REPORTING SAFETY DEFECTS

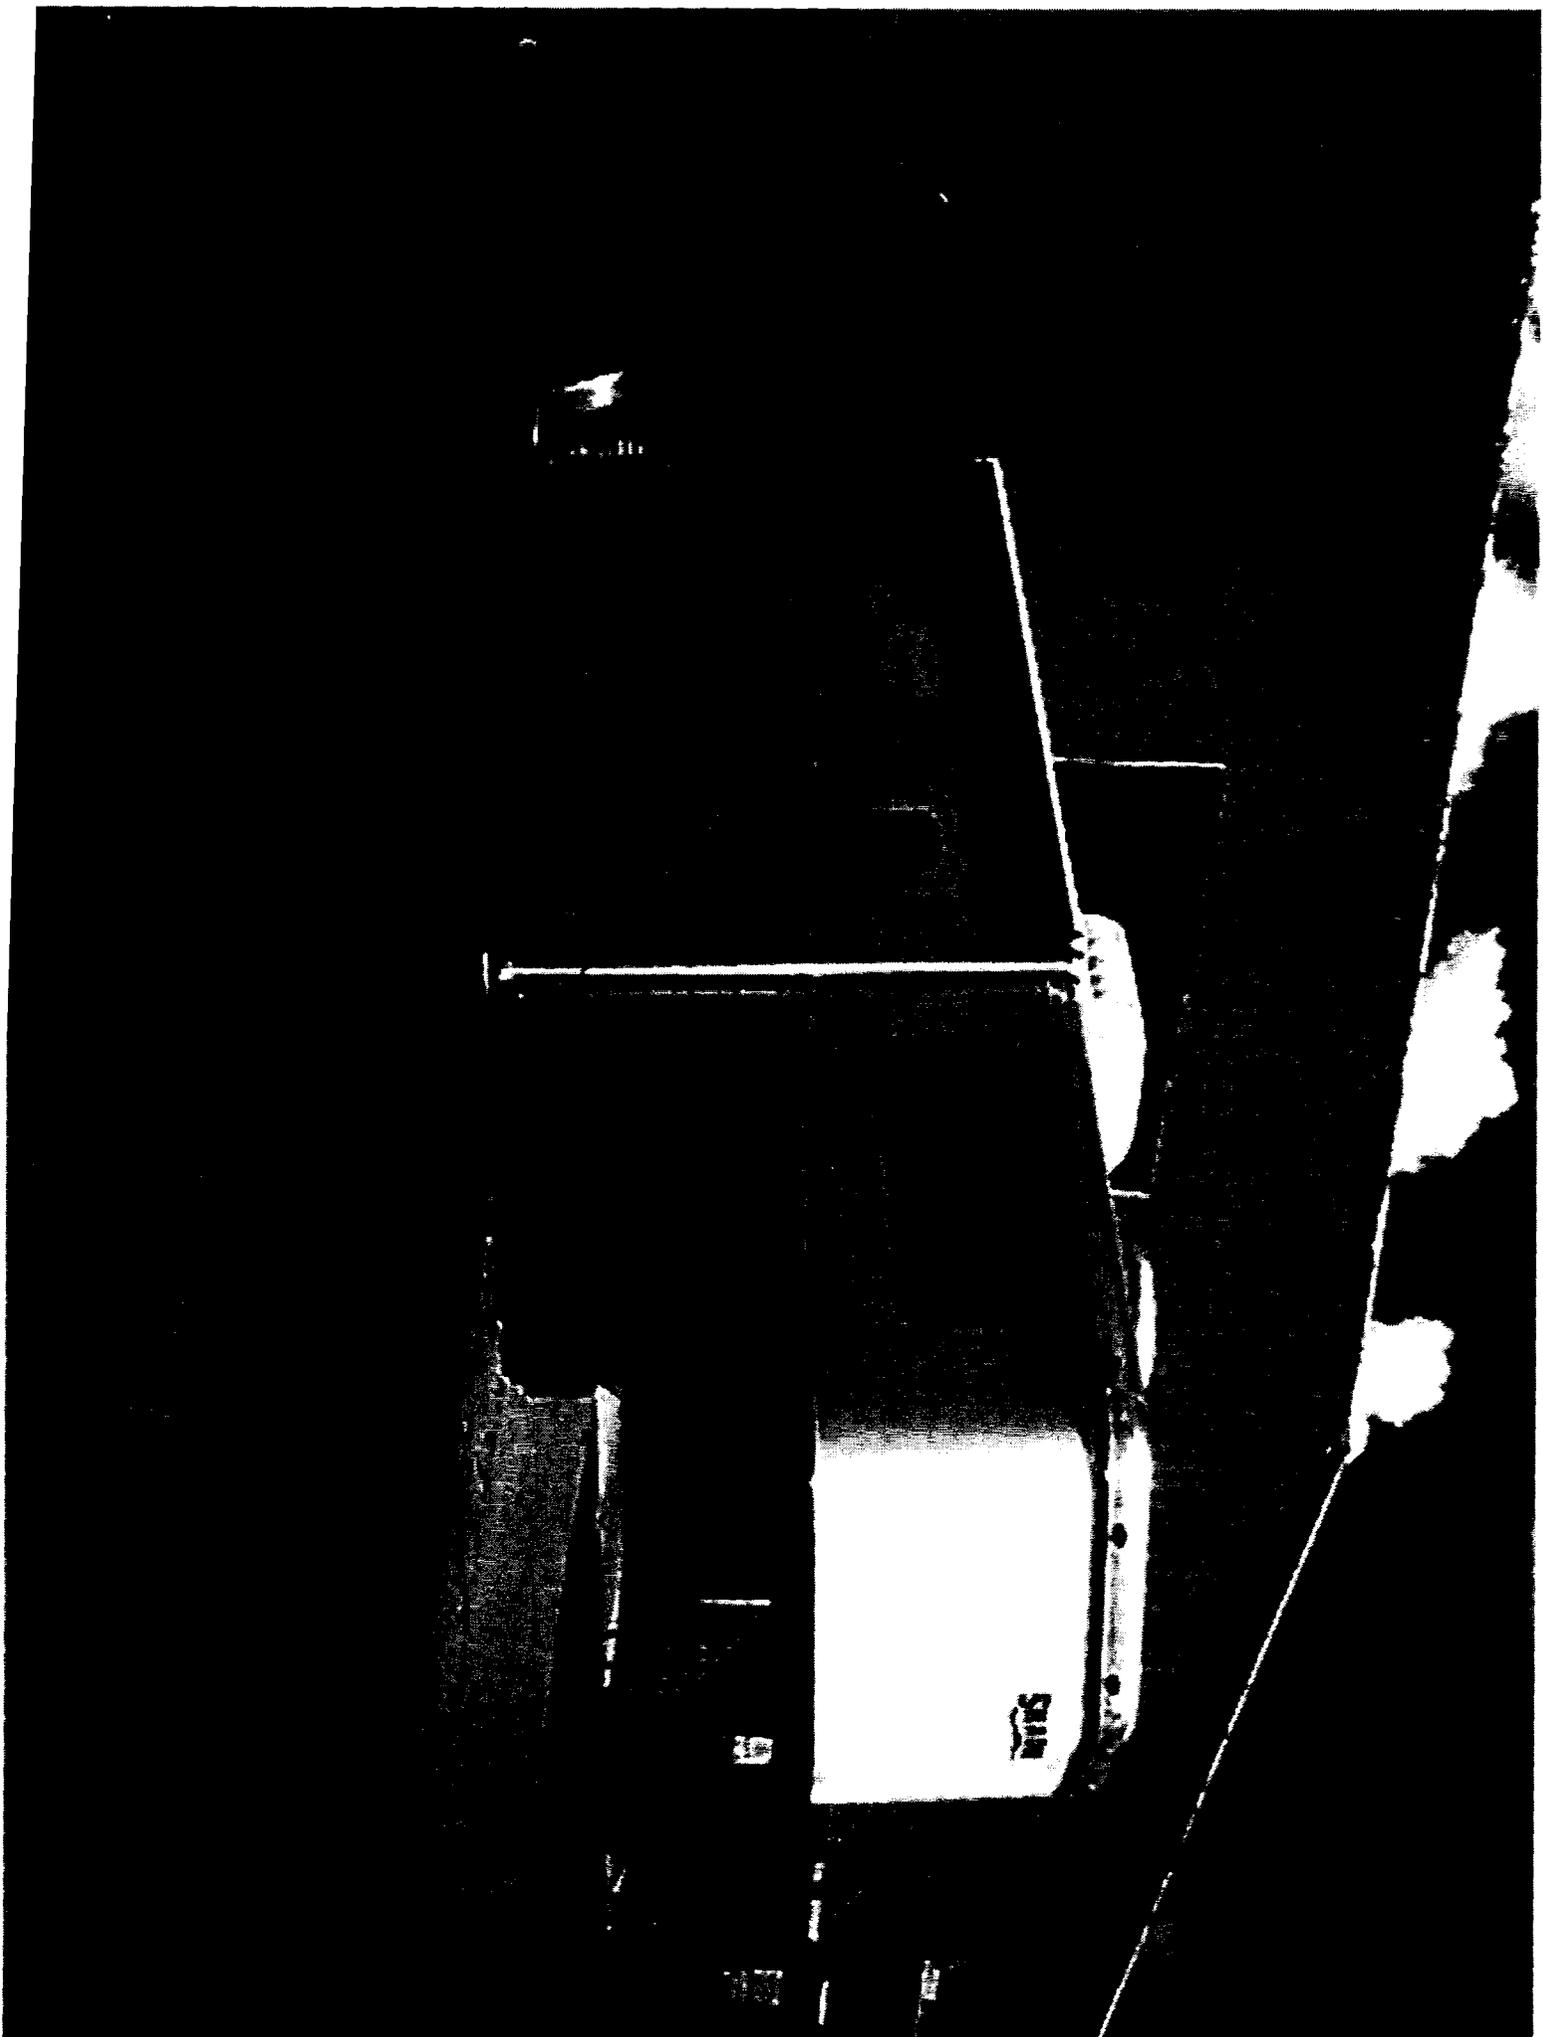

If you believe that your vehicle has a defect, which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying Shadow Trailers, Inc. If the NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, the NHTSA cannot become involved in individual problems between you, your dealer, and Shadow Trailers. To contact the NHTSA, you may either call the Auto Safety Hotline at 1-800-424-9393 (or 366-0123 in the Washington D.C. area) or write to: NHTSA, US Department of Transportation, Washington D.C. 20590. You can also obtain other information about motor safety from the Hotline.

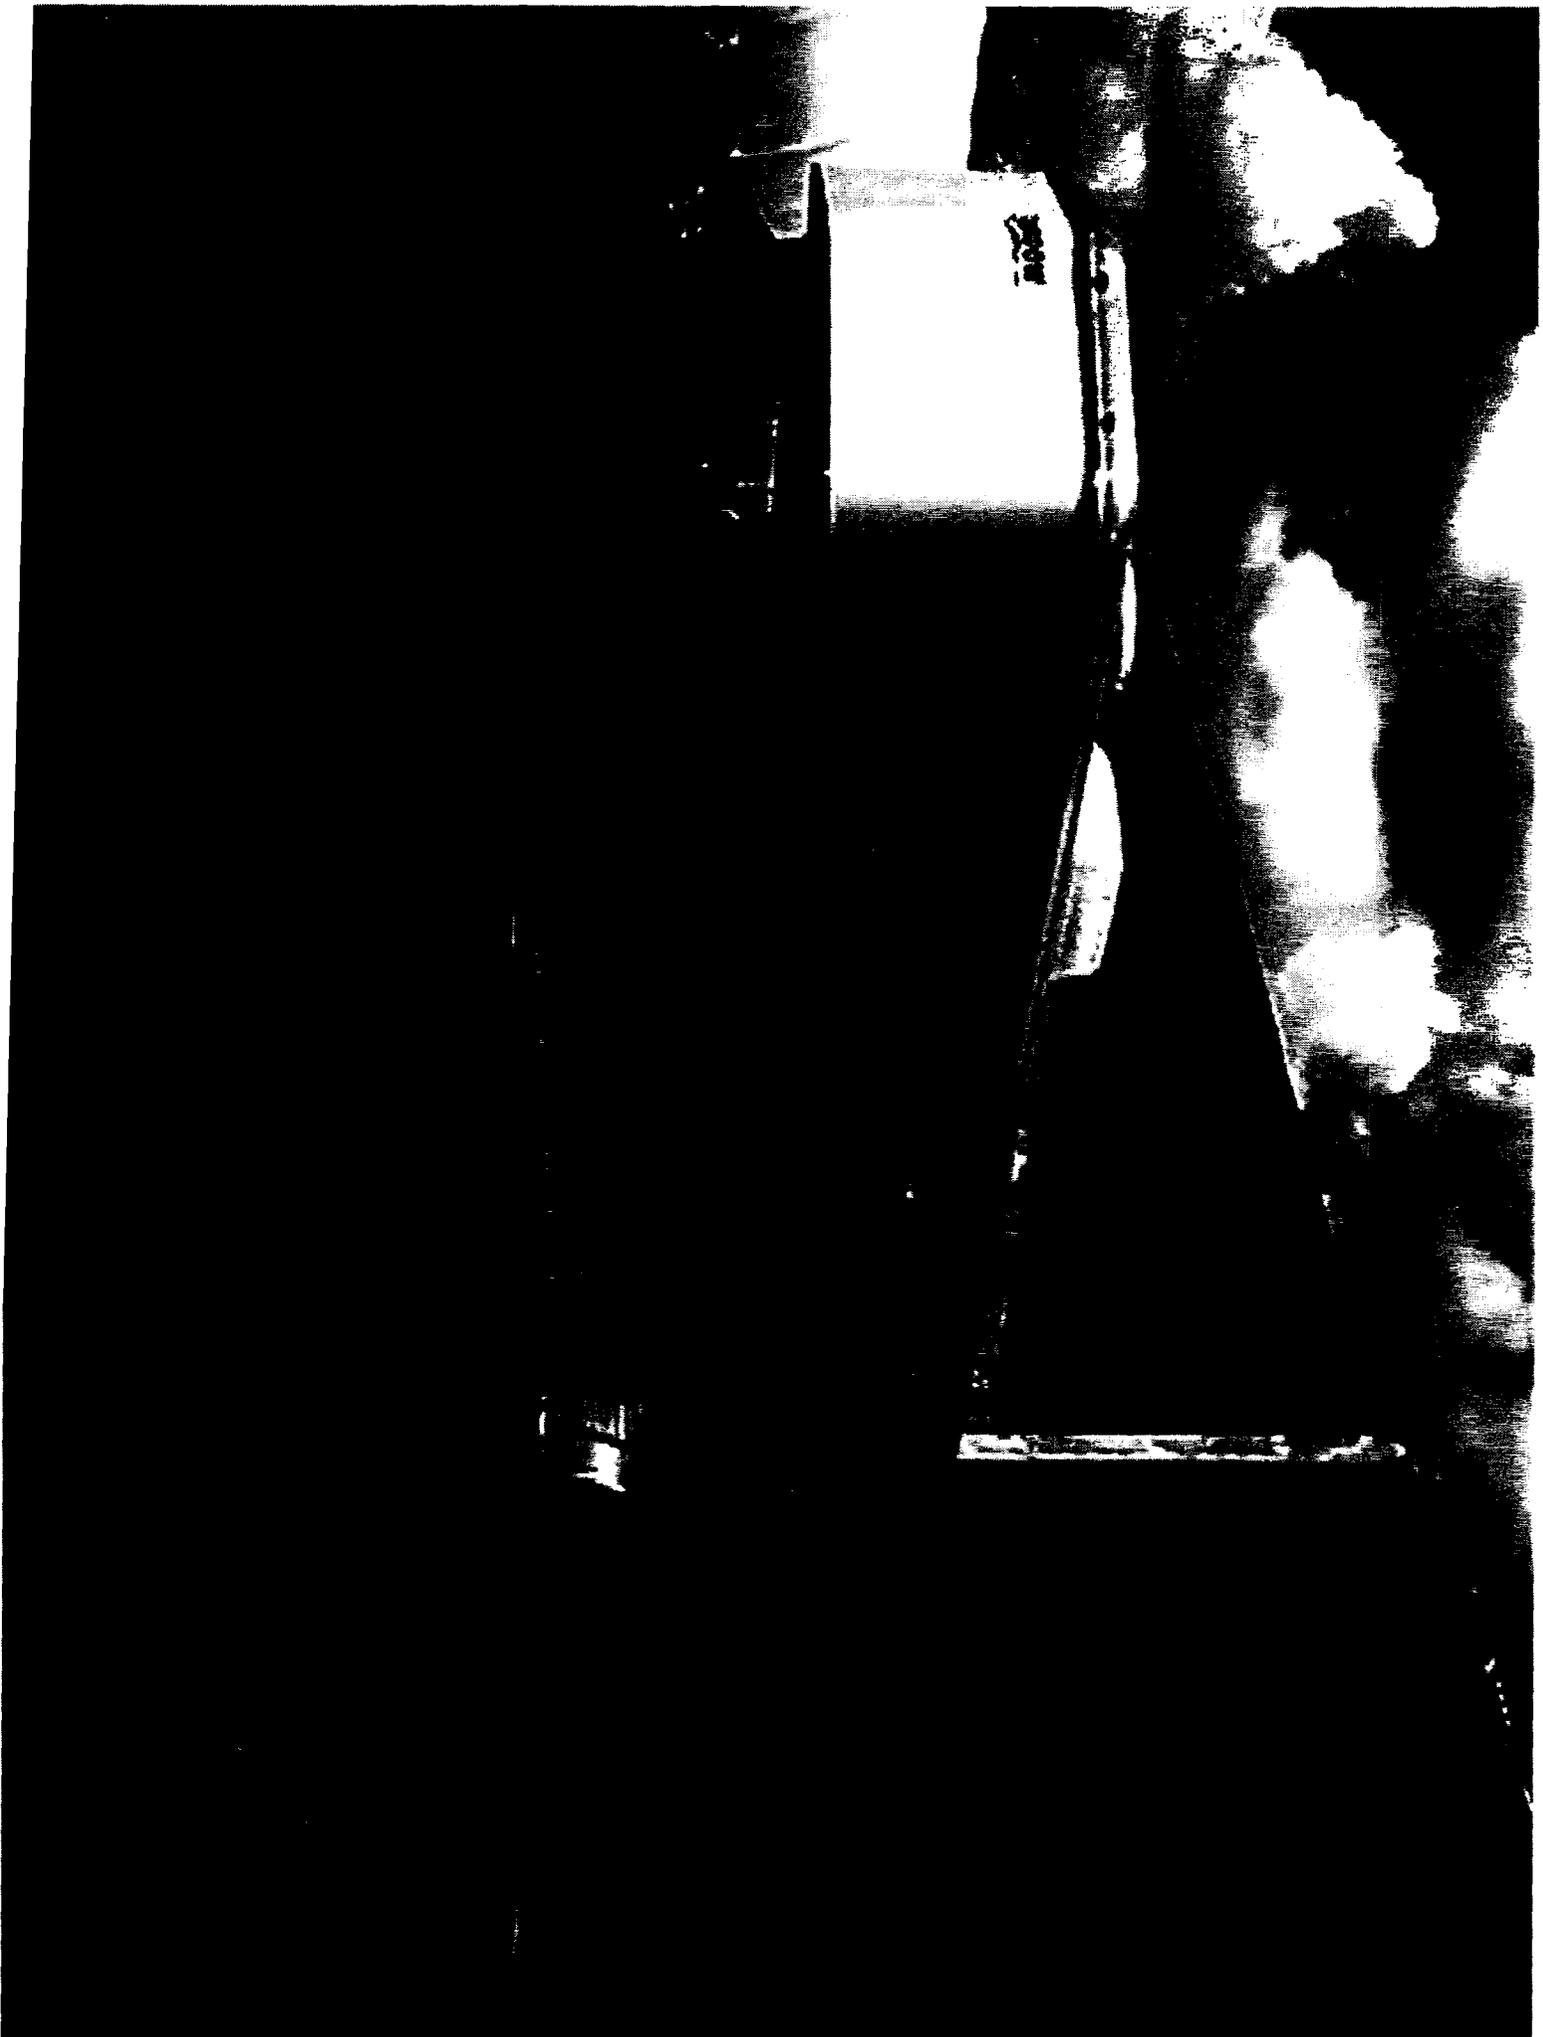

SAFETY TIPS

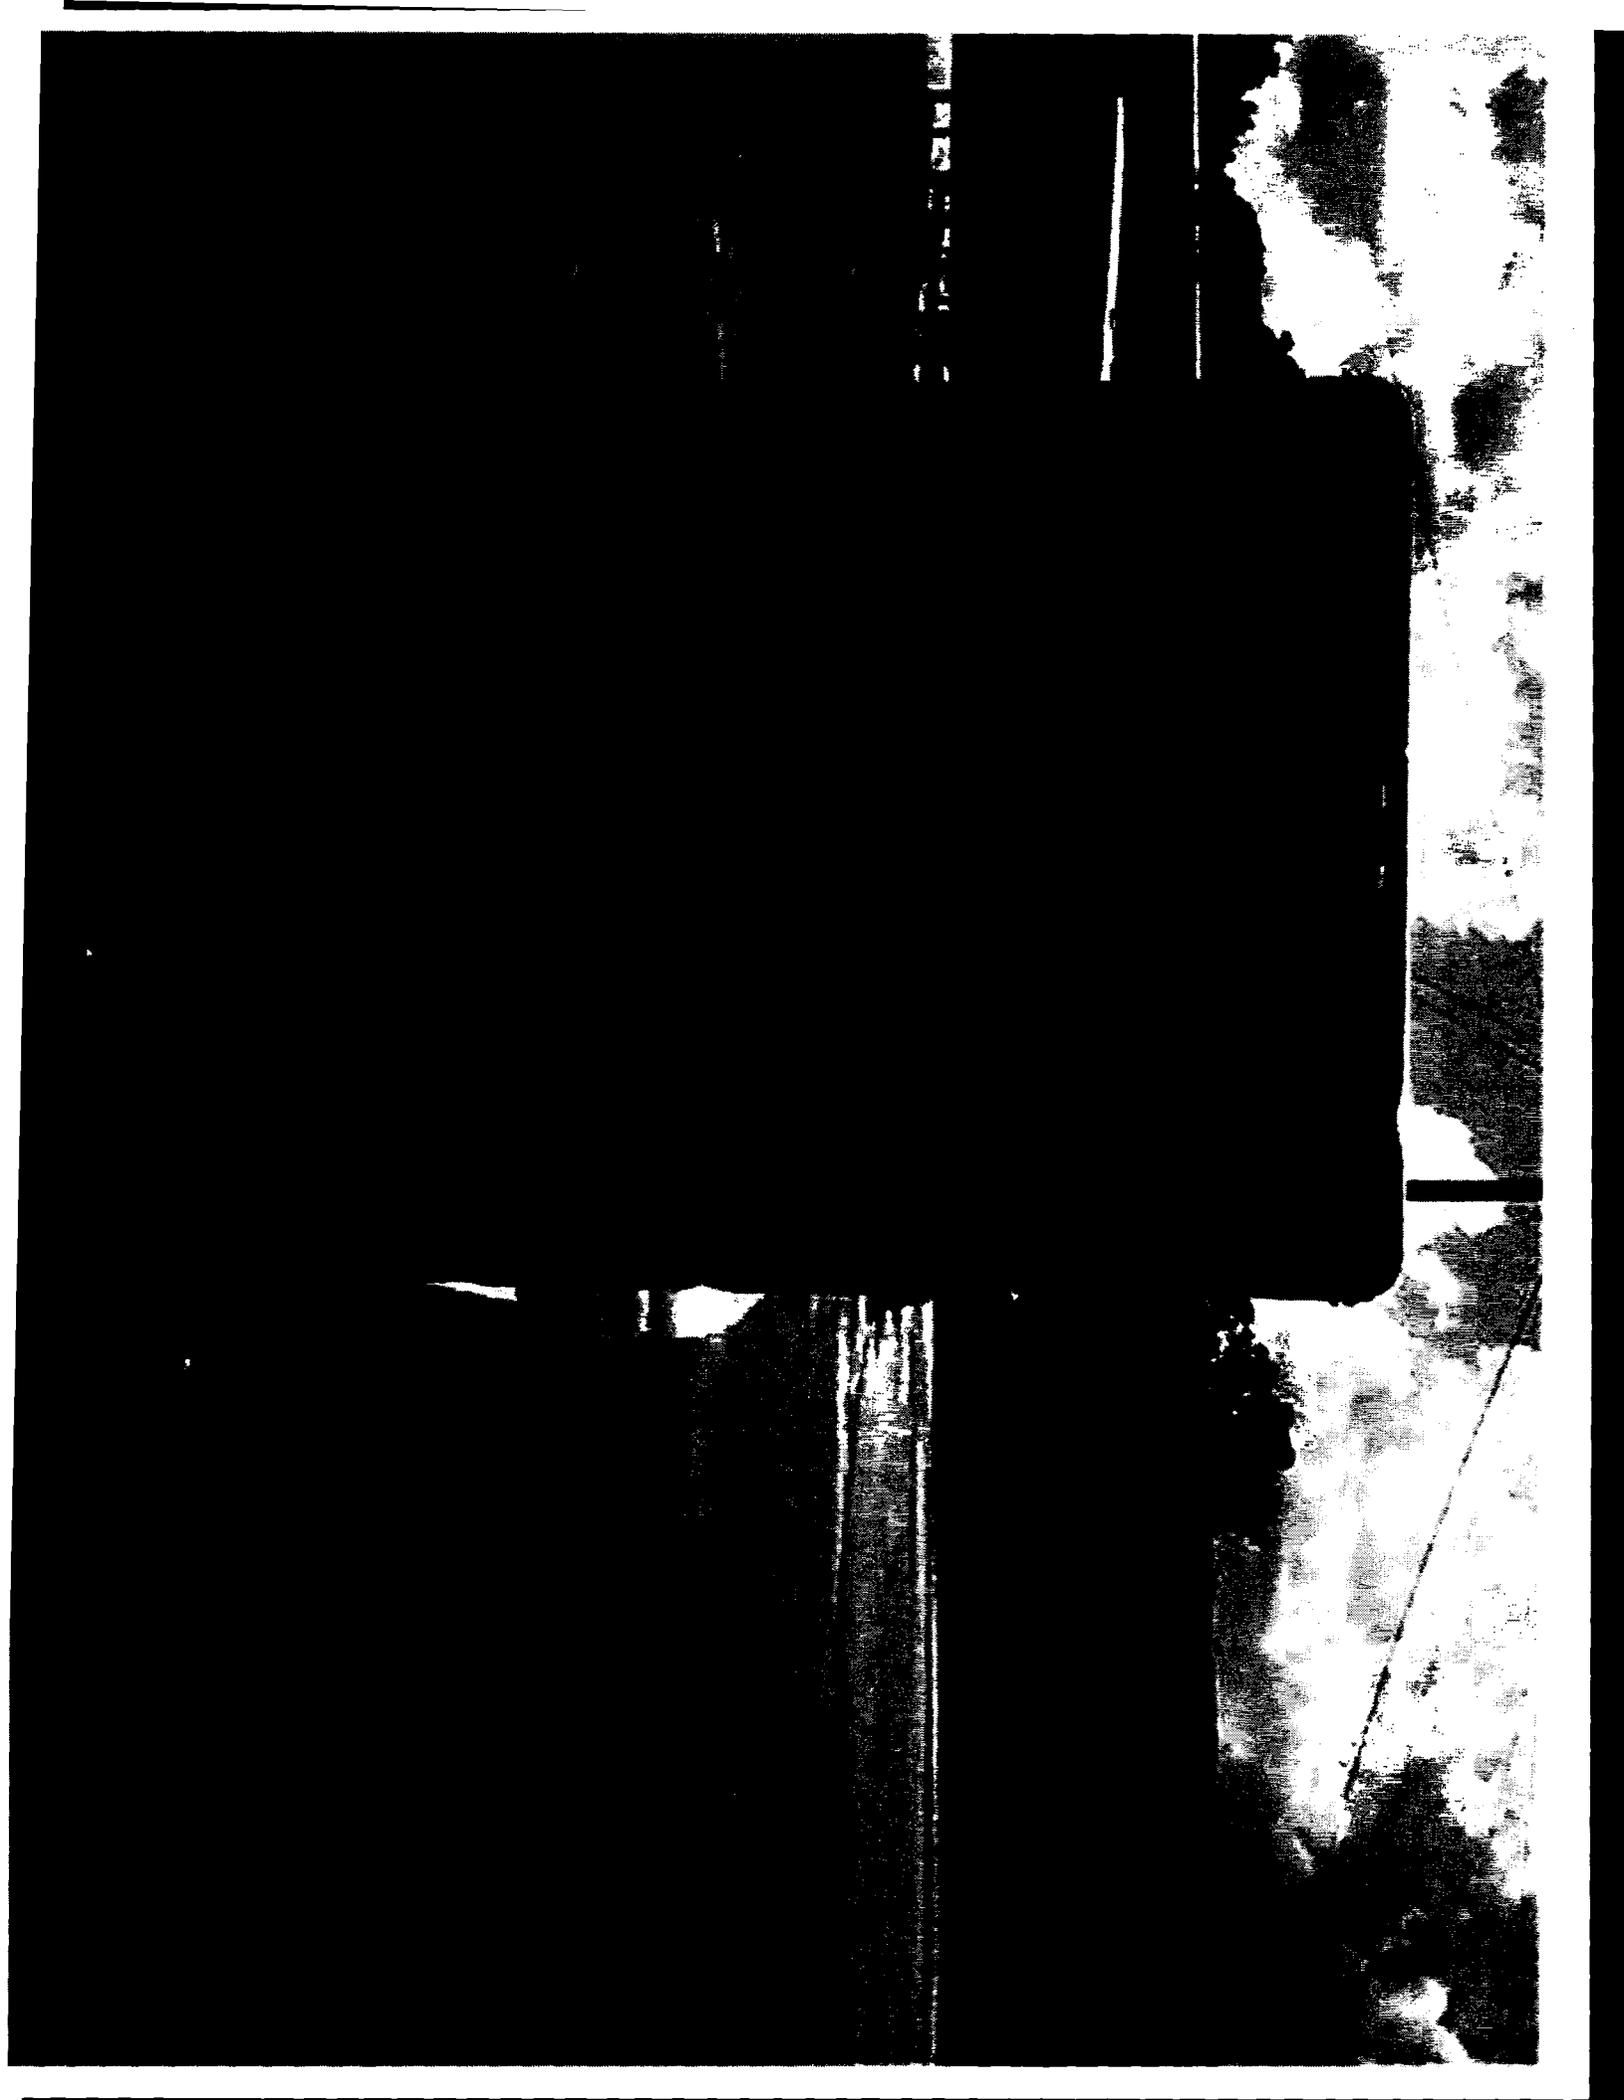

1. **HOOKING UP TO YOU SHADOW TRAILER**
Stand clear of truck and trailer when hooking up. Be sure no small children or persons are in the immediate area when backing up trailer. Do not move your trailer until the coupler and ball or fifth wheel and pin are in locked position and And safety chains are attached to the towing vehicle.
2. **TIRE CAPACITY**
Do not overload tire capacity recommended by tire manufacturer.
3. **GROSS VEHICLE WEIGHT**
At no time exceed the Gross Vehicle Weight (GVW) of the trailer indicated on the Vehicle Identification Number (VIN) plate.
4. **SPEED**
Use extreme caution when pulling you Shadow Trailer. Do not exceed the posted speed limits on the roads you are traveling. Be aware that traveling at higher speeds or hauling heavier loads will increase your stopping distance.
5. **SECURING YOUR LOAD**
Gate or tie your livestock as possible. Livestock or horses shifting in the trailer may cause the driver to loose control and could lead to an accident.
6. **LOADING AND UNLOADING YOUR TRAILER**
Use caution when loading or unloading your trailer. Be sure to keep small children away during your loading or unloading process. Carelessness may cause injury or death.
7. **BREAK AWAY BATTERY**
A single battery is supplied with each trailer. Each is located behind the hitch coupler. Check the battery charge each time the trailer is used. With the trailer plug disconnected, pull the breakaway cord out of the switch box, and pull the trailer forward slowly; the wheels should be locked. To unlock the wheels, snap the breakaway plug back into the switch.
