SAFE-RIDE TRAILERS INC.  
8067 Frank-O Court  
New Port Richey Fla 34653  
(813) 845-6119

ORIGINAL

TO: Administrator, National Highway Traffic Safety Administration

FROM: Elizabeth A Froland, Secretary Safe-Ride Trailers Inc.

1 pg.

I have completed a 17 digit VIN scheme. We are a new, small manufacturer of livestock trailers and plan to make some utility trailers in the future. The coding for the trailers is as follows: Type- S= Stock trailer U= Utility trailer; Series/type of body- G= Gooseneck B= Bumper pull; Length- actual bed length measured in feet; Number of axles- 1= single 2= Tandem. The letter L designates the model year 1990 and the letter N is the location of our only plant in New Port Richey, Florida.

The check digit calculation for Safe-Ride Trailers Inc. resulted in a decimal value of .90. The check digit is X.

Since we plan to manufacturer less than 500 trailers per year the SAE assigned numbers were 199 and 332.

Our first trailer is an 18 foot livestock trailer with tandem axles. The body type is a bumper pull.

Our completed 17 digit VIN will read as follows:

1 S 9 S B 18 2 X L N 3 3 2 0 0 1

Any questions in regard to this number should be directed to me.

Elizabeth A Froland
