Gentlemen:

This is to advise that WCCT, Inc. will start building new and re-manufactured trailers. The following VIN number information can be used to identify the type of trailer.

The first three characters (1W9), indicate our manufacturers code.

The fourth character identifies the type of trailer:

C = container chassis F = flatbed D = drop frame L = lowboy
U = utility trailer Y = van T = tank trailer

The fifth character will be (N) for a new trailer or (R) for a re-manufactured unit.

Characters six and seven indicate the trailer length in feet.

Character eight indicates the number of axles.

Character nine is the check digit determined by the mathematical computation specified in S5.2.1 - S5.2.4.

Character ten is the year of manufacture code as per MYSS 115 table 2.

Character eleven is the plant location (N) for New Orleans, La.

Characters twelve to fourteen will be (083), which is our number assigned by SAE indicating our company will manufacture less than five hundred units per year.

The last three characters indicate the sequence number starting with 001.

We will provide a list of all units manufactured annually.

Please advise if any additional information is required.

YOURS VERY TRULY,
WCCT, INC.

RONALD J. FORTE, PRESIDENT
