Dear Sir:

I have applied for a VIN for manufactured utility trailers. My number is 1R9US1013K1139001. I have listed below how I arrived at these numbers.

1R9-World Manufacturer Identifier, I received from SAE.

U-Type of trailers are utility.

S- Standard body type.

10- Trailer length in feet. I will be making 8ft. and 16ft. also. I will change number for those to 08ft. and 16ft.

1-Number of axles. I will change this number to 2 if I build with 2 axles.

3-I added my numbers and letters of first 8 digits, changed letters to numbers by using Table A conversion chart.

Total was 168 divided by 11=15.27-Remainder .27=3.

K- Model year 1989

1-Plant location-Number I picked out.

139-Manufacturer Identifier from SAE.

001-Production Sequence.

Sincerely

Mr. Roland Barker
