

Research In Progress

Project Title: Biomechanical Investigations using Human Surrogates

Project Manager: Peter Martin

Description: Evaluate biomechanical response of humans using human surrogates and volunteers. Injury research shall be conducted to determine mechanisms of injury and to derive injury tolerances.

Project Initiation Date: Sep-07

CloseDate: 8/30/2012

Contract Number: DTNH22-07-H-00173

Project Awarded To: Medical College of Wisconsin

Total Contract Cost: \$935,000.00

Date Added: 5/22/2007
