Subject: 2001 Model Year Vehicle Identification Number Codes - Revision No. 2

Reference: My March 24, 2000, letter regarding 2001 Model Year Vehicle
Identification Codes - Revision No.1

Pursuant to the requirements set forth in Part 565 of Title 49 of the Code of Federal Regulations, Vehicle Identification Number (VIN), Ford Motor Company is submitting 2001 model year VIN code information covering all passenger cars and trucks to be manufactured or sold by Ford (including Ford-built, Mazda and Nissan-badged vehicles).

The attached coding information (pages 1-18) includes the coding for early introduction vehicles previously reported to the Administrator in the referenced March 24, 2000, submittal. Thus, this complete VIN information package supersedes entirely Ford's March 24, 2000, submittal.

The format of the VIN coding consists of alpha-numeric characters grouped according to the requirements of Part 565 of Title 49. Page 1 of the attachment lists Ford Motor Company World Manufacturer Identifier (WMI) three-digit codes. The Society of Automotive Engineers has previously concurred in the assignments of all the WMI codes listed on page 1 of the attachment.

Page 2 of the attachment lists the restraint system type codes for passenger cars (Ford VIN position no. 4). Page 3 lists the brake system and GVWR class codes for trucks and MPV's with alternative "combination" codes for trucks and MPV's equipped with Second Generation Airbags, as well as brake system codes for buses and incomplete vehicles (Ford VIN position no. 4). Page 4 indicates VIN position no. 5 designation identifiers ("P", "M", and "T") for all Ford passenger cars.

Pages 5, 6, and 7 of the attachment set forth VIN codes for passenger cars: line, series, and body type (Ford VIN position nos. 6 and 7).

Pages 8-12 of the attachment list VIN codes that describe line, series, chassis, cab type, or body type for trucks, MPV's, buses, and incomplete vehicles (Ford VIN position nos. 5, 6, and 7).

Pages 13-16 of the attachment lists VIN codes for engines (Ford VIN position no. 8) by engine displacement, number of cylinders, fuel type, engine manufacturer name, and also makes reference to net brake horsepower ratings. The engines are segmented into four groupings which are independently coded as follows:

- "Passenger Car" - for those engines installed on passenger car vehicles;
- "Light Truck/MPV" - for those engines installed on trucks and buses with Gross Vehicle Weight Rating (GVWR) of 11,000 pounds or less, and multipurpose passenger vehicles; and
- "Light/Medium/Heavy Truck" - for those engines installed on trucks and buses with GVWR's in excess of 11,000 pounds.
- "Electric Vehicles" - for electromotive power sources installed on electric vehicles

A "0" (zero) engine code is shown on pages 13, 14, and 15 of the attachment to denote a unit (glider) built without an engine.

Page 17 of the attachment reiterates VIN information relating to the "check digit" (Ford VIN position no. 9) and vehicle model year (Ford VIN position no. 10) as set forth in Part 565 of Title 49.

June 9, 2000

Page 18 of the attachment lists VIN codes for the Ford vehicle manufacturing plants (Ford VIN position no. 11). Ford VIN position numbers 12 through 17 are utilized for vehicle alpha-numeric identifiers, which are sequentially assigned by the vehicle assembly plants.

If there are any questions regarding this matter, please contact my office.

Very truly yours,

A handwritten signature in black ink, appearing to read "L. W. Camp". The signature is written in a cursive style with a large initial "L" and "W".
