Hayes Lemmerz Wheel Marking in Compliance with MVSS 110

Dear ladies and gentlemen,

With reference to the section 4.4.2. of the updated MVSS, effective 09/01/2007, we have to notify to you about a wheel marking different to the pattern defined in the a.m. standard.

Hayes Lemmerz Werke GmbH, located Ladestrasse 1, 53639 Koenigswinter, Germany, is a producer of steel wheels for passenger car, light truck and truck wheels. Different to the demand to mention day, month and year of manufacturing, Hayes Lemmerz Koenigswinter marks all of their wheels using the following code:

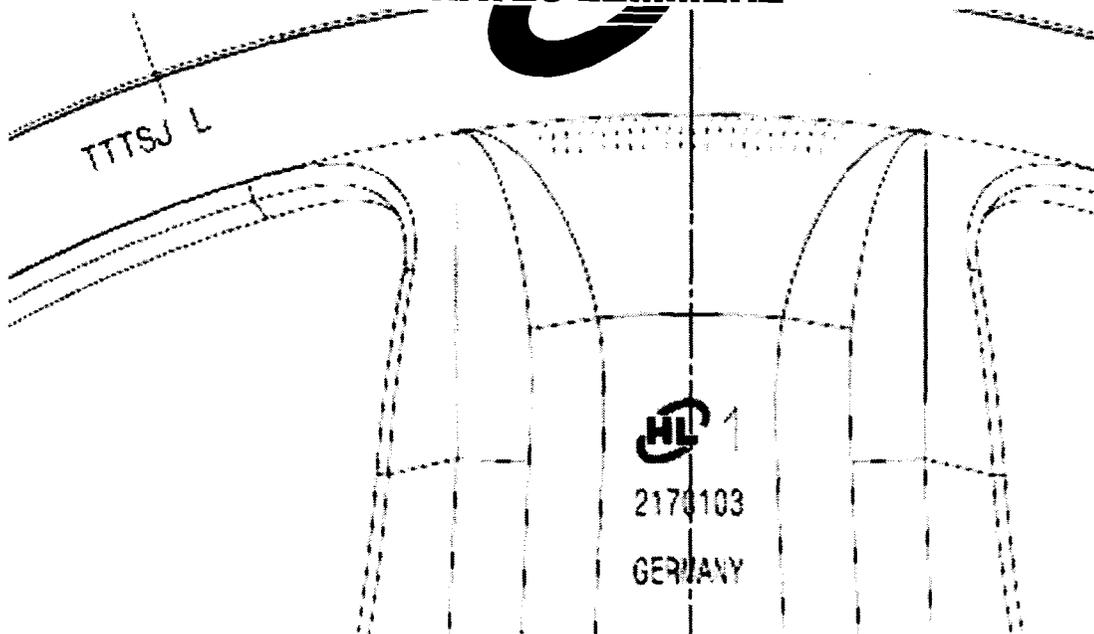

DDDSY L (in German Language symbolic TTTSJ L) which means:

- DDD : running day of the year from 001 to 365 (or 366 respectively)
- S : Shift of production, A for early shift, B for regular and C for late shift
- Y : One digit for the current year "7" would mean 2007.
- L : Indicating the production assembly line, which can be "1", "2" or "3".

Example for today's stamping would be "256B7 3", which is 09/13/07, day shift on 3rd line.

The stamping is located on the visible (weather) side of the rim in the plane, where the valve hole is pierced (see drawing detail). The stamped HL logo and the 1 behind indicate that this wheel has been produced by Hayes Lemmerz Koenigswinter, Germany. The stamping letter height is 3 mm minimum.

HAYES LEMMERZ

All other items of the stamping comply directly with this and related standards.

This kind of stamping is generally valid for ALL wheels, that Hayes Lemmerz Werke GmbH, Koenigswinter produces. In particular this applies also to several wheels that are in development for General Motors / Opel, with the following part numbers and sizes:

1. Steel Wheel, 6½Jx16", IS39, GM13 259 234, HL pn. 2160142
2. Steel Wheel, 6½Jx16", IS41, GM13 259 235, HL pn. 2160143
3. Temporary Spare Wheel, 4.00BTx16", IS25, GM13 259 230, HL pn. 2160140
4. Temporary Spare Wheel, 4.00BTx16", IS25, GM13 259 231, HL pn. 2160141
5. Steel Wheel, 7Jx17", IS42, GM13 259 236, HL pn. 2170105
6. Steel Wheel, 7Jx17", IS44, GM13 259 237, HL pn. 2170106
7. Steel Wheel, 7Jx17", IS42, GM13 259 240, HL pn. 2170107
8. Steel Wheel, 7Jx17", IS44, GM13 259 241, HL pn. 2170108
9. Temporary Spare Wheel, 4.00BTx17", IS25, GM13 259 232, HL pn. 2170104
10. Steel Wheel, 7Jx17", IS41, GM13 219 393, HL pn. 2170103

If you require additional information, please do not hesitate to contact me.
