Attention: VIN Coordinator

2 pgs

Gentleman:

Pursuant to the requirements of CFR49, Part 565, Winnebago is submitting a VIN code revision/addition. This is relating to the information necessary to decipher the characters contained in the VIN for Winnebago's multipurpose passenger vehicles, using the 1WV World Identifier.

In the fifth character position (engine type), "F" will represent a 2.5-liter 5-cylinder heavy-duty gas engine, "H" will present a 2.8-liter 6-cylinder light-duty gas engine, and "G" will represent a 2.4-liter 5-cylinder diesel engine.

Should you have any questions on this matter, please contact me.

Sincerely,

Dale Jordal
Codes and Standards Coordinator
