Subject: Change to Vehicle Identification Numbering

The following information is submitted per your request of our August 21st conversation.

Oshkosh Chassis Division's VC-26 V-Line chassis has had a correction to the 5th digit of the Vehicle Identification Number. The 5th digit indicates the vehicles Gross Vehicle Weight Rating "GVWR." The GVWR of the VC-26 previously was 26,500 lbs which is indicated by a class 7. The new GVWR of the VC-26 is 25,800 which will be indicated by a class 6. The change in GVWR is based upon the new Michelin tire rating change, which limits our rear axle load rating to 16,880 lbs thus yielding our GVWR of 25,800 lbs.

If you have any questions or concerns, please feel free to contact me at ext: 2038.

Sincerely,  
OSHKOSH CHASSIS DIVISION

John E. Calow  
Sr. Safety Engineer
