicle VIN Format

This displays the coding structure and VIN layout for this group of vehicles. It further references the subsequent tables necessary to decode the VIN, except for those tables defined in Section A.

Table C2 - GVWR/Brake Systems

This table of alpha codes defines the NHTSA codes for gross vehicle weight rating (GVWR) range, together with the brake system installed.

Table C3 - Line Chassis Series

There are two positions. The first position is alpha and the second position is numeric. This code represents the truck line, chassis type and series within a truck line. C3 tables consist of the following:

C3a	Chevrolet		
C3b	GMC	C3e	Buick
C3c	Cadillac	C3f	Pontiac
C3q	Saturn		

Table C4 - Body Type

This table of numeric codes specifies the body type for this group of vehicles.

Tables C5a & C5b - Engine Codes

The truck platform engine coordinators are responsible for providing engine usage for table C6b. The incomplete vehicle car platforms are to provide the engines for Table C6a. The codes designate the engine description in respect to liter displacement, cylinder arrangement, fuel type, if other than gasoline, the number of carburetor barrels or other fuel induction system, engine designer, and any other unique attributes.

GM VEHICLE IDENTIFICATION NUMBERING STANDARDS

Organization and Description of Tables

SECTION D - Medium Trucks & Incomplete Vehicles

Contains the tables of coded information used in the VIN for this group of vehicles.

Table D1 - Truck VIN format

Displays the coding structure and VIN layout for this group of vehicles. It further references the subsequent tables necessary to decode the VIN except for those tables in Section A.

Table D2 - GVWR/Brake Systems

Codes designate gross vehicle weight rating together with the vehicle brake system.

Table D3 - Series

This table of numeric codes identifies truck series designations.

Table D4 - Truck Line and Cab Type

Codes specify truck line and cab descriptions.

Table D5 - Chassis

Codes designate number of axles and number of driving axles.

Table D6 - Engine Codes

The truck platform engine coordinators are to provide the engine usage for this table. Engine codes listed in this table specify engine type, manufacturer, and fuel used. Number of cylinders and displacement in cubic inches and liters are also given.

GM VEHICLE IDENTIFICATION NUMBERING STANDARDS

A. General Information

TABLE A2: Check Digit Procedure (VIN position 9)

A check digit shall be provided as part of each vehicle identification number. The check digit shall occupy the ninth position in the vehicle identification number and appear as part of the number on the vehicle and on any documents containing the vehicle identification number.

The check digit is determined by carrying out the mathematical computation as follows:

(1) Assign to each number in the vehicle identification number its actual mathematical value, and assign to each letter the value specified in the table below.

A=1	J=1	T=3
B=2	K=2	U=4
C=3	L=3	V=5
D=4	M=4	W=6
E=5	N=5	X=7
F=6	P=7	Y=8
G=7	R=9	Z=9
H=8	S=2	

(2) Multiply the assigned value for each position in the vehicle identification number by the weight factor specified in the following table.

Position and Weight Factor

1st	8
2nd	7
3rd	6
4th	5
5th	4
6th	3
7th	2
8th	10
9th	0

8
7
6
5
4
3
2

(3) Add the resulting products and divide the total by 11.

RESPONSIBILITY:

GM VIN Subcommittee

AUTHORIZED BY:

GM VIN Subcommittee Chairman

GM VEHICLE IDENTIFICATION NUMBERING STANDARDS

A. General Information

TABLE A2: Check Digit Procedure (VIN position 9)

(4) The remainder is the check digit, which will be inserted in the ninth position. If the remainder is 0-9, the check digit is that numeric value; if the remainder is 10, the check digit is X.

EXAMPLE:

VIN POSITION	1	2	3	4	<u>5</u>	<u>6</u>	7	8	9	10	11	12	<u>13</u>	14	<u>15</u>	<u>16</u>	<u>17</u>
