Dear Sir:

In accordance with your VIN Information Bulletin issued July 1985, please accept the following as our report necessary to decipher all characters of our VIN.

On April 12, 1989, the society of Automotive Engineers issued our business a World Manufactured Identifier Code #487, to be used in the manufacture of cargo trailers. The following is a further explanation of how we have arranged our remaining digit code:

- First three digits: WMI Code # 487
- Fourth digit: Type; T / tilt bed, U / utility, F / flatbed
D / dove-tail, V / enclosed van, S / stock
C / car hauler.
- Fifth digit: Series; B / bumper hitch, P / pintle hitch,
G / gooseneck, F / fifth wheel.
- Sixth and seventh digit: Length of vehicle
- Eighth digit: Number of axles
- Ninth digit: Check digit
- Tenth digit: Model year
- Eleventh digit: Plant location
- Twelfth thru Seventeenth digits: Numerical Sequence of manufacturing

The following is an example of use:

VIN # 487DG2523KA000002, would describe the following vehicle;
A dove-tail, gooseneck, 25', two axle trailer, built in 1989, at our only plant <A for Ashdown, Ar.>, and that trailer being the second trailer for production in that calender year.

Sincerely,
Robert Posey
