

VEHICLE INFORMATION / TEST SPECIFICATIONS
FMVSS No. 104

1. Provide two full-size reproduced copies of the actual windshield pattern showing areas A, B, and C established as shown in figures 1 and 2 of SAE Recommended Practice J903a, dated May 1966, using angles specified in columns 3 to 6 of Tables I, II, III, or IV as applicable as shown in FMVSS No. 104.

Each full-size windshield pattern should be clearly labeled with the vehicle make, model, and model year as well as each of the critical areas A, B, and C.

Each full-size windshield pattern should clearly depict the “daylight opening” perimeter line.

2. Provide the windshield glass exposed surface area.
3. Provide the windshield glass surface area for critical areas A, B, and C.
4. Provide the parked location dimension of the wiper blades with respect to the bottom of the windshield.
5. Provide the wiper speed used to produce the effective wiper pattern.
