Chris, do you have any information off the top of your head? Do you know if it is brake pressure activated or deceleration rate activated? Is it duplicating MB system?

Just any idea extra info that you have off the top of your head would be helpful. I have read about the MB system & their exemption.

I actually have a personal interest in this system. Someday I will share that short tale with you.

Regards, Ed

They mention some TMC braking system with flashing lights - do you know anything about it?
