ORIGINAL

To whom it may concern:

I have tried to contact you by telephone for three days but have never been able to talk to anyone.

I have a question concerning the check digit number.

After I divide my figures by 11, does the numbers have to exactly 9, 18, 27 thus using check digit # 1, 2, or 3?

Or can the numbers be: (Example)

17 so I would use the #2 because 17 falls between 9 and 18

or---

25 so I would use #3 because 25 falls between #18 and #27.

This is an example of one: Trailer 17L54" wide

1	G	9	N	D	1	7	1	J	L	0	7	0	0	0	8
1	7	9	5	4	1	7	1	1	3	0	7	0	0	0	8
8	7	6	5	4	3	2	10	9	8	7	6	5	4	3	2
8+	49+	54+	25+	16+	3+	14+	10+	9+	24+	0+	42+	0+	0+	0+	16 = 270

270.00 ÷ 11 = 24.55 = 6

9th position

55?

I see .54 = 6 but not .55

Please forward any mail to me at the following address:

Custom Trailers, Inc.
