Subject: Isuzu VIN Decoding Information – 2008 Model Year Revised.

Dear Sir or Madam:

In accordance with §565.7 of 49 CFR Part 565, Vehicle Identification Number Requirements, on behalf of Isuzu Motors Limited, Isuzu Manufacturing Services of America, Inc. hereby submits a revision to the Vehicle Identification Number (VIN) decoding information for the 2008 Model Year Isuzu vehicles.

Unfortunately, a mistake was discovered in the VIN assignment at Isuzu Motors Limited. The error occurs in the VIN for the chassis-cabs for Chevrolet/GMC W-Series trucks and Isuzu N-Series trucks.

The 8th position in the VIN for Incomplete medium duty vehicles indicates engine type. The 4HK1-TC engine should have been given the code "6", but trucks built with a manual transmission had been assigned "H". Therefore, Isuzu would like to revise the decoding information as follows;

1. Decoding Information Revision -- Add the following engine code

SECTION D – Medium and Heavy Duty Trucks and Incomplete Vehicles
Table D6 Engine Code (VIN position 8)

Code	Type	Description	Make
H	4HK1-TC	5.2L, Diesel, Turbo Intercooler, Manual Transmission	ISUZU

2. Affected Vehicles

There are 43 affected vehicles that can be identified by the following four conditions.

- a) World Manufacturer Identifier Code (VIN position 1-3)
 JAL: Isuzu Incomplete Vehicle – Medium Duty
 J8B: Chevrolet Incomplete Vehicle – Medium Duty
 J8D: GMC Incomplete Vehicle – Medium Duty

- b) Engine Code (VIN position 8)
 H : 4HK1-TC Manual Transmission

c) Model Year Code (VIN position 10)
8: 2008

The VINs for these vehicles could not be changed, since they have already been distributed. Therefore, we hereby revise our VIN Decoding Information for the 2008 Model Year vehicles which was submitted under our cover letter DET-06-097 dated October 17, 2006.
