Vehicle Theft Prevention Quick Reference Guide

FOR THE
LAW ENFORCEMENT
COMMUNITY

The National Highway Traffic Safety Administration (NHTSA) is responsible for establishing and enforcing vehicle antitheft regulations. Motor vehicle theft is a growing problem that results in billions of dollars in losses every year. NHTSA has developed this annual guide to provide the law enforcement community with a concise reference tool to help identify passenger motor vehicles that have been exempted from the parts-marking requirements for model years 2018–2019 because they contain an antitheft device. The guide should also assist law enforcement in its prosecution and motor vehicle theft prevention efforts. This updated Vehicle Theft Prevention Quick Reference Guide for the Law Enforcement Community provides a quick-reference, comprehensive summary of the vehicles that have antitheft devices installed as standard equipment, and identifies which vehicles are exempted from the parts-marking requirements, the type of exemption granted (partial or full), and the production years for which the exemptions apply.

Parts-marking requirements apply to:

- all passenger cars;
- all multipurpose passenger vehicles with gross vehicle weight ratings of 6,000 pounds or less;
- all light-duty trucks with gross vehicle weight ratings of 6,000 pounds or less determined to be high-theft; and
- all low-theft, light-duty trucks with gross vehicle weight ratings of 6,000 pounds or less having a majority of their major parts interchangeable with those of a passenger motor vehicle line subject to the theft prevention standard.

On April 6, 2004, NHTSA adopted a phase-in of the parts-marking requirements (69 FR 17960) over a two-year period. Specifically, vehicle lines representing not less than 50 percent of a manufacturer's production of vehicle lines that were not subject to the parts-marking requirements before September 1, 2006, must have been marked by September 1, 2007. Because of the phase-in, this publication lists the vehicle lines reported by manufacturers that were used during the phase-in provision to delay parts-marking until September 1, 2008. It also lists those vehicle lines reported by manufacturers as having an annual vehicle production of 3,500 or less, which are excluded from the parts-marking requirements, and their new 2018–2019 vehicle line introductions.

Accordingly, this publication provides updated information to the law enforcement community **only on new light-duty truck lines that have become subject to the parts-marking requirements, and information on existing and newly exempted vehicle lines.**

Comprehensive information on vehicle lines that were determined to be likely high-theft and subject to the parts-marking requirements prior to extension of the rule may be obtained from previous issues of the Parts-Marking Quick Reference Guide for the Law Enforcement Community, available online at www.nhtsa.gov/theft.

This guide provides the most reliable and updated information available from the vehicle manufacturers at the time of publication.

SL500		1994–2002	Replaced the 500SL in MY 1994. The 129 line SL500 model was not produced after MY 2002.
SL600		1994–2002	Renamed the SL600 in MY 1994.
202 Line¹⁶ (C-Class)	FULL	1996–2000	Replaced the 201 line (190-Class) in MY 1994. Replaced by the 203 line (C-Class) in MY 2001.
C220		1996	The 202 line C220 model was not produced after MY 1996.
C230		1997–2000	The 202 line C230 model was not produced after MY 2000.
C280		1996–2000	The 202 line C280 model was not produced after MY 2000.
C36		1996–1997	The 202 line C36 model was not produced after MY 1997.
C43		1998–2000	The 202 line C43 model was not produced after MY 2000.

¹⁵ Includes the 300SL, 500SL, 600SL, SL320, SL500, and SL600 models.

¹⁶ Includes the C220, C230, C280, C36, and C43 models.

MAKE/LINE	EXEMPTION TYPE (FULL/PARTIAL)	MODEL YEARS EXEMPTED FROM PARTS-MARKING	REFERENCE INFORMATION (MY=MODEL YEAR)
MERCEDES-BENZ (continued)			
C Line Chassis ¹⁷ (C-Class/CLK-Class/GLK-Class/ GLC-Class)	FULL	2008–2019	The 202 line (C-Class) was replaced by the 203 line in MY 2001. The 203 line was replaced by the 204 line (C-Class) in MY 2008. The 204 line was replaced by the 205 line in MY 2015.
(C-Class/CLK-Class)		2008–2019	Two-door versions (coupe & cabriolet) of the C-Class were renamed the CLK-Class (209 line) in MY 2008, then renamed again as C-Class Coupe (204 line in MY 2012, then 205 line in MY 2017) & C-Class Cabriolet (205 line starting in MY 2017).
(GLK-Class)		2010–2015	The GLK is based on the 204 chassis. Renamed GLC-Class in MY 2016.
(GLC-Class)		2016–2019	The 204 line was replaced by the 253 line in MY 2016. The GLK-Class was renamed the GLC-Class in MY 2016.
E Line Chassis ¹⁸ (E-Class/CLS-Class)	FULL	2006–2019	The 211 line (E-Class) was replaced by the 212 line in MY 2010. Two-door versions (coupe & cabriolet) of the E-Class were renamed the 207 line in MY 2010, and replaced by the 238 line in MY 2018.
(E-Class) ¹⁹		2006–2019	The 212 line was replaced by the 213 line in MY 2016.
(CLS-Class) ²⁰		2006–2019	The CLS is based on the 211 chassis. The 211 line was replaced by the 218 line in MY 2013; and replaced by the 257 line in MY 2019.
NGCC Chassis ²¹ (CLA-Class/GLA-Class/B-Class/ A-Class)	FULL	2014–2019	
A220		2019	The A-Class is based on the 177 chassis.
B250e		2016–2017	The new B-Class plug-in electric vehicle was replaced by the 242 line in MY 2016.
CLA250		2014–2019	The CLA is based on the 117 chassis.
CLA45 AMG		2014–2019	The CLA is based on the 117 chassis.
GLA250		2015–2019	The 117 line was replaced by the 156 line in MY 2015.

¹⁷ The “C Line Chassis” combined the C-Class (204 line) and the CLK-Class (209 line) in MY 2008. The GLK-Class (204) line was added to the C Line Chassis in MY 2010.

¹⁸ The “E Line Chassis” combined the E-Class (211 line) and the CLS-Class (219 line) in MY 2008.

¹⁹ Includes the E55, E63 AMG, E320 CDI, E320 BLUETEC, E350 BLUETEC, E250d, E350, E400h, E500, and E550 models.

²⁰ Includes the CLS400, CLS500, CLS550, CLS55 AMG, and CLS63 AMG models.

²¹ The “NGCC Chassis” line includes the CLA-Class (117) composed of the CLA250, and CLA45 AMG models, and the new GLA-Class (156) composed of the GLA250 and GLA 45 AMG models.

BACKGROUND

In 1984, the Motor Vehicle Theft Law Enforcement Act was created. It added Title VI to the Motor Vehicle and Information Cost Savings Act (recodified as Chapter 331 of Title 49, United States Code). As a means to prevent the theft of motor vehicles for their parts, the 1984 Theft Act required passenger cars and the major replacement parts for those cars to have vehicle identification numbers. This act required the Secretary of Transportation to complete a number of rulemaking actions targeted to reduce and deter motor vehicle theft. These rulemaking actions established standards for selecting high-theft cars and for identifying which parts of these high-theft cars should be marked with the vehicle identification number. Future rulemakings required the compilation and publication of theft rates for passenger vehicles.

On October 24, 1985, NHTSA published the Federal Motor Vehicle Theft Prevention Standard, 49 CFR Part 541. The purpose of this standard is to reduce motor vehicle theft by assisting law enforcement authorities in tracing and recovering the parts from stolen vehicles. The standard requires manufacturers to inscribe or attach the vehicle identification number (VIN) onto major parts of vehicles identified by the agency as likely high-theft car lines. This standard became effective beginning with the 1987 model year and required that selected high-theft car lines have 12 (two-door models) or 14 (four-door models) of its major components parts-marked with the VIN.

Each vehicle in a high-theft line must have its major parts and major replacement parts marked unless the vehicle line is granted an exemption from the parts-marking requirements. The vehicle can be exempted if an antitheft device has been installed as standard equipment on the entire line.

On August 28, 1985, NHTSA published the Procedures for Selecting Lines to Be Covered by the Theft Prevention Standard, 49 CFR Part 542. This August 1985 regulation established procedures to determine which passenger motor vehicle lines (passenger cars only) are covered by the Theft

Prevention Standard. These procedures require automobile manufacturers to provide NHTSA with information necessary to select whether a new vehicle introduced for sale into the United States is likely to be a high-theft line and subject to the parts-marking requirements. On April 26, 1994, this regulation was amended to apply to all passenger cars, multipurpose passenger vehicles, and light-duty trucks (rated at 6,000 pounds gross vehicle weight or less).

On September 8, 1987, NHTSA published the regulation titled Exemption from the Vehicle Theft Prevention Standard, 49 CFR Part 543. This regulation encourages the installation of antitheft devices as standard equipment in factory-delivered motor vehicles. This rule allows for exemption from the parts-marking requirements of the Theft Prevention Standard. A manufacturer may petition for exemption of a high-theft vehicle line when it plans to install a standard equipment antitheft device on the entire line. The agency must determine that the antitheft device to be installed on the line is “likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements.” On March 8, 1994, this regulation was amended to limit the number of high-theft lines that could be exempted per model year.

As a result of an increase in motor vehicle thefts and associated crimes, the Anti Car Theft Act of 1992 (the 1992 Theft Act) was created. The 1992 Theft Act identified carjackings and owning or operating a “chop shop” as Federal crimes, carrying with them stiff criminal penalties. The 1992 Theft Act amended the Theft Prevention Standard by extending the Federal parts-marking requirements to include light-duty trucks and multipurpose passenger vehicles (with a gross vehicle weight rating of 6,000 pounds or less). On December 13, 1994, the final rule amending the Theft Prevention Standard was published. This December 1994 rulemaking extended the parts-marking requirements as follows: (a) included multipurpose passenger vehicles and light-duty trucks; (b) listed the major component parts and replacement parts to be

marked for each of the classes of vehicles such as the engine, transmission, front/rear bumper, right/left front fender, hood, right/left front door, right/left rear door, sliding or cargo door(s), right/left quarter panel (passenger cars), right/left-side assembly (MPVs), pickup box, and/or cargo box (light-duty trucks), rear doors, decklid or hatchback and tailgate; and (c) established a new median theft rate (3.5826) for all passenger motor vehicles. This amendment became effective beginning with MY 1997 vehicles.

On April 6, 2004, NHTSA published a Final Rule extending the anti-theft parts-marking requirements of the Federal Motor Vehicle Theft Prevention Standard, CFR Part 541. This regulation expanded NHTSA's anti-theft parts-marking requirements to include: (1) all below-median-theft-rate passenger cars and multipurpose passenger vehicles (with a gross vehicle weight rating of 6,000 pounds or less), and (2) below-median-theft-rate light-duty trucks with major parts that are interchangeable with passenger motor vehicles subject to parts-marking. This final rule became effective September 1, 2006.

On May 19, 2005, NHTSA published a Final Rule responding to petitions for reconsideration of the new rule extending the anti-theft parts-marking requirements. This Final Rule made the following changes and clarifications to the agency's expanded parts-marking requirements: (1) manufacturers are no longer required to submit "likely theft rate determinations" for vehicle lines introduced prior to the September 1, 2006, effective date if the manufacturers choose to voluntarily mark the new vehicle lines immediately after their introduction; (2) manufacturers are permitted to petition the agency to exempt low-theft vehicle lines equipped with anti-theft devices from the parts-marking requirements beginning with model year 2006; and (3) vehicle lines with annual production of not more than 3,500 vehicles are excluded from the parts-marking requirements.

On September 29, 2016, NHTSA published a Final Rule amending the regulation titled Exemption from Vehicle Theft Prevention Standard, 49 CFR Part 543. Specifically, 543.7 adds a streamlined exemption procedure for immobilizer-equipped vehicles by adding performance criteria for immobilizers. This amendment allows manufacturers to obtain an exemption from the theft prevention standard by complying with any of the four performance criteria currently accepted by Transport Canada and brings the U.S. anti-theft requirements more into line with those of Canada. Manufacturers simply need to provide data to the agency showing that the device meets the performance criteria and a statement ensuring the reliability and durability of the device.

NHTSA also retained the existing process for gaining an exemption from the vehicle theft prevention standard. Therefore, manufacturers are still able to petition the agency to install other anti-theft devices as standard equipment in a vehicle line to obtain an exemption from the theft prevention standard. However, this amendment does not increase the number of exemptions available to a manufacturer from the theft prevention standard.
