Attn: VIN Coordinator

The following is a description of the VIN number system we are using to identify single axle boat trailers which we are currently manufacturing.

Using the first number which we have assigned as a sample, the explanation is as follows:-

Example:- VIN 1F9 SS 001 8 G H 110 001

1F9 Assigned by SAE to identify Pacesetter Boat Co.

SS Our designation of the type of sailboat for which it was designed. S=Snipe, L=Lightning, etc.

001 This number will be changed sequentially to identify design changes from trailer to trailer. 5/19/86

8 Check digit

G Year 1986

H Plant of manufacture, Hixson, Tn.

110 Assigned by SAE

001 Sequential numbering of trailers built in 1986 regardless of design type.

*Position 6, 7, 8 = length of trailer
8 = No. of axles
i) they vary in size. per Bill Simons, Oette Gardner*

We trust this will provide you with the information necessary to interpret the VIN numbers that we are assigning. If you have any questions please contact us.
