

**Special Service Campaign (SSC) – 70F (Safety Recall) Q&A  
Toyota Camry All Weather Floor Mat for 2007 and Early 2008 Model Year Vehicles**

**Q1: What is the condition?**

A1: The optional Toyota Camry All Weather Floor Mat is specifically engineered and manufactured for 2007 and early 2008 model year Camry vehicles. The driver's seating position Toyota Camry All Weather Floor Mat includes two grommet holes in the All Weather Floor Mat and retaining hooks (clips) to secure the mat to the vehicle's carpet. Toyota has received reports that if the optional Toyota Camry All Weather Floor Mat (either by itself or if it is placed on top of an existing carpeted floor mat) is not secured by the retaining hooks (clips), the mat can move forward and interfere with the accelerator pedal returning to the idle position. ***If the mat is properly secured, it will not interfere with the accelerator pedal.***

**Q2: What is the cause of this condition?**

A2: If the optional Toyota Camry All Weather Floor Mat (either by itself or if it is placed on top of an existing carpeted floor mat) is not secured by the retaining hooks (clips), the mat can move forward and interfere with the accelerator pedal returning to the idle position. ***If the mat is properly secured, it will not interfere with the accelerator pedal.***

**Q3: Why is Toyota sending owner notifications beginning in late November, 2007?**

A3: In late September, 2007, Toyota mailed a ***preliminary owner notification*** regarding the Safety Recall (Special Service Campaign) on certain optional Toyota Camry All Weather Floor Mats (floor mats constructed from heavy duty rubber). The preliminary notification advised owners that Toyota was designing a replacement Toyota Camry All Weather Floor Mat and that another notice will be mailed to them once the new mat was available.

In late November, 2007, Toyota will begin sending a Safety Recall notification to inform owners the newly designed replacement Toyota Camry All Weather Floor Mat for the driver's seating position is now available.

**Q4: Are there any warnings that this condition exists?**

A4: Yes, customers may verify the floor mat is properly secured using the retaining hooks (clips) provided. If the mat is properly secured, it will not interfere with the accelerator pedal. Good times to check are after filling the vehicle's tank with gasoline, after a carwash and/or vehicle interior cleaning, when another driver is about to drive the vehicle, etc. More than one floor mat should never be used in the driver's seating position, as the retaining hooks (clips) are designed to accommodate only one floor mat at a time. Customers may refer to the floor mat section of their Owner's Manual for further information regarding the retaining hooks (clips).

**Q5: Which and how many floor mats are involved?**

A5: The *optional* Toyota Camry All Weather Floor Mat specifically designed for the driver's seating position in 2007 and early 2008 Toyota Camry vehicles are involved. There are approximately 24,500 Toyota Camry All Weather Floor Mats involved in this campaign.

**Q6: Are there any other Toyota or Lexus All Weather Floor Mats involved?**

A6: Yes, this condition also involves the Lexus ES 350 All Weather Floor Mat. There are approximately 30,500 Lexus ES 350 All Weather Floor Mats specifically designed for 2007 and early 2008 model year vehicles involved.

**Q7: How many vehicles are involved?**

A7: Approximately 24,500 Toyota Camry and 30,500 Lexus ES 350 vehicles are equipped with the All Weather Floor Mats designed for 2007 and early 2008 model year vehicles.

**Q8: What is the production period of the affected All Weather Floor Mats?**

A8: The affected Toyota Camry and Lexus ES 350 All Weather Floor Mats were produced from December, 2005 (Camry) and February, 2006 (ES 350) to mid-September, 2007.

**Q9: Is this campaign related to the recent NHTSA investigation on the ES 350 All Weather Floor Mat?**

A9: Yes, this campaign is a direct result of the National Highway Traffic Safety Administration (NHTSA) and Toyota investigation into the ES 350 All Weather Floor Mats. During the investigation, it was determined that if the optional Lexus ES 350 All Weather Floor Mat (either by itself or if it is placed on top of an existing carpeted floor mat) is not secured by the retaining hooks (clips), the mat can move forward and interfere with the accelerator pedal returning to the idle position. **If the mat is properly secured, it will not interfere with the accelerator pedal.** Based upon the same design pattern to the driver's seating position Lexus ES 350 All Weather Floor Mats, the 2007 and early 2008 Toyota Camry vehicles were included in this campaign.

**Q10: How many incidents of this condition have been reported?**

A10: During NHTSA's investigation on the ES 350 All Weather Floor Mat, Toyota was informed by NHTSA that there had been 5 consumer allegations that may relate to this condition in the 2007 Toyota Camry vehicles.

**Q11: Have there been any accidents reported?**

A11: According to NHTSA, there have been allegations of one accident case among the 5 complaints received by the agency.

**Q12: What is Toyota going to do?**

A12: Any authorized Toyota dealer will exchange the **Driver's** seating position Toyota All Weather Floor Mat with a newly designed mat at **no charge** to the owner.

**Q13: What if the customer does not have the Toyota Camry or Lexus ES 350 All Weather Floor Mat?**

A13: If the vehicle does not have the Toyota Camry or Lexus ES 350 All Weather Floor Mat designed for 2007 and early 2008 model year vehicles, it is **NOT** involved in this recall. However, during our investigation, it was noted that floor mat interference is possible in **any vehicle with any combination of floor mats**. Therefore, if you utilize non-Toyota/non-Lexus floor mats, please make sure they are also properly secured using the appropriate retention device and do not place them on top of another floor mat.

**Q14: What if you experience accelerator pedal interference prior to your appointment?**

A14: Each circumstance may vary, and drivers must use their best judgment, but Toyota is providing the following instructions and warnings if the All Weather Floor Mat should interfere with the accelerator pedal:

- If it is possible and safe to do so, pull back the floor mat as it may dislodge the All Weather Floor Mat from the accelerator pedal.
- If you need to stop the vehicle immediately, firmly step on the brake pedal with both feet. Do not pump the brake pedal as it will deplete the vacuum utilized for the power brake assist.
- In the Toyota Camry equipped with the Engine Start/Stop button, if you can safely stop the vehicle, firmly hold down the Engine Start/Stop button for at least three seconds to turn off the engine. Do not tap the Engine Start/Stop button. However, by turning off the engine, you will lose both power brake assist and power steering assist.
- In a traditional key ignition Toyota Camry, if you can safely stop the vehicle, turn the ignition key to the ACC position. Again, by turning the key to the ACC position, you will lose both power brake assist and power steering. Do not remove the key from the ignition. If you remove the key from the ignition, the steering wheel will lock.

Above all, until the replacement All Weather Floor Mat for the driver's seating position is ready, we request the customer's assistance in regularly verifying the floor mat is properly secured using the retaining hooks (clips) provided. If the mat is properly secured, it will not interfere with the accelerator pedal.

**Q15: Are the mats Toyota Genuine accessories?**

A15: Yes. The mat can be placed in the vehicle at the port or dealership, and purchased over-the-counter at Toyota dealerships.

**Q16: What if the customer doesn't have the involved Toyota Camry All Weather Floor Mat, but receives the notification?**

A16: Please have the customer fill out the request form included in their notification.
