2 Highway safety planning process

Enter description of the data sources and processes used by the State to identify its highway safety problems, describe its highway safety performance measures, establish its performance targets, and develop and select evidence-based countermeasure strategies and projects to address its problems and achieve its performance targets.

HIGHWAY SAFETY PLANNING PROCESS

Data Sources and Processes

OHSJP’s Statistical Analysis and Research Section collects and analyzes information concerning traffic collisions on South Carolina’s roadways. OHSJP statisticians perform analysis on traffic data to determine when and where collisions are occurring, the demographics involved in collisions, and the specific causes of collisions. This information is presented to OHSJP staff to be used for the planning and implementation of appropriate countermeasures (e.g., enforcement and education initiatives) and program development efforts to help reduce traffic collisions, injuries, and fatalities. The Statistical Analysis and Research Section also houses a staff person who performs data entry services. Specifically, several fields of information from completed traffic collision reports are input by operators into the Traffic Collision Master File. Responsibilities of this section are far-ranging and encompass programming, consultation, descriptive analysis, inferential statistical analysis, report preparation, etc. The current databases maintained and used for statistical analysis are detailed below:

Traffic Collision Master File
Traffic collisions that occur in South Carolina and are investigated by law enforcement agencies are reported to the SCDPS on the Traffic Collision Report Form (TR-310), which is designed and printed by the OHSJP. Data from the TR-310 is either electronically reported or entered by data entry staff into the Traffic Records Master File. Data entered into the Traffic

Records Master File are retrieved by OHSJP statisticians and used for performing statistical studies for various users, including law enforcement agencies, governmental units, attorneys, engineers, media representatives, and private users. These studies, conducted upon written request, are primarily descriptive in nature and focus on a specific traffic collision topic ranging from collisions at a specific intersection or section of roadway, to collisions during specific months in selected counties, to rankings of specific intersections in a county or jurisdiction.

South Carolina Traffic Fatality Register
The OHSJP maintains the Traffic Fatality Register as an up-to-date preliminary process of counting traffic fatalities. Comparisons with previous years through the same date are required as an ongoing assessment of traffic safety programs. Data for this file are received through the Highway Patrol Communications Office and TR-310s received from all investigative agencies. The Traffic Fatality Register is used on a daily basis to record the latest available information concerning persons who die in traffic collisions in South Carolina, including passengers, pedestrians, bicyclists, etc. Through the Traffic Fatality Register, a report is generated on a daily basis and distributed to highway safety committees and program stakeholders, as well as community and constituent groups. The SCDOT, SLED, SCCJA, NHTSA Region 4 office, and local law enforcement agencies are among the recipients of this critical fatality and seat belt use data distributed through our Statistical Analysis Center.

Fatality Analysis Reporting System (FARS)
FARS was established in the 1970s as a uniform system for gathering information on fatal traffic collisions in the United States. The data collected is used by a large number of organizations in government, academia, and private industry to analyze a wide variety of traffic safety issues.

FARS collects uniform data from each of the 50 states plus the District of Columbia and Puerto Rico. Participation is required and consists of gathering and transmitting fatal collision information to a central data center in Washington, D.C. Currently, data transmission is performed in each state by means of a personal computer linked, via telephone lines with moderns (MDE System), to the headquarters in Washington.

SAFETYNET
SAFETYNET is an automated information management system designed to support Federal and State Motor Carrier Safety Programs by allowing monitoring of the safety performance of Interstate and Intrastate commercial motor carriers. OHSJP and the State Transport Police collaborate in maintaining this data. OHSJP uses the crash data from the Traffic Collision Master File to upload information regarding commercial vehicle activity. Data is uploaded weekly to the Motor Carrier Management Information Systems (MCMIS) carrier’s profile nationwide.

South Carolina Collision and Ticket Tracking System (SCCATTS)
The South Carolina Collision and Ticket Tracking System (SCCATTS) is a collaborative effort among several SCDPS divisions and various external agencies created to address the shortcomings of a system that predominantly generated and processed traffic collision reports and traffic citations manually. The goal of SCCATTS is to enhance highway safety through the timely collection/analysis of, and response to, pertinent data.

FFY 2019 PROCESS TO IDENTIFY SOUTH CAROLINA’S HIGHWAY SAFETY PROBLEMS

Phase 1
The FFY 2019 Problem Identification process began with a statewide Statistical Overview conducted by the Statistical Analysis and Research Section housed within the Office of Highway Safety and Justice Programs (OHSJP) to give a picture of the highway safety problems in general in the State of South Carolina. The overview included an identification of problems and priority counties in the state regarding traffic safety issues and concerns and was presented to the Office of Highway Safety and Justice Programs (OHSJP) Management staff and Program Coordinators. The analysis utilized traffic data trends showing all counties in the State of South Carolina in six statistical categories regarding fatal and severe-injury crashes (number DUI-related, percentage DUI-related, number speed-related, percentage speed-related, number alcohol and/or speed-related, and percentage alcohol and/or speed-related). Additional data was provided relative to occupant protection statistics, such as statewide safety belt use, child passenger safety seat use, and unbelted occupant traffic fatalities. In addition, traffic statistics were provided for vulnerable roadway users (motorcyclists, moped riders, pedestrians, and bicyclists). Priority areas for highway safety initiatives for FFY 2019 were tentatively adopted as Impaired Driving Countermeasures; Occupant Protection; Police Traffic Services/Speed Enforcement; and Traffic Records (Statewide Emphasis).

Phase 2
OHSJP staff met on several occasions to determine funding priorities (programmatic and geographic) and develop a plan for project development for FFY 2019. During these meetings, OHSJP staff identified areas of the state where highway safety problems exist that are void of grant-funded projects or other efforts to reduce crashes and fatalities. The project development plan included, based on an estimate of federal funds being available in FFY 2019, soliciting quality grant applications from entities in those geographic areas where the greatest highway safety problems exist and for the type of projects that are likely to have the most impact.

The analysis utilized traffic data trends showing all counties in the State of South Carolina in six statistical categories regarding fatal and severe-injury crashes (number DUI-related, percentage DUI-related, number speed-related, percentage speed-related, number alcohol and/or speed-related, and percentage alcohol and/or speed-related). Additional data was provided relative to occupant protection statistics, such as statewide safety belt use, child passenger safety seat use, and unbelted occupant traffic fatalities. In addition, traffic statistics were provided for vulnerable roadway users (motorcyclists, moped riders, pedestrians, and bicyclists). Priority areas for highway safety initiatives for FFY 2019 were tentatively adopted as Impaired Driving Countermeasures; Occupant Protection; Police Traffic Services/Speed Enforcement; and Traffic Records (Statewide Emphasis).

South Carolina Performance Measures
Listed in the Table below are South Carolina’s Highway Safety Performance Measures which are consistent with the performance measures developed by USDOT in collaboration with the Governor’s Highway Safety Association (GHSA). The Table contains data points used to determine appropriate targets for success outlined in the Plan document. Data-driven targets for each performance measure have been established and placed in the appropriate corresponding program area within the HSP document. These performance targets will allow the OHSJP to track the state’s progress toward meeting each target from a specific baseline.

Justification for Performance Targets
A description of the traffic safety performance measures, corresponding goals with established performance targets, justification for the targets, and grant projects selected for South Carolina’s FFY 2019 Highway Safety Plan are individually referenced by program area throughout this document. Grant projects identified for funding in this plan will be implemented through local and statewide traffic safety enforcement programs that are proven to be effective in preventing traffic violations, crashes, injuries, and fatalities in areas of South Carolina most at risk for such incidents.

Process for Setting Targets in the HSP
When setting targets in the HSP for the core performance measures, the statisticians of the SC Statistical Analysis and Research Section performed an extensive analysis of the data related to each measure. South Carolina utilized an eight -data-point graphical analysis with a five-year rolling average for all but one of the performance measures. The exception was the seatbelt use rate performance measure, which utilizes a year-to-year analysis. For all the measures, after the data points were plotted and the graphs were created, a trend line was added that could be used to predict future values. Trend lines were reviewed using linear and non-linear equations with R-squared (best fit measure) values, the feasibility of the predicted trend values, and the 2017 preliminary data. Also, an analysis was conducted on the feasibility of getting the five-year average down given the upward trend of some measures and the recent high fatality values the past few years.
The statisticians then performed additional data analyses, often examining the data on an annual basis to determine the percent change from year to year. If, for example, the five-year moving average displayed a general downward trend for the total number of fatalities, but an examination of the fatality count by year revealed a significant increase in fatalities from 2014 to 2015 and 2015 to 2016, the target value from the trend line equation may have proven unfeasible. When this occurred, the statisticians, after consultation with other OHSJP staff, would adjust the target value based on additional data analyses and examination of Highway Safety projects, proposed countermeasures, and other factors unique to South Carolina which could impact the possibility of reaching a lofty target based solely on trend line data. Unique factors examined included vehicle miles traveled, population changes, economic impact, legislative roadblocks, cultural dynamics, and policy issues. South Carolina used a variety of models as part of its trend analyses. Graphical models such as linear, logarithmic, and polynomial were used to determine a best fit, often depending on the normality of data for each performance measure. For example, a linear trend for the total number of fatalities may not have been the best fit due to the large and often unpredictable fluctuation in this figure from year to year.

Performance Targets (Annual Goals)

Annual Goals are individually listed and referenced by program area throughout the Highway Safety Plan.

Identify the participants in the processes (e.g., highway safety committees, program stakeholders, community and constituent groups).

The state receives significant input from its Traffic Records Coordinating Committee (TRCC), which is composed of members from the SC Department of Public Safety (SCDPS), the SC Department of Transportation (SCDOT), the SC Department of Motor Vehicles (SCDMV), the SC Judicial Department (SCJD), and the SC Department of Health and Environmental Control (SCDHEC), as well as local law enforcement, in the continuous upgrading of its traffic records and data collection systems. The TRCC annually updates the state’s Traffic Records Strategic Plan, which is recommended by the TRCC Working Group and approved by the TRCC Executive Group. Projects contained in the TRSP are also included in this document. The countermeasure strategies identified in this plan are performance-based and were developed with significant input from the Statistical Analysis Center, which is housed within the Office of Highway Safety and Justice Programs (OHSJP), as well as with input from a variety of councils/task forces maintained and/or participated in by the SCDPS.

The OHSJP receives input from its Motorcycle Safety Task Force, which is composed of members from SCDPS, SCDOT, the SC Technical College System, AARP, motorcycle advocacy groups, SCDMV, and state and local law enforcement, in regards to its planned motorcycle safety activities for the upcoming year.

In addition, the OHSJP receives significant input from the SC Impaired Driving Prevention Council (SCIDPC), which is a multi-agency, multi-disciplinary task force, seeking to utilize a variety of approaches in attacking the DUI problem in the state and is made up of representatives from law enforcement, the criminal justice system (prosecution, adjudication, and probation), driver licensing, treatment and rehabilitation, ignition interlock program, data and traffic records, public health, and communication. The OHSJP develops an Impaired Driving Countermeasures Plan (IDCP) annually that is approved by the SCIDPC. Activities and strategies contained in the IDCP are also contained in the HSP. The SCIDPC is composed of representatives from the following agencies (please note primary agency function[s] indicated by each listed agency):

- SC Office of the Governor – executive, administration, advisory
- SCDPS – law enforcement, communication, data/traffic records, OHSJP
- SCDOT – data/traffic records
- SCDMV – driver licensing, data/traffic records, ignition interlock device program
- SC Department of Corrections (SCDC) – criminal justice
- SC Dept. of Alcohol and Other Drug Abuse Services (SCDAODAS) – treatment/rehabilitation/prevention, data
- SC Legislative – administration, legislation
- SC Department of Insurance (SCDOI) – data
- SC Commission on Prosecution Coordination (SCCPC) – prosecution
- SC Solicitors Association (SCSoA) – prosecution
- SC Dept. of Probation, Parole and Pardon Services (SCDPPPS) – criminal justice, ignition interlock device program
- SC Criminal Justice Academy (SCCJA) – law enforcement training
- SC State Law Enforcement Division (SLED) – law enforcement
- SC Department of Education (SCDOE) – education
- SC Judicial Department (SCJD) – criminal justice, adjudication
- SC Attorney General’s Office (SCAGO) – criminal justice
- SC Sheriffs’ Association (SCSA) – law enforcement
- SC Law Enforcement Officers’ Association (SCLEOA) – law enforcement
- SC Summary Court Judges’ Association (SCSCJA) – criminal justice, adjudication
- SC Campus Law Enforcement Association (SCCLEA) – law enforcement
- SC Coroners’ Association (SCCA) – public health, criminal justice
- SC Trucking Association (SCTA) – administration, advisory
- Behavioral Health Services Association (BHSA) – public health, treatment/rehabilitation
- SC Victims Assistance Network (SCVAN) – advocacy, victim services
- SC Mothers Against Drunk Driving (SCMADD) – advocacy, victim services
- Families of Highway Fatalities (FHF) – advocacy, victim services
- State Office of Victim Assistance (SOVA) – advocacy, victim assistance
- American College of Emergency Physicians (ACEP) – public health
- Primary Care Physician Association (PCPA) – public health
- American Automobile Association (AAA) – administration, data, advocacy
- Safety Council of South Carolina (SC Chapter of National Safety Council) – advocacy, data
- SC Restaurant and Lodging Association (SCRLA) – administration, business/industry
- Federal Highway Administration (FHWA) – advisory
- National Highway Traffic Safety Administration (NHTSA) – advisory
- Federal Motor Carrier Safety Administration (FMCSA) - advisory

Enter description and analysis of the State’s overall highway safety problems as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets, selecting countermeasure strategies, and developing projects.

When setting targets in the HSP for the core performance measures, the statisticians of the SC Statistical Analysis and Research Section performed an extensive analysis of the data related to each measure. South Carolina utilized an eight-data-point graphical analysis with a five-year rolling average for all but one of the performance measures. The exception was the seatbelt use rate performance measure, which utilizes a year-to-year analysis. For all the measures, after the data points were plotted and the graphs were created, a trend line was added that could be used to predict future values. Trend lines were reviewed using linear and non-linear equations with R-squared (best fit measure) values, the feasibility of the predicted trend values, and the 2017 preliminary data. Also, an analysis was conducted on the feasibility of getting the five-year average down given the upward trend of some measures and the recent high fatality values the past few years.

The statisticians then performed additional data analyses, often examining the data on an annual basis to determine the percent change from year to year. If, for example, the five-year moving average displayed a general downward trend for the total number of fatalities, but an examination of the fatality count by year revealed a significant increase in fatalities from 2014 to 2015 and 2015 to 2016, the target value from the trend line equation may have proven unrealistic. When this occurred, the statisticians, after consultation with other OHSJP staff, would adjust the target value based on additional data analyses and examination of Highway Safety projects, proposed countermeasures, and other factors unique to South Carolina which could impact the possibility of reaching a lofty target based solely on trend line data. Unique factors examined included vehicle miles traveled, population changes, economic impact, legislative roadblocks, cultural dynamics, and policy issues. South Carolina used a variety of models as part of its trend analyses. Graphical models such as linear, logarithmic, and polynomial were used to determine a best fit, often depending on the normality of data for each performance measure. For example, a linear trend for the total number of fatalities may not have been the best fit due to the large and often unpredictable fluctuation in this figure from year to year.

Performance Targets (Annual Goals)
Annual Goals are individually listed and referenced by program area throughout the Highway Safety Plan.

Enter discussion of the methods for project selection (e.g., constituent outreach, public meetings, solicitation of proposals).

PROCESS FOR DEVELOPING AND SELECTING EVIDENCE-BASED COUNTERMEASURES AND PROJECTS

Development of the Funding Guidelines

With the completion of the Problem Identification process, staff developed the 2019 Highway Safety Funding Guidelines. This document set guidelines for the submission of grant applications for highway safety funding in accordance with the priorities established through the problem identification process and basic federal requirements of the Section 402 program. Under the new performance-based process, the guidelines stipulated that “Applicants who do not demonstrate a traffic safety problem/need will not be considered for funding.” In order to place funding where the problems exist, the Guidelines further specified that “Priority consideration will be given to applicants proposing major alcohol countermeasures, occupant protection, speed enforcement, and education/outreach projects within the counties identified previously as having the highest numbers and percentages of alcohol and/or speed-related traffic collisions, deaths, and injuries during the last three years.” The guidelines (1) described the highway safety problems identified by OHSJP staff; (2) discussed the types of projects desired and for which priority would be given based on the problem identification process; (3) described allowable and unallowable activities/program costs; (4) discussed the areas eligible for funding; (5) provided the criteria by which applications would be reviewed and evaluated; (6) gave a checklist for completion of the grant application; (7) discussed the responsibilities of funded applicants; and (8) gave specific requirements for various types of applications submitted under the various program areas.

Solicitation Process

Once the guidelines were completed, a full page postcard was mailed on October 16, 2017 to approximately 700 recipients, including state and local law enforcement agencies, state agencies, school districts, Project Directors of current grant projects, coroners, and Safe Kids coalitions within the state informing them of the grant opportunity; inviting them to the Funding Guidelines Workshop, and referring them to the Office of Highway Safety and Justice Programs’ website at www.scdps/ohsjp/ for more information. The website contained the complete Funding Guidelines document, as well as a link to the online Highway Safety Grant application through the Grants Management Information System (GMIS), and instructions for the completion of the grant application document. An electronic version of the postcard was mailed on October 18, 2017 to all participants of the South Carolina Law Enforcement Network. The application deadline was Friday, February 2, 2018, at 5:00 p.m.

Workshops for Potential Applicants

A Funding Guidelines workshop was held in Columbia on November 29, 2017, at the South Carolina Department of Public Safety with approximately 60 individuals in attendance. During the workshop, attendees were provided with an explanation of the highway safety problem in South Carolina; a description of the various program areas eligible for funding; an explanation of allowable costs; a description of the types of projects for which priority consideration would be given; a description of the criteria by which applications would be reviewed; specific instructions on the proper completion of the grant application; and a presentation on how to write a winning grant proposal. During the Workshop, everyone received a packet of all items covered in order to review as the material was being presented and to have a reference for their records. Additionally, the workshop included a complete overview of the online grant application and instructions on how to complete and submit the application. Participants came from across the state and represented all sectors of the highway safety community (education, enforcement, etc.). Participants were informed that two completed grant application samples would be available on the SC DPS website to assist in the preparation of their applications.

Highway Safety Strategies and Projects

Each countermeasure strategy and project South Carolina plans to implement to reach the performance targets utilizing Section 402 and Section 405 funding streams during the FFY 2019 grant year is described. The systematic data collection and analysis used in the project selection process supports the successful implementation of an evidence-based traffic safety enforcement program in this state.

Strategies for Project Selection

The deadline for Highway Safety grant applications for FFY 2019 funding was Friday, February 2, 2018, at 5:00 p.m. Grant applications moved through a multi-stage review process. The first stage of the review process involved the Grants Administration Manager, the Planning and Evaluation Coordinator, the Occupant Protection/Police Traffic Services Program Coordinator, and the Senior Accountant for the Office of Highway Safety and Justice Programs reviewing and discussing the applications submitted by the due date and time. A second stage of the review process involved additional meetings to discuss grant applications in detail. Applications for continued and new highway safety activities received from state agencies, political subdivisions, and private, non-profit organizations were reviewed at both stages in accordance with the review criteria listed below:

1. The degree to which the proposal addressed a nationally or state-identified problem area. Primary consideration was granted to those projects which addressed major impaired driving countermeasures, occupant protection, speed enforcement, and traffic records programs within the counties identified previously as having the highest numbers and percentages of alcohol and/or speed-related traffic collisions, deaths, and injuries during the last three years.
2. The extent to which the proposal met the published criteria within the specific emphasis area.
3. The degree to which the subgrantee identified, analyzed, and comprehended the local or state problems. Applicants who did not demonstrate a traffic safety problem/need were not recommended for funding.

4. The extent to which the proposal sought to provide a realistic and comprehensive approach toward problem solution, including documenting coordination with local and state agencies necessary for successful implementation.

5. The assignment of specific and measurable objectives with performance indicators capable of assessing project activity.

6. The extent to which the estimated cost justified the anticipated results.

7. The ability of the proposed efforts to generate additional identifiable highway safety activity in the program area; the ability of the applicant to become self-sufficient and to continue project efforts once federal funds are no longer available.

8. The ability of the applicant to successfully implement the project based on the experience of the agency in implementing similar projects and the capability of the agency to provide necessary administrative support to the project. For continuation projects, the quality of work and the responsiveness to grant requirements demonstrated in past funding years, current or past grant performance, results of past monitoring visits, and the timeliness and thoroughness of required reports were all given consideration.

The first segment of the staffing allowed OHSJP staff to review the application against established criteria and determine the written quality of the grant application. Individual proposals were discussed based on supplemental considerations, such as current or past grant performance, success in attaining self-sufficiency (if a past subgrantee); likelihood of project to significantly reduce crashes, injuries, and fatalities; multi-jurisdictional nature of the project; letters of support from interested parties; and other factors which could affect funding consideration. Once all reviewers had completed their individual reviews, a multi-day staffing review was established.

A formal process for discussion of every application was implemented. The presenting Program Coordinator first outlined the highway safety problem identified in the application and discussed the approach proposed to resolve the problem. At the close of the discussion and/or information gathering, a vote of all reviewers was taken as to whether to recommend denial or approval.

The second stage of the grant review process was based on discussions among the Grants Administration Manager, Business Manager, Highway Safety Program Administrator and Director of the OHSJP to reach a general consensus on each of the grant applications. Upon the conclusion of the two stages of staffing meetings, the third portion of the review process began. Each project was further reviewed and evaluated to ensure that all projects recommended for funding met the established criteria and the final recommendation would reflect the best use of grant funds to address a highway safety issue. Ranking priority for projects recommended for funding was given to (1) ongoing grant applications for the overall management and administration of the Highway Safety grant program; (2) continuation grant applications; (3) new grant applications located in priority counties or addressing one of the Funding Guidelines priority areas; and (4) new grant applications which demonstrated a highway safety problem and were located outside priority counties.

**Data Sources Consulted**

South Carolina /SCDPS Crash Statistics

OHSJP Statistical Analysis Center

S.C. Strategic Highway Safety Plan (March 2015)

SCDPS and SC Department of Transportation

http://www.scdps.gov/docs/Target%20Zero_Final_w_Signatures_15APR15.pdf

Fatality Analysis Reporting System National Highway Traffic Safety Administration

Enter description of the outcomes from the coordination of the Highway Safety Plan (HSP), data collection, and information systems with the State Strategic Highway Safety Plan (SHSP).

**Coordination with HSP and the Strategic Highway Safety Plan (SHSP)/State Highway Safety Improvement Program (HSIP)**

The state views the coordination of the HSP with the SHSP as an effort to build a unified state approach to highway safety. This coordination is evidenced by the performance measures meetings with Metropolitan Planning Organizations (MPO) and SC Department of Transportation (DOT), which are conducted by both the OHSJP and the SC DOT. The coordination is also evidenced by joint enforcement efforts such as the establishment of the Safety Improvement Teams (SIT) for work zones, and the Target Zero teams (see page 56 for additional information), which are funded under SCDOT 164 funding.

South Carolina completed the update of its Strategic Highway Safety Plan (SHSP) in March. The updated plan, titled “Target Zero” (http://www.scdps.gov/docs/Target%20Zero_Final_w_Signatures_15APR15.pdf) was developed in consultation and coordination with federal, state, and local safety partners with the goal of eliminating traffic fatalities and reducing serious traffic-related injuries.

The Emphasis Areas for Target Zero were identified using a data-driven process and include performance measures such as the number and rate of fatalities and serious injuries. The major problem areas for SC remain similar to those identified in the 2007 SHSP with only slight changes in terminology. The nine Emphasis Areas are: Roadway Departure; Intersection and Other High-Risk Roadway Locations; Occupant Protection; Impaired Driving; Excessive Speed; Other High-Risk Drivers; Vulnerable Roadway Users; Commercial Motor Vehicles; and Safety Data Collection, Access, and Analysis. In an effort to coordinate the SHSP with the HSP, the Strategic Highway Safety Plan Manager was actively involved in many of the SHSP steering committee meetings. Data analyses performed by the Statistical Analysis Center for the purpose of identifying the Emphasis Areas for the updated SHSP were also utilized in the setting of performance measures and targets in the FFY 2019 HSP. The state views the coordination of the HSP with the SHSP as an effort to build a unified state approach to highway safety.

**Performance Measures Common to the HSP, SHSP and State Highway Safety Improvement Program**

The performance measures that are common to South Carolina’s HSP, SHSP, and the state’s Highway Safety Improvement Program (HSIP) are the number of Traffic Fatalities, number of Severe Traffic Injuries, and the Traffic Fatality VMT Rate. The Federal Highway Administration (FHWA) and the South Carolina Department of Transportation (SCDOT) are responsible for the development of the HSIP. The SCDPS, SCDOT, FHWA, and other local, state and federal agencies and safety advocates collaborated on the creation of the Strategic Highway Safety Plan (SHSP). The state’s Highway Safety Plan, though developed by the OHSJP, reflects multiple partnerships among a variety of federal, state, and local agencies. The number of Traffic Fatalities, number of Severe Traffic Injuries, and the Traffic Fatality VMT Rate performance measures are mutually identified in the HSP and SHSP with evidence-based targets within emphasis areas that were developed through extensive data analysis. At the current time in the State of South Carolina, the performance measures for the state’s HSIP have not yet been developed. Therefore, there is no document to check against to determine if targets are identical between the HSP and HSIP. However, it should be noted that the performance measures and goals contained within this HSP were mutually agreed upon by SCDPS’s Office of Highway Safety and Justice Programs (OHSJP) Director, Highway Safety Program Administrator, and Strategic Highway Safety Plan (SHSP) Manager, the SC Department of Transportation’s (SCDOT) State Safety Engineer, and the Federal Highway Administration’s (FHWA) Safety and Traffic Engineer for South Carolina, all of whom serve on the state’s Strategic Highway Safety Plan steering committee. The SCDOT State Safety Engineer and the
FHWA-SC Safety and Traffic Engineer also are involved in the development of the Highway Safety Improvement Program for South Carolina. It is understood that the performance measures common to the state’s HSP, SHSP and HSIP are and will be defined identically and appropriately aligned.

C-1) Number of traffic fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

C-1: To decrease the upward trend of traffic fatalities from the 2016 preliminary number of 1,018 to 1,006 by December 31, 2018 with a five year average of 970 from 2014-2018.

As of June 18, 2018, traffic fatalities for the state are down 8.0% when compared to the same time period in 2017 (485 in 2017, 446 in 2018). However, due to the highly preliminary nature of the 2018 figures, the state believes the decrease is much lower; perhaps 3.5% lower than the previous year. The state does anticipate meeting its goal of 1,006 traffic deaths in 2018 and the average 970 traffic deaths from 2014-2018.

C-2) Number of serious injuries in traffic crashes (State crash data files)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

C-2: To decrease the number of serious traffic injuries by 5.4% from the 2011-2015 baseline average of 3,241 to 3,067 for 2014-2018 by December 31, 2018.

State data show that the number of serious traffic injuries in 2016 was 3,049. Preliminary 2017 figures indicate a decrease (6.8%) in serious injuries from 2016 to 2,843. Based on these recent figures, the state anticipates meeting its goal of 3,067 serious traffic injuries average from 2014-2018.

C-3) Fatalities/VMT (FARS, FHWA)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

C-3: To decrease the traffic fatalities/VMT by 9.5% from the 2016 baseline average of 1.89 to 1.71 by December 31, 2018 with a five year average of 1.81 from 2014-2018.

The fatality rate for 2016 in SC was 1.87 (state preliminary data). The estimated rate for 2017 is 1.76. The state anticipates a decrease in the number of fatalities for the year 2017 as compared to 2016. This estimation coupled with the recent increase in vehicle miles traveled in the state, will make the target of a 1.71 fatality rate/100M VMT in 2018 and an average of 1.81 from 2014-2018 possible to achieve.

C-4) Number of unrestrained passenger vehicle occupant fatalities, all seat positions (FARS)
Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

C-4: To decrease unrestrained passenger vehicle occupant fatalities by 0.4% from the 2011-2015 baseline average of 279 to 278 by December 31, 2018.

There were 315 unrestrained passenger vehicle occupant fatalities in 2016. Preliminary state data reveal an increase during 2017 to 316 unrestrained passenger vehicle occupant fatalities. This slight increase overall trends may make it difficult for the state to reach its target of 278 unrestrained passenger vehicle occupant fatalities by the end of 2018.

C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

C-5: To decrease the alcohol-impaired driving fatalities by 2.8% from the 2011-2015 baseline average of 326 to 317 by December 31, 2018.

The number of alcohol-impaired driving fatalities for SC in 2016 (FARS ARF) was 331, a 7.8% increase from 2015. The state working with NHTSA-FARS began re-coding police suspected use variable as no instead of unknown based on various conversations. With this information coupled with the recent increase in alcohol-impaired fatalities in the state will make it difficult to achieve the goal of 317 alcohol-impaired driving deaths in 2018.

C-6) Number of speeding-related fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

C-6: To decrease speed-related fatalities by 0.3% from the 2011-2015 baseline average of 315 to 314 by December 31, 2018.

Speed-related fatalities totaled 381 in 2016 and preliminary state data show a total of 374 speed-related fatalities occurred during 2017, a 1.8% decrease. The preliminary 2017 figure points to a strong possibility of not meeting the goal of 314 speed-related fatalities by the end of 2018.

C-7) Number of motorcyclist fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

C-7: To decrease the motorcyclist fatalities by 0.7% from the 2011-2015 baseline average of 146 to 145 by December 31, 2018.

Preliminary state data reveal that 146 motorcyclist fatalities (figure includes moped operators) during 2017, a 21.1% decrease from 2016, when there were 185 motorcyclist fatalities (figure includes moped operators). Preliminary figures for 2018 indicate that motorcyclist fatalities are slightly down and the moped operator fatalities are slightly up. The state goal of 145 motorcyclist fatalities by 2018 is possible.

C-8) Number of unhelmeted motorcyclist fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

C-8: To decrease the un-helmeted motorcyclist fatalities by 0.9% from the 2011-2015 baseline average of 106 to 105 by December 31, 2018.

The number of un-helmeted motorcyclist fatalities in SC was 133 in 2016 and 117 in 2017 (preliminary state data, figure includes moped operators), representing a 12.0% decrease. The state may have difficulty meeting the 2018 goal of 105 un-helmeted motorcyclist fatalities.

C-9) Number of drivers age 20 or younger involved in fatal crashes (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

C-9: To decrease the number of drivers age 20 and under involved in fatal crashes by 0.9% from the 2011-2015 baseline average of 114 to 113 by December 31, 2018.

There were 108 drivers age 20 and under involved in fatal crashes in 2016. Preliminary state data present 119 drivers involved in fatal crashes who were age 20 or younger in 2017. It remains possible that the state could reach its goal of 113 drivers age 20 and under involved in fatal crashes in 2018.
C-10) Number of pedestrian fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

C-10: To decrease pedestrian fatalities by 0.9% from the 2011-2015 baseline average of 113 to 112 by December 31, 2018.

There were 144 pedestrian fatalities in 2016, and preliminary state data for 2017 indicate 158 pedestrian fatalities. As of June 18, 2018, state data shows a slight decrease from 2017 data. The state will experience difficulty in meeting the goal of 112 pedestrian fatalities in 2018.

C-11) Number of bicyclists fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

C-11: To decrease bicyclist traffic fatalities 6.7% from the 2011-2015 baseline average of 15 to 14 by December 31, 2018.

There were 25 bicyclist fatalities in 2016 and preliminary state data for 2017 indicate 18 bicyclist fatalities. Through June 18, 2018, the state had experienced a preliminary number of seven bicyclist fatalities compared eight during the previous year. It remains possible that the state could reach its goal of 14 bicyclist fatalities in 2018.

B-1) Observed seat belt use for passenger vehicles, front seat outboard occupants (survey)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

B-1: To increase the observed seat belt usage rate by 2.4 percentage points from the 2015 calendar year 91.6% to 94.0% by December 31, 2018.

A statewide survey conducted by the University of South Carolina in June 2017 indicated a safety belt usage rate for South Carolina of 92.3% and 93.9% in June 2016. The 2017 figure represents a decrease over the previous year, but an increase in years prior. The state remains optimistic that it will meet its goal of 94.0% in 2018.

4 Performance plan

Open each performance measure listed below or click Add New to create additional non-core performance measures to provide a list of quantifiable and measurable highway safety performance targets that are data-driven, consistent with the Uniform Guidelines for Highway Safety Programs and based on highway safety problems identified by the State during the planning process.

To decrease the upward trend of traffic fatalities from 1020 (State Preliminary) in 2016 to 960 by December 31, 2019 with a five year average of 988 from 2015-2019.

A shown in Figure C-1 above, the five-year moving average with a polynomial trend analysis projects South Carolina will experience a five-year average number of 1,081 traffic fatalities by December 31, 2019. This equates to an estimated 1,239 annual traffic fatalities for 2019, which is a 21.5% increase from 2016. Preliminary state data compiled by the OHSJP's Statistical Analysis & Research (SAR) section indicates there were 988 traffic fatalities in 2017, a decrease of 3.1% from 1,020 in 2016. Projections based on preliminary 2018 state data from January to May, indicates no change in the number of traffic fatalities when compared to the same time period in prior years. Given the preliminary information for 2017 and 2018 with the general upward trend since 2014, the best trend line calculated was unable to predict the decreases in 2017 and potentially 2018. In conjunction with SCDOT, South Carolina looked at another approach to find a reasonable figure to match the needs of SCDOT and SCDPS. Using the 2016 preliminary figure and the expected decreases in 2017 and 2018 traffic fatalities, OHSJP will set a goal of 988 average traffic fatalities from 2015-2016 with 960 traffic fatalities in 2019, a 2.83% reduction in the number of traffic fatalities by December 31, 2019 from the preliminary 2017 calendar year.

C-2) Number of serious injuries in traffic crashes (State crash data files)

Is this a traffic records system performance measure?

**Figure C-2. South Carolina Serious Traffic Injuries, 5 Year Moving Average with Trend Analysis, 2005-2016**

As shown in Figure C-2 above, the five-year moving average with polynomial trend analysis projects South Carolina will experience a five-year average number of 3,059 serious traffic injuries by December 31, 2019. This equates to an estimated 2,914 annual serious traffic injuries for 2019, which is a 4.4% decrease from 2016. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 2,843 serious traffic injuries in 2017, a decrease of 6.8% from 3,049 in 2016. In conjunction with SCDOT, South Carolina looked at more aggressive five-year average given the continued decreases in serious traffic injuries the past several years. While a change to the serious traffic injuries definition to include more types of injuries will take effect in 2018 on the South Carolina traffic report form, South Carolina does not expect at this time the change will alter the overall downward trend in serious traffic injuries. OHSJP will set a goal of 2,986 average serious traffic injuries from 2015 to 2019 with 2,870 serious traffic injuries in 2019, a 5.9% decrease in serious traffic injuries by December 31, 2019 from the 2016 calendar year.

**C-3) Fatalities/VMT (FARS, FHWA)**

Is this a traffic records system performance measure?

No

**C-3) Fatalities/VMT (FARS, FHWA)-2019**

3. To decrease traffic fatalities/VMT by 10.2%, from the 2016 baseline of 1.87 to 1.68 by December 31, 2019 with a five year average of 1.79 from 2015-2019.
The five-year moving average with polynomial trend analysis did not yield any appropriate trends and no other trend analysis yielded any better results. The preliminary state data compiled by the OHSJP’s SAR section indicates that there were 1.76 traffic fatalities/VMT in 2017, a decrease of 5.9% from 2016. After much discussion between SCDOT and SCDPS-OHSJP staff using fatalities projections and VMT projections, OHSJP will set a goal of 1.79 average traffic fatalities/VMT from 2015 to 2019 with 1.68 traffic fatalities/VMT in 2019, a 10.2% decrease in traffic fatalities/VMT by December 31, 2018 from the 2016 calendar year.

The vehicle miles traveled (VMT) in SC had a significant increase in 2016 (5.2%) and 2017 (3.0%) compared with previous years. The VMT is expected to continue to rise in the next few years, but at a slower rate per SCDOT projections. The US Energy Information Administration is projecting a higher average cost of regular gas in 2018 and then a slight decrease in 2019 (https://www.eia.gov/analysis/).

C-4) Number of unrestrained passenger vehicle occupant fatalities, all seat positions (FARS)

Is this a traffic records system performance measure?

No

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

1. To decrease unrestrained motor vehicle occupant fatalities by 2.9% from the 2016 baseline of 315 to 306 by December 31, 2019.

Figure C-4. SC Unrestrained Motor Vehicle Occupant Fatalities, 5 Year Moving Average with Trend Analysis, 2005-2016

As shown in Figure C-4 above, the five-year moving average with polynomial trend analysis projects South Carolina will experience a five-year average number of 350 unrestrained motor vehicle occupant fatalities by December 31, 2019. This equates to an estimated 431 annual unrestrained motor vehicle occupant fatalities for 2019, which is a 36.8% increase from 2016. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 316 unrestrained motor vehicle occupant fatalities in 2017, an increase of 0.3% from 315 in 2016. However, through our efforts to spread public awareness with campaigns the OHSJP predicts a 1% decrease each year from the baseline. Therefore, the OHSJP has set a goal of 306 unrestrained motor vehicle occupant fatalities in 2019, an overall decrease of 2.9% in unrestrained motor vehicle occupant fatalities by December 31, 2019 from the 2016 calendar year.
C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)

Is this a traffic records system performance measure?

No

<table>

7. To decrease the alcohol-impaired driving fatalities by 7.6% from the 2012-2016 baseline average of 331 to 306 by December 31, 2019.

As shown in Figure C-5 above, the five-year moving average with polynomial trend analysis projects South Carolina will experience a five-year average number of 330 alcohol-impaired driving fatalities by December 31, 2019. This equates to an estimated 306 annual alcohol-impaired driving fatalities for 2019, which is a 7.6% decrease from 2016. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 337 alcohol-impaired driving fatalities in 2017, an increase of 1.8% from 331 in 2016. Based on the state preliminary data and state projections, OHSJP will set a goal of 306 alcohol-impaired driving fatalities by December 31, 2019.

NHTSA uses an imputation method to account for drivers involved in fatal crashes who have missing blood-alcohol content (BAC) results. During an internal review by the state, it was found that the imputed data elements in a large number of cases were being coded as “unknown alcohol involvement by officer determination” should possibly have been coded as “no alcohol involvement by officer determination.” The 2015 data was recoded per NHTSA coding change and the new change of how SC coded these cases in FARS is in effect. These cases were imputed as alcohol-involved at a higher rate by the imputation methodology. The state is working to modify its traffic collision report form to provide more accurate data on officer determination of alcohol impairment when paired with missing test results. These cases should be imputed as alcohol-involved much less frequently than those cases with “unknown” or missing test results.

South Carolina faces unique factors such as: the state’s current DUI law, though stronger than previous years, still has major flaws; the expansion of alcoholic beverage sales to Sunday; and annual per capita beer consumption significantly higher than the state’s population rank among the fifty states.

C-6) Number of speeding-related fatalities (FARS)

Is this a traffic records system performance measure?

No

<table>
<thead>

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

8. To decrease speeding-related fatalities by 2.9% from the 2016 baseline of 381 to 370 by December 31, 2019.

As shown in Figure C-6 above, the five-year moving average with a logarithmic trend analysis projects South Carolina will experience a five-year average number of 288 speeding-related traffic fatalities by December 31, 2019. This equates to an estimated 285 annual speeding-related traffic fatalities for 2019, which is a 25.2% decrease from 2016. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 374 speeding-related traffic fatalities in 2017, a decrease of 1.8% from 2016. After much discussion among OHSJP staff, OHSJP has set a goal of 370 speeding-related traffic fatalities in 2019, a 1.1% decrease in speeding-related traffic fatalities by December 31, 2019 from the 2017 calendar year.

C-7) Number of motorcyclist fatalities (FARS)

Is this a traffic records system performance measure?

No

<table>
<thead>
<tr>
<th>C-7) Number of motorcyclist fatalities (FARS)-2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Target Metric Type: Numeric</td>
</tr>
<tr>
<td>Target Value: 156.0</td>
</tr>
<tr>
<td>Target Period: 5 Year</td>
</tr>
<tr>
<td>Target Start Year: 2015</td>
</tr>
</tbody>
</table>

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

To decrease the motorcyclist fatalities by 0.76% from the 2012-2016 baseline average of 157 to 156 by December 31, 2019.

As shown in Figure C-7 above, the five-year moving average with an exponential trend analysis projects South Carolina will experience a five-year average number of 170 motorcyclist fatalities by December 31, 2019. This equates to an estimated 157 annual motorcyclist fatalities for 2019, which is a 15.1% increase from 2016. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 146 motorcyclist fatalities (includes moped operators) in 2017, a 21.1% decrease in motorcyclist fatalities from 2016. After much discussion among OHSJP staff, OHSJP will set a goal of 156 motorcyclist fatalities in 2019, a 15.7 reduction in motorcyclist fatalities by December 31, 2019 from the 2016 baseline calendar year.

It should be noted that there are factors in South Carolina that may impact, both negatively and positively, the selected target. From a negative perspective, the state’s helmet law is only applicable to moped operators and passengers under the age of 21. In addition, the state endures tremendous legislative lobby efforts from advocacy groups, such as ABATE, which have been successful in derailment attempts to prevent a universal helmet law from being enacted. From the positive side, a recent
move by the SC Department of Motor Vehicles (SCDMV) has potentially improved motorcycle safety in the state. Supported by the South Carolina Motorcycle Safety Task Force, the SCDMV began on June 3, 2013, the implementation of an existing policy which had previously not been enforced.

The SCDMV is no longer issuing automatic renewals of motorcycle beginner’s permits, but is requiring that individuals seeking permit renewals must make an effort to pass the motorcycle operator skills test in order to receive a motorcycle endorsement on their driver’s license. SC decided to emphasize their existing policy to prevent motorcyclists from continuously renewing their beginner permits rather than applying for a motorcycle license. The SC Motorcycle Safety Task Force believes that this policy implementation exerts some pressure among the riding community to seek motorcycle safety training in order to acquire skills necessary for passing the SCDMV motorcycle rider skills test.

On May 19, 2018, the legislature passed several changes to the laws on moped classification as a motor vehicle and licensing and registration requirements. This change to the SC law will take effect in late November 2018. The changes basically add a moped as a motor vehicle, and subject the moped operator to motor vehicle laws and regulations. The moped operator is required to have a regular motor vehicle license or a moped license to operate a moped and the moped must be registered with the SC Department of Motor Vehicles (SCDMV). A registration card must be carried by the moped operator and vehicle tags displayed on the vehicle. The moped is exempt from insurance or tax requirements for motor vehicles. Moped operators can obtain a moped license without regard to his/her eligibility for or status of any other driver’s license, but this license can be revoked, suspended, or canceled as any other license. Also, moped operators are limited to public roadways with a speed limit no greater than 55 MPH.

C-8) Number of unhelmeted motorcyclist fatalities (FARS)

Is this a traffic records system performance measure?

No

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

9. To decrease the un-helmeted motorcyclist fatalities by 1.4% from the 2012-2016 baseline average of 114 to 112 by December 31, 2019.

As shown in Figure C-8 above, the five-year moving average with exponential trend analysis projects South Carolina will experience a five-year average number of 123 un-helmeted motorcyclist fatalities by December 31, 2019. This equates to an estimated 120 annual un-helmeted motorcyclist fatalities for 2019, which is a 9.8% decrease from 2016. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 117 un-helmeted motorcyclist fatalities (includes moped operators) in 2017, a decrease of 12% from 2016. After much discussion among OHSJP staff, OHSJP will set a goal of 112 un-helmeted motorcyclist fatalities in 2019, a 4.3% reduction in un-helmeted motorcyclist fatalities by December 31, 2019 from the preliminary 2017 calendar year.

The state of South Carolina does not have a universal helmet law and has strong legislative grass-roots lobbying efforts in place to fight against helmet law changes. This presents challenges in improving motorcycle safety in general and in saving motorcyclists’ lives on the highways in particular. Other states that have a universal helmet law are experiencing a decrease in un-helmeted motorcyclist fatalities. With no legislation in place to require the use of helmets for moped operators and passengers 21 and over, it is expected that this problem will continue to present a challenge for the state to drive down the number of un-helmeted motorcycle motorcyclist fatalities.
On May 19, 2018, the legislature passed several changes to the laws on moped classification as a motor vehicle and licensing and registration requirements. This change to the SC law will take effect in late November 2018. The changes basically add a moped as a motor vehicle, and subject the moped operator to motor vehicle laws and regulations. The moped operator is required to have a regular motor vehicle license or a moped license to operate a moped and the moped must be registered with the SC Department of Motor Vehicles (SCDMV). A registration card must be carried by the moped operator and vehicle tags displayed on the vehicle. The moped is exempt from insurance or tax requirements for motor vehicles. Moped operators can obtain a moped license without regard to his/her eligibility for or status of any other driver’s license, but this license can be revoked, suspended, or canceled as any other license. Also, mopeds are limited to public roadways with a speed limit no greater than 55 MPH.

C-9) Number of drivers age 20 or younger involved in fatal crashes (FARS)

Is this a traffic records system performance measure?

No

<table>

9. To decrease the number of drivers age 20 and under involved in fatal crashes by 6.47% from the 2012-2016 baseline average of 114 to 107 by December 31, 2019.

As shown in Figure C-9 above, the five-year moving average with power trend analysis projects South Carolina will experience a five year average number of 105 drivers age 20 and under involved in fatal collisions by December 31, 2019, which is a 7.9% decrease from 2012-2016 five-year moving average. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 119 drivers age 20 and under involved in fatal collisions in 2017, an increase of 10.2% from 2016. Based on the model and preliminary state data showing a potential increase in 2017, OHSJP will set a goal of 107 drivers age 20 and under involved in fatal collisions in 2019, which is one less than the base annual number of 108 for 2016.

C-10) Number of pedestrian fatalities (FARS)

Is this a traffic records system performance measure?

9. To decrease pedestrian traffic fatalities by 0.7% from the 2016 baseline of 144 to 143 by December 31, 2019.
As shown in Figure C-10 above, the five-year moving average with polynomial trend analysis projects South Carolina will experience a five-year average number of 143 pedestrian fatalities by December 31, 2019. This equates to an estimated 146 annual pedestrian fatalities for 2019, which is a 1.4% increase from 2016. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 158 pedestrian fatalities in 2017, an increase of 9.7% from 2016. Based on the polynomial trend analysis, the 2016 calendar year, and the ongoing efforts of the OHSJP in public awareness, OHSJP has set a goal of 143 pedestrian fatalities in 2019, a 9.5% decrease in pedestrian fatalities by December 31, 2019 from the preliminary 2017 calendar year.

**C-11) Number of bicyclists fatalities (FARS)**

**Is this a traffic records system performance measure?**

No

---

**Target Metric Type: Numeric**

**Target Value:** 15.0

**Target Period:** 5 Year

**Target Start Year:** 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

9. To decrease bicyclist traffic fatalities by 9.6% from the 2012-2016 baseline average of 17 to 15 by December 31, 2019.

As shown in Figure C-11 above, the five-year moving average with polynomial trend analysis projects South Carolina will experience a five-year average number of 23 bicyclist traffic fatalities by December 31, 2019. This equates to an estimated 23 annual bicyclist traffic fatalities for 2019, which is an 8% decrease from 2016. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 18 bicyclist traffic fatalities in 2017, a decrease of 28% from 2016. Based on the small number of fatalities and stabilization of the number of fatalities in the past few years despite the spike in 2016, OHSJP has set a goal of 15 bicyclist traffic fatalities in 2019, a 16.7% reduction in bicyclist traffic fatalities by December 31, 2019 from the preliminary 2017 calendar year.

**B-1) Observed seat belt use for passenger vehicles, front seat outboard occupants (survey)**

**Is this a traffic records system performance measure?**

No

---

**Target Metric Type: Percentage**

1. To increase observed seatbelt usage rate by 0.1 percentage points from the 2016 calendar base year 93.9% to 94% by December 31, 2019.

**Figure B-1. South Carolina Observed Seatbelt Usage Rate, 5 Year Moving Average with Trend Analysis, 2005-2016**

As shown in Figure B-1 above, the five-year moving average with polynomial trend analysis projects South Carolina will experience a five-year average of 92.9% observed seatbelt usage rate by December 31, 2019. This equates to an estimated 90.7% observed seatbelt usage rate in 2019. The annual seatbelt observational study indicated a 92.3% observed seatbelt usage rate in 2017, a decrease of 1.6 percentage points from 2016. Based on fluctuation of the percentage in the past few years in the low 90s and the difficulty in obtaining the remaining percentage points, OHSJP will set a goal of 94% observed seatbelt usage rate in 2019, a 1.7 percentage point increase in the observed seatbelt usage rate by December 31, 2019 from the 2017 calendar year.

**C-3R South Carolina Traffic Fatalities/VMT (Rural), 5 Year Moving Average with Trend Analysis, 2005-2016**

Is this a traffic records system performance measure?

No

1. To decrease traffic fatalities/VMT (Rural) 14.1% from the 2012-2016 baseline average of 2.63 to 2.26 by December 31, 2019.
As shown in Figure C-3R (Rural) above, the five-year moving average with a polynomial trend analysis projects South Carolina will experience a five-year average number of 2.41 traffic fatalities/VMT (Rural) by December 31, 2019. This equates to an estimated 2.26 annual traffic fatalities/VMT (Rural) for 2019. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 988 traffic fatalities in 2017, a decrease of 3.1% from 1,020 in 2016. Projections based on preliminary 2018 state data from January to April, indicates a slight decrease in the number of traffic fatalities when compared to the same time period in 2017. Based on the information available, OHSJP will set its target to a 2.26 annual traffic fatalities/VMT (Rural) by December 31, 2019.

The vehicle miles traveled (VMT) in SC had a significant increase in 2016 (5.2%) and 2017 (3.0%) compared with previous years. The VMT is expected to continue to rise in the next few years, but at a slower rate per SCDOT projections. The US Energy Information Administration is projecting a higher average cost of regular gas in 2018 and then a slight decrease in 2019 (https://www.eia.gov/analysis/).

3 U South Carolina Traffic Fatalities/VMT (Urban), 5 Year Moving Average with Trend Analysis, 2005-2016

To decrease traffic fatalities/VMT (Urban) 8.1% from the 2016 baseline of 1.36 to 1.25 by December 31, 2019.

**Figure 3U South Carolina Traffic Fatalities/VMT (Urban), 5 Year Moving Average with Trend Analysis, 2005-2016.**
As shown in Figure C-3U (Urban) above, the five-year moving average with a polynomial trend analysis projects South Carolina will experience a five-year average number of 1.75 traffic fatalities/VMT (Urban) by December 31, 2019. This equates to an estimated 2.38 annual traffic fatalities/VMT (Urban) in 2019. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 988 traffic fatalities in 2017, a decrease of 3.1% from 1,020 in 2016. Projections based on preliminary 2018 state data from January to April, indicates a slight decrease in the number of traffic fatalities when compared to the same time period in 2017. Based on available information, OHJSP will set its target to a 1.25 annual traffic fatalities/VMT (Urban) by December 31, 2019.

The vehicle miles traveled (VMT) in SC had a significant increase in 2016 (5.2%) and 2017 (3.0%) compared with previous years. The VMT is expected to continue to rise in the next few years, but at a slower rate per SCDOT projections. The US Energy Information Administration is projecting a higher average cost of regular gas in 2018 and then a slight decrease in 2019 (https://www.eia.gov/analysis/).

C-12 South Carolina Moped Fatalities, with Five Year Trend Analysis, 2005-2016

Is this a traffic records system performance measure?

No

<table>
<thead>
<tr>
<th>C-12 South Carolina Moped Fatalities, with Five Year Trend Analysis, 2005-2016-2019</th>
</tr>
</thead>

</tbody>
</table>

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

To decrease moped traffic fatalities by 4.5% from the 2012-2016 baseline average of 36 to 34 by December 31, 2019.

Figure C-12. South Carolina Moped Traffic Fatalities, with Five Year Trend Analysis, 2005-2016
As shown in Figure C-12 above, the five-year moving average with polynomial projection trend analysis projects South Carolina will experience a five-year average number of 42 moped traffic fatalities by December 31, 2019. This equates to an estimated 40 annual moped traffic fatalities for 2019, which is a 2.6% increase from 2016. Preliminary state data compiled by the OHSJP’s SAR section indicates there were 33 moped traffic fatalities in 2017, a decrease of 15.4% from 2016.

A bill passed during the most recent legislative term would require licenses for moped operators and registration for mopeds. This law may lead to more effective enforcement of motor vehicle laws on moped operators and reduce confusion in the state definition of a moped versus a motorcycle. It could also help reduce the number of moped fatalities. The state continues its very compelling Vulnerable Roadway Users billboard campaign which it hopes will have a positive impact on the rising negative traffic statistics associated with moped operators. Taking in all of these factors into consideration, OHSJP has set a goal of 34 moped traffic fatalities in 2019, a 12.8% decrease in moped traffic fatalities by December 31, 2019 from the 2016 calendar year.

5.1 Program Area: Impaired Driving (Drug and Alcohol)

Program area type  Impaired Driving (Drug and Alcohol)

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State’s highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

The State of South Carolina has been committed to reducing the occurrence of alcohol-impaired driving and the resulting traffic crashes, injuries, and fatalities. The state has experienced significant reductions in alcohol-impaired driving traffic fatalities in recent years. The most recent preliminary FARS data provided by the National Highway Traffic Safety Administration (NHTSA) indicates that 331 people died on South Carolina roadways in 2016 as a result of alcohol-impaired driving collisions (see Table 1 below). This raw number translates into a VMT alcohol-impaired driving fatality rate (traffic fatalities per 100 million vehicle miles traveled) for the state of 0.61, higher than the national rate of 0.33.

Table 1 below, compiled by the SC Department of Public Safety’s Office of Highway Safety and Justice Programs (OHSJP) from the available NHTSA-FARS datasets using final 2012 to 2015 data and preliminary 2016 data, shows that in 2012, there were 348 alcohol-impaired driving fatalities in South Carolina. This number fluctuated each year until reaching 331 in 2016. The 331 alcohol-impaired driving fatalities in 2016 represent a 0.08% decrease) from the 2012-2015 average, and a 4.89% decrease from the 2012 total (348). The VMT-based projected alcohol-impaired traffic fatality rate for 2016 (0.61) represented a 7.92% decrease from the prior four-year average and a 14.08% decrease when compared to the 2012 rate (0.71). South Carolina’s alcohol-impaired population-based fatality rate followed a similar pattern as the VMT rate, with the 2016 rate (6.67 deaths per 100,000 population) representing a 3.33% decrease when compared to the 2012-2015 average (6.9) and a 9.50% decrease when compared to the rate in 2012 (7.37). Although alcohol-impaired driving fatalities for the year 2016 have declined when compared to 2012, the State experienced its lowest number of alcohol-impaired driving fatalities in 2015 (307), so the number of alcohol-impaired driving fatalities increased significantly (by 7.82%) in 2016 when compared to 2015. Overall traffic fatalities also increased significantly from 2015 to 2016 (see Table 2).
Statistical data (Table 2) for calendar year (CY) 2016 shows that 1,015 people were killed in South Carolina traffic crashes. In the period from 2012 through 2016, the Fatality Analysis Reporting System (FARS) indicates that there were approximately 4,447 motor vehicle-related deaths in South Carolina. This resulted in an average of about 889 traffic fatalities per year over the five-year period. Over this period, annual traffic fatalities fluctuated around the five-year average, starting with 863 in 2012 and ending with 1,015 in 2016. The 2016 count represents an 18.30% increase, when compared to the average of the prior four years (858 fatalities), and a 17.61% increase when compared to the count in 2012. Total deaths decreased from 863 in 2012 to 767 in 2013, before rising to 823 in 2014 and to 1,015 at the end of the five-year cycle in 2016.

</table>

Table 3 below indicates that nationwide, alcohol-impaired traffic deaths increased by 3.21% in 2016 compared to an average of the four prior years, while VMT-based and population-based fatality rates fell and rose by 2.22% and 1.48%, respectively. Nationally, the VMT-based fatality rate and percent of total death rates declined but rose within the state.

Over the entire five-year period, 2012-2016, the average alcohol-impaired driving VMT rate in South Carolina (0.65 traffic deaths per 100 million VMT, see Table 1) was much higher than the rate for the nation (0.34). Over the entire five-year period, the alcohol-impaired driving population-based fatality rate in South Carolina (6.85 deaths per 100,000 residents) was much higher than the rates for the nation (3.21) (See Table 3 below).

The impaired-driving fatality percentage of total deaths is a key index of the problem of alcohol-impaired driving fatalities. Table 1 indicates that South Carolina’s proportion of impaired-driving deaths declined significantly in 2016 when compared to both the prior four-year average and the 2012 proportion. In South Carolina, this proportion decreased by 6.42% in 2016 (32.60%) when compared to the average of the previous four years (39.03%) and by 7.72% in 2016 when compared to the 2012 proportion (40.32%).

As shown in Figure 1, the percentage of fatalities in South Carolina that involved alcohol-impaired driving was consistently above that of the nation from 2012 to 2016. However, in 2016, 32.60% of all fatalities in South Carolina were alcohol-impaired driving fatalities, which is not too far from the nationwide percentage of 28.02%.

Figure 1: Alcohol-Impaired Driving Fatalities as Percent of Total Fatalities
Figure 2 and Figure 3 are based on NHTSA FARS data and display graphically the downward trends in South Carolina in terms of four key indices of alcohol-impaired data – alcohol-impaired driving fatalities, VMT-based fatality rate, population-based alcohol-impaired driving fatality rate, and percent of total fatalities. Though the state has much work to do to improve the problem of alcohol-impaired driving, the trends displayed in these figures are encouraging.
Table 4 shows the alcohol-impaired driving fatalities by county for South Carolina. According to data compiled from the OHSJP Statistical Analysis and Research Section and FARS, in South Carolina, from 2012 to 2016, the five counties with the most alcohol-impaired driving fatalities were Greenville (130); Richland (114); Horry (113); Lexington (106); and Charleston (100). Of these five counties, the following four showed decreases in the number of 2016 deaths when compared to the respective prior four-year average: Horry (-18.21%), Greenville (-12.98%), Charleston (-8.00%), and Lexington (-6.54%), while Richland experienced a slight increase (1.55%). Throughout the five-year period 2012-2016, the counties with the highest percentages of alcohol-impaired driving fatalities as compared to the total traffic fatalities were McCormick (57.14%); Fairfield (52.38%); Lexington (50.24%); Chesterfield (46.94%); and Kershaw (46.84%).

Different county pictures emerge when looking at population-based alcohol-impaired traffic fatality rates in South Carolina. The population-based traffic fatality rates by county are shown in Table 5 shows that the counties with the highest fatality rates in 2016 are (Colleton [23.73%; Fairfield [22.07%; Chester [21.75%; Jasper [21.08%; and McCormick [20.74%]). These counties are much smaller in population than the average SC County, and it should be noted that the counties’ population-based fatality rates can vary drastically from year to year as the chart below and on the next page shows. Thus, counties with the highest rates in 2016 may have had a much smaller rate in prior years. As a result, using this data to frame and inform strategies should be considered with caution.
Traffic Injuries

According to state data, from 2012 to 2016, a total of 274,534 people were injured in motor-vehicle collisions in South Carolina. Of the 274,534 injuries, 20,833 or 7.6%, were impaired driving-related (State data cannot separate alcohol- and drug-impaired driving). Figure 4 displays graphically how total injuries compare to impaired driving-related injuries in the state from 2012 to 2016.

Figure 4: Injuries in SC Motor Vehicle Collisions 2012-2016 State Data

Figure 5 compares total severe traffic-related injuries in SC from 2012 to 2016 to those severe injuries that were the result of impaired-driving collisions. From 2012 to 2016, SC experienced a total of 15,995 severe traffic-related injuries. Of these 15,995 severe-injuries, 3,409, or 21.3%, were impaired-driving-related. The state experienced a decrease (21.1 %) in 2016 in impaired-driving-related severe injuries (610), as compared to the number of impaired-driving-related severe injuries in 2012 (773). The state also experienced a decrease (12.8 %) in 2016 as compared to the average of the four-year period 2012-2015 (699.5 severe injuries).

Figure 5. Severe Injuries in SC Motor Vehicle Collisions 2012-2016 State Data
Traffic Crashes

Impaired-Driving Collisions

According to state data, over the five-year period 2012-2016, South Carolina experienced 29,868 impaired-driving collisions. During the same period, there was a 1.8% increase in the number of impaired-driving collisions, from 6,040 in 2012 to 6,151 in 2016 (see Figure 6). The 2016 figure of 6,151 impaired-driving-related crashes was 3.7% higher than the average number of impaired-driving-related crashes for the years 2012-2015 (5,929.25).

Drivers Involved in Impaired-Driving-related Collisions

Drivers in the 21-25 year old age group made up the largest age group represented among all drivers (30,026) that contributed to an impaired-driving crash from 2012-2016, totaling 5,413 drivers. Of the 5,413 drivers, 234, or 4.3%, were involved in a fatal impaired-driving collision. The second highest age group of drivers that contributed to an impaired-driving crash was aged 26-30 (4,602 drivers), 240, or 5.2%, of whom were involved in a fatal impaired-driving-related crash. This age group was followed by drivers aged 31-35, totaling 3,837 drivers that contributed to an impaired-driving crash, 150, or 3.9%, of whom were involved in a fatal impaired-driving-related collision (see Tables S-1 and S-2). During the period 2012-2016, 81.6% of the drivers that contributed to an impaired-driving crash were male, 18.2% were female, and 0.2% were gender unknown (Table S-3). In regards to ethnicity, Caucasians were the leading group of drivers that contributed to an...
impaired-driving crash, constituting 64.7% of the total drivers (Table S-4). African Americans were the next highest group, with 31.6%, followed by Hispanic drivers, who accounted for 2.8% of the total drivers that contributed to an impaired-driving crash (0.28% and 0.21% represent other and unknown ethnicities).

**Alcohol-Impaired Driving Fatalities: BAC Percentages**

As shown in Table 6 below, from 2012 through 2016, the percentage of fatalities in South Carolina in which the highest BAC in the crash was 0.08 or above was 86.3%, and only 13.7% of the known BAC test results were in the 0.01 to 0.07 range. Additional analysis show 60% of these fatal crashes had a driver with double the legal limit of alcohol in their system at the time of the crash.
Alcohol-Impaired Fatal Crashes: Month, Day, and Time

As shown in Table 7, the three months with the greatest number of alcohol-impairment-related fatal crashes in South Carolina during the 2012-2016 period were July (153 crashes, 10.06% of total), October (151 crashes, 9.92% of the total), and August (138 crashes, or 9.06% of the total). Nationwide, the three months with the greatest percentage of such crashes were August (9.63 %), July (9.27 %), and then May (8.99%).

During the timeframe 2012-2016, alcohol-impairment-related fatal crashes were much more common on the weekends and Fridays than on other days of the week for South Carolina and the US as a whole. In South Carolina, the most alcohol-impairment-related fatal crashes occurred on Saturdays (391 crashes, 25.67% of total), followed by Sundays (331, 21.70%), and then Fridays (211, 13.82%). The same pattern was observed for the nation. Nationally, 23.38% of alcohol-impairment-related fatal crashes occurred on Saturdays, 21.74% on Sundays, and 14.69% on Fridays.

During the five years 2012-2016, alcohol-impairment-related fatal crashes were much more common after 6 p.m. and before 3 a.m. for South Carolina and the US as a whole. In South Carolina, the most alcohol-impairment-related fatal crashes occurred between midnight and 3 a.m. (343 crashes, 22.53% of total), followed by 9 p.m. to midnight (332, 21.78%), and then 6 p.m. to 9 p.m. (285, 18.68%). Nationwide the pattern was similar, as 23.87% of alcohol-impairment-related fatal crashes occurred between midnight and 3 a.m., 20.78% between 9 p.m. and midnight, and 17.45% between 6 p.m. and 9 p.m. It should be noted that, when adding the 3 a.m. to 6 a.m. (206, 13.55%) and 3 p.m. to 6 p.m. (178, 11.69%) timeframes to the equation, 88.19% of South Carolina’s alcohol-impairment-related fatal crashes occurred between the hours of 3 p.m. and 6 a.m.

Alcohol-Impaired Fatalities: Route Category

As shown in Table 8 below, during 2012-2016, over half (63.22%) of impaired driving-related fatalities in SC occurred on State Highways, followed by U.S. Highways (21.38%). Local streets (Townships, Municipalities and Frontage Roads) routes had the least number of impaired driving-related fatalities with 0.13%, 1.15%, and 0.06% of the total number of fatalities.

Alcohol-Impaired Fatal and Severe-Injury Collisions

The Office of Highway Safety and Justice Programs’ (OHSJP) Statistical Analysis and Research Section also reviewed the counties with the highest reported frequencies of fatal and severe-injury DUI-related collisions in South Carolina from 2012 to 2016. Combining DUI-related “fatal and severe-injury” data is another way that the OHSJP analyzed the impaired-driving problem in the state. During the five-year time frame 2012-2016, the counties identified as experiencing the most DUI-related fatal and severe-injury collisions were Greenville (418), Horry (303), Richland (243), Lexington (233), Spartanburg (218), Anderson (211), Berkeley (169), Charleston (159), York (153), Aiken (122), Florence (113), Laurens (109), Orangeburg (102), Lancaster (95), and Beaufort (88) (see Table 9 below). The five priority counties (Greenville, Richland, Horry, Lexington, and Charleston) identified in Table 4 are all among the highlighted counties in Table 9 below.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

5.1.1 Countermeasure Strategy: Prosecution

Program area: Impaired Driving (Drug and Alcohol)

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?
No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(iii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]
No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]
No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will
implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest.

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.29(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

The state of South Carolina is challenged by the fact that most prosecutions at the first-offense level are done by the arresting law enforcement officer. While some of these officers reportedly are effective advocates, they are often facing much more skilled defense attorneys and are faced with legal arguments that they are unprepared to answer. DUI litigation can also be very complex, resulting in dismissals and “not guilty” findings in cases in which skilled prosecutors are unavailable. Some members of law enforcement are also not comfortable with stepping into the role of prosecuting cases. This practice could result in a hesitancy to make arrests on the part of law enforcement. This practice of law enforcement serving as the prosecution in DUI cases is a challenging problem which is likely a hindrance to reducing impaired driving. As such, implementing a prosecution countermeasure strategy that staffs courts with licensed and trained attorneys to prosecute DUI cases rather than the arresting officers will have a positive traffic safety impact in that it will increase conviction rates and allow officers to remain on the roadways conducting enforcement, rather than in the courtroom trying cases. This strategy would increase the State's Criminal Justice system to function at the level of deterrence outlined in the Countermeasures that Work document.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

The State of South Carolina has historically ranked as one of the top states in the nation for the number of impaired-driving-related fatalities, and the most recent FARS data provided by the National Highway Traffic Safety Administration (NHTSA) indicates that 331 people died on South Carolina roadways in 2016 as a result of an alcohol-impaired driving collision. Given the high alcohol-impaired driving fatality rate, it is clear that efforts to reduce the behavior of impaired driving are needed. Stronger DUI laws and greater conviction rates can serve as a deterrent to the behavior, and greater conviction rates can be achieved by placing special DUI prosecutors in each of the state's Judicial circuits through the funding of prosecutorial projects. These projects will decrease the amount of time a Law Enforcement Officer will spend off of the road preparing DUI cases for court and will hopefully assist in reversing a current trend of DUI case dismissals. Allocating funds to prosecutorial projects will facilitate the state's achievement of the outlined Impaired Driving Countermeasures performance targets, which will serve to reduce collisions, severe-injuries, and fatalities in the state.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

DUI cases can be highly complex and difficult to prosecute, yet they are often assigned to the least experienced prosecutors or, as is the case in the state of South Carolina, to the arresting officer. Given the results of one survey, which indicated that about half of prosecutors and judges said the training and education they received prior to assuming their position was inadequate for preparing them to prosecute and preside over DUI cases, it is clear that prosecutors experienced in prosecuting DUI cases are needed. Prosecutorial projects such as those posed under this countermeasure strategy will place experienced DUI prosecutors in the judicial circuits and municipalities in which they are needed most, and it will also allow for continued funding for a Traffic Safety Resource Prosecutor for the state.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

5.1.1.1 Planned Activity: Prosecution

Planned activity name: Prosecution

Planned activity number: M4CS

Primary countermeasure strategy: Prosecution
The training programs will provide knowledge and training on the current trend of DUI case dismissals. Projects will decrease the amount of time a Law Enforcement Officer will spend off of the road preparing DUI cases for court and will hopefully assist in reversing a trend of dismissals. Special DUI Prosecutors will also be funded in the City of Beaufort Police Department, and the Berkeley and Florence County Sheriff’s Offices. These prosecutorial projects will decrease the amount of time a Law Enforcement Officer will spend off of the road preparing DUI cases for court and will hopefully assist in reversing a trend of dismissals.

In South Carolina, for the majority of the DUI cases, the arresting officer is responsible for the prosecution of his/her own DUI case(s). While some of these officers reportedly are effective advocates, they are often facing much more skilled defense attorneys and are faced with legal arguments that they are unprepared to answer. DUI litigation can also be very complex, resulting in dismissals and “not guilty” findings in cases in which skilled prosecutors are unavailable. Some members of law enforcement are also not comfortable with stepping into the role of prosecuting cases. This practice could result in a hesitancy to make arrests on the part of law enforcement. This practice of law enforcement serving as the prosecution in DUI cases is a challenging problem which is likely a hindrance to reducing impaired driving. To help alleviate some of these issues, efforts are being made by the South Carolina Commission on Prosecution Coordination (SCCPC) to assist prosecutors, with less experience; and arresting officers through the use of the Traffic Safety Resource Prosecutor.

Funding has been and will continue to be made available from the South Carolina Office of Highway Safety and Justice Programs for a Traffic Safety Resource Prosecutor (TSRP) who operates through the South Carolina Commission on Prosecution Coordination (SCCPC). The TSRP is a vital resource for DUI prosecution and education. The TSRP provides seminars, newsletters, and technical assistance to solicitors, law enforcement, and the judiciary, as well as local prosecutors. The TSRP is a strong link in the effort to prosecute impaired drivers at all levels. The TSRP program in the state reduces the use of diversion programs through its educational efforts.

Another important component in the prosecution of impaired drivers is the placement of a DUI prosecutor in each circuit. These assistant solicitors are specially trained to handle and effectively prosecute driving under the influence cases. These positions are funded by the state, with one in each judicial circuit at the level of $73,690 per circuit. While the OHSJP does not fund these assistant solicitors, it has provided funding for a dedicated DUI Prosecutor to prosecute DUI-related cases made by the South Carolina Highway Patrol (SCHP) in Berkeley County since FFY 2015. In FFY 2019, the OHSJP will fund a DUI Prosecutor in the Sixth Circuit Solicitor’s Office, which includes Chester, Fairfield, and Lancaster counties. The DUI Prosecutor will dedicate 100% of his/her time to the prosecution of DUI cases. Special DUI Prosecutors will also be funded in the City of Beaufort Police Department, and the Berkeley and Florence County Sheriff’s Offices. These prosecutorial projects will decrease the amount of time a Law Enforcement Officer will spend off of the road preparing DUI cases for court and will hopefully assist in reversing a current trend of DUI case dismissals.

The planned prosecution activities for FFY 2019 will provide assistance to a variety of professionals from law enforcement to the judiciary. These projects will provide the necessary tools for the detection, apprehension, and successful prosecution of impaired drivers. The training programs will provide knowledge and training on the DUI law and proper roadside procedures for prosecutors, judges, and law enforcement officers that will assist in making quality DUI cases that will result in an
increased number of DUI convictions statewide. The increased number of stakeholders educated in appropriate impaired driving countermeasures can result in a larger number of impaired drivers taken off the roadways, higher conviction rates for impaired drivers, and a decrease in the number of impaired driving crashes, injuries, and fatalities.

5.1.2 Countermeasure Strategy: Law Enforcement Training

Program area
Impaired Driving (Drug and Alcohol)

Countermeasure strategy
Law Enforcement Training

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?
No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]
Planned activities in countermeasure strategy

Countermeasure strategies within each program area to address its problems and achieve its performance targets.

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the planned activities. Evidence of effectiveness

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Impaired driving is a substantial problem in the state of South Carolina, and in order to protect other roadway users, it is important to remove those who choose to drive while impaired from the roadways. Law enforcement training, intended to help officers better identify impaired drivers, is a vital component of reducing impaired driving-related collisions, severe-injuries, and fatalities in the state. As such, law enforcement training for the detection of impaired drivers would have a significant and positive traffic safety impact in South Carolina.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Law enforcement training for the detection of impaired drivers would enhance law enforcement officers’ ability to quickly and accurately identify impaired drivers. If these highly trained officers conduct high visibility enforcement, it would serve as a high level deterrent to the behavior of impaired driving in the state, and it would also more efficiently remove those individuals who choose to drive while impaired from the roadways before they have an opportunity to harm themselves and/or others. As such, allocating funds for the countermeasure strategy of law enforcement training will facilitate the state’s achievement of the outlined Impaired Driving Countermeasures performance targets, which will ultimately serve to reduce collisions, severe-injuries, and fatalities in the state.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

High-visibility enforcement mobilizations, public safety checkpoints, and using law enforcement officers who are highly trained in the detection of impaired driving, have been cited as being effective in reducing alcohol-related fatal crashes when accompanied by public information campaigns and publicity of such events.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.
5.1.2.1 Planned Activity: Impaired Driving Countermeasures Training for Law Enforcement

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)
Yes

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3)
[Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]
No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4)
[Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]
No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(ii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]
No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]
Yes

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]
No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]
Yes

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]
No

Enter description of the planned activity.

In the State of South Carolina, the SC Criminal Justice Academy (SCCJA) is the only authorized law enforcement training facility. The SCCJA provides basic training for all law enforcement, detention, and telecommunications officers. The SCCJA will continue the Impaired Driving Countermeasures Training for Law Enforcement project. Since 2010, the SCCJA has provided at least 32 hours of impaired driving and breath testing-related training to thousands of Basic Law Enforcement Academy students. This training includes the 24-hour NHTSA/IACP DUI Detection and Standardized Field Sobriety Testing (SFST) Practitioner Course and the 8-hour DataMaster DMT Operator Course. Basic Law Enforcement students are required to certify in both of these disciplines in order to continue on in training and ultimately graduate from the Academy as a Class I Officer.

The NHTSA/IACP DUI Detection and SFST Instructor Development Course are also taught solely at the SCCJA. The core course is intended to span 32 hours; however, the SCCJA has added vital training elements to provide a 39-hour course. This course has helped create over 500 currently active adjunct DUI Detection/SFST Instructors throughout the State. The DUI Detection/SFST Practitioner Course is also offered in the field as a stand-alone course, and while the...
Adjunct instructors are certified to instruct the course, the Impaired Driving Countermeasures Training Coordinator (IDCTC) and other SCCJA instructors are often asked to provide instruction and oversight.

Officers who are certified as DUI Detection/SFST Practitioners are required to renew their certification every two years. This is done via an online recertification course as well as an SFST Proficiency conducted in front of a DUI Detection/SFST Instructor. Failure to complete the recertification course within the allotted time or with the required grade results in decertification and requires that the officer attend the full DUI Detection/SFST Practitioner Course. DUI Detection/SFST Instructors are also required to recertify through course instruction and/or the proctoring of multiple SFST Proficiencies.

The South Carolina Drug Evaluation and Classification Program (DECP) has grown significantly since the SCCJA began coordination of the program in 2009. Up to that point, South Carolina had 50 Drug Recognition Experts (DREs). Since then, the SCCJA has trained approximately 215 additional DREs; however, as of mid-2018, there are at least 137 active DREs in South Carolina. While new DREs are added to the roster each year, the active DRE number changes due to DREs retiring, by moving out of law enforcement or out of state, and for failure to recertify.

Two DRE Preschools and two DRE 7-Day Schools are held each year with the hopes of moving adding one of each school in 2019. The DRE Instructor Development Course is also run concurrently with the DRE Schools. South Carolina currently has 35 DRE Instructors who are integral to properly teaching of the DRE Schools and the successful conducting of the Field Certification and Final Knowledge Examination phases. Since the first SCCJA-led DRE school graduated, South Carolina DREs have conducted 3,265 evaluations, of which 2,304 are enforcement related. The IDCTC works continuously to promote the use of DREs throughout the State and is making efforts to enhance training opportunities for the DREs. The IDCTC also provides a multitude of ARIDE course training opportunities to those trained in and experienced with impaired driving enforcement and investigations. A major goal of the IDCTC is to have all South Carolina Highway Patrol troopers (ranked Corporal and below) trained in ARIDE. The increase in ARIDE training should increase the utilization of the State’s DREs in the field.

The purpose of Law Enforcement Training Projects for Impaired Driving is to provide the necessary tools for the detection, apprehension, and successful prosecution of impaired drivers. With South Carolina's status as one of the top states in the nation for the number of impaired-driving-related fatalities, such training is critical if the numbers of impaired-driving-related collisions, severe-injuries, and fatalities are to be reduced.

5.1.3 Countermeasure Strategy: High Visibility DUI Enforcement

Program area: Impaired Driving (Drug and Alcohol)

Countermeasure strategy: High Visibility DUI Enforcement

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.
target will serve to reduce collisions, severe injuries, and fatalities in the state. Enforcement of the state's DUI laws will facilitate the state's achievement of the outlined Impaired Driving performance targets. Achievement of these performance targets will have the potential to produce a significant and positive impact.

Based on the analysis of the problem identification data, South Carolina faces significant issues related to impaired driving. Allocating funds to high-visibility enforcement of the state's DUI laws will facilitate the state's achievement of the outlined Impaired Driving performance targets. Achievement of these performance targets will serve to reduce collisions, severe injuries, and fatalities in the state.
Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

High visibility enforcement has been cited as an effective countermeasure to curb alcohol-impaired driving as outlined in NHTSA's *Countermeasures that Work* document.

Yes

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.
The State will continue to implement a statewide Law Enforcement DUI Challenge (Sober or Slammer! comparable to the national Drive Sober or Get Pulled Over, campaign). The Sober or Slammer campaigns will take place twice during the grant year in conjunction with the national Drive Sober or Get Pulled Over, campaign.

The OHSJP will conduct a high-visibility enforcement and education campaign in an effort to reduce DUI traffic crashes, injuries, and fatalities in FFY 2019. The DUI enforcement campaign will focus predominantly on the SC Highway Patrol (SCHP) for the enforcement component of the campaign, while still making every effort to recruit and partner with local law enforcement agencies statewide. The SCHP is the premier traffic enforcement agency in the state and covers the entire geographic and population areas of South Carolina. The SCHP, during FFY 2019, will conduct special DUI enforcement emphases once a month on weekends from December 2018 to September 2019. The weekend enforcement efforts will be supported by radio and possibly television advertising announcing the enforcement beginning on Wednesday of each week preceding the scheduled enforcement weekends. The SCHP will recruit and utilize the assistance of local law enforcement agencies during the weekend and crackdown efforts.

Educational efforts will again utilize media (television, radio, and alternative advertising) to support campaign efforts. Educational efforts will focus on the twenty priority counties, (Greenville, Horry, Richland, Lexington, Spartanburg, Anderson, Berkeley, Charleston, York, Aiken, Florence, Laurens, Orangeburg, Lancaster, Beaufort, Dorchester, Pickens, Darlington, Sumter, and Kershaw) which represent approximately 83.2% of the state’s population (based on the Census population estimate for July 1, 2016) and 78.2% of the state’s alcohol-impaired driving fatalities and severe injuries over the five-year period 2012 to 2016 and are designated within the state’s Highway Safety Plan and the Impaired Driving Countermeasures Plan.

A high-visibility statewide enforcement and education campaign Buckle up, SC. It’s the law and it’s enforced., is conducted each year around the Memorial Day holiday modeled after the national Click it or Ticket mobilization to emphasize the importance of and to increase the use of occupant restraints. The campaign includes paid and earned media, increased enforcement activity by state and local law enforcement agencies, and diversity outreach elements in order to increase safety belt and child restraint use among the state’s minority populations. In FFY 2019, campaign efforts will continue to focus on nighttime safety belt enforcement in an attempt to reduce unrestrained traffic fatalities and injuries especially during nighttime hours. The emphasis upon nighttime safety belt enforcement has enhanced and will continue to enhance impaired driving enforcement as well. Statistics have demonstrated in the state that safety belt usage rates go down after dark, and it is obvious that many high-risk drivers who do not use safety belts also drink and drive. Thus, this enforcement strategy should continue to pay dividends in the fight against DUI, as well. The SCHP has committed to ongoing nighttime safety belt enforcement activities, beyond the occupant protection enforcement mobilization time frame. A variety of local law enforcement agencies are incorporating this strategy into ongoing enforcement efforts.

For FFY 2019, the SC Public Safety Coordinating Council has approved thirty-six (36) traffic enforcement projects, the majority of which will be implemented, based on the availability of federal funding, in priority counties in the state.

Of the 36 enforcement projects, fourteen (14) are DUI enforcement projects, which will fund a total of sixteen (16) DUI enforcement traffic officers in the counties of Darlington (2 projects), Charleston (1 project), Berkeley (2 projects), Lexington (2 projects), Spartanburg (1 project), Dorchester (1 project), Florence (1 project), Lancaster (1 project), Beaufort (2 projects), and Aiken (1 project). Of the 14 projects, three will be implemented in county sheriffs’ offices. The projects referenced above include one third-year project, 12 second-year projects, and one first-year project. The projects will focus exclusively on DUI enforcement and the enforcement of traffic behaviors that are associated with DUI violators; educating the public about the dangers of drinking and driving; media contacts regarding enforcement activity and results; and meeting with local judges to provide information about the projects. Project officers will be required to work schedules that are evidence-based, meaning the hours (between 3 PM and 6 AM) which FARS data demonstrates to be those during which the most DUI-related traffic fatalities occur in the state (1,344, or 88.2%, of the 1,524 DUI-related fatalities during the years of 2012-2016). Project officers will also work roadways that have the highest number of DUI-related crashes within their respective jurisdictions.

During the FFY 2019 grant cycle, each DUI enforcement grant will participate in at least 12 public safety checkpoints; have an appropriate, corresponding increase in the number of DUI arrests; conduct a minimum of 6 educational presentations on the dangers of DUI; and issue at least 12 press releases to the local media and/or social media detailing the activities of the grant projects. The 14 DUI enforcement officers funded by the grant are required to be Standardized Field Sobriety Testing (SFST) certified.

Additionally, of the 36 approved enforcement projects, twenty-two (22) are Police Traffic Services projects, which will fund a total of thirty-three (33) traffic officers in municipalities located in the priority counties of Richland, Charleston, Lexington, Aiken, York, Greenville, Georgetown, Dorchester, Berkeley, Anderson, Lancaster, and Beaufort, as well as enforcement projects in seven county sheriffs’ offices (Charleston, Dorchester, Georgetown, Spartanburg, Florence, Kershaw, and Oconee counties). The projects referenced above include four third-year projects, nine second-year projects, and nine first-year efforts. These projects will also encompass DUI enforcement efforts as each project requires the grant-funded officers (Section 402-funded) to engage in aggressive DUI enforcement activity.

5.1.4 Countermeasure Strategy: Court Monitoring

Program area

Impaired Driving (Drug and Alcohol)

Countermeasure strategy

Court Monitoring

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when
applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Court monitoring facilitates the identification of areas of improvement within the court system and laws as they pertain to the issue of DUI. Improving the judicial system as a result of the collection and analysis of data through court monitoring represents a significant positive traffic safety impact.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Though South Carolina has experienced significant reductions in alcohol-impaired driving traffic fatalities in recent years, the most recent FARS data provided by the National Highway Traffic Safety Administration (NHTSA) indicates that 311 people died on South Carolina roadways in 2016 as a result of an alcohol-impaired driving collision. The state is also challenged with a DUI law in need of strengthening, as it currently does not function in the state at the deterrence level required to
prevent impaired driving or reduce impaired driving recidivism. Additionally, law enforcement officers, who are not trained attorneys, are required to prosecute their own DUI cases. This practice removes law enforcement officers from roadway responsibilities in actively conducting traffic enforcement and has caused a great number of DUI cases to be dismissed or pled to lesser charges. Court Monitoring programs in priority counties for fatal and severe-injury alcohol and drug-related collisions will work to ensure accountability of the judicial process, and essentially increase the DUI conviction rate. A higher DUI conviction rate will serve as a deterrent to prevent impaired driving and reduce impaired driving recidivism.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Court monitoring has been proven as an effective strategy for reducing recidivism and increasing conviction rates.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(f)(4) that must include high-visibility enforcement efforts]

Yes

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

Yes

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

Yes

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]
Enter description of the planned activity.

Mother’s Against Drunk Driving (MADD) SC’s Court Monitoring Program provides data on how many cases are dismissed or pled down to lesser offenses, how many result in convictions, what sanctions are imposed, and how these results compare across different judges and different courts. MADD SC will continue its court monitoring program utilizing volunteers to record data on DUI court cases to gather relevant statistics, so that areas of improvement within the court system and laws can be identified. During FFY 2019, the OHSJP will utilize grant funding for the continuation of MADD’s Coastal Court Monitoring program, which will be entering its second year of operation. This program serves the priority counties of Horry, Berkeley and Charleston. The OHSJP will also utilize grant funding for MADD’s new court monitoring effort in the priority counties of Greenville, Richland, Lexington and Spartanburg.

Enter intended subrecipients.

5.1.5 Countermeasure Strategy: Communication and Outreach

Program area      Impaired Driving (Drug and Alcohol)

Countermeasure strategy  Communication and Outreach

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

No
The marketing firm will continue to assist with campaigns, including the OHSJP, through the Public Information Outreach and Training section (PIOT), will continue to use a full-service marketing firm to assist with such efforts as state campaigns and sharing information at public events are key strategies to help meet performance measures and goals related to the issue of impaired driving within the South Carolina is committed to its focus on the dissemination of traffic safety information to the general public and the law enforcement community. Marketing allocation of funds to planned activities.
Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and safety in the state of South Carolina.

Communication and Outreach will be used throughout FFY 2019 to promote campaign messages, enforcement activities, and to increase awareness by the general public of the dangers involved in impaired driving and/or speeding. By increasing knowledge and awareness of the dangers associated with these risky driving behaviors, it is possible to reduce the number of individuals choosing to engage in the behaviors of driving while impaired and/or speeding. Reductions in the prevalence of impaired driving and/or speeding and the resulting related collisions, severe-injuries, and fatalities will have a significant and positive impact on traffic safety in the state of South Carolina.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Evidence of effectiveness
Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.
NHTSA promotes the importance of combining high-visibility enforcement with heightened public awareness as the best way to approach key problem areas and produce behavioral change. Therefore, the OHSJP will continue to offer a media mix for enforcement-based and non-enforcement-based campaigns to meet stated goals.

### Planned activities

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

Yes

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

Yes

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

Yes

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.
In FFY 2019, the Public Information, Outreach and Training (PIOT) section of the Office of Highway Safety and Justice Programs (OHSJP) will coordinate with the SCDPS contractor to develop and implement media components of the OHSJP’s Sober or Slammer! campaign and a variety of other major campaigns and emphases. The contractor will assist with efforts such as media buying, creative production, and evaluation of campaigns. Additionally, diversity outreach components will be incorporated within each campaign. The OHSJP will continue efforts to reach out to under-served audiences and hard-to-reach populations in the upcoming year.

The South Carolina Department of Public Safety’s OHSJP will utilize Section 405d Impaired Driving Countermeasures funds in FFY 2019 for paid media efforts for DUI countermeasures. The state continues to use the Strategic Evaluation States (SES) model to implement a sustained DUI enforcement effort (Sober or Slammer! /Drive Sober or Get Pulled Over!), which includes monthly specialized DUI enforcement activities (checkpoints and saturation patrols) by participating state and local law enforcement agencies, as well as two DUI law enforcement crackdowns occurring during the Christmas/New Year’s holidays and during the days leading up to and including the Labor Day holiday. Sober or Slammer! is a high-visibility enforcement crackdown on impaired driving combining paid/earned media with increased DUI enforcement activity in an effort to attack the problem of impaired driving in the state.

During FFY 2019, paid and earned media activities will be utilized to promote campaign messages, enforcement activities, and to increase awareness by the general public of the dangers involved in impaired driving. These activities will encompass radio, television, and paid social media advertising, as well as outdoor and other alternative advertising. The agency contractor will be used by the OHSJP to secure radio and television placement during the two major mobilization crackdowns and radio airtime for strategic points in time during high risk for impaired driving violations. Those times will coincide with monthly enforcement weekends designated by the South Carolina Highway Patrol, which, will span from December 2018 through September 2019. The contractor – with the possible use of a sub-contractor—will also be responsible for the paid social media plan during the same designated time periods. Local law enforcement agencies will be highly encouraged to participate in the designated special enforcement weekends. Specific media buy plans for each component of the process will be developed by the agency contractor concentrating on major media markets which will reach the campaign’s focus counties and other counties throughout the state. The media buy plans will be approved by the OHSJP prior to implementation of the effort. NHTSA promotes the importance of combining high-visibility enforcement with high-visibility public awareness as the best way to approach key problem areas and produce behavioral change. Therefore, the OHSJP will continue to offer a media mix for enforcement-based and non-enforcement-based campaigns to meet stated goals. The OHSJP will employ key strategies to promote its mission and core message of public safety.

5.1.5.2 Planned Activity: Communication and Outreach

Planned activity name: Communication and Outreach

Planned activity number: PIOT-OP

Primary countermeasure strategy: Communication and Outreach

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.

Highway Safety staff will coordinate statewide public information and education efforts to promote compliance with occupant protection laws and impaired driving laws. An overarching theme of all campaign efforts will be utilized by the OHSJP and the SCDPS. The theme will be Target Zero, with the tagline, “The road to Target Zero starts with you.” The Target Zero message will be promoted on social media and through all of the other major media campaigns throughout the year.

OHSJP will work with local project personnel and law enforcement officials to implement the Buckle Up, SC. It’s the law and it’s enforced. program throughout South Carolina during the Memorial Day holiday period in an effort to improve safety belt usage rates within the state. The campaign emphasis areas will include social media and outdoor advertising. Highway Safety staff, other SCDPS staff, and partner agencies/groups will continue to educate and inform the citizenry of the state and its visitors about the state’s primary enforcement safety belt law. Educational strategies will be incorporated to reach out to all citizens and visitors of the state, in particular those minority populations (African-American and Hispanic) and others (rural white males) which have traditionally shown a lower rate of safety belt and child passenger safety restraint usage than white, urban and female counterparts.

All major mobilization emphases of the OHSJP will include messages to reach the diverse population of the state. The OHSJP will incorporate into its diversity outreach strategy a variety of media aimed at reaching teens, African Americans, Hispanics, and rural residents across South Carolina. The goal of the outreach is to encourage safety on the roadways in these populations by urging the use of appropriate occupant restraints and attempting to reduce specific risk-taking behaviors such as drinking and driving.

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.
Marketing campaigns, training for highway safety professionals and sharing information at public events are key strategies to help meet performance measures and goals related to issues with occupant protection, police traffic services, DUI, and vulnerable roadway users.

The OHSJP, through the PIOT, will continue to use a full-service marketing firm to assist with such efforts as media buying, creative production, and evaluation of campaigns. However, the OHSJP, with the help of the agency’s Communications Office and SC Highway Patrol Community Relations Officers, will oversee earned media efforts, such as issuing news releases, conducting press events, and coordinating media interviews. The marketing firm will continue to assist with campaigns such as Sober or Slammer! and Buckle Up, SC. It's the law and it's enforced. Other public information initiatives include Child Passenger Safety, Motorcycle Safety, Speed Enforcement, and Vulnerable Roadway Users (Look).

The OHSJP will utilize the Target Zero concept as an umbrella campaign under which all of its traffic safety campaigns will coalesce. Several states have initiated Target Zero campaigns that incorporate a variety of enforcement and educational strategies with a view toward eliminating traffic fatalities on their respective roadways. The concept was unveiled in South Carolina in October 2012 at a news event conducted by the Governor’s Office, which recognized accomplishments of SCDPS in the arena of traffic safety.

A South Carolina Target Zero logo was developed in 2013 to help promote the concept to the public. The OHSJP wanted a logo unique to South Carolina and looked toward the state flag. With its iconic crescent moon and palmetto tree, the South Carolina flag is a popular marketing tool used by many businesses in their logos and featured on many consumer goods, such as clothing, jewelry, cookware, sporting supplies, and home décor. The Target Zero logo uses an update of a previously used logo that features a stylized image of the state’s outline and the flag’s emblems. All paid media efforts – broadcast and print – feature Target Zero with the accompanying tagline, “A Target Zero message from SCDPS.”

In the coming year, the OHSJP must increase efforts to reach out to underserved audiences and hard-to-reach populations. The OHSJP already incorporates Hispanic-owned media (mainly TV and radio) into its media buys. However, efforts must be made to ensure that Spanish-speaking residents are getting in-depth information on printed collateral regarding traffic laws and safe driving. Additionally, the OHSJP must increase efforts to reach young men, ages 18-34, in areas where they live, work, and play. The OHSJP is also doing more to incorporate the Target Zero campaign by way of social media by using SCDPS’s Facebook and Twitter pages and YouTube channel, as well as continuing to expand on and explore paid social media advertising opportunities.

NHTSA promotes the importance of combining high-visibility enforcement with heightened public awareness as the best way to approach key problem areas and produce behavioral change. Therefore, the OHSJP will continue to offer a media mix for enforcement-based and non-enforcement-based campaigns to meet stated goals. The OHSJP will employ key strategies to promote its mission and core message of public safety.

**Strategies**

Several strategies identified in NHTSA's *Countermeasures That Work* are utilized in PIOT campaigns and activities with much success.

1. The OHSJP will provide funding to highway safety staff and advocates to attend significant conferences and training events related to highway safety issues. As appropriate, when information on national or state-initiated training programs becomes available, the OHSJP will forward the information to highway safety project directors, Law Enforcement Network Coordinators and Assistant Coordinators, and/or other highway safety stakeholders with direct interest in the training. If it is determined that funds are available to support requests to attend these programs, information will be included in the package outlining procedures for requesting assistance.

2. Highway Safety staff will coordinate statewide public information and education efforts to promote compliance with occupant protection laws and impaired driving laws. An overarching theme of all campaign efforts will be utilized by the OHSJP and the SCDPS. The theme will be Target Zero, with the tagline, “The road to Target Zero starts with you.” The Target Zero message will be promoted on social media and through all of the other major media campaigns throughout the year.

3. The OHSJP will work with local project personnel and law enforcement officials to implement the Buckle Up, SC. It's the law and it's enforced. program throughout South Carolina during the Memorial Day holiday period in an effort to improve safety belt usage rates within the state. As referenced in the Occupant Protection Program Area section of the HSP, the NHTSA-produced Countermeasures That Work: A Highway Safety Countermeasure Guide for State Highway Safety Offices, Eighth Edition, 2015 (CTW) document stresses the importance of the Occupant Protection emphasis area and outlines significant strategies and appropriate countermeasures. The campaign emphasis areas will include social media and outdoor advertising.
4. Highway Safety staff, other SCDPS staff, and partner agencies/groups will continue to educate and inform the citizenry of the state and its visitors about the state’s primary enforcement safety belt law. Educational strategies will be incorporated to reach out to all citizens and visitors of the state, in particular those minority populations (African-American and Hispanic) and others (rural white males) which have traditionally shown a lower rate of safety belt and child passenger safety restraint usage than white, urban and female counterparts.

5. The OHSJP will conduct a high-visibility enforcement and education campaign in an effort to reduce DUI traffic crashes, injuries, and fatalities in FFY 2019. The campaign is known as Sober or Slammer! and represents the state’s version of the national Drive Sober or Get Pulled Over initiative. As referenced in the Impaired Driving Program Area section of the HSP, the NHTSA-produced CTW document stresses the importance of the Impaired Driving emphasis area and outlines significant strategies and appropriate countermeasures utilizing high-visibility enforcement. In order to comply with NHTSA requirements regarding equipment distributed to Law Enforcement agencies, the Law Enforcement DUI Challenge was altered in FY 2017. The FFY 2018 strategy for the DUI enforcement campaign was altered as well to focus predominantly on the SC Highway Patrol (SCHP) for the enforcement component of the campaign, while still making every effort to recruit and partner with local law enforcement agencies statewide. The SCHP is the premier traffic enforcement agency in the state and covers the entire geographic and population areas of South Carolina. The same strategy will continue during FFY 2019. The SCHP, during FFY 2019, will conduct special DUI enforcement emphases once a month on weekends from December 2018 to September 2019. The weekend enforcement efforts will be supported by radio and some television and social media advertising beginning on Wednesday of each week preceding the scheduled enforcement weekends. In addition, during the two DUI mobilization crackdowns, the SCHP will conduct an additional four nights of specialized DUI enforcement, including saturation patrols and public safety checkpoints. The SCHP will recruit and utilize the assistance of local law enforcement agencies during the weekend and crackdown efforts. Agencies with the highest DUI arrests during the challenge will be awarded a recognition plaque for their efforts. This recognition is consistent with the NHTSA Guidance and recommendations received by the OHSJP from the NHTSA Region 4 Office. Law Enforcement Liaisons will encourage agencies within the Law Enforcement Network system in the state to participate in these enforcement events. Participating agencies will receive a certificate from the OHSJP in recognition of their participation. Educational efforts will again utilize media (television, radio, paid social media, and alternative advertising) to support campaign efforts. Media messaging will need to be adjusted to reflect a likely significant decrease in law enforcement participation as a result of the OHSJP’s need to conform to the NHTSA Guidance. Educational efforts will focus on the twenty priority counties designated within the state’s Highway Safety Plan and the Impaired Driving Countermeasures Plan.

6. All major mobilization emphases of the OHSJP will include messages to reach the diverse population of the state. The OHSJP will incorporate into its diversity outreach strategy a variety of media aimed at reaching teens, African Americans, Hispanics, and rural residents across South Carolina. The goal of the outreach is to encourage safety on the roadways in these populations by urging the use of appropriate occupant restraints and attempting to reduce specific risk-taking behaviors such as drinking and driving.

7. The OHSJP will assist the SCHP with School Zone Safety Week emphasis during the late summer of 2019. The emphasis will involve highway safety stakeholders statewide in an effort to call the attention of the motoring public to the importance of safety in school zones. Law enforcement agencies and schools are provided information to conduct activities for School Zone Safety Week, which is to be observed during the first full week of the school calendar. The goal is to educate young children about safe walking techniques, to inform parents and caregivers about their role in ensuring that children get to school safely, and to encourage local law enforcement agencies to patrol in and around schools.

8. Highway Safety staff will continue a statewide Motorcycle Safety Campaign (part of Vulnerable Roadway Users campaign) in 2019 that will focus on increasing the awareness of motorists in passenger vehicles regarding the presence of motorcyclists on the highways. The Look campaign, with its focus on vulnerable roadway users, will be used to alert motorists of the presence of motorcyclists and urge everyone to “share the road” (see graphic at bottom of page 140). The campaign, though statewide, will focus on counties having the majority of motorcyclist fatalities and motorcyclist traffic injuries during the preceding year. This campaign will target the months of the year and locations that are most likely to see a significant number of motorcyclists on the roads.

9. The OHSJP will continue to provide non-federal funding for the SC Highway Patrol (SCHP) to establish Highway Safety booths/displays at various statewide events.

10. The OHSJP will utilize paid advertising of highway safety messages at high school sports venues in the state. This may include advertising on printed tickets for sporting and other special events, public address announcements during these sporting events, and program advertising at these sporting events. About 5 million tickets are expected to be printed and used by most high schools across South Carolina.

11. Speed-related collisions continue to be a problem in South Carolina. Furthermore, public perception on the issue of speeding is information that is already captured in OHSJP’s attitudinal surveys. The Target Zero Enforcement Teams, which were implemented during FFY 2016 with Section 164 funding from the SC Department of Transportation, will continue at least until October 31, 2018 and possibly longer in FFY 2019 and feature six, four-person teams of SC Highway Patrol Troopers, who focus their enforcement activity in four major areas of the state (Upstate, Midlands, Lowcountry, and the Pee Dee).
Troopers work roadways that are high-risk for traffic fatalities and severe injuries. The major enforcement focuses are speeding, DUI, and occupant protection violations. The OHSJP also expects to continue the Region 4 summer speed campaign “Operation Southern Shield” established by NHTSA in FY2017.

12. The OHSJP will continue to seek opportunities to form partnerships with other highway safety stakeholder groups, including Operation Lifesaver, National Safety Council, MADD and others.

13. The OHSJP will add questions to its Attitudinal Survey to gauge public awareness of the Target Zero Enforcement Teams and Target Zero media messaging.

5.2 Program Area: Occupant Protection (Adult and Child Passenger Safety)

Program area type Occupant Protection (Adult and Child Passenger Safety)

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

Yes

Problem identification

Enter description and analysis of the State’s highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

The state of South Carolina has made significant strides in improving safety belt usage rates since the passage and enactment of a primary enforcement safety belt law in 2005. At the time of the enactment of the law, the state’s observed safety belt usage rate stood at 69.7% statewide. According to a June 2017 statewide safety belt survey conducted by the University of South Carolina, the state’s usage rate currently stands at 92.3%. The usage rate also represents a 1.6 percentage point decrease from 2016. South Carolina remains at 90% or higher safety belt use rate for the sixth year in a row. The state of South Carolina has made significant improvements since the enactment of its primary enforcement seat belt law in 2005. The state remains committed to increasing restraint usage in an effort to reduce motor vehicle crash injuries and fatalities, particularly in the light of the state’s relatively high unbelted fatality rate (see Table 7).
In last year’s HSP, South Carolina’s focus for occupant protection was to increase the safety belt usage rate from 93.9% in 2016 to 94% in 2018 which was slightly lower at 93.9%. The state will seek to increase the safety belt usage rate through a continued educational program alerting the state’s citizens, particularly minority groups who lag behind their non-minority counterparts in belt usage rates, to the primary enforcement safety belt law and through the continuing of a Memorial Day safety belt and child passenger safety seat enforcement mobilization which conforms to the national Click it or Ticket model. The state also desires to see an increase in the correct usage of child passenger safety seats. Based on informal surveys conducted annually at seat check events around the state, historically, only about 15% of child safety seats in use are installed correctly. Occupant Protection Programs that are funded by the highway safety program will train NHTSA Child Passenger Safety technicians and instructors, conduct child passenger safety seat check events, certify child passenger safety fitting stations, conduct educational presentations, and emphasize child passenger safety seat use and enforcement during the statewide Memorial Day occupant protection enforcement mobilization.

As indicated previously, the state of South Carolina has seen a steady increase in statewide safety belt use rates since the passage and enactment of a primary safety belt law, from 69.7% in 2005 to 92.3% in 2017. Figure 20 below demonstrates this increase as compared to the national rate for the time period 2012-2016, but does not include the data from 2017, which was captured by an observational survey conducted by the University of South Carolina in a statewide survey conducted after the annual Memorial Day occupant protection enforcement mobilization in June 2016. As seen below, South Carolina’s observed seat belt usage rate was above the national rate for the 2012-2016 time period. In 2016, South Carolina’s rate was 4.2% higher than the national rate (95.9% and 90.1% respectively). Observed seat belt use rates in South Carolina ranged from a low of 90.5% in 2012 to a high of 93.9% in 2016. The national rate during the 2012-2016 time period ranged from a low of 86% in 2012 to a high of 90.1% in 2016.

As shown in Table S-8 below, surveys conducted by the University of South Carolina show that South Carolina has made tremendous progress towards improving the statewide belt usage rate to 92.3% in 2017. The progress has been significant, with nonwhite belt use moving from 67.2% in CY 2007 (compared to whites at 77.8%) to 86.8% for nonwhites in 2017 (compared to 94.1% for whites). This represents noteworthy forward momentum. Over a 10-year period, nonwhite belt use has moved from 15.8% below that of the majority population belt use to only 8.4% below the majority population. Additionally, from 2016 to 2017, belt usage among non-white drivers (86.8%) decreased by 6.8% percentage points. The progress from 2001 to 2017 can be attributed to the State of South Carolina’s efforts to maintain a diverse approach to messaging along with maintaining safety belt law enforcement efforts. Obviously, there remains a need to continuously educate the public as to the benefits of safety belt usage, but existing efforts to address this issue have been beneficial.
The following data sections outline specifically the problems being faced by the state of South Carolina in terms of occupant protection and demonstrate the foundation upon which the state has built its response to the problems for its FFY 2019 Highway Safety Plan.

**Traffic Fatalities**

Traffic fatalities are the most severe consequence of motor vehicle collisions. According to NHTSA FARS data that was released in February, in 2018, motor vehicle crashes were the leading cause of death for Americans for age 8-24. For children 4-7 years of age, motor vehicle traffic crashes were the second leading cause of death. For adults 25-34 years of age, motor vehicle traffic crashes were the third leading cause of death. For toddlers 1-3 years of age and adults 35-44 years of age, motor vehicle traffic crashes were the fifth leading cause of death (Reference: USDOT-HS-812499).

In 2016, traffic crashes claimed 37,461 lives throughout the nation, an increase of 5.6% when compared to the 35,485 lives lost nationally in 2015. Children, ages 0-17 accounted for 2,321 (6%) of the motor vehicle fatalities in 2016. The increase in traffic fatalities experienced in 2016 ended a decline in traffic fatalities that occurred over the last fifty years. As noted in the August 29, 2016, press release, NHTSA has attributed the increase in jobs and low fuel costs as the two leading causes of the increased driving, including additional leisure driving and more driving by young people. More driving can contribute to higher fatality rates.

In 2016, the largest increase in nearly 25 years occurred when vehicle miles traveled (VMT) increased 3.5% over 2015 (see Table 3). Traffic fatalities increased by 5.6% from 2015 to 2016 in the United States, with 35 States showing an increase in traffic fatalities between 2015 and 2016.

A comparison of South Carolina data with national data (Table 2) indicates that South Carolina’s 2012-2016 average population-based traffic fatality rate (18.37 per 100,000 persons) was higher than the national rate (10.81) during the same time period.

Though the demonstrated increase in safety belt use in South Carolina has likely contributed significantly to the state’s downward trend in traffic fatalities since 2007, the state continues to have a problem with unbelted traffic fatalities, as evidenced by the 2.3% increase in unbelted traffic fatalities during 2016 when compared to
Table 7 shows the numbers and rates of unbelted passenger vehicle occupants (i.e. occupants of passenger cars, light trucks, and vans) killed in South Carolina from 2012 through 2016. The number of unbelted passenger-vehicle-occupant fatalities was at its highest level in 2016 (315 fatalities) and at its lowest level in 2013 (242). The 2016 (315) count represents a 10.72% increase compared to the 2012-2015 average (285 deaths) and a 0.64% increase from the 2012 total.

South Carolina’s 2012-2016 population-based unbelted fatality rate (6.01 deaths per 100,000 population) is much higher than the rate for the US (3.24) as a whole during the same years. In South Carolina, observed safety belt use increased 3.2% in 2016 when compared to the 2012-2015 average. In 2014, observed seat belt usage was at its lowest level (90.0%) during the five-year period and increased to its highest level in 2016 (93.9%).

In South Carolina, unbelted fatalities represented 36.27% of all traffic-related deaths in 2012, with this proportion fluctuating throughout the period. The value in 2016 (31.26%) represents a 6.4% decrease when compared to the prior four-year average (33.17%) and a 1.4% decrease when compared to the proportion in 2015.

According to FARS data, in South Carolina, restraint use among fatally-injured passenger-vehicle occupants was below that of the nation during four (4) of the five (5) years and equal to the national percentage in 2014 (Table 27 below). The 2016 restraint use percentage for fatally-injured passenger vehicle occupants in South Carolina represents a 2.0% decrease compared to the average of the previous four years (50.8%). The US as a whole also saw a decrease (3.2%) in this index.

| Table 27. Restraint Use of Fatally-Injured Passenger Vehicle Occupants |
|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|
| South Carolina              | 38.3% | 43.9% | 47.3% | 45.3% | 45.2% |
| US                          | 45.7% | 46.5% | 47.2% | 47.2% | 47.5% |

In 2016 in South Carolina, as indicated in Table S-9, 558 automobile and truck occupants were totally ejected from the vehicles in which they were riding during traffic crashes, and of those, 126, or 22.6%, were killed. In addition, 215 occupants were partially ejected and 26 of those, or 12.1%, were killed. Of the 347,208 occupants not ejected, 498, or 0.14%, were killed.
As indicated in Table S-10 South Carolina during the period 2012-2016, there were 2,666 individuals totally ejected from the vehicles in which they were riding during traffic crashes, and of those, 586, or 22.0%, were killed. In addition, 952 were partially ejected, and 157 of those, or 16.5%, were killed. Of the 1,500,672 occupants not ejected, 2,194 or 0.15% were killed.

As shown in Table S-11, estimates indicate that, of the 619 occupant fatalities with known restraint usage in 2016, 328 (52.99%) were not restrained, and 291 (47.01%) were restrained. According to State Data, from 2012 to 2016 there were 2,783 fatalities in which the restraint use was known in South Carolina. Of this number, 1,501, or 53.93%, were unrestrained.

County data shows interesting trends in terms of unbelted traffic fatalities, particularly at night. As shown in Table 28 below, for the years 2012-2016, 59.19% of South Carolina’s passenger vehicle occupant fatalities that occurred at night were unrestrained. The following six counties accounted for the highest percentages of unrestrained nighttime passenger vehicle occupant fatalities: Barnwell (9 fatalities, 9 [100%] unrestrained); Union (9 fatalities, 8 [88.89%] unrestrained); Hampton (11 fatalities, 9 [81.82%] unrestrained); Newberry (16 fatalities, 13 [81.25] unrestrained); Marlboro (10 fatalities, 6 [80%] unrestrained); and Williamsburg (28 fatalities, 22 [78.57%] unrestrained). Of the 46 counties in the state, McCormick, Abbeville and Cherokee had the smallest percentages of unrestrained night-time fatalities (7 fatalities, 2 [28.57%] unrestrained; 14, 5 [35.71%] unrestrained; and 18, 7 [38.89%] unrestrained).
For children 0-19 years of age, motor vehicle crashes are the leading cause of injury-related deaths in South Carolina. Analyzing teen driver data shows challenging statistics for this age group relative to safety belt use, particularly in terms of traffic fatalities in the state from 2012 to 2016. As shown in Table S-12 and Figure 22 below, state data from 2012 to 2016 indicates that drivers between the ages of 15 and 19 were involved in 102,982 traffic collisions, or 16.7% of the total number of collisions during that time period. The number of collisions involving a teen driver has decreased 4.0% from the timeframe of 2012 to 2016. When comparing the 2016 number of collisions that involved a teen driver to the 2012 to 2015 average (19,924.75), the state experienced a 16.9% increase in the number of collisions involving a teen driver. Also shown in Table S-12 and Figure S-22 are the number of fatalities that occurred when a teen driver was involved in the crash by restraint usage. There were a total of 511 such fatalities from 2012 to 2016.

</table>
Restrain usage among fatally-injured persons in traffic crashes in which a teen was driving is shown in Table S-11 and Figure S-5. There were 96,625 crashes that involved a teen driver in which restraint devices were used by all occupants from 2012 to 2016. These collisions resulted in the deaths of 255 persons. The number of fatalities in which all occupants were restrained increased 2.46% in 2016 (52), compared to the average number of fatalities from 2012 to 2015 (50.75).

Conversely, there were 3,392 collisions that involved a teen driver in which restraint devices were not used for at least one occupant, resulting in the deaths of 238 persons. The number of traffic fatalities in these collisions has increased 17.39% in 2016 compared to the average number of this type of fatalities from 201 to 2015 (46).

After analyzing the traffic data relative to the use of appropriate restraints by children, there is a slightly more promising outlook for the state than the teen driver information pictured on the previous page. During the calendar years 2012-2016, 61,751 children under six years of age were motor vehicle occupants involved in traffic crashes in South Carolina. During this five-year period, 60,103 of those children were restrained by a safety restraint device (see Figure S-17). These figures indicate that approximately 97.6% of children involved in 2012-2016 traffic crashes in South Carolina were utilizing some sort of safety restraint device. During the five-year period, 44 occupants under the age of six were killed in traffic crashes (see Table S-5 in Traffic Injuries section). However, informal surveys conducted annually at seat check events by the SC Department of Health and Environmental Control (SCDHEC), indicate that proper usage of child safety seats is historically less than 15% in South Carolina. These statistics indicate a continued need for the development and implementation of occupant restraint programs statewide, since misuse of safety seats may result in death or serious injury to a child.
Traffic Injuries

The statistical data listed in Figure S-3 below shows that in 2016 there were 141,599 motor vehicle crashes in South Carolina. State data in Figure S-1 for 2016 also indicates that there were 61,899 reported traffic injuries during the year, compared to 50,064 reported in 2012. State data in Figure S-1 shows an increase of 23.64% in total traffic-related injuries in 2016, from 50,064 total injuries in 2012 to 61,899 in 2016. The 2016 figure was also more (16.44%) than the average of the four prior years 2012-2015 (53,139). The number of total injuries in 2016 increased by 5.6% compared to the number of total injuries in 2015.

Statistical data listed in Table S-13 shows that during the five-year period from 2012 to 2016 in South Carolina, there were 1,533,554, motor vehicle occupants (i.e. occupants of passenger cars, trucks, vans, and SUVs) involved in collisions; of these, 255,329 were injured. 14,599 of those injured, or 5.7%, were unrestrained.

Figure S-1 gives a graphic representation of the information contained in Table S-13 above for the total number of passenger vehicle occupants injured and the percentage unrestrained during collisions from 2012 to 2016.
Table S-5 below displays information related to passenger vehicle occupants under the age of six involved in passenger vehicle collisions who sustained injuries. During the calendar years 2012-2016, 61,751 children under six years of age were passenger vehicle occupants involved in traffic collisions in South Carolina. Of those children, 9,161, or 14.84%, suffered some type of injury. Of the 9,161 injured, only 478, or 5.2%, were unrestrained.

Traffic Collisions

There were 616,254 total traffic collisions in South Carolina from 2012 to 2016. This total includes fatal collisions, injury collisions, and property-damage-only collisions. State data in Figure S-3 shows an increase of 5.7% in total collisions from 2015 (133,961) compared to 2016 (141,599). The 2016 figure represents an increase of 30.8% as compared to 2012 and an increase of 19.3% as compared to the average of the previous four years of 2012-2015 (118,669). From 2012 to 2016, the 576,497 total collisions occurring in SC involved 1,533,554 passenger vehicle occupants (see Table S-16 below). Of those total occupants, 25,130, or only 1.6%, were unrestrained. These figures indicate that approximately 98% of all occupants involved in traffic crashes during this time period were utilizing some sort of safety restraint device.
During the calendar years 2012-2016 (see Table S-17 below), 61,751 children under six years of age were passenger vehicle occupants involved in traffic crashes in South Carolina. During this five-year period, 60,103 of those children were restrained by a safety restraint device. These figures indicate that approximately 97.33% of children involved in 2012-2016 traffic crashes were utilizing some sort of safety restraint device.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Countermeasure strategies

Select existing countermeasure strategies below and/or click Add New to enter and select countermeasure strategies to submit for program area.

5.2.1 Countermeasure Strategy: Short-term, High Visibility Seat Belt Law Enforcement
<table>
<thead>
<tr>
<th>Program area</th>
<th>Countermeasure strategy</th>
</tr>
</thead>
<tbody>
<tr>
<td>Occupant Protection (Adult and Child Passenger Safety)</td>
<td>Short-term, High Visibility Seat Belt Law Enforcement</td>
</tr>
</tbody>
</table>

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

The state will seek to increase the safety belt usage rate through a continued educational program alerting the state’s citizens, particularly minority groups who lag behind their non-minority counterparts in belt usage rates, to the primary enforcement safety belt law and by continuing to conduct a statewide occupant protection program.
enforcement mobilization during and around the Memorial Day holiday each year to coincide with national enforcement mobilizations are two strategies the state will use to address the occupant protection issues plaguing South Carolina.

Aggressively enforcing the primary safety belt law and continuing a Memorial Day safety belt and child passenger safety seat high-visibility enforcement mobilization which conforms to the national Click it or Ticket model help increase the safety belt usage rate as well as the correct usage of child passenger safety seats. Occupant Protection Programs that are funded by the highway safety program will train NHTSA Child Passenger Safety technicians and instructors, conduct child passenger safety seat check events, certify child passenger safety fitting stations, conduct educational presentations, and emphasize child passenger safety seat use and enforcement during the statewide Memorial Day occupant protection enforcement mobilization.

It is anticipated that performance of the chosen countermeasure strategy will provide a beneficial traffic safety impact in the area of occupant protection in FFY 2019.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Based on the analysis of the problem identification data, South Carolina faces significant issues related to occupant protection. Allocating funds to high-visibility enforcement of the state's primary seatbelt law will facilitate the state's achievement of the outlined Occupant Protection performance targets. Achievement of these performance targets will serve to reduce collisions, severe-injuries, and fatalities in the state.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

The state currently complies with countermeasures deemed highly effective by the Countermeasures that Work document, such as statewide primary safety belt enforcement (pp. 2-9 to 2-10), short-term high-visibility belt law enforcement following the national Click it or Ticket model (pp. 2-13 to 2-14), combined nighttime seat belt and alcohol enforcement (pp. 2-15 to 2-16), and communications and outreach strategies for lower belt use groups (pp. 2-19 to 2-21). South Carolina also implements countermeasures that have been deemed effective in specific situations, such as sustained enforcement (p. 2-17). In addition, the state has implemented countermeasures that have not clearly been demonstrated as effective overall, but may have an impact in specific areas, such as the development of inspection stations for child safety seats (pp. 2-31 to 2-32).

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

5.2.1.1 Planned Activity: High visibility enforcement of seat belt law

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

Yes

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]

Yes

Enter description of the planned activity.

For FFY 2019, the OHSJP will implement high-visibility enforcement strategies in support of national high-visibility law enforcement mobilizations (Click it or Ticket and Drive Sober or Get Pulled Over Crackdowns) coordinated by the Secretary of Transportation. The impaired driving campaign, designated Sober or Slammer! in SC, will include enforcement/education initiatives around the Christmas/New Year’s holidays of 2018-2019, the summer months, and the Labor Day holiday of 2019. The state of South Carolina will again conduct a high-visibility statewide enforcement and education campaign during the Memorial Day 2019 holiday period from May 20 – June 2, 2019, known as Buckle Up, South Carolina. It’s the law and it’s enforced. (BUSC), modeled after the national Click-It-or-Ticket mobilization to emphasize the importance of and to increase the use of occupant restraints. The campaign will include paid and earned media, increased enforcement activity by state and local law enforcement agencies, and diversity outreach elements in order to increase safety belt and child restraint use among the state’s minority populations. The campaign will focus on nighttime safety belt enforcement to attempt to reduce unrestrained traffic fatalities and injuries, especially during these hours. The 2019 BUSC campaign media plan will follow similarly the media buy plan implemented for the 2018 BUSC campaign. The SC Highway Patrol (SCHP), the SC State Transport Police (STP), and the Law Enforcement Network system in South Carolina, which is composed of local law enforcement agencies statewide, have indicated that they will again participate in 2019. This level of participation will again allow the OHSJP to cover 100% of the state’s population. Additionally, all Police Traffic Services subgrantees have an objective to participate in the BUSC campaign and have an objective specifically related to increasing occupant protection violation citations. Diversity outreach is accomplished through focusing placement of paid media on stations and during time slots that attract African American, Hispanic, youth, and rural male audiences. These demographic groups have shown statistically to have lower safety belt use rates than non-minority, urban and female counterparts. Campaign on-air messages, both radio and television will be translated/dubbed into Spanish and aired on Hispanic television and radio stations statewide. The paid media components of this effort will include airing television and radio spots to alert the general public of the enforcement mobilization and to send the message that law enforcement in the state is serious about enforcing the state’s occupant protection laws. The campaign will utilize the state’s enforcement slogan, Buckle up, South Carolina. It’s the law, and it’s enforced. (BUSC). The OHSJP will also hold press events in key media markets of the state to enhance the effort and to alert the general public regarding the enforcement and media components of the campaign. The mobilization crackdown will be coordinated through the SC Law Enforcement Network. Saturation patrols, nighttime seatbelt enforcement, and direct enforcement strategies will be employed to focus on occupant protection violations. South Carolina also plans to conduct pre- and post-campaign observational surveys in order to effectively evaluate the success of the program and determine the state’s safety belt usage rate and pre- and post-campaign telephone surveys to gauge public awareness of the campaign and its enforcement and education messages.

5.2.2 Countermeasure Strategy: Communication Campaign

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?
No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)
Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]
No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Communication campaigns serve to educate the public on the importance of using occupant restraint devices, and they serve to inform the public of upcoming high-visibility enforcement efforts. Educating the public on the importance of occupant restraint usage should increase occupant protection usage rates among the population. Given the knowledge that seatbelts save lives, if the number of unrestrained occupants can be decreased and observed seatbelt rates can be increased, a significant positive impact on traffic safety can be achieved.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

South Carolina is committed to its focus on the dissemination of traffic safety information to the general public and the law enforcement community. Marketing campaigns, training for highway safety professionals and sharing information at public events are key strategies to help meet performance measures and goals related to issues with occupant protection in the state.

The OHSJP, Public Information Outreach and Training (PIOT) section will continue to use a full-service marketing firm to assist with such efforts as media buying, creative production, and evaluation of campaigns. However, the OHSJP, with the help of the agency’s Communications Office and SC Highway Patrol Community Relations Officers, will oversee earned media efforts, such as issuing news releases, conducting press events, and coordinating media interviews.

The marketing firm will continue to assist with campaigns, including Buckle Up, SC. It’s the law and it’s enforced. Child Passenger Safety is another important public information initiative for the State Highway Safety Office.

Special public information events during Buckle Up, America! Week in May 2019, and the National Child Passenger Safety Awareness Week in September 2019 will occur in FFY 2019. Additionally, the State Highway Safety Office (SHSO) will also assist in planning, coordinating, and implementing, with the assistance of the SCDPS Contractor, the Buckle up, South Carolina. It’s the law and it’s enforced. public information, education and enforcement campaign during the Memorial Day holiday of 2019.

Communication and outreach contribute to heightened public awareness, which when combined with enforcement, have been beneficial in addressing the issues faced by the state, as determined through its problem identification process.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

NHTSA promotes the importance of combining high-visibility enforcement with heightened public awareness as the best way to approach key problem areas and produce behavioral change. Therefore, the OHSJP will continue to offer a media mix for enforcement-based and non-enforcement-based campaigns to meet stated goals. The OHSJP will employ key strategies to promote its mission and core message of public safety.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]
No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]
No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]
No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.
Increasing the number of inspection stations in the state will provide increased opportunities for parents and caregivers to receive assistance from certified CPS technicians. A greater number of inspection stations will provide greater opportunities to educate the public on the importance of the consistent and correct use of child safety seats and the dangers of air bags to children.

State data indicates that between 2012-2016, 61,571 children under six years of age were occupants involved in traffic crashes in South Carolina. During this five-year period, 60,103 of those children were restrained by a safety restraint device. These figures indicate that approximately 97.33% of children involved in 2012-2016 traffic crashes were utilizing some sort of safety restraint device. Although approximately 97% of children were utilizing some sort of safety restraint device, data indicates that only 15% of child safety seats are properly installed. Given that an alarming 85% of child safety seats are improperly installed, a significant need for increased opportunities to educate the public on the proper use of child safety seats.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Research indicates that child inspection stations have shown some efficacy in increasing observed occupant restraint use. A few cited studies, such as those sponsored by General Motors and NHTSA, have found that parents/caregivers who attended and received hands on training at child restraint inspection events and inspection stations were more likely to have their children properly restrained when compared to the likelihood of proper restraint usage prior to attending the events/visiting inspection stations. This was especially true for parents/caregivers who had the opportunity to demonstrate installing the child restraint system in their own personal vehicles for the CPS technicians on site.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

5.2.3.1 Planned Activity: Increasing the number of Inspection Stations

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3)

[Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

Yes

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4)

[Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(ii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No
Enter description of the planned activity.

A partnership among the SC Department of Public Safety (SCDPS) and the SC Department of Health and Environmental Control (SCDHEC) will continue in FFY 2019 with the implementation of the South Carolina Vehicle Occupant Protection grant project. The main focus of the project will be to educate and train local law enforcement and other first responders, public health agency staff, and parents/caregivers concerning the proper usage of Child Passenger Safety (CPS) and occupant restraint devices. Two full-time Child Passenger Safety (CPS) Technician Instructors with the SC Department of Health and Environmental Control (SCDHEC) are funded to ensure that training is taking place across the state to certify new CPS technicians and recertify current technicians. The project will seek to increase all forms of vehicle occupant protection by educating the public about the importance of safety belt use and supporting national and statewide emphases. The project will also provide staff to serve as the state contacts for National Safe Kids in terms of CPS certification issues and will continue to coordinate diversity outreach efforts with the Office of Highway Safety and Justice Programs.

With the OHSJP’s partnerships with SCDHEC, Safe Kids, and highway safety sub-grantees, currently, thirty-nine (39) of the forty-six (46) counties in the state have at least one Child Restraint Inspection Station. This represents 96.7% of the statewide population, according the US Census (2010), having access to a Child Restraint Inspection Station. At each child safety seat inspection station and during seat check events, educational material is distributed to better educate parents on the proper way to insure the safety of their children while riding as passengers in automobiles. Presentations are also conducted across the state at churches, day care centers, schools, and civic organizations by the SCDHEC Child Passenger Safety (CPS) Technician Instructors, Safe Kids coalitions, and South Carolina Highway Patrol’s Community Resource Officers. This allows 100% of the state’s population to be covered by CPS public information and education.

In an effort to curtail the misuse of child safety seats, South Carolina has established an active network of child inspection stations across the state in order for the public to have access to persons trained to assist them with properly installing their child safety seats into their automobiles. South Carolina has an active network of child restraint inspection stations, and each one of them is staffed with nationally certified child passenger safety technicians who are available during official posted hours and/or by appointment. According to the most recent US Census (2010), South Carolina has a population of 4,625,364 people within 46 counties. Inspection stations are located in 39 of the 46 counties. Using data from the census, counties containing inspection stations have a total population of 4,474,870. Based on both the census data and locations of fitting stations, SC fitting stations reach 96.7% of the state’s population. Attachment 6 (below) contains information regarding US Census (2010) data of the state and the counties with and without inspection stations. Attachment 5 contains a listing of each of the inspection stations in South Carolina and includes the total number of inspection stations that service rural and urban areas and at-risk populations (minority and low income). South Carolina has 1,171 nationally certified child passenger safety technicians, with 31 of those being certified instructors.

In an effort to provide services to underserved areas within the state, the OHSJP provides supplies, such as child safety seats and educational materials, to the SC Highway Patrol’s Occupant Protection division. The SC Highway Patrol had a designated CPS Coordinator that traveled the state and provided seat checks in areas where people do not have access to fitting stations, but that employee has retired. This position remains open, but other Community Relations Officers are currently handling CPS events throughout the state. In addition, safety materials, law cards, and fitting station listings are placed in all health districts (one health department is located in each county) and pediatricians’ offices across the state.

5.2.4 Countermeasure Strategy: Child passenger safety technicians

Program area: Occupant Protection (Adult and Child Passenger Safety)

Countermeasure strategy: Child passenger safety technicians

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative? No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.
The overall projected traffic safety impact of the chosen countermeasure strategy will be a greater number of children who survive automobile collisions without severe injuries because this countermeasure strategy will increase the number of CPS technicians certified to educate the public on proper child restraint use.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

State data indicates that between 2012-2016, 61,571 children under six years of age were occupants involved in traffic crashes in South Carolina. During this five-year period, 60,103 of those children were restrained by a safety restraint device. These figures indicate that approximately 97.33% of children involved in 2012-2016 traffic crashes were utilizing some sort of safety restraint device. Although approximately 97% of children were utilizing some sort of safety restraint device, data indicates that only 15% of child safety seats are properly installed. Given that an alarming 85% of child safety seats are improperly installed, a significant need for increased opportunities to educate the public on the proper use of child safety seats. The misuse of child restraints has been a concern for many years, and CPS technicians are a valuable resource to help reduce the misuse of child restraints. CPS technicians have completed the NHTSA Standardized Child Passenger Safety Training Course, which was designed to train safety professionals and other interested parties in the fundamentals of correctly choosing and installing the proper car seat for child passengers. Individuals who successfully completed the course are certified to educate the public in using child restraints properly and provide caregivers with this “hands-on” assistance. By increasing the number of technicians trained to educate the public in the proper use of child restraints and to provide caregivers with “hands on” assistance, the number of parents/caregivers who properly restrain the children under their care will also increase. Increasing the number of properly restrained children will increase the number of children who survive traffic collisions and decrease the number of children who survive but sustain severe injuries. Reducing the number of child fatalities and severe injuries among children who were occupants in collisions are significant positive traffic safety impacts.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

The state currently complies with countermeasures deemed highly effective by the Countermeasures that Work document, such as statewide primary safety belt enforcement (pp. 2-9 to 2-10), short-term high-visibility belt law enforcement following the national Click it or Ticket model (pp. 2-13 to 2-14), combined nighttime seat belt and alcohol enforcement (pp. 2-15 to 2-16), and communications and outreach strategies for lower belt use groups (pp. 2-19 to 2-21). South Carolina also implements countermeasures that have been deemed effective in specific situations, such as sustained enforcement (pp. 2-17). In addition, the state has implemented countermeasures that have not clearly been demonstrated as effective overall, but may have an impact in specific areas, such as the development of inspection stations for child safety seats (pp. 2-31 to 2-32).

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

5.2.4.1 Planned Activity: Recruiting, Training, and Maintaining Child Passenger Safety Technicians

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3)

[Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4)

[Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification, at the level of detail required under § 1300.11(d)]

Yes

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii)

[Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State's most recent highway safety data and traffic records system assessment]

No
Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(i) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.

Recruiting, Training and Maintaining Child Passenger Safety Technicians

Recruitment of Technicians:
The typical audience for the NHTSA Child Passenger Safety Technician training is composed of law enforcement, firefighters, and emergency medical personnel. Recruitment of agencies to participate in the SC Fitting Station Network is accomplished through a number of avenues. Word-of-mouth advertising about the program from agency to agency in areas surrounding currently staffed fitting stations generates a great deal of interest in the training. As SC Department of Health and Environmental Control (SCDHEC) Vehicle Occupant Protection project staff travel throughout the state, visits are made to agencies that do not currently have CPS Technicians trained. Focus is concentrated on areas of the state that have few or no fitting stations. For law enforcement agencies that are members of the South Carolina Law Enforcement Network (SCLEN), funding is sometimes available through the SCLEN to pay registration fees, enabling an agency with a tight budget to train personnel, with the only investment required being time away from the office. Law enforcement officers attending the CPS Technician training also earn CLEE’s (Continuing Law Enforcement Education units). Fire and rescue agencies are quickly becoming the predominant agency requesting training, and efforts are underway to secure continuing education credit for firefighters as well. The state also trains a large number of SC Highway Patrol Troopers as CPS Technicians. The OHSJP’s Occupant Protection/Policing Traffic Services Program Coordinator is a CPS Technician.

SCDHEC will continue to recruit CPS technicians through partnerships with public health agency staff, law enforcement, fire departments, EMS, Safe Kids Coalitions, health educators in the private sector and various community organizations.

Training of Technicians:
In FFY 2019, the SCDHEC SC Vehicle Occupant Protection project will hold 18 Child Passenger Safety Technician courses in the following counties: Abbeville, Allendale, Bamberg, Barnwell, Calhoun, Chester, Clarendon, Dillon, Edgefield, Fairfield, Greenwood, Hampton, Jasper, Lancaster, Lee, McCormick, Saluda and Williamsburg. SCDHEC’s target is to certify 90 new CPS technicians in FFY 2019, and to provide six (6) continuing education classes to recertify CPS technicians.

Child Passenger Safety (CPS) Technician training is conducted at the site of the host agency, and invitations are sent to surrounding agencies requesting that they also send personnel. Agencies sending personnel to the CPS Technician training are encouraged to become a part of the SC CPS Fitting Station Network. Agencies participating in the SC CPS Fitting Station Network must list themselves on the NHTSA website as a permanent fitting station. Once they become a NHTSA-recognized fitting station, they are eligible to receive both convertible child restraint and booster seats from the SCDHEC through a grant project funded by the OHSJP. These seats are kept on hand so that if a seat is deemed unsafe during an inspection, a replacement can be offered as a trade for the unsafe seat. The child must be present so the seat can be fitted to the child, and the parent receives education on the proper use and installation of the child restraint. A Lower Anchors and Tethers for Children (LATCH) Restraint System manual is also provided to the fitting station.

Retention of Technicians:
South Carolina currently has a recertification rate of approximately 47% - 51%, a rate with which the state is far from satisfied. After a class is held, technicians are encouraged to contact SCDHEC staff with any needs the agency may have for daily operation or recertification. SCDHEC staff also offers a one-day training that provides the six continuing education units required for recertification as well as verification of seat installations. A CD with the CEU curriculum is also distributed to all CPS Technician Instructors in South Carolina so that they can offer this class in their respective areas as well. Continuing education is also offered at the SC CPS Summit held in September of every other year, where there is also an opportunity for seat installation verification. SCDHEC staff sends an email to technicians a few months before their certification expires, offering assistance with any aspect of the recertification process. The OHSJP also pays the initial technician and...
renewal fees of the Occupant Protection/Police Traffic Services Program Coordinator and the SC Highway Patrol in order to certify as many individuals as possible.

5.3 Program Area: Traffic Records

Program area type  Traffic Records

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State’s highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Timely, accurate, and efficient collection and analysis of appropriate traffic records data have always been essential to highway safety and are critical in the development, implementation, and evaluation of appropriate countermeasures to reduce traffic collisions and injuries. There are many uses of these data. Law enforcement utilizes the data for the deployment of enforcement units. Engineers use data to identify roadway hazards, while judges utilize data as an aid in sentencing. Prosecutors use traffic records data to determine appropriate charges to levy against drivers in violation of traffic laws and ordinances. Licensing agencies utilize data to identify problem drivers, and emergency response teams use data to improve response times. Health-care organizations use data to understand the implications of patient care and costs, and legislators/public officials use data to pass laws and to set public policy.

Overview of the South Carolina Traffic Records System

The South Carolina Traffic Records System is composed of the six components maintained by five core state agencies SC Department of Motor Vehicles (SCDMV), SC Department of Transportation (SCDOT), SC Judicial Department (SCJD), SC Department of Health and Environmental Control (SCDHEC) and SC Department of Public Safety (SCDPS).

**The Collision Component (SCDPS, SCDMV)**

The SCDPS maintains the South Carolina Collision and Ticket Tracking System (SCCATTS). SCCATTS serves as the state-provided solution for collecting collision, public contact/warning, and citation data for SCCATTS users and also employs a Geographic Information System (GIS) component. This system currently collects 90% of all collision data statewide. The remaining 10% of reports are submitted manually and entered into SCCATTS by data entry clerks with the SCDPS Office of Highway Safety and Justice Programs (OHSJP). SCCATTS also has the ability to collect public contact/warning data and Uniform Traffic Ticket (UTT) citation data issued by law enforcement. SCDPS also houses the South Carolina Traffic Collision Master File. This file contains data obtained from the South Carolina Traffic Collision Report Form (TR-310) submitted by law enforcement collision investigators. This form can be submitted electronically through the SCCATTS system to SCDPS and SCDMV. The form can also be submitted manually through a paper process by law enforcement agencies that do not have the capability to submit electronically through SCCATTS. SCDPS also houses the Traffic Records staff, Fatality Analysis Reporting System (FARS), SafetyNet, and Statistical Analysis & Research sections. All of these sections work as a cohesive unit in association with South Carolina’s crash data collection.

In addition to those systems mentioned above, OHSJP is now participating in the National Highway Traffic Safety Administration’s (NHTSA) Crash Report Sampling System (CRSS). This system reviews a sample geographical area of law enforcement reported crash investigations involving all types of motor vehicles, pedestrians, and cyclists. CRSS is used to develop an overall crash depiction, that can be used to identify highway safety problem areas, performance measure trends and as a basis for cost analysis with highway safety initiatives.

SCDMV currently houses driver and vehicle collision records obtained from the TR-310 and Financial Responsibility (FR-10) form. The FR-10 is a component of the TR-310 issued by law enforcement, during crash investigations, to verify liability insurance on the units involved. These records are used for insurance verification and driver/vehicle components of collision records as described below:

**The Driver Component (SCDMV)**

SCDMV maintains driver records for the state in a customer-centric system, called the Phoenix System. This system uses a common architecture to combine driver license records and driver history. These records contain crash and citation data that are used daily by stakeholder agencies for day-to-day operations. The SCDMV is responsible for maintaining current South Carolina driver history from the data collected from the TR-310 collision form and Uniform Traffic Ticket (UTT) citation data received from law enforcement and the courts.

**The Vehicle Component (SCDMV)**

SCDMV’s Phoenix System also maintains vehicle records for the state. This system is used to maintain vehicle title, registration, and insurance records. This system is also used daily by stakeholders for vehicle information. The SCDMV is responsible for maintaining current South Carolina vehicle history from title, registration information and data collected from the TR-310 collision and FR-10 forms.

**The Citation/Adjudication Component (SCDMV, SCJD)**

The Citation/Adjudication component went through major changes in the collection of citation data over the past several years. The South Carolina General Assembly enacted legislation that requires all citation data to be submitted electronically to SCDMV by January 1, 2017 as per SCDMV requirements. In response to this legislation, the Traffic Records Coordinating Committee (TRCC) coordinated the creation of a statewide citation database housed within SCDMV. This database, the South Carolina Uniform Traffic Ticket Information Exchange System (SCUTTIES), was designed to collect all citation data electronically from the issuing law enforcement agency and track to citation through the court system to ultimately obtain the disposition data for all traffic related offenses. The system became fully operational on January 1, 2018.

The Adjudication Component is managed by the South Carolina Judicial Department (SCJD) through its Case Management System (CMS) and various local court’s Records Management Systems (RMS). The Court Administration was charged, as per legislation, with developing adjudication disposition data collection application(s) for all citations issued within the state. The data collection process utilized the state’s Case Management System developed by SCJD. It also uses a Web-services application that was developed for local courts not utilizing CMS. The CMS disposition system was completed and enacted in June 2016. The Disposition Portal to collect disposition data for courts with no RMS was deployed in January 2018.

**The Injury Surveillance System Component (SCDHEC)**

The Injury Surveillance System (ISS) is managed by SCDHEC. This agency collects and maintains data through several statewide data systems. They include Emergency Medical Services (EMS) records; a patient care reporting system called Prehospital Management Information System (PreMIS), which is an electronic reporting component of the National Emergency Medical Services Information System (NEMSIS); and statewide trauma registry and the vital records system.

These major statewide data systems rely on data collected by:

- State, county, local government agencies, private and volunteer service providers in health care-related fields that manage/report data contained in these systems, and;
- State, county, and local government employees in law enforcement and engineering agencies.

**The Roadway Component (SCDOT)**
The South Carolina Department of Transportation (SCDOT) maintains roadway information in the Integrated Transportation Management System (ITMS), the Roadway Information Management System (RIMS), and a Geographic Information System (GIS). These systems focus on state-maintained roadways and local roadway segments that are included as selected segments for the Highway Performance Monitoring System (HPMS).

States are required to have access to a complete collection of Model Inventory of Roadway Elements (MIRE) fundamental data elements (FDE) on all public roads by September 30, 2026. In preparation for 100% compliance, 23 CRF Part 924.11 directs states to include in their 2017 Traffic Records Strategic Plan (TRSP) information related to MIRE FDE, expressly to “incorporate specific quantifiable and measurable anticipated improvements for the collection of MIRE fundamental data elements”. Of the 33 unique MIRE FDE identified, South Carolina Department of Transportation currently has access to 87.9%, missing only four elements. Please see Appendix E of the Traffic Records e-reporting application for a complete list of elements. Many projects in this year’s TRSP address improvements to the collection of MIRE FDE. Specifically, Collision Report Form Revision, Intersections with Traffic Signals Database, Local Agency Data Collection for Road Location Coding, Rural/Urban Designation and Roadway Surface Type Database, Horizontal Roadway Curve Identification, and Traffic Records Dashboard.

Traffic collision data are the focal point of the various record systems that must be accessed to identify highway safety problems. The management approach to highway safety program development embraces the concept of implementing countermeasures directed at specific problems identified through scientific and analytical procedures. The results of any analytical process are only as valid and credible as the data used in analysis. Therefore, an effective safety program is dependent on an effective collision records system. As such, a major priority for FFY 2019 is the upgrading of the SCCATTS (South Carolina Collision and Ticket Tracking System) e-Reporting application.

The current application for electronic Traffic Records report submission and data processing is the ReportBeam© product. This product, purchased through federal grant funds, is hosted by SCDPS for state, county and local law enforcement traffic records processes. It was purchased in 2009 and is aged and has security vulnerabilities. The product is used by law enforcement to produce and electronically submit citations, collisions and public contact/warning reports and/or data through SCDPS to SCDMV, SCJD, and the SCDOT.

Due to the age of the product and outdated technology, the risk of operating this product is increasing and failures/breaches are possible. SCDPS maintains a secure network infrastructure and wants to ensure that all avenues of security are meeting state standards. The SCUTTIES and SCCATTS programs are dependent upon the traffic records data created by this application to continue to meet both Federal Motor Carrier Safety Administration (FMCSA) and National Highway Traffic Safety Administration (NHTSA) requirements. These requirements have a direct impact on funding for Traffic and Roadway Safety programs within our state. A project in the 2018-2019 TRSP, listed under the SCCATTS program, will be focused on upgrading the current e-Reporting application to meet industry security standards and begin the research for a possible replacement or upgrade of the e-reporting software application.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

### Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Uniformity reflects the consistency among the files or records in a database and may be measured against some independent standard, preferably a national standard. Within a state, all jurisdictions should collect and report the same data using the same definitions and procedures. Without uniformity, the goal of data integration cannot be achieved, and both are vital attributes of a well-developed TRS. Improving uniformity of the data will assist in achieving integration among the core databases, and achieving this goal would have considerable traffic safety impacts since it would allow for greater opportunities to track and address traffic safety events among each of the data files.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Within a state, all jurisdictions should collect and report the same data using the same definitions and procedures in order for an accurate depiction of the state’s traffic safety concerns. Uniformity of the data collection and reporting procedures is needed because it will enable the setting of realistic performance targets. Improving the uniformity of the data contained within the TRS will enable the state to spend its limited resources wisely, getting the most benefit for the investment of money and staff time. It will enable the state to better ensure that new efforts are aimed squarely at needed improvements to the data elements and that those resources are allocated in a systematic manner.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

This performance measure is measured by the usage and examination of the data within each component’s dataset. Allocation of funds to improving the timeliness of data is necessary for achieving a well-developed TRS within the state.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

5.3.2 Countermeasure Strategy: Improves timeliness of a core highway safety database

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network

of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(i)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.29(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

The information contained within the TRS should be available within a timeframe to be meaningful for effective analysis of a State’s highway safety programs, and for efficient conduct of each custodial agency’s business and mission. Improving the timeliness of the data contained within the core databases will produce a positive traffic safety impact within the state because it will ensure that all of the necessary problem identification data is as up-to-date as is reasonably possible.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Timely data is necessary for identifying up-to-date locations and relevant causes of crashes, for planning and implementing countermeasures, for operational management and control, and for evaluating highway safety programs and improvements. Improving the timeliness of the data contained within the state’s TRS will ensure that the relevance of the problems identified during the program identification is known. It will also enable the setting of realistic performance targets. Improving the timeliness of the data contained within the TRS will enable the state to spend its limited resources wisely, getting the most benefit for the investment of money and staff time. It will enable the state to better ensure that new efforts are aimed squarely at needed improvements to the data elements and that those resources are allocated in a systematic manner.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.
This performance measure is measured by the usage and examination of the data within each component's dataset. Allocation of funds to improving the timeliness of data is necessary for achieving a well-developed TRS within the state.

**5.3.3 Countermeasure Strategy: Improves integration between one or more core highway safety databases**

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]
To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Timely, accurate, and efficient collection and analysis of appropriate traffic records data have always been essential to highway safety and are critical in the development, implementation, and evaluation of appropriate countermeasures to reduce traffic collisions and injuries. There are many users of these data. Law enforcement utilizes the data for the deployment of enforcement units. Engineers use data to identify roadway hazards, while judges utilize data as an aid in sentencing. Prosecutors use traffic records data to determine appropriate charges to levy against drivers in violation of traffic laws and ordinances. Licensing agencies utilize data to identify problem drivers, and emergency response teams use data to improve response times. Health-care organizations use data to understand the implications of patient care and costs, and legislators/public officials use data to pass laws and to set public policy.

Traffic collision data are the focal point of the various record systems that must be accessed to identify highway safety problems. The management approach to highway safety program development embraces the concept of implementing countermeasures directed at specific problems identified through scientific and analytical procedures. The results of any analytical process are only as valid and credible as the data used in analysis. Therefore, an effective safety program is dependent on an effective collision records system and the collision records system must be integrated between the agencies with custodial responsibility over each of the major components of the TRS: South Carolina Department of Public Safety (SCDPS), the South Carolina Department of Health and Environmental Control (SCDHEC), the South Carolina Department of Transportation (SCDOT), the SC Department of Motor Vehicles (SCDMV), and the South Carolina Judicial Department (SCJD).

Allocating funds to the projects outlined in the state Traffic Records Strategic Plan (TRSP) will bring the state closer to its goal of achieving integrated access to the TRS's numerous data components. This would allow access for each of the entities who need to access the data in order to act in ways that produce positive traffic safety impacts, which would ultimately lead to the state's achievement of its outlined performance targets.

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assureds that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the follow:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Accuracy reflects the degree to which the data is error-free, satisfies internal consistency checks, and does not exist in duplicate within a single database. Error means that the recorded value for some data element of interest is incorrect. Error does not mean that the information is missing from the record. Erroneous information in a database cannot always be detected. In some cases, it is possible to determine that the values entered for a variable or data element are not legitimate codes. In other cases, errors can be detected by matching data with external sources of information. It may also be possible to determine that duplicate records have been entered for the same event. Improving the accuracy of the data contained within the state’s TRS will have a positive traffic safety impact because accurate data is necessary for identifying the locations and causes of crashes, for planning and implementing countermeasures, for operational management and control, and for evaluating highway safety programs and improvements.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Accurate data is necessary for identifying the locations and causes of crashes, for planning and implementing countermeasures, for operational management and control, and for evaluating highway safety programs and improvements. Improving the accuracy of the data contained within the state’s Traffic Records System will ensure that the problems identified during the problem identification process actually exist. It will also enable the setting of realistic performance targets. Improving the accuracy of the data contained within the TRS will ensure that the state’s Traffic Records System will have a positive traffic safety impact because accurate data is necessary for identifying the locations and causes of crashes, for planning and implementing countermeasures, for operational management and control, and for evaluating highway safety programs and improvements.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

This performance measure is measured by the usage and examination of the data within each component’s dataset. Allocation of funds to improving the accuracy of data is necessary for achieving a well-developed TRS within the state.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

5.3.5.1 Planned Activity: TRCC-OHSJP Staffing

Planned activity name  TRCC-OHSJP Staffing
Planned activity number  TRCC-1
Primary countermeasure strategy  Improves accuracy of a core highway safety database

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)
No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3)
[Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]
No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4)
[Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]
No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]
No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]
No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]
No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]
No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

**Primary countermeasure strategy**
Improve accuracy of a core highway safety database

**Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)**

No

**Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3)**

[Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

**Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4)**

[Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]

No

**Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii)**

[Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]

No

**Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii)**

[Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

**Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f)**

[Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

**Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2)**

[Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

**Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2)**

[Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

5.3.5.14 Planned Activity: CMS-SCUTTIES Enhancements
Planned activity name: CMS-SCUTTIES Enhancements

Primary countermeasure strategy: Improves accuracy of a core highway safety database

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)
No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3)
[Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]
No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4)
[Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]
No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]
Yes

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]
No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]
Yes

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]
No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]
No

5.3.5.19 Planned Activity: SCUTTIES Business Application Manager
Planned activity name: SCUTTIES Business Application Manager

Planned activity number: SCUTTIES-1

Primary countermeasure strategy: Improves accuracy of a core highway safety database

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)
No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3)
[Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]
No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4)
[Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]
No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]
No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]
No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]
No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]
No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]
No

5.3.6 Countermeasure Strategy: Improves accessibility of a core highway safety database
Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Accessibility reflects the ability of legitimate users to successfully obtain desired data. For every database and file in a traffic records system, there is a set of legitimate users who are entitled to request and receive data. A Traffic Records System (TRS) with accurate, uniform, timely and complete data integrated between the state’s various core databases is essentially useless if it cannot be accessed by those who legitimately need to access the data. Improving accessibility of the TRS data will have positive traffic safety impacts because it will enable the development of meaningful solutions to the traffic safety problems identified through analysis of the data.
Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Accessible data is necessary for identifying the locations and causes of crashes, for planning and implementing countermeasures, for operational management and control, and for evaluating highway safety programs and improvements. Improving the accessibility for legitimate users of the data contained within the state’s Traffic Records System (TRS) will enable the development of meaningful solutions to the traffic safety problems identified through analysis of the data. Improving the accessibility of the data contained within the TRS will enable the state to spend its limited resources wisely, getting the most benefit for the investment of money and staff time. It will enable the state to better ensure that new efforts are aimed squarely at needed improvements to the data elements and that those resources are allocated in a systematic manner.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

The accessibility of the database or sub-file is determined by obtaining the users’ perceptions of how well the system responds to their requests. It is measured in terms of customer satisfaction related to the retrieval of data.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

5.4 Program Area: Motorcycle Safety

Program area type  Motorcycle Safety

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State’s highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Traffic Fatalities

According to FARS data (please note that FARS data includes moped riders in its motorcyclist fatality statistical information, while SC state data for motorcyclist crashes, injuries, and fatalities does not), in the period 2012-2016:
In South Carolina, the percentage of motorcyclist fatalities was above that of the nation during each year of the five-year period. In 2016, 18.2% of South Carolina’s traffic fatalities were motorcyclists; compared to 14.1% nationwide. See Figure 19 below.

The majority of motorcyclist fatal crashes in South Carolina (53.8%) occurred on Fridays, Saturdays, and Sundays, compared to just below half (55.98%) of motorcyclist fatal crashes in the nation. The highest proportion of motorcyclist fatal crashes occurred on Saturdays in both the state and the nation. Across the state, the majority of motorcyclist fatal crashes occurred between the hours of 3 p.m. and midnight (64.5%). See Table 21 below.

South Carolina law requires helmet use of riders under the age of 21. From 2012 through 2016, 72.26% of South Carolina’s motorcyclist fatalities were not using a helmet. This percentage is substantially higher than the percentage of nonuse seen for the US as a whole (38.7%) during the same years. See Table 23 below.

During the 2012-2016 period in South Carolina, 46.28 of all fatally injured motorcycle operators who were tested for BAC had a BAC of at least 0.01. This percentage is higher than that seen for the US as a whole (42.64). See Table 24 below.

As seen in Figure 19 below, the percentage of motorcyclist fatalities in South Carolina was above that of the nation during each year of the five-year period. In 2016, 18.2% of South Carolina’s traffic fatalities were motorcyclists; compared to 14.1% nationwide.

As Table 21 shows, the months with the most motorcyclist fatal crashes in South Carolina from 2012 to 2016 were July (97 crashes, 12.8% of total), May (94 crashes, 12.4% of total), and October (83 crashes, 11.0% of total).

On a day-by-day basis, South Carolina had the highest frequency of motorcyclist fatal crashes on Saturdays (177 crashes, 23.35% of total), Sundays (123 crashes, 16.23%), and Fridays (108 crashes, 14.25%). Likewise, the highest percentage of motorcyclist fatal crashes nationally occurred on the weekends (55.98%).

In South Carolina, the three-hour windows in which the most motorcyclist fatal crashes occurred were 6 p.m. to 9 p.m. (184 crashes, 24.27% of total), 3 p.m. to 6 p.m. (168 crashes, 22.16% of total), and 9 p.m. to midnight (137 crashes, 18.07% of total). Across the state, the majority of motorcyclist fatal crashes occurred between the hours of 3 p.m. and midnight (64.5%).
As shown in Table 22, males constituted a much larger percentage of South Carolina’s 2012-2016 motorcyclist fatalities than did females (89.06% versus 10.94%), a proportion comparable to that for the nation (91.02% male) during the same timeframe.

As shown in Table 23, throughout the five years 2012-2016, 27.5% of South Carolina’s motorcyclist fatalities used a helmet, a number substantially lower than the percentage of helmet use seen for the US as a whole (58.5%). In South Carolina, each age group, with the exception of the 16-20 and 65-74 age groups, demonstrated helmet use under 40%. However, state law requires helmet use by riders under the age of 21 only.
Table 24 shows that 52.8% of South Carolina motorcycle operator fatalities ages 45 to 54 who were tested for BAC had a positive BAC, the highest percentage of any age group during the 2012-2016 period. Overall, 46.3% of motorcycle operator fatalities in South Carolina who were tested for BAC had a positive BAC, a percentage higher than that seen for the nation (42.6%). In South Carolina, speed was cited as a factor in 54.6% of motorcycle operator fatalities aged 16-20, the highest percentage of any group. Overall, 32.5% of South Carolina’s motorcycle operator fatalities involved a crash in which speed was a factor, a percentage slightly lower than that of the nation (34.2%) during the same years.

**Refers to entire crash event

Table 9 shows that in South Carolina, during the five year period, 2012-2016, the number of motorcyclist deaths was at its lowest level in 2014 (121), and increased to its highest level in 2015 and 2016 (185). The count in 2016 (185 fatalities) represents a 23.13% increase from the average of the prior four years (150.25 fatalities) and a 26.71% increase from the 2012 total (146).

* Fatality rate per 100,000 population

South Carolina’s population-based motorcyclist death rate followed a similar pattern as the number of fatalities. The 2016 rate (3.73 deaths per 100,000 population) represented an 19.26% increase when compared to the 2012-2015 average (3.13), and a 20.71% increase when compared to 2012 (3.09). The population-based motorcyclist death rate in South Carolina for all five years (deaths per 100,000 residents) is higher than the national rate (1.54) during the same timeframe.
Unhelmeted motorcyclists accounted for 69.86% of South Carolina’s motorcyclist fatalities in 2012. During the five year period, 2012-2016, unhelmeted motorcyclist fatalities was at its least in 2014 (96); and at its highest number in 2016 with 133 fatalities. The count in 2016 (133) represents a 22.3% increase from the 2012-2016 average (108.5 fatalities) and a 30.39% increase from the number in 2012 (102). As a percentage of all motorcyclist deaths in the state, unhelmeted motorcyclists accounted for approximately 73% during the 2012-2016 period, with the 2016 proportion (71.89) representing a 0.9 percentage point decrease compared to the prior four years (72.79%) and a 2.03 percentage point increase from the 2012 proportion (69.86%).

As seen in Table 25 below, nationally, the number of motorcyclist fatalities and the population-based fatality rate increased in 2016 when compared to the 2011-2014 average by 9.55% and 6.25%, respectively. Additionally, the nation’s motorcyclist percent of total deaths decreased slightly (0.2 percentage points). During the same timeframe (2012-2016), the number of unhelmeted deaths in the U.S. in 2016 increased compared to the figure in 2012 (2.39%). Also, the nation’s 2016 proportion of unhelmeted motorcyclist deaths increased slightly compared to the average of the prior four years (0.3 percentage points).

### Traffic Injuries

Unlike FARS data for motorcyclist fatalities, South Carolina does not include moped riders in its calculation of motorcyclist injuries. As seen in Figure S-8 below, figures for 2016 show that there were 2,224 persons injured in motorcycle crashes in South Carolina, as compared to 2,166 in 2012, a 2.7% increase. Additionally, the total for 2016 is higher (7.8%) than the average number of motorcyclist crash injuries in the four years prior (2012-2016; [2,063]). From 2012-2016, motorcycle crashes have represented 3.7%, or 10,476, of all traffic crash injuries (274,534) in South Carolina (see Figure S-1 and Figure S-8 below).

In terms of severe motorcycle collision injuries, in 2016, South Carolina had a total of 401 such traffic injuries, a 14.3% decrease from the 468 in 2012 (see Figure S-8 below). The 2016 figure represented an increase (1.3%) over the figure in 2015 (396), and a decrease (5.4%) when comparing the 2016 figure with the average number of severe motorcycle collision injuries for the time period 2012-2015 (424). These severe injuries constituted 13.1% of all serious traffic injuries in the state for 2012-2016 (15,995), while in 2016 they constituted 13.2% of all severe traffic injuries (3,049).

![Figure S-1 Injuries in SC Motor Vehicle Collisions 2012-2016 Data](https://nhtsagmss.crm9.dynamics.com/main.aspx?etc=10046&extraqs=&histKey=978320017&id=%7b72669499-EB31-E811-814A-1458D04EA8139/232)

![Figure S-8 Injuries in SC Motorcycle Collisions 2012-2016 State Data](https://nhtsagmss.crm9.dynamics.com/main.aspx?etc=10046&extraqs=&histKey=978320017&id=%7b72669499-EB31-E811-814A-1458D04EA8139/232)
Traffic Collisions

Unlike FARS data, South Carolina does not include mopeds in its calculation of motorcycle fatal collisions, or in its state calculations of all collisions. As seen in Figure S-9 below, motorcycle collisions have increased in South Carolina from 2,269 in 2012 to 2,329 in 2016, an increase of 2.6%. The 2016 figure represents a 3.2% increase over the 2015 figure (2,255) and an increase of 5.4% over the average number of motorcycle collisions for the four-year period 2012-2015 (2,209).

From 2012 to 2016, motorcycle crashes (11,164) have represented a small percentage (1.8%) of all traffic crashes (616,254) in South Carolina. Also, during the same time period, serious-injury motorcycle collisions represented 2011 or 18.0%, of total motorcycle crashes (11,164). The number of serious-injury motorcycle collisions decreased in 2016 (385) when compared to the 2012 figure (449) by 14.25%. The 2016 figure represents an increase over the 2015 figure (382) of 0.80%. The 2016 figure of 385 severe-injury motorcycle collisions also represents a decrease (5.3%) over the 2012-2015 average number of severe-injury motorcycle crashes (407).

Figure S-9 Motorcycle Collisions in SC, 2012-2016

Table S-7 contains information on the top contributing factors for motorcycle collisions in South Carolina from 2012 to 2015. These factors are driving too fast for conditions, failed to yield right-of-way, driver under the influence, improper lane usage/change, animal in the road, distracted/inattention, following too closely, other improper action (driver), aggressive operation of vehicle, and ran off the road.
Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

5.4.1 Countermeasure Strategy: Motorcyclist Awareness Campaign

Program area  Motorcycle Safety

Countermeasure strategy  Motorcyclist Awareness Campaign

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

No
Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the state's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(4)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(iii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

Yes

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving an impaired operator is highest]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

The importance of helmet use, the dangers of impaired motorcycling, and the importance of having a valid motorcycle endorsement on one's driver's license are all important objectives for improving motorcycle safety in the state of South Carolina. Another objective is to increase other motorists' awareness of motorcyclists by increasing the visibility of motorcyclists and by educating other drivers on the importance of sharing the road with motorcycles. If these objectives are accomplished, a positive traffic safety impact of improved motorcycle safety could be achieved. Thankfully, these objectives can be met, in part, through communications and outreach efforts intended to promote helmet use, reduce impaired motorcycling, increase licensing and spread Share the Road messaging to the motoring public.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

As evidenced by the problem identification data, motorcyclist fatalities represented greater than 18% of the state's total fatalities in 2016. Of the total number of motorcycle crashes that occurred during the years 2012-2016, 1,393 of those collisions involved another vehicle. It is clear that there is an impetus for increasing other motorists' awareness of motorcyclists is needed, given the severity of such collisions. Communication and outreach can be used to improve other motorists' awareness of motorcyclists and to promote the use of helmets and other protective gear among motorcyclists. As such, allocation of funds to motorcyclist awareness campaigns and the importance of protective gear is needed in order to help the state achieve its motorcycle safety performance targets.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Efforts relative to motorcycle safety in SC have utilized countermeasures deemed by the Countermeasures that Work document as having limited evidence in terms of improving motorcycle safety, such as strengthening motorcycle licensing requirements (Chapter 5, Section 3.1, pp. 5-18 to 5-20); motorcycle rider training (Chapter 5, Section 3.2, pp. 5-21 to 5-22); helmet use promotion (Chapter 5, Section 1.2, p. 5-11); Communications and Outreach: Conspicuity and Protective Clothing (Chapter 5, Section 4.1, pp. 5-23 to 5-24); and Communications and Outreach: Other Driver Awareness of Motorcyclists (Chapter 5, Section 4.2, p. 5-25). Though the document indicates limited evidence in terms of effectiveness, SC lacks a universal helmet law and has a strong legislative lobby against such a law; therefore, these types of efforts are essential to the state if it is to address the problem of motorcycle safety.

Planned activities
Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii)

[Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii)

[Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f)

[Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No
Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.

Use of Variable Message Signs through SCDOT

In partnership with the SCDOT, the OHSJP will again secure the use of variable message signs around the state in designated time periods during the motorcycle safety campaign effort. These message signs will be utilized in May, July, and September 2019. The message to be shown on the message boards is, “Stay Alert. Look for Motorcycles.” This has proven extremely valuable to the campaign effort, as hundreds of thousands of motorists will be exposed to campaign messaging while they are in the act of driving and/or riding.

5.4.1.3 Planned Activity: Motorcyclist Awareness Campaign

Planned activity name Motorcyclist Awareness Campaign

Planned activity number M9MA

Primary countermeasure strategy Motorcyclist Awareness Campaign

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No
Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(ii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

**Enter description of the planned activity.**

*Regarding the counties or political subdivisions, Motorcycle Rider Safety Courses will be offered in counties accounting for the majority (58%) of the state’s registered motorcycles; Charleston, Greenville, Horry, Richland, Spartanburg and York counties.*

**Regarding the counties or political subdivisions in which the highest number of motorcycle collisions involving another motor vehicle, the information was gathered from 2016, which is the state's most recent final crash data.**

Motorcycle Safety Public Information and Education Campaign

A successful motorcycle safety public information and education campaign, which began in FFY 2007, has been maintained and will continue during FFY 2019 in Horry County during the month of May 2019 as part of two major motorcycle rallies (Myrtle Beach Bike Rally and Atlantic Beach Bikefest). Some of the safety educational materials distributed at these rallies will include the encouragement of wearing protective gear while riding a motorcycle.

**Motorcycle Safety Public Information and Education Campaign**

A successful motorcycle safety public information and education campaign, which began in FFY 2007, has been maintained and will continue during FFY 2019 in Horry County during the month of May 2019 as part of two major motorcycle rallies (Myrtle Beach Bike Rally and Atlantic Beach Bikefest). Some of the safety educational materials distributed at these rallies will include the encouragement of wearing protective gear while riding a motorcycle.

**Statewide Motorcycle Safety Awareness Program**

The state of South Carolina in FFY 2019 will again launch a statewide motorcycle safety awareness program modeled after campaign efforts in 2018. The primary feature of the “Ride Smart” campaign will involve “Share the Road” messaging to increase motorist awareness of the presence of motorcyclists on the roadways and sharing the road appropriately with these vehicles. The campaign also encourages motorcycle operators to utilize appropriate safety gear when riding. The campaign will utilize radio public service announcements, outdoor advertising, printed educational materials, SCDOT message signs, and displays placed at motorcycle rallies and events. The outreach efforts will be conducted during the Myrtle Beach Bike Week and Atlantic Beach Bike Fest motorcycle rallies in May 2019. The campaign, though statewide, will focus on counties that sustained the highest number of motorcycle fatalities during CY 2018.

The campaign theme will build upon the “Look!” messaging used successfully by South Carolina in past bike rally campaigns. In addition, all outreach efforts will incorporate a “Share the Road” message targeting both motorists and motorcyclists. The message will be aimed at increasing motorist awareness of motorcyclists traveling on the state’s roadways. In May 2016, a new Target Zero motorcycle billboard was created that highlighted the correlation between motorcyclist fatalities and not wearing a helmet. The campaign will also continue the billboard campaign launched in 2013 based simply on the word “LOOK.” The campaign as a whole focuses on all vulnerable roadway users (pedestrians, motorcyclists, bicyclists, and moped riders). The “LOOK” billboards, samples of which may be seen in the Community Traffic Safety Project section of the state’s Highway Safety Plan, encourage observers to “LOOK: Share the Road. Save a Life.” Individual billboards focusing exclusively on motorcyclists will also be used, predominantly in priority counties during the statewide campaign event, which encourage motorists to “LOOK for Motorcyclists. Share the Road. Save a Life.”

The contractor will also produce a radio spot with a “Share the Road” message to air during the six-month safety campaign. All billboard and radio advertising will incorporate the SCDPS “Target Zero Traffic Fatalities” umbrella theme.

**Motorcycle Safety Task Force**

The Motorcycle Safety Task Force will continue to meet and form partnerships with various state, federal, and local agencies, as well as community groups to develop and implement strategies to reduce the number of motorcycle crashes, fatalities, and injuries.
Use of Variable Message Signs through SCDOT

In partnership with the SCDOT, the OHSJP will again secure the use of variable message signs around the state in designated time periods during the motorcycle safety campaign effort. These message signs will be utilized in May, July, and September 2019. The message to be shown on the message boards is, “Stay Alert. Look for Motorcycles.” This has proven extremely valuable to the campaign effort, as hundreds of thousands of motorists will be exposed to campaign messaging while they are in the act of driving and/or riding.

5.4.2 Countermeasure Strategy: Motorcycle Rider Training

Program area: Motorcycle Safety

Countermeasure strategy: Motorcycle Rider Training

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No
Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]
No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcyclist and another motor vehicle is highest]
No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]
No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]
No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Motorcycle safety education provides knowledge through classroom activities and on-cycle riding exercises. Emphasis is placed on personal risk management, self-assessment strategies and various riding techniques. The courses are designed to teach safe motorcycle operation and motorcycle control skills. Providing access to motorcycle rider training courses to all who wish to operate a motorcycle would be beneficial to the state because it would ensure a greater number of skilled motorcyclists on South Carolina's roadways.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

The percentage of motorcyclist fatalities in South Carolina was above that of the nation during each year of the five-year period, 2012-2016. In 2016, 18.2% of South Carolina's traffic fatalities were motorcyclists, compared to 14.1% nationwide. Given these dire statistics, it is clear that allocating funds for the Motorcycle Safety Program Area is needed as it will facilitate the state's achievement of the outlined motorcycle safety performance targets, which will ultimately serve to reduce motorcyclist collisions, severe-injury motorcyclist collisions, and motorcyclist fatalities, as well as traffic collisions, severe-injuries and fatalities overall.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Motorcycle safety was an area identified in the NHTSA-produced Countermeasures That Work: A Highway Safety Countermeasure Guide for State Highway Safety Offices, Eighth Edition, 2015. The document stresses the importance of this emphasis area and outlines significant strategies and appropriate countermeasures for motorcycle safety (pp. 5-1 to 5-25). Efforts relative to motorcycle safety in SC have utilized countermeasures deemed by this document as having limited evidence in terms of improving motorcycle safety, such as strengthening motorcycle licensing requirements (Chapter 5, Section 3.1, pp. 5-18 to 5-20); motorcycle rider training (Chapter 5, Section 3.2, pp. 5-21 to 5-22); helmet use promotion (Chapter 5, Section 1.2, p. 5-11); Communications and Outreach: Conspicuity and Protective Clothing (Chapter 5, Section 4.1, pp. 5-23 to 5-24); and Communications and Outreach: Other Driver Awareness of Motorcyclists (Chapter 5, Section 4.2, p. 5-25).

Though the document indicates limited evidence in terms of effectiveness, SC lacks a universal helmet law and has a strong legislative lobby against such a law; therefore, these types of efforts are essential to the state if it is to address the problem of motorcycle safety.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

5.5 Program Area: Community Traffic Safety Program

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State’s highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Projected statistics based on 2016 calendar year (CY) (01/01/16-12/31/16) Data: Statistics for South Carolina indicate that during 2016, approximately 142,000 traffic collisions were reported; this is a 6.00% increase from 2015, when 133,961 collisions were reported. Collisions in CY 2016 resulted in 1,020 fatalities (preliminary) and an estimated 62,000 injuries. The number of traffic deaths in CY 2016 (1,020 preliminary) was 4.19% higher than in 2015, when 979 persons were fatally injured in South Carolina traffic collisions. The estimated economic loss to the state from traffic crashes in 2015 was more than 4.32 billion dollars. This total, however, does not reflect the human toll of pain and suffering.

Mileage Death Rate: The state’s mileage death rate (MDR), or traffic fatalities per 100 million miles of travel, in 2016 was 1.87, a 1.06% decrease from 2015 when the MDR was 1.89. According to the most recent data available, the national mileage death rate in 2016 was 1.18. Based on 2016 figures, South Carolina’s MDR of 1.87 was 58% higher than the national mileage death rate of 1.18.

2016 Collision Statistics: Breaking collision statistics down by time in CY 2016 indicated the following:

* 1 Traffic Collision was reported every 3.7 minutes.
* 1 Traffic Death was reported every 8.7 hours.
* 1 Non-fatal Traffic Injury was reported every 8.5 minutes.
* 1 Property-Damage-Only Collision was reported every 5.2 minutes.

In 2016, South Carolina had 3,772,018 licensed drivers who operated 4,433,104 registered motor vehicles on a roadway system of over 76,000 miles of streets and highways.

DUI Involvement in Collisions:

According to NHTSA's Fatality Analysis Reporting System (FARS) data, alcohol-impaired fatalities for 2016 totaled 331. The SC Department of Public Safety's statistics for 2016 indicate approximately 6,132 collisions involving a driver under the influence of alcohol and/or drugs (DUI), resulting in a preliminary figure of 4,313 persons injured. FARS data also stated that there were a total of 1,399 drivers involved in fatal collisions in South Carolina during 2015. Of the 1,399 drivers, 297 had a blood alcohol concentration (BAC) of .08 or greater, which accounted for 21.2% of all drivers involved in fatal crashes. Of the 6,132 total DUI-related collisions, 4.79% were fatal crashes, 46.75% were injury crashes, and 48.45% were property-damage-only crashes. In 2016, the state experienced an increase of 1.76% in the number of DUI crashes as compared to the 6,026 which occurred in 2015.

Speed Involvement in Collisions:

According to the SC Department of Public Safety's preliminary data for 2016, of the approximately 62,000 total traffic-related injuries reported in 2016, 20,942, or 33.8%, occurred in speeding-related collisions. Injuries in speeding-related traffic crashes increased from 20,442 in 2015 to 20,942 in 2016, an increase of 2.5%. The percentage of traffic-related injuries that involved speeding decreased slightly from 34.9% in 2015 to 33.8% in 2016.

Incapacitating injuries in speeding-related traffic crashes increased from 2015 to 2016 with 1,059 such injuries occurring in 2015 and 1,089 in 2016, an increase of only 2.8%. The percentage of traffic-related incapacitating injuries that involved speeding also increased, from 34.2% in 2015 to 35.7% in 2016. In comparison, state data shows that South Carolina’s overall speeding-related fatalities increased by 6.38%, from 392 fatalities in 2015 to 417 fatalities in 2016.

Five-Year Collision Data: In order to examine traffic collision trends over time, the Office of Highway Safety and Justice Programs’ staff reviewed collision data for the period 2012-2016. During this five-year period, the state’s MDR of 1.76 in 2012 decreased annually to a historical low of 1.57 in 2013 before increasing again to 1.65 in 2014, 1.89 in 2015, and decreasing slightly again to 1.87 in 2016. Collision statistics for the period are presented in the chart below.

#### Location of Highest Numbers of Property-Damage-Only Crashes:
During the five-year period from 2012-2016, the five counties with the highest number of property-damage-only collisions were Greenville, Charleston, Richland, Horry, and Spartanburg.

#### Location of Highest Numbers of Injury Crashes:
The locations of the largest numbers of injury collisions during the five-year period 2012-2016 were Charleston, Greenville, Richland, Horry, and Spartanburg Counties.

#### Location of Highest Numbers of Fatal Crashes:
The locations of the largest numbers of fatal crashes during the five-year period 2012-2016 were Greenville, Horry, Richland Charleston, and Spartanburg Counties.

#### Driver Groups Involved in Crashes:
During the five-year period, the age groups with the highest number of drivers involved in crashes (presented in order) included drivers ages 20-24, 25-29, and 15-19. Drivers under the age of 30 continued to be over-represented in traffic crashes based on the size of the category of licensed drivers in this group. Males continued to be involved in a higher percentage and number of crashes than female drivers.

#### An Analysis by the Office of Highway Safety and Justice Programs:
Based on traffic data over the 2012-2016 period, the charts below show counties in the state of South Carolina which lead the state in statistical categories regarding fatal and severe injury collisions (number of fatal and severe injury, number DUI-related, and percentage DUI-related, number speed-related, and percentage speed-related).
Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Countermeasure Strategies in Program Area

5.5.1 Countermeasure Strategy: Highway Safety Office Program Management

Program area  Community Traffic Safety Program

Countermeasure strategy  Highway Safety Office Program Management

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?
No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)
Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]
No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]
No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]
No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]
No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]
No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Communications and outreach strategies are a critical part of many deterrence and prevention strategies. The various communications and outreach strategies employed by the SHSO are utilized to help deter and prevent problematic driving behaviors, such as a driving under the influence and driving above posted speed limits. Combining communications and outreach strategies with existing deterrent and prevention strategies within the state of South Carolina has the potential to reduce negative driving behaviors and promote safe driving practices, all of which would provide beneficial traffic safety impacts.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

The Public Information, Outreach and Training (PIOT) section is a vital component of the South Carolina Highway Safety grant program which addresses various highway safety emphasis areas identified in the state. South Carolina needs a comprehensive project that focuses on the dissemination of traffic safety information to the general public and the law enforcement community. Marketing campaigns, training for highway safety professionals and sharing information at public events are key strategies to help meet performance measures and goals related to issues with occupant protection, police traffic services, DUI, and vulnerable roadway users.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Comprehensive media strategies have been cited in NHTSA's Countermeasures that Work document as effective in reducing problematic driving behaviors, especially when used for the purposes of supporting enforcement and increasing belt use among those groups with traditionally low usage rates. Allocating funds to allow for the implementation of comprehensive media strategies within the state will facilitate the achievement of the state's performance targets and goals and lead to reduced collisions, severe-injuries, and fatalities.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

5.5.2 Countermeasure Strategy: Communication Campaign

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in...
To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Communication campaigns serve to educate the public on the importance of using occupant restraint devices, and they serve to inform the public of upcoming high-visibility enforcement efforts. Educating the public on the importance of occupant restraint usage should increase occupant protection usage rates among the population. Given the knowledge that seatbelts save lives, if the number of unrestrained occupants can be decreased and observed seatbelt rates can be increased, a significant positive impact on traffic safety can be achieved.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

South Carolina is committed to its focus on the dissemination of traffic safety information to the general public and the law enforcement community. Marketing campaigns, training for highway safety professionals and sharing information at public events are key strategies to help meet performance measures and goals related to issues with occupant protection in the state.

The OHSJP, Public Information Outreach and Training (PIOT) section will continue to use a full-service marketing firm to assist with such efforts as media buying, creative production, and evaluation of campaigns. However, the OHSJP, with the help of the agency’s Communications Office and SC Highway Patrol Community Relations Officers, will oversee earned media efforts, such as issuing news releases, conducting press events, and coordinating media interviews.

The marketing firm will continue to assist with campaigns, including Buckle Up, SC. It’s the law and it’s enforced. Child Passenger Safety is another important public information initiative for the State Highway Safety Office.

Special public information events during Buckle Up, America! Week in May 2019, and the National Child Passenger Safety Awareness Week in September 2019 will occur in FFY 2019. Additionally, the State Highway Safety Office (SHSO) will also assist in planning, coordinating, and implementing, with the assistance of the SCDPS Contractor, the Buckle up, South Carolina. It’s the law and it’s enforced public information, education and enforcement campaign during the Memorial Day holiday of 2019.

Communication and outreach contribute to heightened public awareness, which when combined with enforcement, have been beneficial in addressing the issues faced by the state, as determined through its problem identification process.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.
NHTSA promotes the importance of combining high-visibility enforcement with heightened public awareness as the best way to approach key problem areas and produce behavioral change. Therefore, the OHSJP will continue to offer a media mix for enforcement-based and non-enforcement-based campaigns to meet stated goals. The OHSJP will employ key strategies to promote its mission and core message of public safety.

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Communication and Outreach will be used throughout FFY 2019 to promote campaign messages, enforcement activities, and to increase awareness by the general public of the dangers involved in impaired driving and/or speeding. By increasing knowledge and awareness of the dangers associated with these risky driving behaviors, it is possible to reduce the number of individuals choosing to engaging in the behaviors of driving while impaired and/or speeding. Reductions in the prevalence of impaired driving and/or speeding and the resulting related collisions, severe-injuries, and fatalities will have a significant and positive impact on traffic safety in the state of South Carolina.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

South Carolina is committed to its focus on the dissemination of traffic safety information to the general public and the law enforcement community. Marketing campaigns and sharing information at public events are key strategies to help meet performance measures and goals related to the issue of impaired driving within the state.

The OHSJP, through the Public Information Outreach and Training section (PIOT), will continue to use a full-service marketing firm to assist with such efforts as media buying, creative production, and evaluation of campaigns. However, the OHSJP, with the help of the agency’s Communications Office and SC Highway Patrol Community Relations Officers, will oversee earned media efforts, such as issuing news releases, conducting press events, and coordinating media interviews.

The marketing firm will continue to assist with campaigns, including Sober or Slammer!

Communication and outreach contribute to heightened public awareness, which when combined with enforcement, have been beneficial in addressing the speed-related issues faced by the state, as determined through its problem identification process.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

NHTSA promotes the importance of combining high-visibility enforcement with heightened public awareness as the best way to approach key problem areas and produce behavioral change. Therefore, the OHSJP will continue to offer a media mix for enforcement-based and non-enforcement-based campaigns to meet stated goals.

5.5.3.1 Planned Activity: Communication and Outreach

Planned activity name: Communication and Outreach

Planned activity number: PIOT-ID

Primary countermeasure strategy: Communication and Outreach
Enter description of the planned activity.

In FFY 2019, the Public Information, Outreach and Training (PIOT) section of the Office of Highway Safety and Justice Programs (OHSJP) will coordinate with the SCDPS contractor to develop and implement media components of the OHSJP’s Sober or Slammer! campaign and a variety of other major campaigns and emphases. The contractor will assist with efforts such as media buying, creative production, and evaluation of campaigns. Additionally, diversity outreach components will be incorporated within each campaign. The OHSJP will continue efforts to reach out to under-served audiences and hard-to-reach populations in the upcoming year.

The South Carolina Department of Public Safety’s OHSJP will utilize Section 405d Impaired Driving Countermeasures funds in FFY 2019 for paid media efforts for DUI countermeasures. The state continues to use the Strategic Evaluation States (SES) model to implement a sustained DUI enforcement effort (Sober or Slammer! / Drive Sober or Get Pulled Over), which includes monthly specialized DUI enforcement activities (checkpoints and saturation patrols) by participating state and local law enforcement agencies, as well as two DUI law enforcement crackdowns occurring during the Christmas/New Year’s holidays and during the days leading up to and including the Labor Day holiday. Sober or Slammer! is a high-visibility enforcement crackdown on impaired driving combining paid/earned media with increased DUI enforcement activity in an effort to attack the problem of impaired driving in the state.

During FFY 2019, paid and earned media activities will be utilized to promote campaign messages, enforcement activities, and to increase awareness by the general public of the dangers involved in impaired driving. These activities will encompass radio, television, and paid social media advertising, as well as outdoor and other alternative advertising. The agency contractor will be used by the OHSJP to secure radio and television placement during the two major mobilization crackdowns and radio airtime for strategic points in time during high risk for impaired driving violations. Those times will coincide with monthly enforcement weekends designated by the South Carolina Highway Patrol, which will span from December 2018 through September 2019. The contractor – with the possible use of a sub-contractor—will also be responsible for the paid social media plan during the same designated time periods. Local law enforcement agencies will be highly encouraged to participate in the designated special enforcement weekends. Specific media buy plans for each component of the process will be developed by the agency contractor concentrating on major media markets which will reach the campaign’s focus counties and other counties throughout the state. The media buy plans will be approved by the OHSJP prior to implementation of the effort. NHTSA promotes the importance of combining high-visibility enforcement with high-visibility public awareness as the best way to approach key problem areas and produce behavioral change. Therefore, the OHSJP will continue to offer a media mix for enforcement-based and non-enforcement-based campaigns to meet stated goals. The OHSJP will employ key strategies to promote its mission and core message of public safety.

5.5.3.2 Planned Activity: Communication and Outreach

Planned activity name: Communication and Outreach
Planned activity number: PIOT-OP
Primary countermeasure strategy: Communication and Outreach

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3)

[Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4)

[Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii)

[Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii)

[Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f)

[Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2)

[Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]
Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.

Highway Safety staff will coordinate statewide public information and education efforts to promote compliance with occupant protection laws and impaired driving laws. An overarching theme of all campaign efforts will be utilized by the OHSJP and the SCDPS. The theme will be Target Zero, with the tagline, “The road to Target Zero starts with you.” The Target Zero message will be promoted on social media and through all of the other major media campaigns throughout the year.

OHSJP will work with local project personnel and law enforcement officials to implement the Buckle Up, SC. It’s the law and it’s enforced. program throughout South Carolina during the Memorial Day holiday period in an effort to improve safety belt usage rates within the state. The campaign emphasis areas will include social media and outdoor advertising. Highway Safety staff, other SCDPS staff, and partner agencies/groups will continue to educate and inform the citizenry of the state and its visitors about the state’s primary enforcement safety belt law. Educational strategies will be incorporated to reach out to all citizens and visitors of the state, in particular those minority populations (African-American and Hispanic) and others (rural white males) which have traditionally shown a lower rate of safety belt and child passenger safety restraint usage than white, urban and female counterparts.

All major mobilization emphases of the OHSJP will include messages to reach the diverse population of the state. The OHSJP will incorporate into its diversity outreach strategy a variety of media aimed at reaching teens, African Americans, Hispanics, and rural residents across South Carolina. The goal of the outreach is to encourage safety on the roadways in these populations by urging the use of appropriate occupant restraints and attempting to reduce specific risk-taking behaviors such as drinking and driving.

5.5.3.3 Planned Activity: PIOT Communication Strategies

Planned activity name

PIOT Communication Strategies

Planned activity number

PIOT-S

Primary countermeasure strategy

Communication and Outreach

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

Speed Enforcement, and Vulnerable Roadway Users (produce behavioral change. NHTSA promotes the importance of combining high-visibility enforcement with heightened public awareness as the best way to approach key problem areas and printed collateral regarding traffic laws and safe driving. Additionally, the OHSJP must increase efforts to reach young men, ages 18-34, in areas where they live, toward the state flag. A South Carolina Target Zero logo was developed in 2013 to help promote the concept to the public. The OHSJP wanted a logo unique to South Carolina and looked used logo that features a stylized image of the state’s outline and the flag’s emblems. All paid media efforts – broadcast and print – feature Target Zero with the accompanying tagline, “A Target Zero message from SCDFS.” In the coming year, the OHSJP must increase efforts to reach out to underserved audiences and hard-to-reach populations. The OHSJP already incorporates Hispanic-owned media (mainly TV and radio) into its media buys. However, efforts must be made to ensure that Spanish-speaking residents are getting in-depth information on printed collateral regarding traffic laws and safe driving. Additionally, the OHSJP must increase efforts to reach young men, ages 18-34, in areas where they live, work, and play. The OHSJP is also doing more to incorporate the Target Zero campaign by way of social media by using SCDFS’s Facebook and Twitter pages and YouTube channel, as well as continuing to expand on and explore paid social media advertising opportunities.

NHTSA promotes the importance of combining high-visibility enforcement with heightened public awareness as the best way to approach key problem areas and produce behavioral change. Therefore, the OHSJP will continue to offer a media mix for enforcement-based and non-enforcement-based campaigns to meet stated goals. The OHSJP will employ key strategies to promote its mission and core message of public safety.
Strategies

Several strategies identified in NHTSA’s *Countermeasures That Work* are utilized in PIOT campaigns and activities with much success.

1. The OHSJP will provide funding to highway safety staff and advocates to attend significant conferences and training events related to highway safety issues. As appropriate, when information on national or state-initiated training programs becomes available, the OHSJP will forward the information to highway safety project directors, Law Enforcement Network Coordinators and Assistant Coordinators, and/or other highway safety stakeholders with direct interest in the training. If it is determined that funds are available to support requests to attend these programs, information will be included in the package outlining procedures for requesting assistance.

2. Highway Safety staff will coordinate statewide public information and education efforts to promote compliance with occupant protection laws and impaired driving laws. An overarching theme of all campaign efforts will be utilized by the OHSJP and the SCDPS. The theme will be *Target Zero*, with the tagline, “The road to Target Zero starts with you.” The Target Zero message will be promoted on social media and through all of the other major media campaigns throughout the year.

   Artwork for Motorcycle Safety campaign

   In addition, the OHSJP will expand upon an existing created billboard campaign, “Look,” geared toward vulnerable roadway users. The previous umbrella theme, “Highways or Dieways? The Choice Is Yours.” will continue to be utilized as a supporting message when deemed necessary.

3. OHSJP will work with local project personnel and law enforcement officials to implement the *Buckle Up, SC. It’s the law and it’s enforced.* program throughout South Carolina during the Memorial Day holiday period in an effort to improve safety belt usage rates within the state. As referenced in the Occupant Protection Program Area section of the HSP, the NHTSA-produced *Countermeasures That Work: A Highway Safety Countermeasure Guide for State Highway Safety Offices, Eighth Edition, 2015* (CTW) document stresses the importance of the Occupant Protection emphasis area and outlines significant strategies and appropriate countermeasures. The campaign emphasis areas will include social media and outdoor advertising.

   BUSC Memorial Day 2018 Billboard

4. Highway Safety staff, other SCDPS staff, and partner agencies/groups will continue to educate and inform the citizenry of the state and its visitors about the state’s primary enforcement safety belt law. Educational strategies will be incorporated to reach out to all citizens and visitors of the state, in particular those minority populations (African-American and Hispanic) and others (rural white males) which have traditionally shown a lower rate of safety belt and child passenger safety restraint usage than white, urban and female counterparts.

5. The OHSJP will conduct a high-visibility enforcement and education campaign in an effort to reduce DUI traffic crashes, injuries, and fatalities in FFY 2019. The campaign is known as *Sober or Slammer!* and represents the state’s version of the national *Drive Sober or Get Pulled Over* initiative. As referenced in the Impaired Driving Program Area section of the HSP, the NHTSA-produced CTW document stresses the importance of the Impaired Driving emphasis area and outlines significant strategies and appropriate countermeasures utilizing high-visibility enforcement. In order to comply with NHTSA requirements regarding equipment distributed to Law Enforcement agencies, the Law Enforcement DUI Challenge was altered in FY 2017. The FFY 2018 strategy for the DUI enforcement campaign was altered as well to focus predominantly on the SC Highway Patrol (SCHP) for the enforcement component of the campaign, while still making every effort to recruit and partner with local law enforcement agencies statewide. The SCHP is the premier traffic enforcement agency in the state and covers the entire geographic and population areas of South Carolina. The same strategy will continue during FFY 2019. The SCHP, during FFY 2019, will conduct special DUI enforcement emphases once a month on weekends from December 2018 to September 2019. The weekend enforcement efforts will be supported by radio and some television and social media advertising beginning on Wednesday of each week preceding the scheduled enforcement weekends. In addition, during the two DUI mobilization crackdowns, the SCHP will conduct an additional four nights of specialized DUI enforcement, including saturation patrols and public safety checkpoints. The SCHP will recruit and utilize the assistance of local law enforcement agencies during the weekend and crackdown efforts. Agencies with the highest DUI arrests during the challenge will be awarded a recognition plaque for their efforts. This recognition is consistent with the NHTSA Guidance and recommendations received by the OHSJP from the NHTSA Region 4 Office. Law Enforcement Liaisons will encourage agencies within the Law Enforcement Network system in the state to participate in these enforcement events. Participating agencies
will receive a certificate from the OHSJP in recognition of their participation. Educational efforts will again utilize media (television, radio, paid social media, and alternative advertising) to support campaign efforts. Media messaging will need to be adjusted to reflect a likely significant decrease in law enforcement participation as a result of the OHSJP’s need to conform to the NHTSA Guidance. Educational efforts will focus on the twenty priority counties designated within the state’s Highway Safety Plan and the Impaired Driving Countermeasures Plan.

6. All major mobilization emphases of the OHSJP will include messages to reach the diverse population of the state. The OHSJP will incorporate into its diversity outreach strategy a variety of media aimed at reaching teens, African Americans, Hispanics, and rural residents across South Carolina. The goal of the outreach is to encourage safety on the roadways in these populations by urging the use of appropriate occupant restraints and attempting to reduce specific risk-taking behaviors such as drinking and driving.

7. The OHSJP will assist the SCHP with School Zone Safety Week emphasis during the late summer of 2019. The emphasis will involve highway safety stakeholders statewide in an effort to call the attention of the motoring public to the importance of safety in school zones. Law enforcement agencies and schools are provided information to conduct activities for School Zone Safety Week, which is to be observed during the first full week of the school calendar. The goal is to educate young children about safe walking techniques, to inform parents and caregivers about their role in ensuring that children get to school safely, and to encourage local law enforcement agencies to patrol in and around schools.

8. The OHSJP will assist the SCHP with School Zone Safety Week emphasis during the late summer of 2019. The emphasis will involve highway safety stakeholders statewide in an effort to call the attention of the motoring public to the importance of safety in school zones. Law enforcement agencies and schools are provided information to conduct activities for School Zone Safety Week, which is to be observed during the first full week of the school calendar. The goal is to educate young children about safe walking techniques, to inform parents and caregivers about their role in ensuring that children get to school safely, and to encourage local law enforcement agencies to patrol in and around schools.

9. The OHSJP will continue to provide non-federal funding for the SC Highway Patrol (SCHP) to establish Highway Safety booths/displays at various statewide events.

10. The OHSJP will utilize paid advertising of highway safety messages at high school sports venues in the state. This may include advertising on printed tickets for sporting and other special events, public address announcements during these sporting events, and program advertising at these sporting events. About 5 million tickets are expected to be printed and used by most high schools across South Carolina.

11. Speed-related collisions continue to be a problem in South Carolina. Furthermore, public perception on the issue of speeding is information that is already captured in OHSJP’s attitudinal surveys. The Target Zero Enforcement Teams, which were implemented during FFY 2016 with Section 164 funding from the SC Department of Transportation, will continue at least until October 31, 2018 and possibly longer in FFY 2019 and feature six, four-person teams of SC Highway Patrol Troopers, who focus their enforcement activity in four major areas of the state (Upstate, Midlands, Lowcountry, and the Pee Dee). Troopers work roadways that are high-risk for traffic fatalities and severe injuries. The major enforcement focuses are speeding, DUI, and occupant protection violations. The OHSJP also expects to continue the Region 4 summer speed campaign “Operation Southern Shield” established by NHTSA in FY2017.

12. The OHSJP will continue to seek opportunities to form partnerships with other highway safety stakeholder groups, including Operation Lifesaver, National Safety Council, MADD and others.

13. The OHSJP will add questions to its Attitudinal Survey to gauge public awareness of the Target Zero Enforcement Teams and Target Zero media messaging.

5.6 Program Area: Police Traffic Services

Program area type  Police Traffic Services

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State’s highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Traffic Fatalities

According to FARS data, a speeding-related fatality is defined as one that occurred in a crash in which a driver was charged with a speeding-related offense, or in which an officer indicated that racing, driving too fast for conditions, or exceeding the posted speed limit was a contributing factor.

Data indicates that speeding-related fatalities from 2012 to 2016 were at their lowest level in 2013 (305 fatalities) and at their highest level during 2016 (381 fatalities). The 381 speeding-related fatalities in South Carolina in 2016 represent an 18.32% increase when compared to the 2012 total (322). South Carolina’s population-based fatality rate followed a somewhat similar pattern as the number of speeding-related fatalities, with the highest rate in 2016 (7.68) and the lowest rate in 2014 (6.36). South Carolina’s 2016 speeding-related population-based fatality rate (7.68 deaths per 100,000 population) is 13.4% higher than the 2012-2015 average (6.77) and 12.6% higher than the 2012 rate.

In 2014, 37.30% of all traffic fatalities in South Carolina were speeding-related, the lowest of proportion of the five-year period. This proportion was at its highest in 2013 (39.77%). The 2016 percentage (37.54) is less than one percent (0.40%) lower than the average of the previous four years. Additionally, the 2016 proportion of speeding-related fatalities to total traffic fatalities increased 0.23% when compared to this same proportion for 2012.

Speeding-related fatalities increased throughout the nation (3.62%) in 2016 when compared to the prior four-year average. The population-based fatality rate increased nationally as well, rising by 1.79% during the same timeframe. The nation’s speeding-related percentage of total deaths averaged 28.56% from 2012 through 2016, with this proportion decreasing by 1.96% in 2016 when compared to the 2012-2015 average. South Carolina experienced an overall upward trend in two key traffic indices, total speeding-related fatalities and total speeding-related fatality population-based rate, during the period of 2012-2016. Additionally, South Carolina’s percentage of fatalities that were speeding-related remained greater than that of the nation during the entire 2012-2016 period. In 2016, 37.54% of South Carolina’s total traffic fatalities were speeding-related, compared to 26.99% for the nation.

According to FARS, from 2012 to 2016, the counties accounting for the highest percentages of the speeding-related fatalities in South Carolina for the years 2012 through 2016 were: Richland (6.25%); Greenville (5.95%); Spartanburg (5.29%); Charleston (5.18%); Horry (5.00%); Anderson (4.70%); and Lexington (4.40%) (see Table 30).

As shown in Table 30, the counties with the most speeding-related fatalities from 2012 to 2016 were: Richland (105); Greenville (100); Spartanburg (89); Charleston (87); Horry (84); Anderson (79); and Lexington (74). Four of these seven counties experienced a decrease in the number of speeding-related fatalities in 2016 when compared to the prior four-year averages: Spartanburg (-18.92%); Horry (-13.04%); Lexington (-6.67%); and Charleston (-2.86%), and there was no change in the number of speeding-related fatalities in Greenville county when compared to the prior four-year average. Two (2) of those counties saw an increase in speeding-related fatalities during 2016 when compared to the prior four-year average: Richland (45.45%) and Anderson (44.83%).

South Carolina’s speeding-related population-based fatality rate increased 13.44% in 2016 (7.68 fatalities per 100,000 population) compared to the average of the previous four years (6.77). The counties with the highest average of speeding-related population-based fatality rates during the 2012-2016 period (see Table 31) were Jasper (21.67); Calhoun (20.22); Williamsburg (20.11); Colleton (18.46); Fairfield (18.21); and Clarendon (17.65). It should be noted that the population-based fatality rates can vary drastically from year to year and thus should be considered with caution.

Traffic Injuries

State data shows an increase of 23.6% in total traffic-related injuries, from 50,064 total injuries in 2012 to 61,899 in 2016. The 2016 figure was also more (16.4%) than the average of the four prior years 2012-2015 (53,158.75).

Table S-18 below shows the number of speed-related crash injuries for the State of South Carolina for the years 2012-2016. Of the 61,899 total traffic-related injuries reported in 2016, 20,954, or 33.9%, occurred in speeding-related collisions. Injuries in speeding-related traffic crashes increased from 16,212 in 2012 to 20,954 in 2016, an increase of 29.2%; however, the 2016 figure represents a decrease of 2.87% from the 2015 figure. On average, for the years 2012-2015, injuries occurring in speeding-related traffic crashes accounted for 33.7% of all traffic-related injuries. The 2016 figure for speeding-related crash injuries (20,954) is 16.9% higher than the average for speeding-related crash injuries (17,921.75) from 2012 to 2015.

Table S-18 Speed Related Crash Injuries, South Carolina 2012-2016

State data show a decrease of 10.3% in total serious traffic-related injuries, from 3,399 in 2012 to 3,049 in 2016. Serious traffic injuries in 2016 decreased by 1.39% compared to the number of serious injuries in 2015 (3,092). The 2016 figure represents a decrease of 4.69% when compared to the average number of serious traffic injuries for the years 2012-2016 (3,199).

In Figure S-7 below, state data from 2012-2016 show that the number of serious injuries occurring in speeding-related collisions increased 0.93% in South Carolina, from 1,078 serious injuries in speeding-related collisions in 2012 to 1,088 in 2016. The 2016 figure also represents a 0.14% increase when compared to the average number of serious injuries in speeding-related crashes for the four years 2012-2015 (1086.5). Of the 3,049 total traffic-related serious injuries reported in 2016, 1,088, or 35.7%, occurred in speeding-related collisions. The 2016 percentage of traffic-related serious injuries that occurred in speeding-related collisions represents an increase of 12.3% when compared to the percentage of traffic-related serious injuries that occurred in speeding-related serious injuries that occurred in 2012 (31.7%).

Serious injuries in speeding-related traffic crashes increased from 1,059 in 2015 to 1,088 in 2016, an increase of 2.7%, and the percentage of traffic-related serious injuries that occurred in speeding-related crashes also increased slightly, from 34.2% in 2015 to 35.7% in 2016.

Traffic Collisions

There were 616,254 total traffic collisions in South Carolina from 2012 to 2016. This total includes fatal collisions, injury collisions, and property-damage-only collisions. There was an increase of 5.7% in total collisions from 2015 (133,961) to 2016 (141,599). The 2016 figure represents an increase of 30.8% as compared to 2012 and an increase of 19.3% as compared to the average of the previous four years of 2012-2015 (118,663.75).

There were 203,837 total speeding-related traffic collisions in South Carolina from 2012 to 2016 (see Figure S-16). Speeding-related collisions accounted for 33.1% of total traffic crashes in the state. In 2016, speeding-below related crashes increased by 2.65% as compared to 2015, from 45,620 in 2015 to 46,830 in 2016. The 2016 figure also represents a 36.6% increase as compared to the 2012 figure (34,278) and an increase of 19.3% when compared to the average number of speeding-related collisions (39,251.75) for the four-year period 2012-2015.
Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

5.6.1 Countermeasure Strategy: Traffic Safety Officer Training

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No
Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Well-trained traffic enforcement officers are an essential aspect of helping to reduce the number of traffic-related crashes, injuries, and fatalities through a variety of enforcement strategies. Reducing traffic-related crashes, injuries and fatalities throughout the state is considered to be a significant traffic safety impact.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Based on the analysis of the problem identification data, South Carolina faces significant issues in speeding-related indices. Allocating funds to the provision of educational programs that accompany traffic enforcement projects will produce well-rounded, well-trained traffic enforcement officers. These highly trained traffic enforcement officers will facilitate the state's achievement of the outlined speed-related performance targets. Achievement of these performance targets will serve to reduce collisions, severe-injuries, and fatalities in the state.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

The enforcement/investigative training provided by the SC Criminal Justice Academy as part of the Traffic Safety Officer (TSO) Program is designed to enhance law enforcement officers' ability to quickly and accurately drivers exhibiting problematic driving behaviors. identify impaired drivers. If these highly trained officers conduct high visibility enforcement (short-term or sustained) and/or general traffic enforcement, it would serve as a high level deterrent to the dangerous driving behaviors cited as contributing factors for the numerous traffic collisions that occur in the state. As such, allocating funds for the countermeasure strategy of law enforcement training will facilitate the state's achievement of the outlined performance targets, which will ultimately serve to reduce collisions, severe-injuries, and fatalities in the state.

Planned activities

### 5.6.2 Countermeasure Strategy: Short-term, High Visibility Law Enforcement

**Program area**

Police Traffic Services

**Countermeasure strategy**

Short-term, High Visibility Law Enforcement

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the...
State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest.

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Traffic law enforcement plays a crucial role in deterring impaired driving, increasing safety belt and child restraint usage, encouraging compliance with speed laws, and reducing other unsafe driving actions. A combination of highly-visible enforcement, public information, education, and training is needed to achieve a significant impact in reducing crash-related injuries and fatalities in South Carolina. This can be accomplished through establishing full-time traffic enforcement units (PTS units) that include comprehensive highly-visible enforcement efforts relative to speeding, DUI, occupant protection, and other traffic laws. It should be noted that on many occasions a speed-related violation results in a more severe violation, such as driving under suspension, DUI, or other serious criminal violations. Comprehensive traffic enforcement efforts involving components such as selective traffic enforcement, public education activities, and accountability standards, can lead to noticeable traffic safety impacts.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Based on the analysis of the problem identification data, South Carolina faces significant issues in speeding-related indices. Allocating funds to the establishment of full-time traffic enforcement units that include comprehensive highly-visible selective traffic enforcement efforts and public education will facilitate the state's achievement of the outlined speed-related performance targets. Achievement of these performance targets will serve to reduce collisions, severe-injuries, and fatalities in the state.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

PTS enforcement units will use countermeasures demonstrated to be highly effective in NHTSA's Countermeasures That Work document. Some of these countermeasures include the enforcement of speed limits through the use of measuring equipment such as Radars and/or Lidars, (CTW, Chapter 3: Section 2.3, [pp. 3-29 to 3-31]) and Communications and Outreach Supporting Enforcement (CTW, Chapter 3: Section 4.1, [p. 3-38 to 3-39]). PTS enforcement units will also use countermeasures outlined in the document that have proven successful in DUI enforcement (pp. 1-21 to 1-28) and occupant restraint enforcement. An example of this type of combined enforcement would be to emphasize nighttime safety belt enforcement (pp. 2-15 to 2-16), while conducting a sustained DUI enforcement effort (p. 2-17) simultaneously.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activity number | PTS-EU
Primary countermeasure strategy | Short-term, High Visibility Law Enforcement
Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

Yes

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.

PTS enforcement units will be developed and implemented in those areas where analysis of traffic collision and citation data indicates a major traffic safety problem. The PTS projects funded are located in counties identified as having a significant problem with speed-related traffic collisions, serious injuries, and fatalities. This includes county sheriffs’ offices and municipal law enforcement agency projects identified by the supporting data. The projects will fund law enforcement officer personnel, travel, equipment, and other allowable items. Traffic safety enforcement programs throughout the state will participate in Law Enforcement Networks established in the 16 Judicial Circuits in South Carolina. They will participate in statewide and national highway safety campaigns and enforcement crackdown/mobilization programs. These campaigns include DUI crackdowns (Sober or Slammer!), occupant protection mobilizations (Buckle Up, South Carolina), focused roadway corridor speed enforcement (Operation Southern Shield), and combined enforcement activity, to include nighttime safety belt enforcement. The PTS projects will conduct traffic safety presentations to increase community awareness of traffic safety-related issues and issue press releases of the projects’ activities. Law Enforcement Networks will continue to meet and share information among agencies, to disseminate information from the Office of Highway Safety and Justice Programs, and to conduct multi-jurisdictional traffic enforcement activities.

The OHSJP has continued the implementation of Data Driven Approaches to Crime and Traffic Safety (DDACTS) since 2012, which is a hot spot locator-type approach to deploying law enforcement. Several law enforcement agencies across the state have been trained in DDACTS, and they are provided information on the data sources available to them in order to best utilize their resources. This data includes traffic corridor information relative to their respective agencies, which will allow them to focus on roadways where collisions, injuries, and traffic fatalities are occurring. It is always available upon request and some agencies even use their own internal data/records when selecting safety checkpoint and saturation patrol locations.

No

Enter description of the planned activity.

The Law Enforcement Coordination project proposes to continue funding the Law Enforcement Support Services (LESS) division’s manager, who serves as a Law Enforcement Liaison (LEL), and one additional LEL. The Law Enforcement Liaisons (LELs) will work with the Law Enforcement Network (LEN) to enforce traffic safety throughout the state in priority areas. The LESS division's priorities are to develop and maintain the Law Enforcement Network (LEN) system, to work to establish and maintain relationships between the OHSJP and law enforcement agencies around the state, and to garner law enforcement support for participation in statewide enforcement mobilization campaigns. The Law Enforcement Coordination internal grant project will also provide LEN support grants to the sixteen (16) Law Enforcement Networks established around the state. The sixteen networks correspond to the sixteen judicial circuits in the state. The support grants will be provided through the Law Enforcement Coordination grant to assist the networks with meeting room costs, recognition awards for traffic officers, the costs to attend highway safety training and/or conferences, and educational materials. The LEN system, which includes both state and local law enforcement agencies, will allow statewide coverage and implementation of law enforcement activity, including multi-jurisdictional enforcement activities.

5.6.3 Countermeasure Strategy: Communication Campaign

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.
South Carolina is committed to its focus on the dissemination of traffic safety information to the general public and the law enforcement community. Marketing allocation of funds to planned activities.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

South Carolina is committed to its focus on the dissemination of traffic safety information to the general public and the law enforcement community. Marketing campaigns, training for highway safety professionals and sharing information at public events are key strategies to help meet performance measures and goals related to issues with occupant protection in the state.
The OHSJP, Public Information Outreach and Training (PIOT) section will continue to use a full-service marketing firm to assist with such efforts as media buying, creative production, and evaluation of campaigns. However, the OHSJP, with the help of the agency’s Communications Office and SC Highway Patrol Community Relations Officers, will oversee earned media efforts, such as issuing news releases, conducting press events, and coordinating media interviews.

The marketing firm will continue to assist with campaigns, including *Buckle Up, SC. It's the law and it's enforced. Child Passenger Safety* is another important public information initiative for the State Highway Safety Office.

Special public information events during *Buckle Up, America!* Week in May 2019, and the National Child Passenger Safety Awareness Week in September 2019 will occur in FFY 2019. Additionally, the State Highway Safety Office (SHSO) will also assist in planning, coordinating, and implementing, with the assistance of the SCDPS Contractor, the *Buckle up, South Carolina. It's the law and it's enforced.* public information, education and enforcement campaign during the Memorial Day holiday of 2019.

Communication and outreach contribute to heightened public awareness, which when combined with enforcement, have been beneficial in addressing the issues faced by the state, as determined through its problem identification process.

**Evidence of effectiveness**

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

NHTSA promotes the importance of combining high-visibility enforcement with heightened public awareness as the best way to approach key problem areas and produce behavioral change. Therefore, the OHSJP will continue to offer a media mix for enforcement-based and non-enforcement-based campaigns to meet stated goals. The OHSJP will employ key strategies to promote its mission and core message of public safety.

**Planned activities**

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

**5.7 Program Area: Non-motorized (Bicyclist)**

<table>
<thead>
<tr>
<th>Program area type</th>
<th>Other</th>
</tr>
</thead>
</table>

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

**Problem identification**

Enter description and analysis of the State’s highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

**BICYCLISTS**

**Traffic Fatalities**

According to FARS data, in 2016 there were 25 bicyclist fatalities in South Carolina motor vehicle crashes. These 25 fatalities accounted for only 2.5% of the total fatalities for the state for 2016.

There were 83 bicyclist fatalities in the five-year period from 2012 to 2016, with 25 occurring in 2016, representing a 72.41% increase when compared to the average of the previous four-year period, and a 92.31% increase from the level in 2012. This percentage change is significantly larger than the percentage increase in such fatalities seen nationwide (a 14.44% increase) during the same timeframe (see Table 32 ).
Throughout the last five years (2012-2016), South Carolina’s average population-based bicyclist fatality rate (0.34 deaths per 100,000 population) was higher than the national average rate (0.24) during the same timeframe. South Carolina’s rate in 2016 (0.50) was 65.29% higher than the prior four-year average, and was 78.57% higher than the 2012 rate. (see Table 13). Nationwide, the population-based bicyclist fatality rate increased by 8.33% in 2016 (0.26) compared to the 2012-2015 average and was a 13.04% percentage increase from the rate in 2012.

*Note: Data based on Final FARS and ARF Fars from the available NHTSA-FARS datasets*

### Traffic Injuries

Based on state data, bicyclist traffic injuries decreased from 2012 to 2015, before increasing in 2016. Table S-20 shows that total bicyclist traffic injuries in the state for the five-year period was 2,381, or 0.87% of the total traffic injuries in the state for the time period (274,534). Total bicyclist injuries decreased in 2016 (503) as compared to 2012 (507) by 0.79%. However, the number of bicyclist injuries from 2016 represents a 15.37% increase from the number of bicyclist injuries in 2015 (436), and injuries were 7.1% higher than the average number of bicyclist injuries for the period 2011-2014 (469.5).

### Traffic Collisions

According to state data, SC experienced 2,502 total traffic collisions involving bicyclists during the time period 2012-2016. Table S-22 shows that, during the five-year period, the state has experienced variation in the number of bicyclist collisions. In 2016, the state’s number of bicyclist collisions increased 14.0% compared to the previous year (2015, 457 collisions), and was 3.7% lower than it was in 2012. In 2016, the state’s number of bicyclist collisions was 5.2% more than the average number of bicyclist collisions (495.3) for the four-year period 2012-2015.

Table S-23 presents the number of fatal and severe-injury bicycle-related collisions from 2012-2016 by county. Charleston, Horry, Richland, and Beaufort counties had the highest occurrences of bicyclist fatal and severe-injury collisions during this time period with 63, 52, 26, and 29, respectively.

MOPED OPERATORS

Traffic Fatalities

According to SC state data (the state’s fatality data does not include mopeds as a subset of motorcycles) (see Table S-24), in 2016 there were 39 moped operator fatalities as a result of motor vehicle collisions in South Carolina. These 39 fatalities accounted for 3.8% of the total fatalities for the state that year. While there had been a significant increase in the number of moped fatalities since 2009, in 2016, moped-operator traffic fatalities increased by 2.6% as compared to 2012 and 12.2% as compared to the average number of moped operator traffic fatalities for the four-year period 2012-2015 (34.75).
Traffic Injuries

According to state data, moped operators/riders received 3,564 injuries or possible injuries in traffic crashes during the period 2012-2016 (does not include fatally injured moped operators/riders), representing about 1.3% of all traffic-related injuries during the time period (274,534). Traffic injuries have decreased for moped operators since 2012, with 743 such injuries occurring in 2012 and 684 such injuries occurring in 2016, a decrease of almost 8.0%. This attests, in part, to a slight decrease in moped use across the state during this five-year period (892 total moped operators/riders in 2012 vs. 860 moped operators/riders in 2016.)

Table S-25 shows total moped riders involved in traffic collisions by injury severity. Severe injuries among moped riders decreased from 2012 to 2016, with 162 such injuries occurring in 2012 as compared to 124 in 2016, a decrease of 23.5%. The 2016 figure also represents a decrease in 2016 of 16.9% as compared to the average number of moped-rider traffic severe injuries for the four-year period 2012-2015 (149.25).

As depicted in Table S-26, the top six counties for moped-operator fatal and severe-injury collisions accounted for more than 53.5% of the total. These counties were Horry, Greenville, Charleston, Spartanburg, Richland, and Anderson.

Traffic Collisions

According to state data, traffic collisions involving moped operators decreased in 2013 and 2014 before increasing again in 2015, and decreasing again in 2016 (see Table S-27). The 3,983 total collisions represent only 0.65% of the state’s 616,254 total traffic collisions during the 2012-2016 time period. In 2016, the state experienced 791 such collisions, a 2.5% decrease as compared to the number of collisions in 2012 (811). In 2016, the number of moped-operator traffic collisions decreased by 4.6% as compared to 2015, and the 2016 figure was 0.9% lower than the average number of moped-operator collisions for the four-year period 2012-2015 (798).
Table S-28 shows that in South Carolina during the period 2012-2016, the greatest concentration of moped-involved collisions occurred between 3:01 p.m. and 6:00 p.m. (949 or 23.8%). During that same time period, the greatest number of fatal moped-involved crashes occurred between the hours of 6:01 p.m. to 9:00 p.m. (42, or 23.7%).

PEDESTRIANS

Traffic Fatalities

The State of South Carolina is experiencing a pedestrian safety problem of almost equal magnitude to the challenges being faced with motorcycle safety. Table 12 shows the number and rate of pedestrian deaths in South Carolina, both of which increased considerably throughout the 2012-2016 period. Overall, the 2016 total (144 fatalities) is 27.15% higher than the prior four-year average (116 fatalities), and 17.1% higher than the 2012 total (123 fatalities).

</tbody>
</table>

Note: Data based on Final FARS and ARF Fars from the available NHTSA-FARS datasets

Throughout the five years (2012-2016), pedestrian fatalities accounted for, on average, 13.4% of all traffic-related deaths in South Carolina. The 2016 percentage of South Carolina pedestrian fatalities to total traffic fatalities (14.19%) represents a 0.98% increase in this index when compared to the 2012-2016 average (13.21%), and a 0.06% decrease compared to the 2012 proportion (14.25%).

The state’s population-based pedestrian fatality rate increased in 2016 (2.90 deaths per 100,000 population) by 22.8% when compared to the prior four-year average (2.36). Over all five years, South Carolina’s average population death rate for pedestrians (2.47) was higher than the rate seen for the US as a whole (1.63).

Table 33 indicates that nationwide, pedestrians accounted for an average of 5,198 deaths annually during the 2012-2016 period. Total pedestrian fatalities increased in 2016 (5,987 fatalities) by 19.73 % when compared to the 2012-2015 average (5,001). Additionally, the 2016 nationwide population-based fatality rate for pedestrian fatalities (1.85) increased by 17.65% as compared to the previous four-year average (1.57). In the US, pedestrians accounted for an average of 15.05% of all 2012-
2016 traffic-related fatalities. The 2016 proportion of pedestrian fatalities to total traffic fatalities (15.98%) represented a 1.16% increase when compared to the prior four-year average (14.82%).

Traffic Injuries

According to state data (see Table S-29), the State of South Carolina experienced 4,611 traffic-related injuries (not including fatalities) in the years 2012-2016 involving pedestrians. Of these injuries, 929, or 20.1%, were severe injuries. The number of pedestrian injuries has fluctuated in recent years, with the state in 2016 experiencing 2.8% more pedestrian traffic injuries than occurred in 2012. The 2016 figure of 986 total pedestrian traffic injuries represents an increase (12.2%) from 2015’s number of 879. The 2016 figure represents an increase of 8.8% as compared to the average number of pedestrian traffic injuries for the four-year period 2012-2015 (906.25). Serious pedestrian traffic injuries, however, appear to be trending downward. The 2016 figure for serious pedestrian traffic injuries (183) is 11.6% lower than the 2012 figure of 207 and it is 3.5% lower than the average number of pedestrian traffic fatalities for the four-year period 2012-2015 (186.5). However, the 2016 figure represents an increase of nearly 13.0% when compared to the 2015 figure (162).

As depicted in Table S-30, the top six counties for fatal and severe-injury pedestrian collisions accounted for more than 70% of the total (1,106). These counties were Charleston, Greenville, Richland, Horry, Spartanburg, and Anderson.

Traffic Collisions

According to state data, South Carolina experienced 4,939 total traffic collisions involving pedestrians during the time period 2012-2016 (see Table S-31). Total collisions involving pedestrians have fluctuated over the recent years, with 1,037 collisions in 2012, 962 in 2013, 923 in 2014, 953 in 2015, and 1,064 in 2016. The number of collisions involving pedestrians increased 11.7% in 2016 compared to 2015 and 2.6% when compared to 2012. The 2016 figure of 1,064 was also 9.8% greater than the average number of traffic collisions involving pedestrians for the four-year period 2011-2014 (968.75).
Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

5.7.1 Countermeasure Strategy: VRU Communication Campaign

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State’s problem identification, involves law enforcement agencies responsible for seat belt enforcement in
geographic areas in which at least 70 percent of either the State’s unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred.

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Vulnerable Roadway User (VRU) Communication Campaigns serve to increase drivers’ awareness of vulnerable roadway users, including bicyclists, pedestrians, and moped operators, as well as improve both VRU and driver compliance with relevant traffic laws. The VRU Communication Campaign is known as “Look!” and will focus on counties that experienced high rates of deaths and serious injuries among vulnerable roadway user groups. A positive traffic safety impact can be achieved through increasing drivers’ awareness of these vulnerable roadway user groups and through increasing VRU and driver compliance with relevant traffic laws.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Each year the State of South Carolina experiences traffic crashes, injuries, and fatalities which involve individuals whose modes of transportation involve means other than four-wheeled vehicles. These individuals choose to negotiate roadways on foot (pedestrians), or by the mechanism of two-wheeled vehicles (mopeds, bicycles and motorcycles). Unfortunately, each year these most vulnerable of roadway users contribute, sometimes through no fault of their own, to the negative traffic statistics experienced by the state. Communication campaigns designed to increase drivers’ awareness of vulnerable roadway user groups and improve both VRU and driver compliance with relevant traffic laws will help the state meet the performance measures and goals related to the issues faced by vulnerable roadway user groups.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

The NHTSA-produced Countermesures That Work: A Highway Safety Countermeasure Guide for State Highway Safety Offices, Eighth Edition, 2015 (CTW) contains specific chapters on motorcyclists, pedestrians, and bicyclists, but no specific documentation about appropriate countermeasures for moped rider safety, although aspects of motorcyclist safety countermeasures would clearly be applicable to this category as well. The State of South Carolina has implemented certain efforts over time, predominantly of an educational nature, in terms of addressing bicyclist and pedestrian traffic safety issues, such as elementary-age child pedestrian training, deemed likely effective (Chapter 8, Section 2.1, pp. 8-18 to 8-22); child school bus training, deemed undetermined in terms of effectiveness (Chapter 8, Section 2.3, p. 8-25 to 8-27); impaired pedestrians: communications and outreach, deemed undetermined in terms of effectiveness (Chapter 8, Section 3.1, p. 8-27 to 8-28); conspicuity enhancement, deemed likely effective (Chapter 8, Section 4.3, p. 8-34 to 8-36); Share the Road awareness programs, limited evidence of effectiveness (Chapter 9, Section 4.2, p. 9-35 to 9-36); and bicycle safety education for bicycle commuters, limited evidence of effectiveness (Chapter 9, Section 2.2, p. 9-23 to 9-25).
Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

5.7.1.1 Planned Activity: Look! Communication Campaign

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)
No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]
No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]
No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(ii)(i) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]
No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]
No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]
No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]
No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]
No

Enter description of the planned activity.

Look! Communication Campaign Strategies

The Office of Highway Safety and Justice Programs (OHSJP) will launch a billboard campaign in 2019 to focus on safety issues related to vulnerable roadway users, particularly moped riders, bicyclists and pedestrians. The campaign will target focus counties that experienced high rates of deaths and serious injuries among vulnerable roadway user groups during the five-year period from 2012 to 2016. The campaign will support public outreach and enforcement efforts by the SC Highway Patrol to address the increase in deaths occurring in South Carolina among these vulnerable groups. While each board will focus on one vulnerable roadway group, the campaign features a unified and cohesive series of “share the road” messages. That way, roadway users will recognize the compellingly colorful billboard campaign as one theme, which is “Look!” The theme encourages motorists to simply pay attention and “look” for these vulnerable roadway users when they are negotiating the roadways. The billboards, in essence, tell motorists that by looking out for vulnerable roadway users and sharing the road responsibly with them, lives
can be saved. (Boards focusing on motorcycles also feature the same theme and logo, but funding for the boards will be taken from another source.)

During FFY 2019, the OHSJP staff will develop a presentation on vulnerable roadway users to present at LEN meetings around the state in those Judicial Circuits in which the priority counties for the above-referenced billboard campaign are located. The presentation will contain a variety of information about vulnerable roadway users, including statistical information regarding traffic crashes, injuries, and fatalities featuring locations, time, and demographic data.

**5.8 Program Area: Planning & Administration**

**Program area type** Planning & Administration

Will countermeasure strategies and planned activities be described in this plan to address the program area?

No

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

**Problem identification**

Enter description and analysis of the State’s highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

**Traffic Fatalities**

In South Carolina, FARS annual report file (ARF) state data from our Statistical Analysis & Research Section (SARS) indicates that there were 1,015 traffic fatalities in 2016. This figure represents a 3.7% increase from the 979 traffic fatalities reported for 2015. Based on the number of fatalities and a 5.2% increase in vehicle miles of travel for 2016, the mileage death rate for 2016 is 1.87, which represents a 0.9% decrease from 2015 (1.89). Overall, from 2012 to 2016, fatalities increased by 17.61% in South Carolina, compared to increases of 10.89% nationwide.

**Traffic Injuries**

Figure S-1 contains South Carolina state statistical data which indicates there were 274,534 persons injured in motor vehicle collisions during a five year period (2012-2016). The crash data compiled by the OHSJP’s Statistical Analysis & Research Section (SARS) indicates that the number of annual motor vehicle injuries sustained during collisions increased from 50,064 in 2012 to 61,899 in 2016. The 2016 data relative to the actual number of injuries sustained in traffic crashes represents a 23.6% increase when compared to the number of people injured in traffic collisions in 2012. When compared to the average of the four-year period 2012-2015 (53,159 injuries), the 2016 figure represents a 16.4% increase. Of the 274,534 people injured during a vehicle crash from 2012 to 2016, 15,995 people (Figure S-2), or 5.8%, sustained severe injuries as a result of a crash.

![Figure S-1 Injuries in SC Motor Vehicle Collisions 2012-2016 Data](image1)

Figure S-2 contains data regarding severe traffic injuries occurring in the state during the years 2012-2016. Of the 274,534 traffic-related injuries occurring during this time period, 15,995, or 5.8%, were severe injuries. There were 3,049 traffic-related severe injuries in 2016, a 10.3% reduction as compared to 2012. The 2016 figure of 3,049 severe traffic-related injuries was also a 5.8% reduction as compared to the average of the four-year period 2012-2015 (3,237 severe injuries).

![Figure S-2. Severe injuries SC Motor Vehicle Collisions 2012-2016 Data](image2)

Traffic Collisions

From 2012 to 2016, state statistical data listed in Figure S-3 shows that there were a total of 616,254 vehicle collisions in South Carolina during this five year time period. Of the 616,254 vehicle collisions reported during this time period, 17,133 (Figure S-4), or 2.8%, were fatal or severe-injury crashes. From 2012 to 2016, the state has experienced a 30.7% increase in the number of reported vehicle crashes. When compared to the four-year average of traffic crashes occurring from 2012 to 2015 (118,664 collisions) the 2016 figure represents a 19.3% increase. The leading counties for fatal and severe-injury crashes from 2012 to 2016 were, in decreasing order, Horry, Charleston, Greenville, Richland, Spartanburg, Anderson, Berkeley, Lexington, York, Beaufort, Florence, Aiken, Orangeburg, Dorchester, Lancaster, Pickens, Laurens, Sumter, Colleton, Georgetown, Darlington, Greenwood, Jasper, Oconee, and Cherokee.

5.8.1 Planned Activity: Highway Safety Program Administration

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State’s problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State’s most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No
Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.

The 402 State and Community Highway Safety Program in South Carolina is administered by the Office of Highway Safety and Justice Programs (OHSJP) of the SC Department of Public Safety (SCDPS). The mission of the OHSJP is to develop and implement comprehensive strategies aimed at reducing the number and severity of traffic crashes on the state's streets and highways. The Program Administration area of the OHSJP will coordinate highway safety programming focused on public outreach and education, aggressive traffic law enforcement, promotion of new safety technologies, the integration of public health strategies and techniques, collaboration with safety and business organizations, and cooperation with state and local governments. Programming resources will be directed to nationally and state-identified priority areas outlined in this document. The Program Administration area will ensure monitoring of traffic data to coordinate appropriate statewide highway safety messages to all citizens and visitors of the state. Highway safety staff members will conduct a Problem Identification meeting annually to identify highway safety problems. A Funding Guidelines Workshop will be conducted to provide information to potential subgrantees and to encourage the development of data-driven, evidence-based projects that will positively impact highway safety. Pre-work Conferences and a Project Management Course will be conducted during FFY 2019 with all Project Directors of newly awarded highway safety projects.

Program Administration will continue a sustained DUI enforcement initiative by implementing the 2019 Law Enforcement DUI Challenge known as Sober or Slammer! campaign (corresponding to the national Drive Sober or Get Pulled Over campaign) on a statewide level utilizing strategies that have proven results. The campaign will run from December 1, 2018 through September 1, 2019. According to the Countermeasures That Work, A Highway Safety Countermeasure Guide for State Highway Safety Offices, Eighth Edition, 2015 (Chapter 1, section 2.2), publicized saturation patrol programs and sobriety checkpoints are effective in reducing alcohol-related fatal crashes and deterring drunk driving. The SCLEN will encourage participants to join the campaign and utilize these enforcement strategies in their DUI enforcement efforts statewide alongside the SCHP.

Program Administration will also continue the state’s occupant protection enforcement mobilization in the time period leading up to and after the Memorial Day holiday in May 2019. The statewide campaign, known as Buckle up, South Carolina. It’s the law and it’s enforced., will mirror the national Click-it-or-Ticket campaign. The 2019 campaign will once again focus on nighttime safety belt enforcement at the state and local level. This strategy will not only impact the time of day when seat belt usage rates decline, but will also result in additional DUI arrests. All major mobilizations will include outreach components that focus on the diverse population of our state.

The OHSJP will provide funding to highway safety staff and advocates to attend significant conferences and training events related to highway safety issues. Highway safety staff, other SCDPS staff, and partner agencies/groups will continue to educate and inform the citizens of the state and its visitors about the state’s primary enforcement safety belt law. Highway safety staff will continue to support and assist in the further development of the Law Enforcement Network (LEN) system in the state. Sixteen (16) LENs have been formed corresponding to the sixteen judicial circuits in South Carolina. The OHSJP will continue to maintain a strong partnership with the SC Department of Transportation (SCDOT) to enhance traffic safety initiatives through a variety of activities.

The OHSJP’s Planning and Administration highway safety project staff will direct the planning, development, coordination, monitoring, evaluating, and auditing of projects under the Section 402 Program. Highway safety staff are also responsible for coordinating and evaluating the highway safety efforts among the various agencies throughout the state. The goal of the Planning and Administration Program Area is to decrease the upward trend of traffic fatalities from the 2016 preliminary number of 1,020 to 960 by December 31, 2019 with a five year average of 988 from 2015-2019.

Analysis

Enter analysis of crashes, crash fatalities, and injuries in areas of highest risk.

Analysis of Crashes, Crash Fatalities, and Injuries in Areas of Highest Risk

The state of South Carolina has seen significant fatality reductions in the impaired driving category over the time period 2011-2016. According to 2016 Fatality Analysis Reporting System (FARS) annual report file (ARF) data, the state has experienced a significant decrease in alcohol-impaired driving fatalities (-8 from 2012 to 2016; +39 in 2012; -8 in 2013; -61 in 2014; -30 in 2015; ). South Carolina has experienced a 2.59% decline in impaired driving fatalities from 2011 to 2015 compared to a 4.05% increase. See Table 3; Table 5; Figure 2 and Figure 3 for trends.
Since 2013, the total number of traffic deaths in South Carolina has increased considerably. The year 2014 saw 823 traffic fatalities and 979 traffic fatalities occurred in 2015. The number of traffic fatalities increased significantly in 2016 to 1,015. Overall, there was an increase of 152 deaths in comparing 2012 with 2016. It is not certain what effect changes in the economy or other related factors had on the more unfavorable results of 2016.

The only observed statistical declines from 2012 through 2016 were in impaired-driving deaths (-4.89) and young driver-involved fatalities (-14.29%). The remaining categories all saw increases. The top five increasing categories in traffic fatalities were: Bicyclist Fatalities (92.31%); Motorcyclists (26.71%); Older Driver-Involved Fatalities (23.85%); Passenger Fatalities (21.17%); and Speeding Fatalities (18.32%).

Traffic Fatalities

Total traffic deaths in South Carolina numbered 863 in 2012 before decreasing to 768 in 2013 (the third lowest number of deaths in the prior 50-year state history). Since 2013, the total number of traffic deaths in South Carolina has increased considerably. The year 2014 saw 823 traffic fatalities and 979 traffic fatalities occurred in 2015. The number of traffic fatalities increased significantly in 2016 to 1,015. Overall, there was an increase of 152 deaths in comparing 2012 with 2016. It is not certain what effect changes in the economy or other related factors had on the more unfavorable results of 2016.

The only observed statistical declines from 2012 through 2016 were in impaired-driving deaths (-4.89) and young driver-involved fatalities (-14.29%). The remaining categories all saw increases. The top five increasing categories in traffic fatalities were: Bicyclist Fatalities (92.31%); Motorcyclists (26.71%); Older Driver-Involved Fatalities (23.85%); Passenger Fatalities (21.17%); and Speeding Fatalities (18.32%).

Traffic Injuries

Figure 3 contains South Carolina state statistical data which indicates there were 274,534 persons injured in motor vehicle collisions during a five year period (2012-2016). The crash data compiled by the OHSJP’s Statistical Analysis & Research Section (SARS) indicates that the number of annual motor vehicle injuries sustained during collisions increased from 50,064 in 2012 to 61,899 in 2016. The 2016 data relative to the actual number of injuries sustained in traffic crashes represents a 23.6% increase when compared to the number of people injured in traffic collisions in 2012. When compared to the average of the four-year period 2012-
2015 (53,159 injuries), the 2016 figure represents a 16.4% increase. Of the 274,534 people injured during a vehicle crash from 2012 to 2016, 15,995 people (Figure S-2, p. 60), or 5.8%, sustained severe injuries as a result of a crash.

**Figure S-1 Injuries in SC Motor Vehicle Collisions 2012-2016 Data**

![Figure S-1](image)

**Figure S-2 contains data regarding severe traffic injuries occurring in the state during the years 2012-2016. Of the 274,534 traffic-related injuries occurring during this time period, 15,995, or 5.8%, were severe injuries. There were 3,049 traffic-related severe injuries in 2016, a 10.3% reduction as compared to 2012. The 2016 figure of 3,049 severe traffic-related injuries was also a 5.8% reduction as compared to the average of the four-year period 2012-2015 (3,237 severe injuries).**

**Figure S-2. Severe injuries SC Motor Vehicle Collisions 2012-2016 Data**

![Figure S-2](image)

**Traffic Collisions**

From 2012 to 2016, state statistical data listed in **Figure S-3** shows that there were a total of 616,254 vehicle collisions in South Carolina during this five year time period. Of the 616,254 vehicle collisions reported during this time period, 17,133 (Figure S-4), or 2.8%, were fatal or severe-injury crashes. From 2012 to 2016, the state has experienced a 30.7% increase in the number of reported vehicle crashes. When compared to the four-year average of traffic crashes occurring from 2012 to 2015 (118,664 collisions) the 2016 figure represents a 19.3% increase. The leading counties for fatal and severe-injury crashes from 2012 to 2016 were, in decreasing order, Horry, Charleston, Greenville, Richland, Spartanburg, Anderson, Berkeley, Lexington, York, Beaufort, Florence, Aiken, Orangeburg, Dorchester Lancaster Pickens, Laurens, Sumter, Colleton Georgetown, Darlington, Greenwood, Jasper, Oconee, Cherokee.
Enter explanation of the deployment of resources based on the analysis performed.

Explanation of the Deployment of Resources Based on the Analysis Performed

Evidence-Based Traffic Safety Enforcement Program (TSEP)
For FFY 2019, the OHSJJP will implement an Evidence-Based Traffic Safety Enforcement Plan (TSEP) comprising strategies that will include efforts utilizing highway safety grant enforcement projects in priority counties in the state, law enforcement training projects, the maintenance of the SC Law Enforcement Network, the continuation of Target Zero Teams of SC Highway Patrol Troopers in critical areas of the state, and planned high-visibility enforcement strategies to support national mobilizations. The following sections outline these efforts in more detail.

**Highway Safety Grant Enforcement Projects**

For FFY 2019, the SC Public Safety Coordinating Council has approved thirty-six (36) traffic enforcement projects, the majority of which will be implemented, based on the availability of federal funding, in priority counties in the state.

Of the 36 enforcement projects, twenty-two (22) are police traffic services projects, which will fund a total of thirty-three (33) traffic officers in municipalities located in the priority counties of Richland, Charleston, Lexington, Aiken, York, Greenville, Dorchester, Berkeley, Anderson, Lancaster, and Beaufort, as well as five enforcement projects in seven county sheriff’s offices (Charleston, Dorchester, Georgetown, Spartanburg, Florence, Kershaw, and Oconee counties). The sixteen previously identified counties accounted for 57.8% of all speed-related fatalities in the state in 2016. The projects referenced above include four third-year projects, nine second-year projects, and nine first-year efforts. These projects will also encompass DUI enforcement efforts, however, they will primarily focus on general traffic enforcement to include speeding and occupant restraint violations; the conducting of educational presentations to inform local communities about traffic safety problems and issues; meeting with local judges to instruct them about the projects; media contacts to share success stories and enforcement strategies with the general public; and required participation in the SC Law Enforcement Network.

Of the 36 enforcement projects, fourteen (14) are DUI enforcement projects, which will fund a total of sixteen (16) DUI enforcement traffic officers in the counties of Darlington (2 projects), Charleston (1 project), Berkeley (2 projects), Lexington (2 projects), Spartanburg (1 project), Dorchester (1 project), Florence (1 project), Lancaster (1 project), Beaufort (2 projects), and Aiken (1 project). Three projects will be implemented in county sheriff’s offices. The five previously identified counties accounted for 36.5% of all alcohol-impaired driving fatalities in the state in 2016. The projects referenced above include one third-year project, twelve (12) second-year projects, and one first-year project. The projects will focus exclusively on DUI enforcement and the enforcement of traffic behaviors that are associated with DUI violators; educating the public about the dangers of drinking and driving; media contacts regarding enforcement activity and results; and meeting with local judges to provide information about the projects. Project officers will be required to work schedules that are evidence-based, meaning the hours (between 3 PM and 6 AM) which FARS data demonstrates to be those during which the most DUI-related traffic fatalities occur in the state (1,344, or 88.2%, of the 1,524 DUI-related fatalities during the years of 2012-2016). Project officers will also work roadways that have the highest number of DUI-related crashes within their respective jurisdictions.

**Law Enforcement Training Projects**

The OHSJJP will also fund two projects that provide training to law enforcement officers statewide through the SC Criminal Justice Academy. One of the two training projects implemented through the SC Criminal Justice Academy will be funded with Section 402 federal dollars and will focus on comprehensive, advanced training for traffic enforcement officers leading to a Traffic Safety Officer certification and/or a Traffic Safety Instructor Program certification. Training will not only assist officers in enhancing their knowledge and enforcement of traffic laws, but will also provide them with the skills needed to increase conviction rates of traffic law violators. The project will fund four Traffic Safety Instructors. Instructors will train officers from all over South Carolina in a variety of traffic enforcement and investigation areas, including the following:

- DUI Detection and Standardized Field Sobriety Testing (32 hours, 15 classes);
- DUI Detection and SFST Instructor (40 hours, 7 classes);
- SFST Recertification (2 hours, online classes);
- Speed Measurement Device Instructor, RADAR/LIDAR (40 hours, 3 classes);
- Speed Measurement Device Instructor Recertification (4 hours, 2 classes);
- Speed Measurement Device Operator, RADAR/LIDAR (24 hours, 6 classes);
- Speed Measurement Device Recertification, RADAR and/or LIDAR (5 hours, online classes);
- At-Scene Traffic Collision Investigation (80 hours, 4 classes);
- Technical Traffic Collision Investigation (80 hours, 3 classes);
- Traffic Collision Reconstruction (80 hours, 2 classes);
- Motorcycle Collision Investigation (40 hours, 2 classes);
- Pedestrian and Bicycle Collision Reconstruction (40 hours, 2 classes);
- Commercial Vehicle Collision Investigation Level I (40 hours, 1 class);
- Commercial Vehicle Collision Investigation Level II (40 hours, 1 class);
- Safe And Legal Traffic Stops (SALTS) (4 hours, 15 classes);
- Data Master DMT Operator Certification (8 hours, 40 classes);
- Data Master DMT Operator Recertification (3 hours, online classes);
- LIDAR Operator (16 hours, 1 class); and
- RADAR Operator Recertification (3 hours, online classes).

The other training project which will be continued with the SC Criminal Justice Academy focuses on Impaired Driving Countermeasures Training for Law Enforcement and will be funded with Section 405d federal dollars. This project funds one State Impaired Driving Coordinator, who will expend efforts in providing training to state traffic enforcement officers in the areas of Standardized Field Sobriety Tests Instructor (3 classes); Advanced Roadside Impaired Driving Enforcement...
selective, support of and participation in statewide enforcement mobilization campaigns, including the two DUI annual mobilization crackdowns, known as "Sober or Slammer!", and the state's high-visibility DUI Challenge enforcement campaign.

The statewide Law Enforcement DUI Challenge has been successful over the last decade with DUI-related traffic fatalities reduced by almost 29%, from 464 in 2007 to 331 in 2016, and the State is hopeful that the positive reductions will continue in FFY 19 and future years. The SCDPS will continue to implement a statewide Law Enforcement DUI Challenge in FFY 2019 that focuses predominantly on the SC Highway Patrol (SCHP) for the enforcement component of the campaign, while still making every effort to recruit and partner with local law enforcement agencies statewide. The SCHP is the premier traffic enforcement agency in the state and covers the entire geographic and population areas of South Carolina. The SCHP, during FFY 2019, will conduct special DUI enforcement emphases once a month on weekends from December 2018 to September 2019. The weekend enforcement efforts will be supported by radio, social media, and possibly television advertising announcing the enforcement beginning on Wednesday of each week preceding the scheduled enforcement weekends. In addition, during the two DUI mobilization crackdowns, the SCHP will conduct an additional four nights of specialized DUI enforcement, including saturation patrols and public safety checkpoints.

The SCHP will recruit and utilize the assistance of local law enforcement agencies during the weekend and crackdown efforts. Agencies with the highest DUI arrests made during the campaigns will be awarded a recognition plaque for their efforts. Law Enforcement Liaisons will encourage agencies within the Law Enforcement Network system in the state to participate in these enforcement events. Participating agencies will receive a certificate from the OHSJP in recognition of their participation.

Educational efforts will again utilize media (television, radio, social media, and alternative advertising) to support campaign efforts. The focus of the educational efforts will be on the twenty priority counties, (Greenville, Horry, Richland, Lexington, Anderson, Spartanburg, Berkeley, Charleston, York, Aiken, Laurens, Florence, Orangeburg, Pickens, Lancaster, Dorchester, Beaufort, Darlington, Greenwood, and Sumter) which represent approximately 83.2% of the state’s population (based on the Census population estimate for July 1, 2016) and 78.2% of the state’s alcohol-impaired driving fatalities and severe injuries over the five-year period 2012 to 2016 and are designated within the state’s Highway Safety Plan and the Impaired Driving Countermeasures Plan.

Target Zero Teams

The SC Department of Public Safety (SCDPS), utilizing Section 164 transfer funds from the SC Department of Transportation (SCDOT), will continue to implement a three-year enforcement program. The program, called Target Zero Teams, began June 1, 2015 and will run through October 31, 2018. The project name is derived from the state’s “Target Zero Traffic Deaths” umbrella slogan for all highway safety initiatives implemented by SCDPS.

The law enforcement project provides SCDPS with complete funding for six, four-officer teams of SC Highway Patrol Troopers, which devote full-time efforts to the selective, concentrated, and strict enforcement of the state’s traffic laws along roadway corridors identified by SCDPS and SCDOT as being highest for the occurrence of fatal and severe-injury collisions within four areas of the state, the Upstate, the Midlands, the Pee Dee, and the Lowcountry. Participating Troopers focus on traffic enforcement and spend little or no time engaging in crash investigation. Roadways have been identified through statistical analysis following strategies employed successfully by other states around the country. SCDOT selected the 16, 10 mile corridors based on an analysis fatal & injury crashes from 2009-2013. The 16 selected corridors accounted for 4.1% of the total traffic fatalities and 4.4% of the total injuries the state during that time period.

The partnering agencies will continue to meet quarterly to review the lists of roadway corridors to be patrolled and to coordinate enforcement activities. SCDPS will provide weekly schedules to SCDOT of enforcement coverage. This will allow for shifting and reassignment of enforcement resources and priorities based on statistical information and enforcement successes. The partnering agreement between SCDPS and SCDOT allows for the project to be renewed for an additional year. Both the commander over the Target Zero Team and a SCDOT representative consistently review the data for the number of traffic collisions, citations, warnings, and arrests for the designated enforcement corridors. It has been SCDOT’s policy to conduct formal evaluations on all of their safety improvement projects (which would include the TZ Teams) on a pre- and post- schedule of three years.
Enter description of how the State plans to monitor the effectiveness of enforcement activities, make ongoing adjustments as warranted by data, and update the countermeasure strategies and projects in the Highway Safety Plan (HSP).

**How SC Plans to Monitor the Effectiveness of Enforcement Activities, Make Ongoing Adjustments as Warranted by Data and Update the Countermeasure Strategies and Projects in the HSP**

The South County Department of Public Safety, Office of Highway Safety and Justice Programs (OHSJP) utilizes several methods to monitor the effectiveness of enforcement activities using data as the basis for adjustments to countermeasure strategies and updates to the HSP. To ensure that the activities required by the grant award are being performed, the Program Coordinators (For Impaired Driving Countermeasures, Police Traffic Services and Occupant Protection) along with the Business Administration Accountant and/or Grants Administration Accountant conduct on-site monitoring visits for 100% of all projects funded in order to provide adequate technical assistance and to ensure compliance with grant guidelines. First year subgrantees are visited at least twice during the grant year. Continuation grant recipients are visited at least once. During the visit, staff assigned to the grant are asked programmatic and financial monitoring questions to determine whether the subgrantee is in compliance with the terms and conditions of the grant award and if the subgrantee has made sufficient progress towards achieving the grant's outlined goals and objectives. The results, as well as any findings or recommendations for improvement, are discussed with the subgrantee and documented in a letter, mailed to the subgrantee, and a copy is placed in the grant file.

Enforcement subgrantees must also submit monthly reports and all subgrantees provide quarterly reports to the OHSJP documenting grant progress. The monthly and quarterly reports are reviewed by the appropriate OHSJP staff including the Program Coordinator, Grants Administration Manager, Highway Safety Program Administrator, and law enforcement staff.

The enforcement subgrantees' specific performance e.g., numbers of citations written for speeding, DUI, seatbelt use, etc. are recorded in a spreadsheet. An internal Enforcement meeting is held monthly to review the subgrantees' progress. This Enforcement meeting is attended by the Program Coordinators, a member of the Accounting staff, the Grants Administration Manager, the Highway Safety program Administrator and at least one OHSJP staff member with law enforcement experience. The perspective of law enforcement staff is immensely beneficial to the team in evaluating whether the level of enforcement activity is appropriate for the number of officers assigned to the project. If the team determines that enforcement activity is insufficient, the subgrantee is notified by a phone call (which is followed up by an email) regarding the need to make adjustments. The email is placed in the subgrantee's grant file. Additionally, the Program Coordinators maintain effective working relationships with the subgrantees encouraging them to notify the OHSJP if there are changes that may impact the level of grant activity, e.g., an officer is on leave. These relationships and ongoing communication help to keep the subgrantees on track with meeting the grant requirements.

Any recommended changes made to the OHSJP's Countermeasure Strategies as warranted by data, are discussed by the senior management team in consultation with our regional NHTSA representative.

### 7 High Visibility Enforcement

**High-visibility enforcement (HVE) strategies**

**Planned HVE strategies to support national mobilizations:**

*Reminder: When associating a countermeasure strategy to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.*

8 405(b) Occupant Protection Grant

Occupant protection information

405(b) qualification status: High seat belt use rate State

Occupant protection plan

Submit State occupant protection program area plan that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems.

Program Area

Occupant Protection (Adult and Child Passenger Safety)

Participation in Click-it-or-Ticket (CIOT) national mobilization

Select or click Add New to submit the planned participating agencies during the fiscal year of the grant, as required under § 1300.11(d)(6).

Agencies planning to participate in CIOT

Charleston Police Department
Spartanburg County Sheriff's Department
Florence County Sheriff's Office
Lexington Police Department
Columbia Police Department
Charleston County Sheriff's Department
Cayce Public Safety
Summerville Police Department
Aiken Department of Public Safety
Fort Mill Police Department
Moncks Corner Police Department
Kershaw County Sheriff's Office
Dorchester County Sheriff's Office
Anderson Police Department
Goose Creek Police Department
North Augusta Police Department
Bluffton Police Department
Lancaster Police Department
Georgetown County Sheriff's Office
Mount Pleasant Police Department
Enter description of the State’s planned participation in the Click-it-or-Ticket national mobilization.

The state of South Carolina will again conduct a high-visibility statewide enforcement and education campaign during the Memorial Day 2019 holiday period from May 13 – June 2, 2019, known as Buckle Up, South Carolina. It’s the law and it’s enforced. (BUSC), modeled after the national Click-It-or-Ticket mobilization to emphasize the importance of and to increase the use of occupant restraints. The campaign will include paid and earned media, increased enforcement activity by state and local law enforcement agencies, and diversity outreach elements in order to increase safety belt and child restraint use among the state’s minority populations, and it will focus on nighttime safety belt enforcement to attempt to reduce unrestrained traffic fatalities and injuries, especially during nighttime hours. The 2019 BUSC campaign media plan will similarly follow the media buy plan for the 2018 BUSC campaign. All agencies that participate in the state’s FFY 2019 DUI enforcement campaign mobilizations will be encouraged to participate in the BUSC efforts. The SC Highway Patrol (SCHP), the SC State Transport Police (STP), and the Law Enforcement Network system in South Carolina, which is composed of local law enforcement agencies statewide, have indicated that they will again participate in 2019. This level of participation will again allow the OHSJP to cover 100% of the state’s population. The campaign mobilizations will include elements of paid and earned media, enforcement, and diversity outreach. The funding expended during the BUSC portion of the effort will be utilized for advertising, which will focus on the enforcement of safety belt and child passenger safety seat laws. The Law Enforcement Support Services section of the OHSJP will work to recruit and encourage agencies to conduct and report special enforcement activities focusing on occupant protection violations during the BUSC campaign. Additionally, all Police Traffic Services FFY 2019 sub-grantees will have an objective to participate in the BUSC campaign and have another objective specifically related to increasing occupant protection violation enforcement activities. According to the U.S. Census Bureau’s 2016 population estimates, South Carolina has a significant minority population: 27.5% African American and 5.5% Hispanic. For this reason, the State has focused placement of paid media on stations and during time slots that attract African American, Hispanic, youth, and rural male audiences. These demographic groups have shown statistically lower safety belt use rates than non-minority, urban, and female counterparts. The data presented on Table S-8 indicate that South Carolina’s diversity outreach efforts have been successful. In 2017, belt usage among drivers in rural areas surpassed belt usage among urban drivers in 2017 (94.3% vs. 91.7%), and the gap between belt usage among white and nonwhite drivers has increased from 2016 (94.1% for white vs. 86.8% for non-white). In 2017, belt usage among nonwhite drivers differed from belt usage among white drivers by 7.3%. Also in 2017, belt usage among non-white drivers (86.8%) decreased by 6.8% when compared to 2016 usage rates (93.6%). Any campaign on-air messages, on both radio and television, will continue to be translated/dubbed in Spanish and aired on Hispanic television and radio stations statewide, when utilized. The paid media components of this effort will include paid social media and outdoor advertising. In the past the effort has also included airing television and radio spots to alert the general public of the enforcement mobilization, but this method was not utilized in the media buy plan for 2018. All paid media will be used to send the message that law enforcement in the state is serious about enforcing the state’s occupant protection laws. The campaign will utilize the state’s enforcement slogan, Buckle up, South Carolina. It’s the law, and it’s enforced. (BUSC). The enforcement mobilization will be coordinated through the SC Highway Patrol and the SC Law Enforcement Network (SCLEN). Saturation patrols and direct enforcement strategies will be employed to focus on occupant protection violations. South Carolina will also conduct pre- and post-campaign observational surveys in order to effectively evaluate the success of the program and determine the state’s safety belt usage rate. The OHSJP will continue to utilize, in the development of paid media for the BUSC enforcement mobilization, research conducted in surveys and focus groups of younger drivers in May 2018. Online surveys and interviews with drivers ages 16-35 were conducted to determine how the agency could best develop campaign media messages which resonate with the focus populations, attempt to bring about behavioral change. Campaign media messages will focus on the life-saving capabilities of the state’s primary enforcement safety belt law and alert the listening and/or viewing audiences to the aggressive, specialized enforcement being conducted by law enforcement agencies during the Memorial Day enforcement mobilization. Also, for the 2019 BUSC campaign, the OHSJP will again emphasize nighttime seat belt usage. Consideration will be given to creating and developing a new commercial spot for the Memorial Day 2019 enforcement mobilization crackdown. Statistical information shows that seat belt usage rates decrease significantly after dark, and a large percentage of traffic fatalities occur between the hours of 6 PM and 6 AM. This existing spot focuses on nighttime seat belt enforcement, utilizing members of the SC Highway Patrol and other local agencies to illustrate nighttime enforcement procedures for non-compliance with the state’s primary seat belt law. In addition, for 2019, the state will use its adopted umbrella message of “Target Zero” relating to all campaign efforts and its corresponding logo will be incorporated with all campaign materials. Law enforcement agencies that fully participate in all campaigns efforts, including the BUSC campaign will be recognized and awarded with a plaque for their efforts during the campaign periods.

Child restraint inspection stations

Submit countermeasure strategies, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State’s problem identification.

*Reminder: When associating a countermeasure strategy to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.

<table>

Enter an estimate of the total number of classes and the estimated total number of technicians to be trained in the upcoming fiscal year to ensure coverage of child passenger safety inspection stations and inspection events by nationally Certified Child Passenger Safety Technicians.

Estimated total number of classes 18
Estimated total number of technicians 90

Maintenance of effort

ASSURANCE: The lead State agency responsible for occupant protection programs shall maintain its aggregate expenditures for occupant protection programs at or above the level of such expenditures in fiscal year 2014 and 2015.

9 405(c) - State Traffic Safety Information System Improvement Grant

Traffic records coordinating committee (TRCC)

Submit at least three meeting dates of the TRCC during the 12 months immediately preceding the application due date.
Meeting Date
11/9/2017
2/8/2018
3/8/2018
5/31/2018

Enter the name and title of the State’s Traffic Records Coordinator

Name of State’s Traffic Records Coordinator: J.D. Connelly
Title of State’s Traffic Records Coordinator: State Traffic Records Manager

Enter a list of TRCC members by name, title, home organization and the core safety database represented, provided that at a minimum, at least one member represents each of the following core safety databases: (A) Crash; (B) Citation or adjudication; (C) Driver; (D) Emergency medical services or injury surveillance system; (E) Roadway; and (F) Vehicle.

TRCC – Executive Group

The Honorable Donald W. Beatty
SC Chief Justice
SC Judicial Department

TRCC Coordinator
Lt. Doug Connelly (SCDPS-OHSJP)

State traffic records strategic plan

Upload a Strategic Plan, approved by the TRCC, that— (i) Describes specific, quantifiable and measurable improvements, as described in paragraph (b)(3) of this section, that are anticipated in the State’s core safety databases, including crash, citation or adjudication, driver, emergency medical services or injury surveillance system, roadway, and vehicle databases; (ii) Includes a list of all recommendations from its most recent highway safety data and traffic records system assessment; (iii) Identifies which recommendations identified under paragraph (b)(2)(ii) of this section the State intends to address in the fiscal year, the countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), that implement each recommendation, and the performance measures to be used to demonstrate quantifiable and measurable progress; and (iv) Identifies which recommendations identified under paragraph (b)(2)(ii) of this section the State does not intend to address in the fiscal year and explains the reason for not implementing the recommendations.

Documents Uploaded
2018-2019 TRSP APPROVED.pdf

Enter a direct copy of the section of the State traffic records strategic plan that lists all recommendations from the State's most recent highway safety data and traffic records system assessment.

**Crash Recommendations**

- Improve the data dictionary for the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- Improve the interfaces with the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- Improve the data quality control program for the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.

**Vehicle Recommendations**

- Improve the description and contents of the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- Improve the applicable guidelines for the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- Improve the data quality control program for the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.

**Driver Recommendations**

- Improve the data dictionary for the Driver data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- Improve the procedures/process flows for the Driver data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- Improve the data quality control program for the Driver data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.

**Roadway Recommendations**

- Improve the data dictionary for the Roadway data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- Improve the data quality control program for the Roadway data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.

**Citation / Adjudication Recommendations**

- Improve the data dictionary for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- Improve the procedures/process flows for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- Improve the data quality control program for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.

**EMS / Injury Surveillance Recommendations**

- Improve the interfaces with the Injury Surveillance systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- Improve the data quality control program for the Injury Surveillance systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.

**Data Use and Integration Recommendations**

- Improve the traffic records systems capacity to integrate data to reflect best practices identified in the Traffic Records Program Assessment Advisory.

**Enter a direct copy of the section of the State traffic records strategic plan that identifies which recommendations the State intends to address in the fiscal year, the countermeasure strategies and planned activities, at the level of detail required under 23 C.F.R. 1300.11(d), that implement each recommendation, and the performance measures to be used to demonstrate quantifiable and measurable progress.**

**Crash Recommendations**

1. Improve the data dictionary for the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.

   **Response:** SCDPS, SCDOT and SCDMV are reviewing the current structures of the Crash data system to develop a data dictionary.
recommendation is slated for future development within the TRCC.

2. Improve the interfaces with the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.  
Response: The SCCATTS Enhancements/Reporting Equipment project is included in the current TRSP to enhance the interfaces between SCDPS, SCDMV, SCDHEC and SCDOT “Crash-Roadway and Injury Surveillance Systems”. These interfaces will enhance the capabilities of SCCATTS for data sharing of elements collected between the systems that relate to crash records.  
[Project Description in 2018-2019 TRSP Appendix C]

3. Improve the data quality control program for the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.  
Response: The Office of Highway Safety and Justice Programs hired a full time Data Traffic Records Analyst for the SCCATTS. This analyst has been charged with developing programs and initiatives to identify best practices for ensuring optimal data collection for “Crash Systems” reporting. The TRCC will also enact a regular agenda item for the reporting of data quality initiatives and problems at each regularly schedule TRCC meeting.

Vehicle Recommendations

1. Improve the description and contents of the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.  
Response: SCDMV and the TRCC are reviewing the current structures of the descriptions and contents of the Vehicle data system to develop a comprehensive data dictionary and best practices included in the advisory for this system. This recommendation is slated for future development within the TRCC.

2. Improve the applicable guidelines for the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.  
Response: SCDMV and the TRCC are reviewing the guidelines of the Vehicle data system to incorporate best practices included in the recommendations of the advisory for this system. This recommendation is slated for future development within the TRCC.

3. Improve the data quality control program for the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.  
Response: The TRCC will enact a regular agenda item for data quality discussion, planning and review for each of the Core Data Systems within the Traffic Records System. These discussions and problem identification will be used to develop best practices to ensure data quality for all systems.

Driver Recommendations

1. Improve the data dictionary for the Driver data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.  
Response: SCDMV is reviewing the current structures of the Driver data system to develop a comprehensive data dictionary. This recommendation is slated for future development within the TRCC.

2. Improve the procedures/ process flows for the Driver data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.  
Response: The e-Citation database project was completed in January 2018. This project enhanced the interfaces between SCDPS, SCDMV, and SCJD “Driver and Citation/Adjudication” systems. These new interfaces between the Core Systems will enhance the process flow for records directly associated with Citation/Adjudication Driver data systems. Two new projects included in the current TRSP address enhancing these new interfaces that are now being utilized to improve Timeliness, Accuracy, Completeness and Uniformity. They are the SCUTTIES e-Citation Enhancements project and the Phoenix e-Citation Enhancements project. [Project Descriptions in 2018-2019 TRSP Appendix C]

3. Improve the data quality control program for the Driver data system to reflect best practices identified in the Traffic Records Program.  
Response: The TRCC will enact a regular agenda item for data quality discussion, planning and review for each of the Core Data Systems within the Traffic Records System. These discussions and problem identification will be used to develop best practices to ensure data quality for all systems.

Roadway Recommendations

1. Improve the data dictionary for the Roadway data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.  
Response: SCDOT is reviewing the current structures of the Roadway data system to develop a comprehensive data dictionary. This recommendation is slated for future development within the TRCC.

2. Improve the data quality control program for the Roadway data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.  
Response: The TRCC will enact a regular agenda item for data quality discussion, planning and review for each of the Core Data Systems within the Traffic Records System. These discussions and problem identification will be used to develop best practices to ensure data quality for all systems.

Citation/Adjudication Recommendations

1. Improve the data dictionary for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
Response: SCJD is reviewing the current structures of their data system to develop a detailed data dictionary. This recommendation is slated for future development within the TRCC.

2. Improve the procedures/process flows for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
   Response: The e-Citation database project was completed in January 2018. This project enhanced the interfaces between SCDPS, SCDMV, and SCJD “Driver and Citation/Adjudication” systems. These new interfaces between the Core Systems will enhance the process flow for records directly associated with Citation/Adjudication and Driver data systems. Three new projects included in the current TRSP address enhancing these new interfaces that are now being utilized to improve Timeliness, Accuracy, Completeness and Uniformity. They are the SCUTTIES e-Citation Enhancements project and the CMS-SCUTTIES Enhancement project. [Project Descriptions in 2018-2019 TRSP Appendix C]

3. Improve the data quality control program for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
   Response: The TRCC will enact a regular agenda item for data quality discussion, planning and review for each of the Core Data Systems within the Traffic Records System. These discussions and problem identification will be used to develop best practices to ensure data quality for all systems.

EMS/Injury Surveillance System Recommendations

1. Improve the interfaces with the Injury Surveillance systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
   Response: SCDHEC is in the processing of reviewing their Injury Surveillance and Emergency Medical Systems to develop projects to enhance interfaces between their systems and the Crash System to accurately report injury surveillance data. The current TRSP Emergency Medical Services Patient Tracking System project will be the initial step in the process. This project will track the patient from crash to discharge and will improve proper coding data collection for injuries related to crash victims. [Project Description in 2018-2019 TRSP Appendix C]

2. Improve the data quality control program for the Injury Surveillance systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
   Response: The TRCC will enact a regular agenda item for data quality discussion, planning and review for each of the Core Data Systems within the Traffic Records System. These discussions and problem identification will be used to develop best practices to ensure data quality for all systems.

Data Use and Integration Recommendations

1. Improve the traffic records systems capacity to integrate data to reflect best practices identified in the Traffic Records Program Assessment Advisory.
   Response: The current TRSP has several projects targeting the integration of Traffic Records Systems to enhance the data sharing and accessibility of data collected from all Core Systems. The projects addressing these issues include the SCCATTS, CMS, SCUTTIES and Phoenix system enhancement projects. In addition, the EMS Patient Tracking System would be a first step in integrating the ISS and Crash systems for improved data collection of injury records. The TRSP also includes the Traffic Records Dashboard project. This dashboard would give stakeholders and limited public access to data records based on security protocols. [Project Descriptions in 2018-2019 TRSP Appendix C]

Submit the planned activities, at the level of detail required under § 1300.11(d), that implement recommendations.

*Reminder: When associating a planned activity to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.

Enter a direct copy of the section of the State traffic records strategic plan that identifies which recommendations the State does not intend to address in the fiscal year and explains the reason for not implementing the recommendations.

Crash Recommendations

1. Improve the data dictionary for the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
   Response: SCDPS, SCDOT and SCDMV are reviewing the current structures of the Crash data system to develop a data dictionary. This recommendation is slated for future development within the TRCC.

2. Improve the data quality control program for the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
   Response: The Office of Highway Safety and Justice Programs hired a full time Data Traffic Records Analyst for the SCCATTS. This analyst has been
charged with developing programs and initiatives to identify best practices for ensuring optimal data collection for "Crash Systems" reporting. The TRCC will also enact a regular agenda item for the reporting of data quality initiatives and problems at each regularly schedule TRCC meeting.

Vehicle Recommendations

1. Improve the description and contents of the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory. 
   Response: SCDMV and the TRCC are reviewing the current structures of the descriptions and contents of the Vehicle data system to develop a comprehensive data dictionary and best practices included in the advisory for this system. This recommendation is slated for future development within the TRCC.
2. Improve the applicable guidelines for the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory. 
   Response: SCDMV and the TRCC are reviewing the guidelines of the Vehicle data system to incorporate best practices included in the recommendations of the advisory for this system. This recommendation is slated for future development within the TRCC.
3. Improve the data quality control program for the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory. 
   Response: The TRCC will enact a regular agenda item for data quality discussion, planning and review for each of the Core Data Systems within the Traffic Records System. These discussions and problem identification will be used to develop best practices to ensure data quality for all systems.

Driver Recommendations

1. Improve the data dictionary for the Driver data system to reflect best practices identified in the Traffic Records Program Assessment Advisory. 
   Response: SCDMV is reviewing the current structures of the Driver data system to develop a comprehensive data dictionary. This recommendation is slated for future development within the TRCC.
2. Improve the data quality control program for the Driver data system to reflect best practices identified in the Traffic Records Program. 
   Response: The TRCC will enact a regular agenda item for data quality discussion, planning and review for each of the Core Data Systems within the Traffic Records System. These discussions and problem identification will be used to develop best practices to ensure data quality for all systems.

Roadway Recommendations

1. Improve the data dictionary for the Roadway data system to reflect best practices identified in the Traffic Records Program Assessment Advisory. 
   Response: SCDOT is reviewing the current structures of the Roadway data system to develop a comprehensive data dictionary. This recommendation is slated for future development within the TRCC.
2. Improve the data quality control program for the Roadway data system to reflect best practices identified in the Traffic Records Program Assessment Advisory. 
   Response: The TRCC will enact a regular agenda item for data quality discussion, planning and review for each of the Core Data Systems within the Traffic Records System. These discussions and problem identification will be used to develop best practices to ensure data quality for all systems.

Citation/Adjudication Recommendations

1. Improve the data dictionary for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory. 
   Response: SCJD is reviewing the current structures of their data system to develop a detailed data dictionary. This recommendation is slated for future development within the TRCC.
2. Improve the data quality control program for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory. 
   Response: The TRCC will enact a regular agenda item for data quality discussion, planning and review for each of the Core Data Systems within the Traffic Records System. These discussions and problem identification will be used to develop best practices to ensure data quality for all systems.

EMS/Injury Surveillance System Recommendations

1. Improve the data quality control program for the Injury Surveillance systems to reflect best practices identified in the Traffic Records Program Assessment Advisory. 
   Response: SCDMV and the TRCC are reviewing the current structures and contents of the Vehicle data system to develop a comprehensive data dictionary and best practices included in the advisory for this system. This recommendation is slated for future development within the TRCC.

Quantitative improvement

Enter a direct copy of the section of the State traffic records strategic plan that describes specific, quantifiable and measurable improvements, as described in 23 C.F.R. 1300.22(b)(3), that are anticipated in the State's core safety databases, including crash, citation or adjudication, driver, emergency medical services or injury surveillance system, roadway, and vehicle databases. Specifically, the State must demonstrate quantitative improvement in the data attribute of accuracy, completeness, timeliness, uniformity, accessibility or integration of a core database by providing a written description of the performance measures that clearly identifies which performance attribute for which core database the State is relying on to demonstrate progress using the methodology set forth in the "Model Performance Measures for State Traffic Records Systems” (DOT HS 811 441), as updated.

A direct copy of this information is provided in Appendix C of the State's Approved 2018-2019 TRSP. The information provided below is a snapshot of each project's contribution to the anticipated improvements in each of the State's core safety databases.
SC TRCC administers programs and projects that benefit multiple Traffic Records Systems. These programs/projects are approved by designated members of the TRCC.

**Recurring Program title:** OHSJP Staffing

**Description:** a recurring program that addresses TRS Goal #3: Improve management and coordination of traffic records systems. The core traffic records system components affected, applicable performance measures, project goal and program information are listed in the table below.

---

### Core Traffic Records System Components Affected (Check all that apply):
- ☒ Collision, ☒ Citation / Adjudication, ☒ Roadway, ☒ Injury Surveillance, ☒ Driver, ☒ Vehicle

### Performance Measure(s):
- ☒ Timeliness ☒ Accuracy ☒ Completeness ☒ Uniformity ☒ Accessibility ☒ Data Integration

### Project Goal:
Continue the employment of the Traffic Records and support staff through 2020. Implement user support tools and resources for the TRCC and others in the traffic safety community.

**Program Information:**
The Traffic Records Team and support staff within the SCDPS has been steadily coordinating Traffic Records efforts. Positions included in the following areas are: TRCC-Management, SCCATTS, Crash Data Quality Control, Citation Data Quality Control, CRSS, Statistics, FARS, Safety Net, Information Technology, and Data Entry. As the rollout of the SCCATTS and SCUTTIES applications continues staffing requirements will continue to grow to ensure both operations are successful for SC Traffic Records System.

---

**Project title:** Traffic Records Dashboard

**Project Description:** This project addresses TRS Goal #2: Improve traffic records data integration, access, and analysis. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

### Core Traffic Records System Components Affected (Check all that apply):
- ☒ Collision, ☒ Citation / Adjudication, ☒ Roadway, ☒ Injury Surveillance, ☒ Driver, ☒ Vehicle

### Performance Measure(s):
- ☐ Timeliness ☐ Accuracy ☐ Completeness ☐ Uniformity ☒ Accessibility ☒ Data Integration

### Project Goal:
Develop user-enabled dashboard for data analysis with a user quality acceptance rate of 70% for FY 2020.

### Project Status:
Ongoing project: SC requested and was granted a NHTSA GO Team to study the feasibility of a Traffic Records Dashboard. The project is now moving into an exploratory mode to determine the best application for the foundation of a state Traffic Records dashboard. A sub-Working Group has been formed and a proof of concept is now being developed.

---

**SCDHEC’s Injury Surveillance Systems (ISS)** injury coding and tracking for traffic related incidents.

**Project Title:** EMS Patient Tracking System

**Project Description:** This project addresses TRS Goal #2: Improve traffic records data integration, access, and analysis. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

### Core Traffic Records System Components Affected (Check all that apply):
- ☒ Collision, ☒ Citation / Adjudication, ☒ Roadway, ☒ Injury Surveillance, ☒ Driver, ☒ Vehicle

---

Project Goal: To reduce the number of improper injury status codes on traffic collisions by 10% before October 2019.

Project Status: Under development. Original RFP is being updated with new criteria.

SCDMV’s Phoenix System for driver and vehicle records services.

Project Title: Automate Failure to Pay UTT Process

Project Description: This project addresses TRS Goal #2: Improve traffic records data integration, access, and analysis. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Project Goal: Reduce the number of days to receive information on noncompliance from SCJD.

Project Status: The final process is in development, including an MOA with SCJD and SCDMV.

Project Title: Phoenix e-Citation Enhancements

Project Description: This project addresses TRS Goal #2: Improve traffic records data integration, access, and analysis. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Project Goal: Enhance Phoenix to further automate the processing of e-Citations.

Project Status: Project under development.
Project Title: Data Quality Improvements: Citations & Collisions

Project Description: This project addresses TRS Goal #2: Improve traffic records data integration, access, and analysis. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Core Traffic Records System Components Affected (Check all that apply):
☐ Collision, ☒ Citation / Adjudication, ☐ Roadway, ☐ Injury Surveillance, ☒ Driver, ☐ Vehicle

Performance Measure(s):
☐ Timeliness ☐ Accuracy ☐ Completeness ☐ Uniformity ☒ Accessibility ☒ Data Integration

Project Goal: Maintain and improve the consistent quality of the citation and disposition data for the duration of the project

Project Status: Project under development.

SCDMV’s South Carolina Uniform Traffic Ticket Information Exchange System (SCUTTIES) for citation records processing.

Project Title: SCUTTIES Business Application Manager

Project Description: This project addresses TRS Goal #3: Improve management and coordination of traffic records systems. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Core Traffic Records System Components Affected (Check all that apply):
☐ Collision, ☒ Citation / Adjudication, ☐ Roadway, ☐ Injury Surveillance, ☒ Driver, ☒ Vehicle

Performance Measure(s):
☐ Timeliness ☐ Accuracy ☐ Completeness ☐ Uniformity ☒ Accessibility ☒ Data Integration

Project Goal: Fill position for SCUTTIES Business Application Manager prior to October 2019

Project Status: In process

Project Title: Citation Reports

Project Description: Currently SCUTTIES offers a simplified solution for reporting. As we move toward a data warehouse and as we fully implement SCUTTIES there is an anticipated requirement that more statistical reporting will be required from the legislature and other interested parties. If we are required to provide additional reporting prior to the data warehouse implementation this will require development time from either a .net developer or DBA. Until such a time as these reports are requested by interested third parties we will expend our efforts toward building the data warehouse. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Core Traffic Records System Components Affected (Check all that apply):
☐ Collision, ☒ Citation / Adjudication, ☐ Roadway, ☐ Injury Surveillance, ☒ Driver, ☒ Vehicle

Performance Measure(s):
☐ Timeliness ☐ Accuracy ☐ Completeness ☐ Uniformity ☒ Accessibility ☒ Data Integration
**Project Goal:** Project Under development.

**Project Status:** Add additional edits for both citations and dispositions as they are required. General support for enhancements, additional vendor certification, and general problem solving.

**Project Title:** SCUTTIES e-Citation Enhancements

**Project Description:** This project addresses aims to add additional edits for both citations and dispositions as they are required, including general support for enhancements, additional vendor certification, and general problem solving. This can be achieved through hiring a .net contractor for part time work as required to support SCUTTIES technical issues. This contractor would be at 50% SCUTTIES enhancements. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

<table>
<thead>
<tr>
<th>Core Traffic Records System Components Affected (Check all that apply):</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ Collision, ☒ Citation / Adjudication, ☐ Roadway, ☐ Injury Surveillance, ☒ Driver, ☐ Vehicle</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Performance Measure(s):</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ Timeliness ☐ Accuracy ☐ Completeness ☐ Uniformity ☒ Accessibility ☒ Data Integration</td>
</tr>
</tbody>
</table>

**Project Goal:** Continue updates to SCUTTIES and provide general support and troubleshooting.

**Project Status:** Project is under development

**Project Title:** Court Ishmael Orders: Electronic Process

**Project Description:** Currently, Ishmael orders are received in paper format when a court makes a change to a previously disposed citation. Automating this process would be a joint effort between SCDMV and SCJD. The solution to this problem is to use SCUTTIES Business Application Manager as the business analyst and hire a .net contractor for part time work as required to support this development. This contractor would be at 50% for this project initially and could ramp up to 100% for the duration of the development cycle. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

<table>
<thead>
<tr>
<th>Core Traffic Records System Components Affected (Check all that apply):</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ Collision, ☒ Citation / Adjudication, ☐ Roadway, ☐ Injury Surveillance, ☒ Driver, ☐ Vehicle</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Performance Measure(s):</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ Timeliness ☐ Accuracy ☐ Completeness ☐ Uniformity ☒ Accessibility ☒ Data Integration</td>
</tr>
</tbody>
</table>

**Project Goal:** Automate the Ishmael process from courts to SCDMV by September 2019

**Project Status:** Project under development

**SCDOT’s Roadway Component** for maintaining, compiling and analyzing traffic records data for highway safety purposes

**Project Title:** Local Agency Data Collection/Road Location Coding

**Project Description:** This project addresses TRS Goal #1: Improve collection and management of core Traffic Records Data Systems. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

<table>
<thead>
<tr>
<th>Core Traffic Records System Components Affected (Check all that apply):</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Performance Measure(s):</th>
</tr>
</thead>
</table>

**Project Goal:** Project Under development.
Performance Measure(s):
☐Timeliness ☒Accuracy ☒Completeness ☒Uniformity ☐Accessibility ☒Data Integration

Project Goal: Complete local agency data collection in all 46 counties by 2019.

Project Status: To date, SCDOT has completed local agency data collection in 29 counties. However, with the completion of the GIS data extraction, we expect to be able to complete an additional 9 counties in 2018 and then the final 8 counties in 2019. We will then begin a process to keep this data updated.

Project Title: Horizontal Curve Roadway Identification

Project Description: This project addresses TRS Goal #1: Improve collection and management of core Traffic Records Data Systems. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Core Traffic Records System Components Affected (Check all that apply):
☒Collision, ☐Citation / Adjudication, ☒Roadway, ☐Injury Surveillance, ☐Driver, ☐Vehicle

Performance Measure(s):
☐Timeliness ☒Accuracy ☒Completeness ☒Uniformity ☐Accessibility ☒Data Integration

Project Goal: Obtain horizontal curve data for SC roadways. Use information to analyze and identify problem areas to reduce curve-related collisions by October 2019.

Project Status: Software solution has been identified; SCDOT is in the process of developing RFP to proceed with data collection.

---

Project Title: Intersections with Traffic Signals Database

Project Description: This project addresses TRS Goal #1: Improve collection and management of core Traffic Records Data Systems. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Core Traffic Records System Components Affected (Check all that apply):
☒Collision, ☐Citation / Adjudication, ☒Roadway, ☐Injury Surveillance, ☐Driver, ☐Vehicle

Performance Measure(s):
☐Timeliness ☒Accuracy ☒Completeness ☒Uniformity ☐Accessibility ☒Data Integration

Project Goal: Create a database within the Roadway Component that will contain traffic control information for intersections. Develop application to allow this data to auto populate e-Collision forms. This application will decrease the number of inaccurately reported collision signal intersection data elements by 10%.

Project Status: Project is currently in planning stages and under development.

---

Project Title: Rural/Urban Designation & Roadway Surface Type

Project Description: This project addresses TRS Goal #1: Improve collection and management of core Traffic Records Data Systems. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.
Core Traffic Records System Components Affected (Check all that apply):
☒ Collision, ☐ Citation / Adjudication, ☒ Roadway, ☐ Injury Surveillance, ☐ Driver, ☐ Vehicle

Performance Measure(s):
☐ Timeliness ☒ Accuracy ☒ Completeness ☒ Uniformity ☐ Accessibility ☒ Data Integration

Project Goal: Increase the percentage of accurate rural/urban designation and roadway surface type reported to FARS by 15%.

Project Status: This project is in the initial stages of development.

Project Title: Roadway & Crash Management Program Enhancement/Update

Project Description: While a current system exists for the management of South Carolina’s roadway inventory, the need for enhancements in the form of safety analysis capabilities is crucial. One of SCDOT’s key strategic goals is to improve safety along the state’s roadways and to develop and implement safety programs to achieve that goal. A more robust data-driven analysis approach would be an improvement to SCDOT’s roadway safety efforts. Additionally, when collision data are received from SCDPS, modifications may be made to allow for the exact placement of a collision on the state’s roadway line work. The current system lacks the ability to both save these modifications and to provide an avenue back to SCDPS to allow the official record to be updated. The solution is to develop a software solution, adjacent to SCDOT’s current roadway inventory system, which will: integrate traffic collision data to the roadway attributes to perform analysis using both crash criteria and roadway characteristics, address issues of data validation, identify and rank locations with the highest frequency of fatal and severe injury collisions, evaluate potential countermeasures, perform benefit/cost analysis, and project evaluation. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Core Traffic Records System Components Affected (Check all that apply):
☒ Collision, ☐ Citation / Adjudication, ☒ Roadway, ☐ Injury Surveillance, ☐ Driver, ☐ Vehicle

Performance Measure(s):
☐ Timeliness ☒ Accuracy ☒ Completeness ☒ Uniformity ☐ Accessibility ☒ Data Integration

Project Goal: Develop new safety analyst application that will allow for a more robust system of traffic collision problem identification and solutions.

Project Status: Project is in the design phase.

SCDPS’s South Carolina Collision and Ticket Tracking System (SCCATTS) application for collection and e-Reporting of crash, citation and public contact/warnings.

Project Title: SCCATTS Software Application Enhancement/Upgrade

Project Description: The current SCCATTS Application for electronic Traffic Records report submission and data processing is the ReportBeam product. This product, purchased through federal grant funds, is hosted by SCDPS OIT for South Carolina state and local law enforcement traffic records processes. It was purchased in 2009 and is aged and has security vulnerabilities. The product is used by law enforcement to produce and electronically submit citations, collisions and public contact/warning reports and/or data through SCDPS to the South Carolina Department of Motor Vehicles (SCDMV), South Carolina Judicial Department (SCJD), and South Carolina Department of Transportation (SCDOT). The solution is to immediately address the security concerns of the SCCATTS applications vulnerabilities and begin the process to identify possible new solutions for SCCATTS applications currently hosted by SCDPS and interfaced with SCDMV, SCJD, and SCDOT. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Core Traffic Records System Components Affected (Check all that apply):
☒ Collision, ☐ Citation / Adjudication, ☒ Roadway, ☒ Injury Surveillance, ☐ Driver, ☐ Vehicle
Performance Measure(s):
☒ Timeliness ☒ Accuracy ☒ Completeness ☒ Uniformity ☐ Accessibility ☒ Data Integration

Project Goal: Upgrade SCCATTS applications with software system(s) that are functional, affordable, maintainable, and meet security requirements

Project Status: The Report Beam developer Aptean, is in the process of upgrading the current application to meet security needs. SCDPS has begun the process for determining next generation application for SCCATTS.

Project Title: Online Collision Sales

Project Description: This project addresses TRS Goal #2: Improve traffic records data integration, access, and analysis. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Core Traffic Records System Components Affected (Check all that apply):
☒ Collision, ☒ Citation / Adjudication, ☒ Roadway, ☒ Injury Surveillance, ☒ Driver, ☒ Vehicle

Performance Measure(s):
☒ Timeliness ☒ Accuracy ☒ Completeness ☒ Uniformity ☒ Accessibility ☒ Data Integration

Project Goal: To increase the number of crash reports sold by 15% through an online process by October 2020.

Project Status: Project is still in planning and development stage. Memorandum of Agreements are being reviewed and updated.

Project Title: Field Deployment to L/E Agencies

Project Description: This project addresses TRS Goal #1: Improve collection and management of core Traffic Records Data Systems. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Core Traffic Records System Components Affected (Check all that apply):
☒ Collision, ☒ Citation / Adjudication, ☒ Roadway, ☒ Injury Surveillance, ☒ Driver, ☒ Vehicle

Performance Measure(s):
☒ Timeliness ☒ Accuracy ☒ Completeness ☒ Uniformity ☒ Accessibility ☒ Data Integration

Project Goal: Continue to deploy SCCATTS applications to agencies with ability to create electronic reports.

Project Status: SCCATTS has been deployed to 126 agencies across the state. SC now receives 91% of all collision reports electronically through SCCATTS. On average 60% of all citations are submitted to SCUTTIES electronically through the SCCATTS application.

Project Title: SCCATTS Enhancements/Reporting Equipment
**Project Description:** This project addresses TRS Goal #1: Improve collection and management of core Traffic Records Data Systems. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

<table>
<thead>
<tr>
<th>Core Traffic Records System Components Affected (Check all that apply):</th>
</tr>
</thead>
<tbody>
<tr>
<td>☒ Collision, ☒ Citation / Adjudication, ☒ Roadway, ☒ Injury Surveillance, ☒ Driver, ☒ Vehicle</td>
</tr>
</tbody>
</table>

**Performance Measure(s):**
- ☒ Timeliness
- ☒ Accuracy
- ☒ Completeness
- ☒ Uniformity
- ☒ Accessibility
- ☒ Data Integration

**Project Goal:** Continually upgrade components of SCCATTS and related TRS as requirements change through rollout of different applications within SCCATTS initiative.

**Project Status:** SCCATTS has been deployed to more than 90 agencies across the state. SC now receives 91% of all collision reports electronically through SCCATTS. More than 50% of all citations are received electronically through the SCCATTS application.

---

**Project Title:** Collision Report Revision

**Project Description:** This project addresses TRS Goal #1: Improve collection and management of core Traffic Records Data Systems. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

<table>
<thead>
<tr>
<th>Core Traffic Records System Components Affected (Check all that apply):</th>
</tr>
</thead>
<tbody>
<tr>
<td>☒ Collision, ☐ Citation / Adjudication, ☒ Roadway, ☒ Injury Surveillance, ☒ Driver, ☒ Vehicle</td>
</tr>
</tbody>
</table>

**Performance Measure(s):**
- ☒ Timeliness
- ☒ Accuracy
- ☒ Completeness
- ☒ Uniformity
- ☒ Accessibility
- ☒ Data Integration

**Project Goal:** Through linkage of roadway elements and collision data, increase MMUCC compliance to 80% of data elements and 80% of data attributes by 2019. Improve the overall collection of crash related injury coding for collision reporting.

**Project Status:** In 2015 a committee was established to evaluate the current TR-310 collision form and make recommendations for a new form. This project has been on hold due to lack of personnel available to address project properly. Scheduled to be reinstated for 2018-2019 development.

---

**SCJD’s Case Management System (CMS) citation and adjudication processing.**

**Project Title:** CMS-SCUTTIES Enhancements

**Project Description:** This project addresses TRS Goal #2: Improve traffic records data integration, access, and analysis. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

<table>
<thead>
<tr>
<th>Core Traffic Records System Components Affected (Check all that apply):</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ Collision, ☐ Citation / Adjudication, ☐ Roadway, ☐ Injury Surveillance, ☒ Driver, ☒ Vehicle</td>
</tr>
</tbody>
</table>

**Performance Measure(s):**
- ☒ Timeliness
- ☒ Accuracy
- ☒ Completeness
- ☒ Uniformity
- ☐ Accessibility
- ☒ Data Integration

**Project Goal:** To enhance processes in the interface between SCJD’s CMS and SCDMV’s SCUTTIES to improve data quality and information exchange.

**Project Status:** The system has been deployed and began full data integration in January 2018. Next steps are to enhance productivity and data quality of the data collected and exchanged.

---

**Project Title:** PDF Citation

---

Project Description: This project addresses TRS Goal #2: Improve traffic records data integration, access, and analysis. The core traffic records system components affected, applicable performance measures, project goal and project status are listed in the table below.

Core Traffic Records System Components Affected (Check all that apply):
☐ Collision, ☒ Citation / Adjudication, ☐ Roadway, ☐ Injury Surveillance, ☐ Driver, ☐ Vehicle

Performance Measure(s):
☐ Timeliness ☒ Accuracy ☒ Completeness ☐ Uniformity ☒ Accessibility ☒ Data Integration

Project Goal: To allow for a PDF copy of the UTT to be generated for administrative purpose

Project Status: This project is in initial stages of development.

Upload supporting documentation covering a contiguous 12-month performance period starting no earlier than April 1 of the calendar year prior to the application due date, that demonstrates quantitative improvement when compared to the comparable 12-month baseline period.

State highway safety data and traffic records system assessment

Enter the date of the assessment of the State’s highway safety data and traffic records system that was conducted or updated within the five years prior to the application due date and that complies with the procedures and methodologies outlined in NHTSA’s “Traffic Records Highway Safety Program Advisory” (DOT HS 811 644), as updated.

Date of Assessment: 4/27/2017

Requirement for maintenance of effort

ASSURANCE: The lead State agency responsible for State traffic safety information system improvements programs shall maintain its aggregate expenditures for State traffic safety information system improvements programs at or above the average level of such expenditures in fiscal years 2014 and 2015.

10 405(d) Impaired Driving Countermeasure Grant

Impaired driving assurances

Impaired driving qualification - High-Range State

ASSURANCE: The State shall use the funds awarded under 23 U.S.C. 405(d)(1) only for the implementation and enforcement of programs authorized in 23 C.F.R. 1300.23(j).

ASSURANCE: The lead State agency responsible for impaired driving programs shall maintain its aggregate expenditures for impaired driving programs at or above the average level of such expenditures in fiscal years 2014 and 2015.
Impaired driving program assessment

Enter date of the last NHTSA-facilitated assessment of the State’s impaired driving program conducted within three years prior to the application due date. (§ 405(d))

Date of Last NHTSA Assessment: 11/18/2016

Authority to operate

Enter a direct copy of the section of the statewide impaired driving plan that describes the authority and basis for the operation of the Statewide impaired driving task force, including the process used to develop and approve the plan and date of approval.

The State of South Carolina has an impaired driving task force known as the South Carolina Impaired Driving Prevention Council (SCIDPC), which was formed in August 2004 based on a recommendation submitted by an Impaired Driving Assessment conducted in the state in 2002 by a team of NHTSA experts led by Judge Mike Witte of the State of Indiana. The SCIDPC is a multi-agency, multi-disciplinary task force, made up of representatives from law enforcement, the criminal justice system (prosecution, adjudication and probation), driver licensing, treatment and rehabilitation, ignition interlock program, data and traffic records, public health, and communication, which has sought to utilize a variety of approaches in attacking the DUI problem in the state.

The SCIDPC is composed of representatives from various agencies, and each member agency/organization brings different perspectives and experiences to the task force.

The essential purpose of the SC Impaired Driving Prevention Council (SCIDPC) is to provide leadership and guidance for citizens seeking to reduce the number of DUI-related collisions, injuries, and fatalities in the state. The SCIDPC assists in the drafting and review of the Impaired Driving Countermeasures Plan. Prior to the SCIDPC meeting, the Impaired Driving Countermeasures Program Coordinator sends the relevant sections of the plan to the Chairs and Co-Chairs to update with information resulting from the committee's work. OHSJP staff compiles the information into a draft and disseminates the draft to the SCIDPC for review and comment. During the SCIDPC meeting, OHSJP staff review the statutory requirements for a high-range state and the key areas of the IDPC plan. Changes resulting from any discussion of the plan are made to the draft. After all concerns and questions are addressed, the Chair, following parliamentary procedure, (Roberts Rules of Order) requests the Council's approval of the plan. The meeting is recorded and minutes are drafted by an OHSJP staff person who serves as the secretary. The SC Impaired Driving Prevention Council approved the 2019 Impaired Driving Countermeasures Plan on June 15, 2018.

In FFY 2019, the OHSJP will continue to work to ensure that the SCIDPC and its membership remain viable. The SCIDPC and the OHSJP will also continue to diligently work together to ensure that impaired driving countermeasures remain a top priority for the State of South Carolina.

Input the date that the Statewide impaired driving plan was approved by the State’s task force.

Date impaired driving plan approved by task force: 6/15/2018

Task force member information

Enter a direct copy of the list in the statewide impaired driving plan that contains names, titles and organizations of all task force members, provided that the task force includes key stakeholders from the State highway safety agency, law enforcement and the criminal justice system (e.g., prosecution, adjudication, probation) and, as determined appropriate by the State, representatives from areas such as 24–7 sobriety programs, driver licensing, treatment and rehabilitation, ignition interlock programs, data and traffic records, public health and communication.

Select whether the State will submit updates to a Statewide impaired driving plan that was previously submitted under 23 C.F.R. 1300.23(f)(1). If the State is relying on a previously submitted plan, the State must provide updates to its Statewide impaired driving plan that meet the requirements of 23 C.F.R. 1300.23(e)(1) and updates to its assessment review and spending plan that meet the requirements of 23 C.F.R. 1300.23(f)(1).

Click link to view Highway Safety Guidelines No. 8

http://icsw.nhtsa.gov/nhtsa/whatsup/tea21/tea21programs/pages/ImpairedDriving.htm

Indicate either new or updated submission

Submit updates

List the page number(s) from your impaired driving strategic plan that is based on the most recent version of Highway Safety Program Guideline No. 8 - Impaired Driving, which at a minimum covers the following:

| Prevention: | 54 |
| Criminal justice system: | 70 |
| Communication program: | 107 |
| Alcohol and other drug misuse, including screening, treatment, assessment and rehabilitation: | 111 |
| Program evaluation and data: | 117 |

Upload a copy of the Statewide impaired driving plan. The strategic plan must contain the following information, in accordance with part 3 of appendix B: (i) Section that describes the authority and basis for the operation of the Statewide impaired driving task force, including the process used to develop and approve the plan and date of approval; (ii) List that contains names, titles and organizations of all task force members, provided that the task force includes key stakeholders from the State highway safety agency, law enforcement and the criminal justice system (e.g., prosecution, adjudication, probation) and, as determined appropriate by the State, representatives from areas such as 24-7 sobriety programs, driver licensing, treatment and rehabilitation, ignition interlock programs, data and traffic records, public health and communication; (iii) Strategic plan based on the most recent version of Highway Safety Program Guideline No. 8—Impaired Driving, which, at a minimum, covers the following—(A) Prevention; (B) Criminal justice system; (C) Communication programs; (D) Alcohol and other drug misuse, including screening, treatment, assessment and rehabilitation; and (E) Program evaluation and data. The plan must also include the following: (i) Review that addresses in each plan area any related recommendations from the assessment of the State’s impaired driving program; (ii) Detailed project list for spending grant funds on impaired driving activities listed in 23 C.F.R. 1300.23(j)(4) must include high-visibility enforcement efforts, at the level of detail required under 23 C.F.R. 1300.11(d); and (iii) Description of how the spending supports the State’s impaired driving program and achievement of its performance targets, at the level of detail required under 23 C.F.R. 1300.11(d).

Assessment recommendations

Enter a direct copy of the section of the statewide impaired driving plan that contains a review that addresses in each plan area any related recommendations from the assessment of the State’s impaired driving program.

After each listed recommendation, printed in bold, a corresponding strategy for implementation is provided as part of the state’s Impaired Driving Countermeasures Plan.

Program Management and Strategic Planning

Recommendations:
Convene a Governor’s Alcohol and Drug Impaired Driving Task Force that includes both traditional and non-traditional members such as highway safety experts, law enforcement, judiciary, driver licensing services, treatment, alcohol beverage control, businesses, insurance companies, medical and health care representatives, advocacy groups, the media, and higher education, to review existing laws and regulations and make recommendations to the Governor and State Legislature.

The OHSJP will consider seeking an Executive Order from the Governor that will convene a Governor’s Alcohol and Drug Impaired Driving Task Force that will secure a vast array of experts and professionals to review existing laws and regulations and make recommendations to the Governor and State Legislature.

Conduct a survey for the members of the South Carolina Impaired Driving Prevention Council that have not regularly attended meetings during the past two years to seek their input on methods to increase participation in the meetings.

The OHSJP will conduct a survey for the members of the SCIDPC in order to gather input on methods to increase participation in the meetings.

Identify locations in South Carolina where South Carolina Impaired Driving Prevention Council meetings might be held, making attendance more convenient for members residing outside of the Columbia area.

The OHSJP will conduct a survey for the members of the SCIDPC in order to gather input on potential meeting locations in order to increase participation in the meetings.

Provide teleconferencing for South Carolina Impaired Driving Prevention Council members that are unable to participate in person at meetings.

The SCIDPC will provide teleconferencing for the members of the SCIDPC in order to increase participation in the meetings.

Meet the vacant South Carolina Impaired Driving Prevention Council positions.

The SCIDPC will submit letters to agency directors to replace and/or place members on the SCIDPC membership list in an effort to increase participation in the meetings.

Continue to evolve the problem identification process in the Office of Highway Safety and Justice Programs by taking advantage of new and emerging data sources in impaired driving.

The OHSJP will continue to evolve its Problem Identification process to include more input from local traffic safety stakeholders statewide and to utilize new and emerging sources of available impaired driving data.

Integrate medical data into the planning process to enhance the needs for better and more accurate impaired driving analyses.

The OHSJPs’ Statistical Analysis and Research Section will work to integrate medical data into the planning process to enhance the needs for better and more accurate impaired driving analyses.

Require convicted Driving Under the Influence offenders to pay fines and fees that support the Impaired Driving Countermeasures Program.

The OHSJP will continue to research through the SCIDPC the prospects of legislative change to allow convicted DUI offenders to pay the costs of supporting impaired driving countermeasures programs within the state. However, the prospects of securing this type of change continue to appear, at this time, to be minimal.

Evaluate impaired driving programs to determine if resources are being allocated in the most effective manner.

Evaluate the performance measures that are common to South Carolina’s HSP, SHSP and the state’s Highway Safety Improvement Plan (HSIP) regarding the number of Traffic Fatalities, the number of Severe Traffic Injuries and the Traffic Fatality VMT Rate. The Federal Highway Administration (FHWA) and the South Carolina Department of Transportation (SCDOT) are responsible for the development of the HSIP. The SCDPS, SCDOT, FHWA and other local, state and federal agencies and safety advocates collaborated on the creation of the Strategic Highway Safety Plan (SHSP). The state’s Highway Safety Plan, though developed by the OHSJP, reflects multiple partnerships among a variety of federal, state, and local agencies. The number of Traffic Fatalities, number of Severe Traffic Injuries, and Traffic Fatality VMT Rate performance measures are mutually identified in each plan (HSP, HSIP and SHSP) with evidence-based targets within emphasis areas that were developed through extensive data analysis. The state views the coordination of the HSP with the SHSP as an effort to build a unified State approach to highway safety and can be used to determine impaired driving program effectiveness.

Prevention

Recommendations:

Enact Alli’s Law or similar legislation to require responsible beverage server training as a condition of liquor licensure.

The OHSJP will work through the SCIDPC Enforcement Committee and Legislative Committee in order to continue to address the need for legislative action for (S. 115) Alli’s Law; Responsible Alcoholic Server Training Act, as it is currently pending legislation. This law would allow for future administrative and/or criminal penalties to ensue, as it mandates a training program to hold servers and establishments accountable.

Provide local Alcohol and Drug Commissions with timely and accurate impaired driving- related information to be integrated into school-based prevention programs.
The OHSJP will continue to provide timely and accurate impaired-driving data to local Alcohol and Drug Commissions as needed.

**Add impaired driving and other traffic safety learning objectives to the South Carolina Health and Safety Education Standards.**

The OHSJP staff is exploring the possibility of increasing partnerships with agencies, such as the SC Department of Education, local school districts, and colleges/universities to get information regarding DUI issues and countermeasures before student populations in the state. The OHSJP will work with the SCDOE through the SCIDPC to determine the possibility of adding impaired driving and other traffic safety learning objectives to the SC Health and Safety Education Standards.

**Provide Drug Impairment Training for Educational Professionals to school counselors, teachers, and administrators throughout South Carolina.**

The OHSJP will work with the SC Department of Education (SCDOE) to determine the efficacy of expanding the DITEP program into local school districts to increase the number of educational professionals (school counselors, teachers, and administrators) trained in this discipline.

**Establish statewide and local student organizations to address impaired driving.**

The OHSJP staff is exploring the possibility of increasing partnerships with agencies, such as the SC Department of Education, MADD SC, SC National Safety Council, local school districts, and colleges/universities to get information regarding DUI issues and countermeasures before student populations in the state.

**Coordinate one-shot or single session prevention strategies with evidence-based prevention programs in schools.**

The OHSJP staff is exploring the possibility of increasing partnerships with agencies, such as the SC Department of Education, local school districts, and colleges/universities to coordinate one-shot or single session prevention strategies with evidence-based prevention programs in schools regarding DUI issues and countermeasures.

**Establish a statewide college impaired driving and/or underage drinking prevention consortium to address the drinking culture on South Carolina college campuses.**

The OHSJP staff will explore the possibility of increasing partnerships with agencies, such as the SC Department of Education, MADD SC, local school districts, Higher Education Commission, and colleges/universities to get information regarding DUI issues and countermeasures before student populations in the state.

**Integrate impaired driving information into drug free workplace, employee assistance, and other programs for employees.**

The OHSJP staff will explore working with the SC National Safety Council to produce an electronic newsletter/flyer to be sent to employers, school districts, and other interested stakeholders statewide containing strategic traffic safety information, including impaired driving data, for distribution to employees and students alerting them to the DUI problems in the state and proposing appropriate countermeasures that could be implemented at school or in the workplace.

**Provide employers with impaired driving media materials for inclusion in company newsletters, posting in facilities and employee work areas, and use in employee safety training.**

The OHSJP staff will work with the SC National Safety Council to explore the possibility of producing an electronic newsletter/flyer to be sent to employers, school districts, and other interested stakeholders statewide containing strategic traffic safety information, including impaired driving data, for distribution to employees and students alerting them to the DUI problems in the state and proposing appropriate countermeasures that could be implemented at the workplace.

**Support and expand the resources of Alcohol and Drug Commissions, Alcohol Enforcement Teams, and Law Enforcement Networks.**

The OHSJP will continue to support the SCDAODAS AET project focusing on educational and enforcement strategies to reduce underage alcohol consumption and underage DUI. The OHSJP will continue to provide grant funding for the Law Enforcement Networks (LEN) to assist them in their ongoing enforcement efforts and in recruiting additional enforcement agencies to enlist in the system. The OHSJP will continue to provide training to LENs through LEN Coordinator meetings, regularly scheduled LEN meetings, and Traffic Safety Officer Certification courses.

**Provide timely and accurate impaired driving information and technical assistance to Alcohol and Drug Commissions and Alcohol Enforcement Teams.**

The OHSJP will continue its partnering efforts with other entities in the state which are concerned with impaired driving issues and will provide accurate and timely data/information regarding impaired driving issues, including local Alcohol and Drug Commissions and Alcohol Enforcement Teams as needed.

**Ensure that all designated driver programs stress “no use” of alcohol messages for the designated driver.**

The OHSJP will work toward ensuring that any designated-driver programs implemented through the OHSJP and partners, stress a “no use” of alcohol message for designated-driver programs.

**Ensure alternative transportation programs do not encourage or enable excessive drinking.**

The OHSJP will attempt to address the above issue through the SCIDPC and partnering agencies.

**Ensure that both designated driver and safe ride programs prohibit consumption of alcohol by underage individuals or unintentionally promote over-consumption.**

The OHSJP will work through the SCIDPC and partnering agencies to address the issues contained in this recommendation.
Enact statewide social host liability laws that include liability for serving to adults who are visibly impaired.

The OHSJP will present a list of legislative issues for the FFY 2019 year during the meetings of the SC Impaired Driving Prevention Council (SCIDPC).

Enact comprehensive dram shop liability laws.

The OHSJP will present a list of legislative issues for the FFY 2019 year during the meetings of the SC Impaired Driving Prevention Council (SCIDPC).

Conduct an assessment of the availability and product placement of alcoholic beverages that resemble non-alcoholic beverages.

The SCIDPC will work closely with the SC Law Enforcement Division (SLED) to determine the opportunity for an assessment of the availability and product placement of alcoholic beverages that resemble non-alcoholic beverages.

Criminal Justice System

Recommendations:

Repeal the statutory videotaping requirements of the entire traffic stop, including the field sobriety testing and advice of rights.

The OHSJP will present a list of legislative issues for the FFY 2019 year during the meetings of the SC Impaired Driving Prevention Council (SCIDPC).

Convene a Governor’s DUI and Drugs Task Force that includes both traditional and non-traditional members such as highway safety experts, law enforcement, judiciary, driver licensing services, treatment, alcohol beverage control, businesses, insurance companies, medical and health care representatives, advocacy groups, the media, and higher education, to review existing laws and regulations and make recommendations to the Governor and State Legislature.

The OHSJP will consider seeking an Executive Order from the Governor that will convene a Governor’s Alcohol and Drug Impaired Driving Task Force that will secure a vast array of experts and professionals to review existing laws and regulations and make recommendations to the Governor and State Legislature.

Emphasize year-round high visibility impaired driving enforcement by all law enforcement agencies in South Carolina.

The OHSJP will continue its partnering efforts with other law enforcement agencies in South Carolina to emphasize year-round high visibility impaired driving enforcement, relying heavily on the SC Highway Patrol and the Law Enforcement Networks (LEN) to assist them in their ongoing enforcement efforts.

Engage more Sheriffs Offices in traffic enforcement activities.

The OHSJP will continue its partnering efforts with Sheriff’s Offices in traffic enforcement activities, largely through the assistance of the LEN.

Increase the number of law enforcement agencies that participate in the Law Enforcement DUI Challenge Sober or Slammer!

The OHSJP will continue to provide grant funding for the Law Enforcement Networks (LEN) to assist them in their ongoing enforcement efforts and in recruiting additional enforcement agencies to enlist in the Law Enforcement DUI Challenge Sober or Slammer!

Evaluate the effectiveness of funding special DUI enforcement teams as opposed to providing funding for more law enforcement agencies to garner more participation in DUI enforcement activities.

The OHSJP will work with the SCDOT to evaluate the effectiveness of funding the special DUI enforcement teams known as the Target Zero Teams, a project funded from 2015 through 2018 by the SCDOT, as opposed to providing funding for more law enforcement agencies to garner more participation in DUI enforcement activities.

Expand the Drug Recognition Expert program in South Carolina.

The SC Criminal Justice Academy (SCCJA) is the training facility for all law enforcement in the state. The Drug Recognition Expert (DRE) program is continually expanding as the focus on impaired driving remains a State concern.

Distribute contact lists and explore the feasibility of on-call procedures to make Drug Recognition Experts more accessible.

The OHSJP will work with the SCCJA regarding a distribution list and the SCCJA currently utilizes a DRE point of contact for regions in order to facilitate the accessibility and availability of DREs.

Give training priority to those agencies that are willing to share their Drug Recognition Expert resources with neighboring jurisdictions.

The OHSJP will work with the SCCJA in an attempt to address the above issue, although the SCCJA currently utilizes a “most qualified” criterion in order to effectively maintain the program in the State.

Increase the number of Solicitors to handle DUI cases.

The State of South Carolina resumed funding effective July 1, 2013 for a specialized DUI prosecutor in each of the 16 judicial circuits in the state. In SFY 2018, the state will continue this funding. Additional funding will be provided by the OHSJP during FFY 2019 to continue a DUI prosecutor to prosecute DUI-related traffic cases made by the Berkeley County Sheriff’s deputies in in Berkeley County in an effort to increase DUI convictions within this county and reduce the number of DUI...
The OHSJP will also continue to fund in FFY 2019 a DUI Prosecutor in the Sixth Circuit Solicitor’s Office, which includes Chester, Fairfield, and Lancaster counties, and provide funding for a DUI Prosecutor in the City of Beaufort, and an additional DUI Prosecutor in Florence County.

Repeal the statutory videotaping requirements of the entire traffic stop, including the field sobriety testing and advice of rights.

The OHSJP will present a list of legislative issues for the FFY 2019 year during the meetings of the SC Impaired Driving Prevention Council (SCIDPC).

Provide paralegal assistants to the police who prosecute in the summary courts.

The OHSJP will work with the SC Commission on Prosecution Coordination’s Traffic Safety Resource Prosecutor (TSRP) to determine what additional assistance may be provided to law enforcement officers in the prosecution of DUI cases when required. The TSRP is available to provide certain assistance to law enforcement officers in the prosecution of DUI cases when requested.

Work more closely with the South Carolina Office of Court Administration to improve access to court data.

The OHSJP will work with the TRCC and the SC Office of Court Administration to improve access to court data.

Establish a Judicial Outreach Liaison position with a focus on the summary courts.

The OHSJP will work through the SCIDPC and partnering agencies to address the issues contained in this recommendation.

Expand the use of the Ignition Interlock Device program to include all first time offenders upon conviction regardless of blood alcohol concentration.

The OHSJP will present a list of legislative issues for the FFY 2019 year during the meetings of the SC Impaired Driving Prevention Council (SCIDPC).

Conduct an evaluation study of the Ignition Interlock Device program to quantify recidivism based on enrollment, length of the program, and as compared to other sanctions and treatment options.

The OHSJP will work with the SC Department of Probation, Parole, and Pardon Services (SCDPPPS) to attain access to any and all evaluations conducted to quantify recidivism based on enrollment, length of the program, and as compared to other sanctions and treatment options.

Enact Alli’s Law or similar legislation to require responsible beverage server training as a condition of liquor licensure.

The OHSJP will work through the SCIDPC Enforcement Committee and Legislative Committee in order to continue to address the need for legislative action for (S. 115) Alli’s Law; Responsible Alcoholic Server Training Act, as it is currently pending legislation. This law would allow for future administrative and/or criminal penalties to ensue, as it mandates a training program to hold servers and establishments accountable.

Evaluate inexperienced/young driver statistics to identify the degree to which increasing the minimum age for licensure (at each graduated stage) would reduce traffic crashes, injuries, and fatalities.

The OHSJP will work with the SCIDPC and the SCDMV to research the prospects of evaluating inexperienced/young driver statistics to identify the degree to which increasing the minimum age for licensure (at each graduated stage) would reduce traffic crashes, injuries, and fatalities.

Communication Program

Recommendations:

Increase impaired driving message exposure on earned media by partnership with the contracted media consultant and buyer.

The OHSJP will continue to work with the contractor regarding the highway safety messaging to paint the picture for the general public of the extreme danger caused by the impaired driver.

Evaluate the Office of Highway Safety and Justice Programs’ media plan to ensure its messages are reaching target audiences.

The OHSJP will continue to evaluate and ensure its highway safety messages reach target audiences and supports law enforcement and prevention partners in their ongoing efforts. The OHSJP has adopted “Target Zero” as its over-arching theme for all campaign activities. The state is committed to the elimination of traffic fatalities over time in the state.

Plan and coordinate simultaneous press events during Sober or Slammer mobilizations and utilize the services of the Governor and other high ranking state officials to deliver the message that impaired driving will be met with strong law enforcement.

The state will continue the media campaign focusing on Sober or Slammer! (SOS!) for FY 2019, including radio, outdoor advertising, paid social media, and television advertising during strategic points throughout the year, including the two traditional DUI enforcement crackdowns during Christmas/New Year’s 2018-2019 and Labor Day 2019.

Alcohol and Other Drug Misuse: Screening, Assessment, Treatment and Rehabilitation
Recommendations:

Require completion of the Alcohol and Drug Safety Action Program as a condition of license reinstatement for DUI offenders whose license is suspended for an alcohol driving offense.

The OHSJP will present a list of legislative issues for the FFY 2019 year during the meetings of the SC Impaired Driving Prevention Council (SCIDPC).

Expand the South Carolina Screening, Brief Intervention Referral and Treatment project in all hospital emergency departments in South Carolina.

The OHSJP will continue to work with SCDAOADAS to research the possibility of having screening and brief intervention referral and treatment available in all hospital emergency departments in South Carolina.

Implement Screening, Brief Intervention Referral and Treatment in all healthcare settings such as family practices, as well as on college and high school campuses and jails throughout South Carolina.

The OHSJP will continue to work with SCDAOADAS to research the possibility of having screening and brief intervention referral and treatment available in settings as recommended. It should be noted that the SCDAOADAS has been awarded a cooperative agreement from SAMHSA to implement SBIRT in health care sites. The funding period is from August 1, 2013 – July 31, 2018. Formal SBIRT protocols have been implemented in sixteen health care sites to date: Barnwell County (Southern Palmetto Hospital ED, Southern Palmetto Hospital Barnwell clinic, and Healthwise Family Medicine); Georgetown County (St. James Santee Family Health Center: Georgetown, Sampit, and Choppee sites); Greenville County (New Horizon Family Health Services, and Greenville Health System Internal Medicine); Horry County (Little River Medical Center: Little River, Loris, Health Access, South Strand, Carolina Forest, and Myrtle Beach sites, along with Grand Strand Regional Medical Center ED); and York County (North Central Family Medical Center). Though each site receives varying amounts of funding, all sites receive ongoing training and technical assistance from the SCDAOADAS SC SBIRT state team. Plans to expand to additional healthcare sites are underway.

Through RPTIF grants from DHHS, Clarendon County has implemented SBIRT in its ED and outpatient clinic, and Spartanburg County has implemented SBIRT in its county jail.

The state’s goal is to implement SBIRT in all health care facilities in South Carolina. However, funds and resources limit the state’s ability at this time to implement the SBIRT program in all health care facilities in the state.

Enact legislation designating impaired driving as a mandatory reportable condition for all healthcare providers.

The OHSJP will present a list of legislative issues for the FFY 2019 year during the meetings of the SC Impaired Driving Prevention Council (SCIDPC).

Repeal the South Carolina alcohol exclusion statutes.

On May 4, 2017, the House voted and passed S. 9; AN ACT TO AMEND THE CODE OF LAWS OF SOUTH CAROLINA, 1976, BY ADDING SECTION 38-71-380 SO AS TO PROVIDE THAT THE OPTIONAL INTOXICANTS AND NARCOTICS EXCLUSION PROVISION CONTAINED IN CERTAIN INSURANCE POLICIES THAT REQUIRE THE REPLICATION OF EXACT LANGUAGE AS PROVIDED IN SECTION 38-71-370 DOES NOT APPLY TO A MEDICAL EXPENSE POLICY, AND TO DEFINE MEDICAL EXPENSE POLICY. - ratified title.

Require completion of the Alcohol and Drug Safety Action Program as a condition of license reinstatement for DUI offenders whose license is suspended for an alcohol driving offense.

The OHSJP will present a list of legislative issues for the FFY 2019 year during the meetings of the SC Impaired Driving Prevention Council (SCIDPC).

Implement additional DUI Courts and conduct an evaluation to determine effectiveness and identify replication issues.

The OHSJP provided grant funding during FFY 2014 for the development and implementation of a Pilot DUI Court in the Twelfth Judicial Circuit, composed of Florence and Marion Counties, and in the Fifth Judicial Circuit, which consists of Kershaw and Richland Counties. Both judicial circuits successfully completed NHTSA's required DWI Court training and implemented the DUI Court program. The OHSJP provided grant funding from FFY 2015 through FFY 2017 for the continuation of the DUI Courts. The DUI Courts are designed to prosecute, adjudicate, and monitor DUI cases and to reduce DUI recidivism.

Program Evaluation and Data

Recommendations:

Conduct an evaluation of the Ignition Interlock Device and Alive at 25 programs to quantify their effectiveness and suggest any revisions; such an analysis may include crash/arrest recidivism or behavioral measures.

The OHSJP will refer this recommendation to the SCIDPC and the agencies directly involved with the ignition interlock program in the state to research the practicality of conducting the above recommendation.

Continue to focus problem identification and program evaluation analyses on injuries of all levels (specifically serious injuries) in addition to fatalities.

The OHSJP will continue to evolve its Problem Identification process to include more input from local traffic safety stakeholders statewide and to utilize new and emerging sources of available impaired driving data (to include all levels of injuries).

Pursue medical data access (pre-hospital, trauma registry, emergency department, and inpatient) and collaboration to enhance traffic safety efforts; this partnership may be fostered through the Traffic Records Coordinating Committee.
The OHSJPs’ Statistical Analysis and Research Section, through the Traffic Records Coordinating Committee, will pursue medical data access and collaboration to enhance traffic safety efforts.

Evaluate continuously the Fatality Analysis Reporting System data to ensure the most accurate estimate of alcohol-related fatalities is resulting from the imputation model.

The OHSJPs’ Statistical Analysis and Research Section will continue to evaluate the Fatality Analysis Reporting System data to ensure the most accurate estimate of alcohol-related fatalities is resulting from the imputation model.

Support the implementation of the South Carolina Uniform Traffic Ticket Information Exchange System to serve as a comprehensive citation tracking system.

The South Carolina Uniform Traffic Ticket Information Exchange System (SCUTTIES) was deployed on January 1, 2018. The system was deployed to serve as a comprehensive citation tracking system.

Incorporate information about injuries of all levels (specifically serious injuries) in addition to fatalities into products shared with partners and the public.

The OHSJP will continue incorporating information about injuries of all levels (specifically serious injuries) in addition to fatalities into products shared with partners and the pub

Planned activities

Enter a direct copy of the section of the statewide impaired driving plan that includes the planned activities for spending grant funds on impaired driving activities authorized under 23 C.F.R. 1300.23(j)(4). Planned activities described in this section must include high visibility enforcement efforts and must meet the level of detail required under 23 C.F.R. 1300.11(d).

Of the four impaired driving countermeasures strategies identified, the State of South Carolina will continue to effectively implement Deterrence of high quality in the areas of Enforcement, with the SC Highway Patrol (SCHP) and law enforcement agencies across the state utilizing high-visibility saturation patrols (pp.1-21 to 1-27), as well as Prosecution and Adjudication, with continuation of the Court Monitoring Program (pp.1-29 to 1-34).

A high-visibility DUI enforcement and education initiative known as the Sober or Slammer! campaign (corresponding to the national Drive Sober or Get Pulled Over campaign) on a statewide level utilizing strategies that have proven to yield results. The campaign runs from December 1 of the federal fiscal year through Labor Day. According to the Countermeasures That Work guide (Chapter 1, section 2.2, p. 1-24), publicized saturation patrol programs and sobriety checkpoints are effective in reducing alcohol-related fatal crashes and deterring drunk driving. The state encourages and requires campaign participants to utilize high visibility enforcement and safety checkpoint strategies in their DUI enforcement efforts statewide. The State also conducts an occupant protection enforcement mobilization in the time period leading up to and after the Memorial Day holiday in May each year. The statewide campaign, known as Buckle up, South Carolina. It’s the law and it’s enforced., mirrors the national Click it or Ticket campaign. The campaign focuses on occupant protection enforcement generally and on nighttime safety belt enforcement at the state and local level, which results in, not only increased citations for safety belt violations, but increased opportunity for DUI arrests as well. All major mobilizations include outreach components that focus on the diverse population of our state.

Communication and Outreach is a countermeasure strategy used to reduce impaired driving, and outreach is incorporated into each high-visibility enforcement mobilization. For example, the Sober or Slammer! campaign, modeled after and conducted with the national Drive Sober or Get Pulled Over campaign, combines enforcement, education, media, and diversity outreach components to attempt to reduce impaired driving crashes, injuries, and fatalities in the state. Participation of state and local law enforcement agencies throughout every judicial circuit in the state is encouraged. With the decline in the number of alcohol-impaired traffic fatalities in the state, communication and outreach strategies have proven to be highly effective for South Carolina (CTW, 2015, pp. 1-46, and 1-49 to 1-50).

Additional detail on the previously identified Impaired Driving Countermeasure Strategies the State plans to implement in FFY 2019 and the corresponding planned activities for spending grant funds on impaired driving activities is provided below.

A. Enforcement

The State will continue to implement a statewide Law Enforcement DUI Challenge (Sober or Slammer! comparable to the national Drive Sober or Get Pulled Over campaign). The OHSJP will conduct a high-visibility enforcement and education campaign in an effort to reduce DUI traffic crashes, injuries, and fatalities in FFY 2019. The DUI enforcement campaign will focus predominantly on the SC Highway Patrol (SCHP) for the enforcement component of the campaign, while still making every effort to recruit and partner with local law enforcement agencies statewide. The SCHP is the premier traffic enforcement agency in the state and covers the entire geographic and population areas of South Carolina. The SCHP, during FFY 2019, will conduct special DUI enforcement emphases once a month on weekends from December 2018 to September 2019. The weekend enforcement efforts will be supported by radio and possibly television advertising announcing the enforcement beginning on Wednesday of each week preceding the scheduled enforcement weekends. The SCHP will recruit and utilize the assistance of local law enforcement agencies during the weekend and crackdown efforts.

Educational efforts will again utilize media (television, radio, and alternative advertising) to support campaign efforts. Educational efforts will focus on the twenty priority counties, (Greenville, Horry, Richland, Lexington, Spartanburg, Anderson, Berkeley, Charleston, York, Aiken, Florence, Laurens, Orangeburg, Lancaster, Beaufort, Dorchester, Pickens, Darlington, Sumter, and Kershaw) which represent which represent approximately 83.2% of the state’s population (based on the Census population estimate for July 1, 2016) and 78.2% of the state’s alcohol-impaired driving fatalities and severe injuries over the five-year period 2012 to 2016 and are designated within the state’s Highway Safety Plan and the Impaired Driving Countermeasures Plan.
A high-visibility statewide enforcement and education campaign Buckle up, SC. It's the law and it's enforced, is conducted each year around the Memorial Day holiday modeled after the national Click it or Ticket mobilization to emphasize the importance of and to increase the use of occupant restraints. The campaign includes paid and earned media, increased enforcement activity by state and local law enforcement agencies, and diversity outreach elements in order to increase safety belt and child restraint use among the state’s minority populations. In FFY 2019, campaign efforts will continue to focus on nighttime safety belt enforcement in an attempt to reduce un restrained traffic fatalities and injuries during nighttime hours. The emphasis upon nighttime safety belt enforcement has enhanced and will continue to enhance impaired driving enforcement as well. Statistics have demonstrated in the state that safety belt usage rates go down after dark, and it is obvious that many high-risk drivers who do not use safety belts also drink and drive. Thus, this enforcement strategy should continue to pay dividends in the fight against DUI, as well. The SCHP has committed to ongoing nighttime safety belt enforcement activities, beyond the occupant protection enforcement mobilization time frame. A variety of local law enforcement agencies are incorporating this strategy into ongoing enforcement efforts.

For FFY 2019, the SC Public Safety Coordinating Council has approved thirty-six (36) traffic enforcement projects, the majority of which will be implemented, based on the availability of federal funding, in priority counties in the state.

Of the 36 enforcement projects, fourteen (14) are DUI enforcement projects, which will fund a total of sixteen (16) DUI enforcement traffic officers in the counties of Darlington (2 projects), Charleston (1 project), Berkeley (2 projects), Lexington (2 projects), Spartanburg (1 project), Dorchester (1 project), Florence (1 project), Lancaster (1 project), Beaufort (2 projects), and Aiken (1 project). Of the 14 projects, three will be implemented in county sheriffs’ offices. The projects referenced above include one third-year project, 12 second-year projects, and one first-year project. The projects will focus exclusively on DUI enforcement and the enforcement of traffic behaviors that are associated with DUI violators; educating the public about the dangers of drinking and driving; media contacts regarding enforcement activity and results; and meeting with local judges to provide information about the projects. Project officers will be required to work schedules that are evidence-based, meaning the hours (between 3 PM and 6 AM) which FARS data demonstrates to be those during which the most DUI-related traffic fatalities occur in the state (1,344, or 88.2%, of the 1,524 DUI-related fatalities during the years of 2012-2016). Project officers will also work roadways that have the highest number of DUI-related crashes within their respective jurisdictions.

During the FFY 2019 grant cycle, each DUI enforcement grant will participate in at least 12 public safety checkpoints; have an appropriate, corresponding increase in the number of DUI arrests; conduct a minimum of 6 educational presentations on the dangers of DUI; and issue at least 12 press releases to the local media and/or social media detailing the activities of the grant projects. The 14 DUI enforcement officers funded by the grant are required to be Standardized Field Sobriety Testing (SFST) certified.

Additionally, of the 36 approved enforcement projects, twenty-two (22) are Police Traffic Services projects, which will fund a total of thirty-three (33) traffic officers in municipalities located in the priority counties of Richland, Charleston, Lexington, Aiken, York, Greenville, Georgetown, Dorchester, Berkeley, Anderson, Lancaster, and Beaufort, as well as enforcement projects in seven county sheriffs’ offices (Charleston, Dorchester, Georgetown, Spartanburg, Florence, Kershaw, and Oconee counties). The projects referenced above include four third-year projects, nine second-year projects, and nine first-year efforts. These projects will also encompass DUI enforcement efforts as each project requires the grant-funded officers (Section 402-funded) to engage in aggressive DUI enforcement activity.

### B. Communication and Outreach Enforcement

In FFY 2019, the Public Information, Outreach and Training (PIOT) section of the Office of Highway Safety and Justice Programs (OHSJP) will coordinate with the SCDPS contractor to develop and implement media components of the OHSJP’s Sober or Slammer! campaign and a variety of other major campaigns and emphases. The contractor will assist with efforts such as media buying, creative production, and evaluation of campaigns. Additionally, diversity outreach components will be incorporated within each campaign. The OHSJP will continue efforts to reach out to under-served audiences and hard-to-reach populations in the upcoming year.

The South Carolina Department of Public Safety’s OHSJP will utilize Section 405d Impaired Driving Countermeasures funds in FFY 2019 for paid media efforts for DUI countermeasures. The state continues to use the Strategic Evaluation States (SES) model to implement a sustained DUI enforcement effort (Sober or Slammer! / Drive Sober or Get Pulled Over), which includes monthly specialized DUI enforcement activities (checkpoints and saturation patrols) by participating state and local law enforcement agencies, as well as two DUI law enforcement crackdowns occurring during the Christmas/New Year’s holidays and during the days leading up to and including the Labor Day holiday. Sober or Slammer! is a high-visibility enforcement crackdown on impaired driving combining paid/earned media with increased DUI enforcement activity in an effort to attack the problem of impaired driving in the state.

During FFY 2019, paid and earned media activities will be utilized to promote campaign messages, enforcement activities, and to increase awareness by the general public of the dangers involved in impaired driving. These activities will encompass radio, television, and paid social media advertising, as well as outdoor and other alternative advertising. The agency contractor will be used by the OHSJP to secure radio and television placement during the two major mobilization crackdowns and radio airtime for strategic points in time during high risk for impaired driving violations. Those times will coincide with monthly enforcement weekends designated by the South Carolina Highway Patrol, which will span from December 2018 through September 2019. The contractor – with the possible use of a sub-contractor — will also be responsible for the paid social media plan during the same designated time periods. Local law enforcement agencies will be highly encouraged to participate in the designated special enforcement weekends. Specific media buy plans for each component of the process will be developed by the agency contractor concentrating on major media markets which will reach the campaign’s focus counties and other counties throughout the state. The media buy plans will be approved by the OHSJP prior to implementation of the effort. NHTSA promotes the importance of combining high-visibility enforcement with high-visibility public awareness as the best way to approach key problem areas and produce behavioral change. Therefore, the OHSJP will continue to offer a media mix for enforcement-based and non-enforcement-based campaigns to meet stated goals. The OHSJP will employ key strategies to promote its mission and core message of public safety.

### C. Prosecution

In South Carolina, for the majority of the DUI cases, the arresting officer is responsible for the prosecution of his/her own DUI case(s). While some of these officers reportedly are effective advocates, they are often facing much more skilled defense attorneys and are faced with legal arguments that they are unprepared to answer. DUI litigation can also be very complex, resulting in dismissals and “not guilty” findings in cases in which skilled prosecutors are unavailable. Some members of law enforcement are also not comfortable with stepping into the role of prosecuting cases. This practice could result in a hesitancy to make arrests on the part of law enforcement. This practice of law enforcement serving as the prosecution in DUI cases is a challenging problem which is likely a hindrance to reducing impaired driving. To help alleviate some of these issues, efforts are being made by the South Carolina Commission on Prosecution Coordination (SCCPC) to assist prosecutors with less experience and arresting officers through the use of the Traffic Safety Resource Prosecutor.

Funding has been and will continue to be made available from the South Carolina Office of Highway Safety and Justice Programs for a Traffic Safety Resource Prosecutor (TSRP) who operates through the South Carolina Commission on Prosecution Coordination (SCCPC). The TSRP is a vital resource for DUI prosecution and education. The TSRP provides seminars, newsletters, and technical assistance to solicitors, law enforcement, and the judiciary, as well as local prosecutors. The TSRP is a strong link in the effort to prosecute impaired drivers at all levels. The TSRP program in the state reduces the use of diversion programs through its educational efforts.

Another important component in the prosecution of impaired drivers is the placement of a DUI prosecutor in each circuit. These assistant solicitors are specially trained to handle and effectively prosecute driving under the influence cases. These positions are funded by the state, with one in each judicial circuit at the level of $73,690 per circuit. While the OHSJP does not fund these assistant solicitors, it has provided funding for a dedicated DUI Prosecutor to prosecute DUI-related cases made by the South Carolina Highway Patrol (SCHP) in Berkeley County since FFY 2015. In FFY 2019, the OHSJP will fund a DUI Prosecutor in the Sixth Circuit Solicitor’s Office, which includes Chester, Fairfield, and Lancaster counties. The DUI Prosecutor will dedicate 100% of his/her time to the prosecution of DUI cases. Special DUI Prosecutors will also be funded in the City of Beaufort Police Department, and the Berkeley and Florence County Sheriff’s Offices. These prosecutorial projects will decrease the amount of time a Law Enforcement Officer will spend off of the road preparing DUI cases for court and will hopefully assist in reversing a current trend of DUI case dismissals.

The planned prosecution activities for FFY 2019 will provide assistance to a variety of professionals from law enforcement to the judiciary. These projects will provide the necessary tools for the detection, apprehension, and successful prosecution of impaired drivers. The training programs will provide knowledge and training on the DUI law and proper roadside procedures for prosecutors, judges, and law enforcement officers that will assist in making quality DUI cases that will result in an increased number of DUI convictions statewide. The increased number of stakeholders educated in appropriate impaired driving countermeasures can result in a larger number of impaired drivers taken off the roadways, higher conviction rates for impaired drivers, and a decrease in the number of impaired driving crashes, injuries, and fatalities.

D. Adjudication

Mother’s Against Drunk Driving (MADD) SC’s Court Monitoring Program provides data on how many cases are dismissed or pled down to lesser offenses, how many result in convictions, what sanctions are imposed, and how these results compare across different judges and different courts. MADD SC will continue its current monitoring program utilizing volunteers to record data on DUI court cases to gather relevant statistics, so that areas of improvement within the court system and laws can be identified. During FFY 2019, the OHSJP will utilize grant funding for the continuation of MADD’s Coastal Court Monitoring program, which will be entering its second year of operation. This program serves the priority counties of Horry, Berkeley and Charleston. The OHSJP will also utilize grant funding for MADD’s new court monitoring effort in the priority counties of Greenville, Richland, Lexington and Spartanburg.

The planned impaired driving prevention activities (High-visibility enforcement efforts, adjudication and prosecution, and communication and outreach) will be supported by approving more than $6 million in grant funding to state and local agencies in FFY 2019. The commitment of funding levels to attack the problem of impaired driving in the state has been consistent over the last eight years. The state will utilize Section 402 funding, Section 405(d) impaired driving funding, and Section 405(b) funding in FFY 2019 to fund a variety of projects to combat DUI, including DUI enforcement teams, police traffic services projects, prosecution and adjudication efforts, and major campaign initiatives, such as Sober or Slammer!, the state’s equivalent to the national Drive sober or get pulled over.

Submit the planned activities for spending grant funds on impaired driving activities authorized under 23 C.F.R. 1300.23(j)(4). Planned activities described in this section must include high visibility enforcement efforts and must meet the level of detail required under 23 C.F.R. 1300.11(d).

*Reminder: When associating a planned activity to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.

**Planned activity support**

Enter a direct copy of the section of the statewide impaired driving plan that contains a description of how spending supports the State’s impaired driving program and achievement of its performance targets.

Each countermeasure strategy and project South Carolina plans to implement to reach the performance targets will be accomplished utilizing Section 402 and Section 405 funding streams during the FFY 2019 grant year. The systematic data collection and analysis used in the project selection process supports the successful implementation of an evidence-based traffic safety enforcement program in this state. The OHSJP’s annual Highway Safety Plan (HSP) which serves as a programmatic roadmap for educational and highway safety enforcement initiatives implemented throughout the fiscal year with Section 402 and 405 funds received from the National Highway Traffic Safety Administration (NHTSA). The HSP outlines the strategic approach South Carolina takes to address traffic-related crashes and fatalities during the FFY 2019 year through data-driven, evidence-based performance measures and practices.

11 405(f) Motorcyclist Safety Grant

Motorcycle safety information

To qualify for a Motorcyclist Safety Grant in a fiscal year, a State shall submit as part of its HSP documentation demonstrating compliance with at least two of the following criteria. Select application criteria from the list below to display the associated requirements.

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Requirement</th>

Motorcycle rider training course

Enter the name and organization of the head of the designated State authority over motorcyclist safety issues.

State authority name/title: Rosline Sumpter/Curriculum and Research Coordinator

Select the introductory rider curricula that has been approved by the designated State authority and adopted by the State.

Approved curricula: Motorcycle Safety Foundation Basic Rider Course

CERTIFICATION: The head of the designated State authority over motorcyclist safety issues has approved and the State has adopted the selected introductory rider curricula.

Enter a list of the counties or political subdivisions in the State where motorcycle rider training courses will be conducted during the fiscal year of the grant and the number of registered motorcycles in each such county or political subdivision according to official State motor vehicle records, provided the State must offer at least one motorcycle rider training course in counties or political subdivisions that collectively account for a majority of the State’s registered motorcycles.

<table>

Traffic Records System Performance Measures

Traffic Records Systems (TRS) are typically made up of components that serve primary functions other than highway traffic safety improvement. Because of this, it may not be immediately obvious to the data custodians responsible for day-to-day management of the traffic records components that their data are part of the Traffic Records System. Data collected for one purpose (e.g., asset management, driver licensing, medical billing, etc.) may or may not be suitable for use in highway safety decision making. Treating such a diverse system as a unified whole requires that collectors, managers, and users come together to discuss needs and how best to meet the needs of decision-makers at a reasonable cost. To assist in this dialog, states develop measures of how well the traffic records data meet the needs of their users. The performance measures developed for this purpose are intended to measure the quality of the data in ways that are operationally meaningful. These measures could be used by front-line managers to gauge day-to-day operations and convey meaningful information to users. NHTSA has identified six performance attributes in the *Model Performance Measures for State Traffic Records Systems*.

1. **Timeliness:** Timeliness reflects the span of time between the occurrence of an event and entry of information into the appropriate database. Timeliness can also measure the time from when the custodial agency receives the data to the point when the data is entered into the database.
   
   - **Commercial Driver’s license.** SCDMV has ten days to transmit the traffic violation conviction of any commercial driver’s license to that driver’s home state DMV. The standard is 90% of the time. The SCDMV has moved from 4% compliance to 82% compliance. The 90% compliance must be met by 2019.

2. **Accuracy:** Accuracy reflects the degree to which the data is error-free, satisfies internal consistency checks, and does not exist in duplicate within a single database. Error means that the recorded value for some data element of interest is incorrect. Error does not mean the information is missing from the record. Erroneous information in a database cannot always be detected. In some cases, it is possible to determine that the values entered for a variable or data element are not legitimate codes. In other cases, errors can be detected by matching data with external sources of information. It may also be possible to determine that duplicate records have been entered for the same event.
   
   - **SCUTTIES.** The citation data is verified against the DMV file to check for accuracy. If the citation does not pass validation, it is returned to the agency with an explanation of the error. If the record already exists in the database, the new record will be rejected.
3. **Completeness**: Completeness reflects both the number of records that are missing from the database (e.g., events of interest that occurred but were not entered into the database) and the number of missing (blank) data elements in the records that are in a database.

   - **Validation Rules**. Electronic reports which are created in Report Beam must meet certain validation rules which check for required data. If any of the required data is missing, the report will not be accepted into the system. Collision reports submitted on paper are checked by DMV personnel and if there is any missing required data, the reports are returned to the originating agency for correction.

4. **Uniformity**: Uniformity reflects the consistency among the files or records in a database and may be measured against some independent standard, preferably a national standard. Within a state, all jurisdictions should collect and report the same data using the same definitions and procedures.

   - **TR-310 Collision Report**. All agencies in South Carolina use the same form for reporting collisions. Most of these reports are generated electronically (90%). A TR-310 manual instructs the officers how the information should be entered.

5. **Integration**: Integration reflects the ability of records in a database to be linked to a set of records in another of the core databases, or components thereof, using common or unique identifiers. Integration differs in one important respect from the first four attributes of data quality. By definition, integration is a performance attribute that always involves two or more traffic records subsystems.

   - **SCCATTS/SCUTTIES/CMS**. The South Carolina Collision and Ticket Tracking System (SCCATTS) collects citation data electronically. That data is then transmitted to the Department of Motor Vehicles South Carolina Uniform Traffic Ticket Information Exchange System (SCUTTIES). The data is validated and then made available on demand to the Court’s System’s Case Management System (CMS). The courts then transmit the citation disposition data to SCUTTIES and then SCUTTIES transmits that data to SCCATTS to be added to the citation.

6. **Accessibility**: Reflects the ability of legitimate users to successfully obtain desired data. For every database and file in a traffic records system, there is a set of legitimate users who are entitled to request and receive data. The accessibility of the database or sub-file is determined by obtaining the users’ perceptions of how well the system responds to their requests.

   - **SCCATTS and SCUTTIES databases**. Users of the Report Beam software program within SCCATTS can access their entire agency’s data. This data can be imported into their Records Management System (RMS) to be used as they see fit. Validated users can access the SCUTTIES
database and run a variety of reports for the citation data in the database. This data can then be exported to an Excel spreadsheet for further analysis.

The first five of these six types of performance measures are measured by the usage and examination of the data within each component’s dataset. The accessibility performance attribute is measured in terms of customer satisfaction related to the retrieval of data. These performance attributes are to be specific and well-defined, performance-based, and practical.
June 21, 2018

Ms. Carmen Hayes, Regional Administrator  
National Highway Traffic Safety Administration  
Atlanta Federal Center  
61 Forsyth Street, SW, 17T30  
Atlanta, Georgia 30303

RE: Maintenance of Effort

Dear Ms. Hayes:

This letter is provided to affirm that the South Carolina Department of Public Safety’s (SCDPS) Office of Highway Safety and Justice Programs (OHSJP) remains the lead entity for meeting federal maintenance of effort (MOE) requirements. This determination was made based on the fact that OHSJP administers the Section 402 and Section 405 grant funds for the state of South Carolina.

Per 23 CFR 1300, OHSJP, as the lead entity for MOE requirements, will maintain aggregate expenditures at or above the baseline years of Federal Fiscal Year 2014 and Federal Fiscal Year 2015 for the following programs: Occupant Protection, Traffic Safety Information Systems, and Impaired Driving Countermeasures.

Please contact me or Phil Riley if you have any questions regarding the above matter. Thank you for your support, and we look forward to our continued partnership with the National Highway Traffic Safety Administration to eliminate traffic-related fatalities.

Sincerely,

Leroy Smith  
Director

Certifications and Assurances for Highway Safety Grants
(23 U.S.C. Chapter 4 and Sec. 1906, Pub. L. 109-59, as Amended)

[The Governor’s Representative for Highway Safety must sign these Certifications and Assurances each fiscal year. Requirements that also apply to subrecipients are noted under the applicable caption, and must be included in agreements with subrecipients.]

State: South Carolina  Fiscal Year: 2019

By applying for Federal grants under 23 U.S.C. Chapter 4 or Section 1906, the State Highway Safety Office, through the Governor’s Representative for Highway Safety, agrees to the following conditions and requirements.

GENERAL CERTIFICATIONS AND ASSURANCES

In my capacity as the Governor’s Representative for Highway Safety, I hereby affirm that—

• I have reviewed the information in support of the State’s application for 23 U.S.C. Chapter 4 and Section 1906 grants, and based on my review, the information is accurate and complete to the best of my personal knowledge.

• In addition to the certifications and assurances contained in this document, I am aware and I acknowledge that each statement in the State’s application bearing the designation “CERTIFICATION” or “ASSURANCE” constitutes a legal and binding Certification or Assurance that I am making in connection with this application.

• As a condition of each grant awarded, the State will use the grant funds in accordance with the specific statutory and regulatory requirements of that grant, and will comply with all applicable laws, regulations, and financial and programmatic requirements for Federal grants, including but not limited to—
  o 23 CFR part 1300 – Uniform Procedures for State Highway Safety Grant Programs
  o 2 CFR part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards
  o 2 CFR part 1201 – Department of Transportation, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards

• I understand and accept that incorrect, incomplete, or untimely information submitted in support of the State’s application may result in the denial of a grant award. If NHTSA seeks clarification of the State’s application, I authorize the State Highway Safety Office to provide additional information in support of the State’s application for a 23 USC Chapter 4 and Section 1906 grant.
SECTION 402 CERTIFICATIONS AND ASSURANCES

In my capacity as the Governor’s Representative for Highway Safety, I hereby affirm that—

- The Governor is the responsible official for the administration of the State highway safety program, by appointing a Governor’s Representative for Highway Safety who shall be responsible for a State highway safety agency that has adequate powers and is suitably equipped and organized (as evidenced by appropriate oversight procedures governing such areas as procurement, financial administration, and the use, management, and disposition of equipment) to carry out the program. (23 U.S.C. 402(b)(1)(A))

- The political subdivisions of this State are authorized, as part of the State highway safety program, to carry out within their jurisdictions local highway safety programs which have been approved by the Governor and are in accordance with the uniform guidelines promulgated by the Secretary of Transportation. (23 U.S.C. 402(b)(1)(B))

- At least 40 percent of all Federal funds apportioned to this State under 23 U.S.C. 402 for this fiscal year will be expended by or for the benefit of political subdivisions of the State in carrying out local highway safety programs (23 U.S.C. 402(b)(1)(C)) or 95 percent by and for the benefit of Indian tribes (23 U.S.C. 402(h)(2)), unless this requirement is waived in writing. (This provision is not applicable to the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.)

- The State's highway safety program provides adequate and reasonable access for the safe and convenient movement of physically handicapped persons, including those in wheelchairs, across curbs constructed or replaced on or after July 1, 1976, at all pedestrian crosswalks. (23 U.S.C. 402(b)(1)(D))

- The State will provide for an evidenced-based traffic safety enforcement program to prevent traffic violations, crashes, and crash fatalities and injuries in areas most at risk for such incidents. (23 U.S.C. 402(b)(1)(E))

- The State will implement activities in support of national highway safety goals to reduce motor vehicle related fatalities that also reflect the primary data-related crash factors within the State, as identified by the State highway safety planning process, including:
  - Participation in the National high-visibility law enforcement mobilizations as identified annually in the NHTSA Communications Calendar, including not less than 3 mobilization campaigns in each fiscal year to—
    - Reduce alcohol-impaired or drug-impaired operation of motor vehicles; and
    - Increase use of seat belts by occupants of motor vehicles;
  - Sustained enforcement of statutes addressing impaired driving, occupant protection, and driving in excess of posted speed limits;
  - An annual Statewide seat belt use survey in accordance with 23 CFR part 1340 for the measurement of State seat belt use rates, except for the Secretary of Interior on behalf of Indian tribes;
Development of Statewide data systems to provide timely and effective data analysis to support allocation of highway safety resources;

Coordination of Highway Safety Plan, data collection, and information systems with the State strategic highway safety plan, as defined in 23 U.S.C. 148(a). (23 U.S.C. 402(b)(1)(F))

The State will actively encourage all relevant law enforcement agencies in the State to follow the guidelines established for vehicular pursuits issued by the International Association of Chiefs of Police that are currently in effect. (23 U.S.C. 402(j))

The State will not expend Section 402 funds to carry out a program to purchase, operate, or maintain an automated traffic enforcement system. (23 U.S.C. 402(c)(4))

In my capacity as Governor's Representative for Highway Safety, I—

[CHECK ONLY ONE]

☑ certify that automated traffic enforcement systems are not used on any public road in the State;

OR

☐ am unable to certify that automated traffic enforcement systems are not used on any public road in the State, and therefore the State will conduct a survey meeting the requirements of 23 U.S.C. 402(c)(4)(C) AND will submit the survey results to the NHTSA Regional Office no later than March 1 of the fiscal year of the grant.

OTHER REQUIRED CERTIFICATIONS AND ASSURANCES

In my capacity as the Governor's Representative for Highway Safety, I hereby provide the following additional certifications and assurances:

Intergovernmental Review of Federal Programs

The State has submitted appropriate documentation for review to the single point of contact designated by the Governor to review Federal programs, as required by Executive Order 12372 (Intergovernmental Review of Federal Programs).

Federal Funding Accountability and Transparency Act (FFATA)

The State will comply with FFATA guidance, OMB Guidance on FFATA Subward and Executive Compensation Reporting, August 27, 2010, (https://www.fsrs.gov/documents/OMB_Guidance_on_FFATA_Subaward_and_Executive_Compen...). by reporting to FSRS.gov for each sub-grant awarded:

• Name of the entity receiving the award;

• Amount of the award;
• Information on the award including transaction type, funding agency, the North American Industry Classification System code or Catalog of Federal Domestic Assistance number (where applicable), program source;

• Location of the entity receiving the award and the primary location of performance under the award, including the city, State, congressional district, and country; and an award title descriptive of the purpose of each funding action;

• A unique identifier (DUNS);

• The names and total compensation of the five most highly compensated officers of the entity if:

(i) the entity in the preceding fiscal year received—
   (I) 80 percent or more of its annual gross revenues in Federal awards;
   (II) $25,000,000 or more in annual gross revenues from Federal awards; and

(ii) the public does not have access to information about the compensation of the senior executives of the entity through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986;

• Other relevant information specified by OMB guidance.

Nondiscrimination
(appplies to subrecipients as well as States)

The State highway safety agency will comply with all Federal statutes and implementing regulations relating to nondiscrimination ("Federal Nondiscrimination Authorities"). These include but are not limited to:

• **Title VI of the Civil Rights Act of 1964** (42 U.S.C. 2000d *et seq.*, 78 stat. 252), (prohibits discrimination on the basis of race, color, national origin) and 49 CFR part 21;

• **The Uniform Relocation Assistance and Real Property Acquisition Policies** Act of 1970, (42 U.S.C. 4601), (prohibits unfair treatment of persons displaced or whose property has been acquired because of Federal or Federal-aid programs and projects);

• **Section 504 of the Rehabilitation Act of 1973**, (29 U.S.C. 794 *et seq.*), as amended, (prohibits discrimination on the basis of disability) and 49 CFR part 27;

• **The Age Discrimination Act of 1975**, as amended, (42 U.S.C. 6101 *et seq.*), (prohibits discrimination on the basis of age);
• **The Civil Rights Restoration Act of 1987**, (Pub. L. 100-209), (broadens scope, coverage and applicability of Title VI of the Civil Rights Act of 1964, The Age Discrimination Act of 1975 and Section 504 of the Rehabilitation Act of 1973, by expanding the definition of the terms "programs or activities" to include all of the programs or activities of the Federal aid recipients, subrecipients and contractors, whether such programs or activities are Federally-funded or not);

• **Titles II and III of the Americans with Disabilities Act** (42 U.S.C. 12131-12189) (prohibits discrimination on the basis of disability in the operation of public entities, public and private transportation systems, places of public accommodation, and certain testing) and 49 CFR parts 37 and 38;

• **Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations** (prevents discrimination against minority populations by discouraging programs, policies, and activities with disproportionately high and adverse human health or environmental effects on minority and low-income populations); and

• **Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency** (guards against Title VI national origin discrimination/discrimination because of limited English proficiency (LEP) by ensuring that funding recipients take reasonable steps to ensure that LEP persons have meaningful access to programs (70 FR 74087-74100).

The State highway safety agency—

• Will take all measures necessary to ensure that no person in the United States shall, on the grounds of race, color, national origin, disability, sex, age, limited English proficiency, or membership in any other class protected by Federal Nondiscrimination Authorities, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any of its programs or activities, so long as any portion of the program is Federally-assisted;

• Will administer the program in a manner that reasonably ensures that any of its subrecipients, contractors, subcontractors, and consultants receiving Federal financial assistance under this program will comply with all requirements of the Non-Discrimination Authorities identified in this Assurance;

• Agrees to comply (and require its subrecipients, contractors, subcontractors, and consultants to comply) with all applicable provisions of law or regulation governing US DOT’s or NHTSA’s access to records, accounts, documents, information, facilities, and staff, and to cooperate and comply with any program or compliance reviews, and/or complaint investigations conducted by US DOT or NHTSA under any Federal Nondiscrimination Authority;

• Acknowledges that the United States has a right to seek judicial enforcement with regard to any matter arising under these Non-Discrimination Authorities and this Assurance;
• Agrees to insert in all contracts and funding agreements with other State or private entities the following clause:

"During the performance of this contract/funding agreement, the contractor/funding recipient agrees—

a. To comply with all Federal nondiscrimination laws and regulations, as may be amended from time to time;

b. Not to participate directly or indirectly in the discrimination prohibited by any Federal non-discrimination law or regulation, as set forth in appendix B of 49 CFR part 21 and herein;

c. To permit access to its books, records, accounts, other sources of information, and its facilities as required by the State highway safety office, US DOT or NHTSA;

d. That, in event a contractor/funding recipient fails to comply with any nondiscrimination provisions in this contract/funding agreement, the State highway safety agency will have the right to impose such contract/agreement sanctions as it or NHTSA determine are appropriate, including but not limited to withholding payments to the contractor/funding recipient under the contract/agreement until the contractor/funding recipient complies; and/or cancelling, terminating, or suspending a contract or funding agreement, in whole or in part; and

e. To insert this clause, including paragraphs (a) through (e), in every subcontract and subagreement and in every solicitation for a subcontract or sub-agreement, that receives Federal funds under this program.

The State will provide a drug-free workplace by:

a. Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

b. Establishing a drug-free awareness program to inform employees about:

1. The dangers of drug abuse in the workplace;

2. The grantee's policy of maintaining a drug-free workplace;

3. Any available drug counseling, rehabilitation, and employee assistance programs;

4. The penalties that may be imposed upon employees for drug violations occurring in the workplace;
5. Making it a requirement that each employee engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

c. Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will –

1. Abide by the terms of the statement;

2. Notify the employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five days after such conviction;

d. Notifying the agency within ten days after receiving notice under subparagraph (c)(2) from an employee or otherwise receiving actual notice of such conviction;

e. Taking one of the following actions, within 30 days of receiving notice under subparagraph (c)(2), with respect to any employee who is so convicted –

1. Taking appropriate personnel action against such an employee, up to and including termination;

2. Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

f. Making a good faith effort to continue to maintain a drug-free workplace through implementation of all of the paragraphs above.

**Political Activity (Hatch Act)**
*(applies to subrecipients as well as States)*

The State will comply with provisions of the Hatch Act (5 U.S.C. 1501-1508), which limits the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

**Certification Regarding Federal Lobbying**
*(applies to subrecipients as well as States)*

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement;
2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;

3. The undersigned shall require that the language of this certification be included in the award documents for all sub-award at all tiers (including subcontracts, subgrants, and contracts under grant, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly. This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Restriction on State Lobbying
(applies to subrecipients as well as States)

None of the funds under this program will be used for any activity specifically designed to urge or influence a State or local legislator to favor or oppose the adoption of any specific legislative proposal pending before any State or local legislative body. Such activities include both direct and indirect (e.g., "grassroots") lobbying activities, with one exception. This does not preclude a State official whose salary is supported with NHTSA funds from engaging in direct communications with State or local legislative officials, in accordance with customary State practice, even if such communications urge legislative officials to favor or oppose the adoption of a specific pending legislative proposal.

Certification Regarding Debarment and Suspension
(applies to subrecipients as well as States)

Instructions for Primary Tier Participant Certification (States)

1. By signing and submitting this proposal, the prospective primary tier participant is providing the certification set out below and agrees to comply with the requirements of 2 CFR parts 180 and 1200.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. The prospective primary tier participant shall submit an explanation of why it cannot provide the certification set out below. The certification or explanation will be considered in connection with the department or agency's determination whether to enter into this transaction. However, failure of the prospective primary tier participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when the department or agency determined to enter into this transaction. If it is later determined that the prospective primary tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency may terminate this transaction for cause or default or may pursue suspension or debarment.

4. The prospective primary tier participant shall provide immediate written notice to the department or agency to which this proposal is submitted if at any time the prospective primary tier participant learns its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

5. The terms covered transaction, civil judgment, debarment, suspension, ineligible, participant, person, principal, and voluntarily excluded, as used in this clause, are defined in 2 CFR parts 180 and 1200. You may contact the department or agency to which this proposal is being submitted for assistance in obtaining a copy of those regulations.

6. The prospective primary tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency entering into this transaction.

7. The prospective primary tier participant further agrees by submitting this proposal that it will include the clause titled “Instructions for Lower Tier Participant Certification” including the “Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transaction,” provided by the department or agency entering into this covered transaction, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions and will require lower tier participants to comply with 2 CFR parts 180 and 1200.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant is responsible for ensuring that its principals are not suspended, debarred, or otherwise ineligible to participate in covered transactions. To verify the eligibility of its principals, as well as the eligibility of any prospective lower tier participants, each participant may, but is not required to, check the System for Award Management Exclusions website (https://www.sam.gov/).

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, the department or agency may terminate the transaction for cause or default.
Certification Regarding Debarment, Suspension, and Other Responsibility Matters-Primary Tier Covered Transactions

(1) The prospective primary tier participant certifies to the best of its knowledge and belief, that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participating in covered transactions by any Federal department or agency;

(b) Have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or Local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State, or local) terminated for cause or default.

(2) Where the prospective primary tier participant is unable to certify to any of the Statements in this certification, such prospective participant shall attach an explanation to this proposal.

Instructions for Lower Tier Participant Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below and agrees to comply with the requirements of 2 CFR parts 180 and 1200.

2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension or debarment.

3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

4. The terms covered transaction, civil judgment, debarment, suspension, ineligible, participant, person, principal, and voluntarily excluded, as used in this clause, are defined in 2 CFR parts 180 and 1200. You may contact the person to whom this proposal is submitted for assistance in obtaining a copy of those regulations.
5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled “Instructions for Lower Tier Participant Certification” including the "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion – Lower Tier Covered Transaction,” without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions and will require lower tier participants to comply with 2 CFR parts 180 and 1200.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant is responsible for ensuring that its principals are not suspended, debarred, or otherwise ineligible to participate in covered transactions. To verify the eligibility of its principals, as well as the eligibility of any prospective lower tier participants, each participant may, but is not required to, check the System for Award Management Exclusions website (https://www.sam.gov/).

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension or debarment.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion -- Lower Tier Covered Transactions:

1. The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participating in covered transactions by any Federal department or agency.

2. Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.
**Buy America Act**  
*(applies to subrecipients as well as States)*

The State and each subrecipient will comply with the Buy America requirement (23 U.S.C. 313) when purchasing items using Federal funds. Buy America requires a State, or subrecipient, to purchase with Federal funds only steel, iron and manufactured products produced in the United States, unless the Secretary of Transportation determines that such domestically produced items would be inconsistent with the public interest, that such materials are not reasonably available and of a satisfactory quality, or that inclusion of domestic materials will increase the cost of the overall project contract by more than 25 percent. In order to use Federal funds to purchase foreign produced items, the State must submit a waiver request that provides an adequate basis and justification for approval by the Secretary of Transportation.

**Prohibition on Using Grant Funds to Check for Helmet Usage**  
*(applies to subrecipients as well as States)*

The State and each subrecipient will not use 23 U.S.C. Chapter 4 grant funds for programs to check helmet usage or to create checkpoints that specifically target motorcyclists.

**Policy on Seat Belt Use**

In accordance with Executive Order 13043, Increasing Seat Belt Use in the United States, dated April 16, 1997, the Grantee is encouraged to adopt and enforce on-the-job seat belt use policies and programs for its employees when operating company-owned, rented, or personally-owned vehicles. The National Highway Traffic Safety Administration (NHTSA) is responsible for providing leadership and guidance in support of this Presidential initiative. For information and resources on traffic safety programs and policies for employers, please contact the Network of Employers for Traffic Safety (NETS), a public-private partnership dedicated to improving the traffic safety practices of employers and employees. You can download information on seat belt programs, costs of motor vehicle crashes to employers, and other traffic safety initiatives at [www.trafficsafety.org](http://www.trafficsafety.org). The NHTSA website ([www.nhtsa.gov](http://www.nhtsa.gov)) also provides information on statistics, campaigns, and program evaluations and references.

**Policy on Banning Text Messaging While Driving**

In accordance with Executive Order 13513, Federal Leadership On Reducing Text Messaging While Driving, and DOT Order 3902.10, Text Messaging While Driving, States are encouraged to adopt and enforce workplace safety policies to decrease crashes caused by distracted driving, including policies to ban text messaging while driving company-owned or rented vehicles, Government-owned, leased or rented vehicles, or privately-owned vehicles when on official Government business or when performing any work on or behalf of the Government. States are also encouraged to conduct workplace safety initiatives in a manner commensurate with the size of the business, such as establishment of new rules and programs or re-evaluation of existing programs to prohibit text messaging while driving, and education, awareness, and other outreach to employees about the safety risks associated with texting while driving.
I understand that the information provided in support of the State's application for Federal grant funds and these Certifications and Assurances constitute information upon which the Federal Government will rely in determining qualification for grant funds, and that knowing misstatements may be subject to civil or criminal penalties under 18 U.S.C. 1001. I sign these Certifications and Assurances based on personal knowledge, and after appropriate inquiry.
