Attn: VIN Coordinator

Dear Sir:

We are planning to manufacture a lowboy trailer as part of our product line. We have received a copy of the standard and applicable numbers from SAE.

Just to make sure we understand the code we are to stamp on our trailers, please review the following number which describes a 45' lowboy living quarters trailer, 45 feet long with one axle manufactured in 1985 in South Carolina, and it was our first unit.

1 OK should be 1 (see attached SAE letter)
IV9 LL 451__F1 030 001

Do we understand it correctly?

Sincerely,

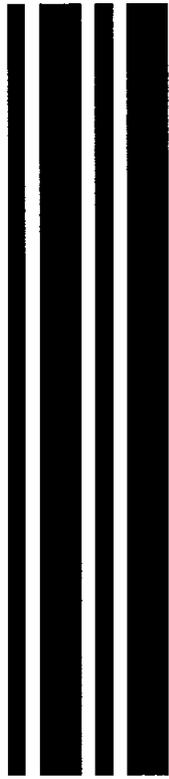

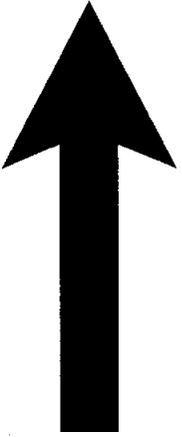

Wayne P. Comstock
Vice President
