<sup>1-</sup> 49 CFR Part 543 – This regulation encourages the installation of antitheft devices as standard equipment in factory-delivered motor vehicles. This regulation allows for exemption from the parts-marking requirements of the Theft Prevention Standard. A manufacturer may petition the agency for exemption of a high-theft vehicle line when it plans to install a standard equipment antitheft device on the entire line. However, the agency must first determine that the antitheft device to be installed on the line is “likely to be as effective in reducing and deterring motor vehicle theft as parts-marking”. [Major Legislation and Rulemaking Actions](#)
