400 Seventh Street, S.W.  
Washington, D.C. 20590

Coordinator:

Reinke Mfg. would like to use the letter "A" in the fifth position of the VIN numbers. The "A" would be used to designate trailers of primarily aluminum construction. We would continue to use "S" to designate our standard trailers.

This information is submitted as per requirements set forth in Federal Motor Vehicle Safety Standard No. 115.

We understand that any amendment to this coding shall be submitted to NHTSA and that a written approval may not be provided by NHTSA unless corrections are necessary.

Sincerely,

*John Davis*
